

CITY NEWS IN BRIEF

COMMISSIONER SECTION BUREAU.—The commission men's section of front street is busier than ever. There are more commission men on the street than at any time in the history of Portland, and the amount of produce they are handling is enormous. All appear to be doing "fairly well," and they wonder where all the stuff they handle goes to. Oregon peaches are coming in rather freely, but not in large quantities. California is crowding in watermelons by the carload, as Oregon melons will soon take the market, and Eastern Oregon is putting in cantaloupes, tomatoes, etc.

COLONEL HAWKINS' RECENT ACQUISITIONS.—L. L. Hawkins has just received a copy of Storer's ornithology. It is somewhat of an old work, but a very valuable one, giving descriptions of some 700 species of the birds of North America, and is illustrated with 119 large colored lithographic plates, each showing several birds in their natural plumage. It will be very useful to Mr. Hawkins in enabling him to correctly name and give the characteristics of any of the birds of this continent which he may secure for the Free City Museum. He has also received a copy of Professor Henry Gannett's dictionary of altitudes, giving the height above sea level of the principal cities of the United States. Some friends have also forwarded to the museum a piece of rock filled with fossil snails. The inside of the shells are filled with minute quartz crystals.

WILL BE CLEARED OF OBSTRUCTIONS.—Belmont street, from East Water to Union avenue, has been ordered by the Common Council to be cleared of a lot of agricultural machines placed on it by a neighboring dealer. It would seem that the Council has been misled by the matter, as the City Engineer has just been ordered to close this section of the street to team travel on account of the worn-out and dangerous condition of the planking. East Morrison street was in bad order for a long time, during which all the traffic of the Morrison-Street Bridge used Belmont street from Union avenue to East Water street, and the planking has been so badly worn about a year as to be hardly fit for travel. Now it is closed and will probably soon be repaired.

POTATO PRICES STILL UP.—The potato market was still on a spree yesterday, and it is to be expected that prices will be level again. Dealers in Alaska are compelled to lay in their winter supply of potatoes within the next month or so, as after that potatoes cannot be transported through the Arctic regions with safety. There is not much demand from Alaska now for dedicated potatoes or onions, these vegetables being preferred in their natural state. They have to be stored where they can be maintained to keep them from freezing in the cold weather.

CHARMS ALL EVIL AWAY.—Specimens of a souvenir issued by the Pan-American Exposition have been received here. They are in the form of a medal or token of aluminum, bearing on the obverse a roaring, rampaging buffalo bull. On the reverse is the following: "This charm, if carried in the pocket, prevents bad heads, hard work, love, wars on the nose, measles, face, war, crabs, swelled head, insanity, unhappy marriages, dark-brown taste, delirium tremens and punctured tires. Every man who carries a buckeye or a potato in his pocket to prevent rheumatism should at once provide himself with one of these charms, and thus be protected from about all the ills which beset him."

SAID HE WAS CATCHING FISH.—Steve Pollock was in the Municipal Court yesterday for stealing carpenter's tools valued at \$10 from Hugh J. Smith, Jr., a second-hand dealer in the White-chapel district, testified that Pollock said the tools to him for \$10 on the evening of the 18th. Pollock asked for \$10. Pollock denied stealing the tools from Smith and selling them to Sellitt, and testified that he was in Oregon City on the afternoon and evening of the 18th. "I remember taking in Oregon City Sunday with a man named Perkins," continued Pollock, "catching suckers, no doubt," suggested Deputy District Attorney Spencer. The case was continued.

TO SEASIDE AND RETURN FOR \$250.—Large crowds are taking advantage of cheap round-trip excursion rates of the A. & C. R. R. from Portland to Clatsop Beach. Tickets on sale every Saturday, good to return on Sunday, at \$2.50 for round trip. The Portland-Seaside Express leaves Union Depot every Saturday at 2:30 P. M., and runs through direct, without change of cars, arriving at Astoria at 5:30 P. M., Gearhart 6:30 P. M., and Seaside 6:30 P. M., making direct connection at Warrenton for Flavel, also connecting at Astoria with steamer T. J. Potter for all North Beach points.

