Protect the Weak.

The fame of the Copeland medical system is based on the two-fold service it has rendered to society.

Ends the Nonsense of Life-Long Doctoring.

It has ended the nonsense of the life-long doctoring for diseases that promptly yield to correct diagnosis, followed by correct treatment.

Second, the Copeland system has given relief to the angry suspicion of medical economy. By limiting the expense outlay of patients to \$5 a month, medicines included, until cured (and no patient is ever permitted to pay more than \$100, the public eye of the devilish inquiry and crime of bleeding the unfortunate sick with preposterous fees.

And while exposing the boodler in medicine, to the angry suspicion of the world, it saves the invalid from becoming a prey, because, if there is no statute law preventing a dishonest doctor from charging a dishonest fee, neither is there law to the contrary, with the Copeland system before him, to become a dupe and pay the fee. He don't have to.

First, in the evolution of more enlightened methods of disease treatment, it has added chronic catarrh, deafness, asthma, bronchitis, kidney trouble and incipient consumption to the less vital list of curable infirmities, while in medical aliments it has perceptibly reduced the period of professional requisite to their cure.

THEIR USE INvariably Dangerous and Against Common Sense.

When any person uses a patent cure-all as a means of self-doctoring, for any particular disease, catarrh, lung trouble, for instance, he assumes the risk of firing at random through his whole body to take the chances of hitting the disease spot. He is

Taking Medicine Blindfolded.

He is taking medicine from an imaginary doctor who never saw him nor ever heard of him. He is driving at his heart when the disease is in his bowels, or driving at his lungs when the disease is in his liver. Whether he commits suicide or not, he commits a blunder, and a folly, and goes against common sense at his own risk and his own expense.

It has been claimed that

Of expert medical services that has encouraged the sale of these patent cure-alls. Under the nominal assessment system in force at the Copeland Institute, however, the invalids are fully protected against the evils. With expert individual treatment in each individual case, at a fee rate limited to \$5 a month, all medicines included, there is no longer either temptation or necessity to tamper with secret cure-alls!