CHICKENS SCARCER AND HIGH.—Poultry-fanciers, farmers and others interested in raising poultry will do well to double or quadruple their facilities. Chickens are in great demand here and they command fancy prices. Dealers say they cannot get enough, and that they have to divide what they get among customers, many of whom would be willing to pay large lots. In fact, dealers say that there is a market for five times as many chickens as are obtainable, and at high prices. It puzzles the dealers to know who can afford to pay the prices asked and consume so many chickens.

STREETS ARE NOT MANGERS.—Otto Rudey and J. W. Jamieson failed to answer in the Municipal Court yesterday to a charge of feeding their horses on the street, and the money they had deposited, \$1 in all, was forfeited. The police say the practice of feeding horses on the streets must stop, as it is necessary that pavements be kept clean. It is understood that the authorities have been stirred to action by proprietors of livery stables who have been complaining lately of lack of patronage from outside-cities.

DONATION FOR THE FEELER BATH.—Mrs. A. Henriot, of 34 East Seventh street, called yesterday at Edward Holman's office and left a beautiful hand-knitted bedspread, to be disposed of for the benefit of the free swimming bath for boys and girls. Mrs. Henriot said she was three months making the spread and hoped it would add a substantial sum for so worthy and necessary a project. The bedspread has been raffled off at 25 cents a ticket.

INVITED TO VISIT ASTORIA.—Mayor Isaac Bergman, of Astoria, has invited Mayor Rowe and all other municipal officers of Portland to visit Astoria during the regatta. It is probable that as many of them as can be spared will go down to the city by the sea to take part in the festivities of the occasion.

SEASIDE STATION'S FARMER ILL.—David Simon, father of United States Senator Joseph Simon, is seriously ill at his home, 689 Everett street. He has been confined to his room for one week and his condition is such as to cause fears for his recovery.

FILED A PETITION IN BANKRUPTCY.—Shropshire Bros., of Hilgard, Union County, yesterday filed a petition in bankruptcy in the United States Court. Their liabilities amount to \$12,855.04; assets, \$200.16.

REN CROSS PRICED.—At Magone's Park, Saturday, take the Oregon City boat, leaving Taylor street 5:30, 11:30 and 5 P. M. Round trip 25c.

DR. G. M. WELLS has returned from the East. Regular office hours, Albion building; residence, 21 Thirtieth st.

DR. CHARLES E. HILL has moved his office to room 304, the Marquam.

DR. JOSEPH has returned.

NEWS OF THE EAST SIDE

SUNNYSIDE WILL ASK FOR ADDITIONAL FIRE PROTECTION.—A Permanent Engine and Company Are Wanted—Blaze in a Fuel House—Other Notes.

Sunnyside is agitating the question of additional fire protection, and will soon ask for a permanent fire engine and company. At present the only fire protection is that afforded by a hose wagon and one permanent man. This is said to be sufficient if the pressure on the mains in that district was strong enough to throw a good stream; but it is very light. Fire hydrants, also, are scattered. A property-owner, who has been looking into the matter, said yesterday that the expense of installing an engine would not be over \$4500. "The city," he says, "has one or more extra engines out of the city, and one could be stationed at Sunnyside without robbing any other section. The district is growing and filling up rapidly with handsome dwellings, which should have reasonable protection against fire. The present company, outside of the driver and foreman, is composed of volunteers, who usually respond, if they can, to the alarm, but the main protection comes from engine No. 7. Whenever there is a fire of any importance at Sunnyside this engine must respond, and be dragged up hill for a mile and a half before it reaches the fire. In engine No. 7, if it can be had, would give excellent protection to a wide district. It could reach East Sixteenth street, between Hawthorne avenue and East Burnside street, sooner than engine No. 7. It would have a down-hill run in nearly every direction."

Better Street Facilities Wanted.—Better street facilities than those afforded by East Eleventh and Milwaukee streets are desired in the southern district. All the travel from Sellwood, Willamette and Clackamas County comes into Portland on Milwaukee street, which is now occupied by single and double tracks nearly all the way from Sellwood to Hawthorne avenue. It is proposed to open and extend Holgate street west to a connection with East Eleventh. If this can be done it will provide two more streets for the South End, East Ninth and East Eighth, which are open through Brooklyn to Hawthorne avenue and beyond. East Eighth is improved, but East Ninth is not. What is wanted is a connecting cross street to these two streets, and eventually East Ninth will be improved. East Ninth and East Eighth streets cannot be extended farther south than Holgate. On the east side of Milwaukee no street is open south of Bismarck, and the only way to extend streets south is by condemning property. This may be done when all the property has been platted.

Fire in Fuel House.—Fire started at 5:45 last evening in the top of the fuel house of the City & Suburban Railway Company's power plant at Inman, Poulsen & Co.'s saw mill, but was extinguished by a quick response. An alarm was sounded, but water was turned on the house from a fire hydrant before the fire companies arrived. No damage was done. The fire was caused by a spark from the smokestack of the power plant dropping into the dust chute and being carried into the building.

Pleasant Home Notes.—Telephone poles are being distributed along the road to Sandy, and will soon be planted. The wires will follow and in a few weeks telephone connection will be had with Sandy. The line will cover a wide district, and connections will be made with many of the saw mills.

East Side Notes.—C. R. Merrill, of Albina, underwent an operation at the Good Samaritan Hospital for appendicitis. He is recovering.

Repairs are being made to engine company No. 28 boulevard Upper Albina. A hose tower 50 feet high will be built.

Mrs. C. R. Deburgh has gone to Tacoma on a visit to friends, and will be absent a month. Her daughters are visiting in Seattle.

Wise Bros., dentists, both phones. The Falling.

DROWNED WHILE ROWING SLEPT.—Body of James Hanna, a Scow-dweller, Found in the River.

The body of James Hanna, a scow-dweller, who lived near Greenwood dock, was found in the river yesterday morning north of the east approach of the steel bridge. It was badly decomposed. At the Coroner's inquest, William A. Gille testified that he knew Hanna for 18 years, and that Hanna was born on the farm of Man about 48 years ago. Hanna was a drinking man at times. He worked as a longshoreman. When the body was found a bottle partly filled with whisky was one of the pockets. Witnesses understood that Hanna and three other men went on a picnic up the river last Saturday, and that on their return Hanna and Charles Amos were alone in the boat. Amos was

THE PRETTY MUSICAL COMEDY.—"The Toy Maker" will be one of the operas presented. This piece scored an immense triumph in London and duplicated the success at the Tivoli Theater, San Francisco. The individual criticism was glowing, and the press notices were the finest ever written by the local critics. The same scenery, costumes, and accessories are carried by the company and the large chorus of selected beauties, and the principals in the original production will appear among whom are Ferris Hartman, as the inventor of the mechanical doll, who never ceases to keep his audience in roars of laughter, Annie Meyers, as his daughter Elsa, is also seen at her best. The rest of the company includes Arthur Cunningham, Harry Cashman, Edward Webb, Joseph Fogarty, Arthur Boyce, Tom Gules, Fred Kavanaugh, Bernice Holmes, Almeda Leconte, Maude Pringle, Mel Hardard and the large Tivoli chorus. "The Wedding Day" will also be given.

Sale of Seats for Uncle Tom's Cabin.—The sale of seats for Sutton's New York Tom's Cabin Company will open this morning at 10 o'clock. The company will appear at the Marquam Grand Theater for one night only, Monday, August 26. Speaking of the company the "Butte Miner" says: "The Grand Opera House was packed last night with an audience that was bent upon being amused, and from the applause it was evident that Sutton's Tom's Cabin fully came up to expectation of the pleasure-seekers. Their clever specialties between acts are built along lines to make people laugh and it appears eminently to fill the bill. Popular prices will prevail."

WHERE TO DINE TODAY.—We aim to give you full value received, satisfaction, courteous treatment. Portland restaurant, 305 Wash, near 5th.

Bishop Scott Academy.—Opens on Sept. 12. The plant is renovated throughout, lighted by electricity and thoroughly equipped.

CITY NEWS IN BRIEF

COMMISSIONER SECTION BUREAU.—The commission men's section of front street is busier than ever. There are more commission men on the street than at any time in the history of Portland, and the amount of produce they are handling is enormous. WALTER REED, The Optician, 133 Sixth Street, Oregonian Building.

You'd be surprised to know the number of people who are adding organs to their music room. This tendency may be attributed to the modern novel somewhat—we're returning to historical literature and sweeter music.

The Kimball Organ has a sweet, sympathetic tone and a wonderful volume of melody. You can make it ring out with cathedral-like melody or sink to a tremulous chord like a violin.

\$10 cash and \$5 a month is all it costs to own the Kimball, and every instrument is guaranteed for five years. Drop in and listen to some music.
