Challenge Series With Tacoma.

Manager Jack Grim, of the Portland team, said last evening that a series of match games for the best two of three had been arranged with Tacoma after the close of the regular season. Manager Mc-Closkey has been anxious to get a chance to play off such a match series, contend-ing that he had the better team, but had suffered from hard luck in the early part of the season. The Portland nine to a man is in favor of the series, and Manager Grim announced that his team was willing to play for a \$200 side bet in addi-tion. The games will be played one on Saturday and the other two on Sunday and the proceeds will go as a benefit to the players.

It is a common proverb, often repeated here, that "God has done much for Ore-gon, but man has done mighty little." However, in this matter Providence did come to Portland's assistance when her own citizens declined to do anything; for

within the last eight months three permanent coal discoveries of three different kinds of coals have been made-a lignite of six to seven feet thickness in Columbia County, 36 miles from Portland, a semi-bituminous coal four feet eight inches thick of extra good quality at Nehalem Bay, and, best of all, a first-class coking coal, varying in thickness from three to seven feet on the surveyed line of the Portland, Nehlem & Tillamook Rallway,

We believe it can; or rather that Eastern capitalists, having more confidence than Portland capitaliste possess in the benefits which Portland will derive from a coking bituminous coal, have offered to give guarantees in writing to supply sufficient capital to secure conseen here. They rushed at each other with right and left swings, upper cuts, straight rights and lefts, and each made struction of the railway to these beds subject to one condition, namely, that in exchange for that railway a similar guaranty from citizens of Portland is essential saving that when a railroad from

Portland reaches these mines next year the citizens, or some responsible company will guarantee to own and operate these coal mines, so as to be able to deliver to the railway company for transit to Portland coal sufficient to displace the coals now arriving by rall daily from Puget Sound. No Men in Town.

Philadelphia Record. During the Summer and Autumn many of the villages and towns around the Essex coast are entirely without ablebodied men, save, of course, for the presence of such indispensable personages as the clergyman, doctor and one or two-shopkeepers.

Althought Tollesbury boasts a population of considerably over a thousand inhabi-tants, the nearest railway stations, Kelvedon and Maldon, are nearly ten miles away, and from May until toward the end of September it is simply a village of women and children. This is owing to

the fact that all the men, and most of the boys over 16 years of age, earn their living as yacht hands, and when the Summer commences they start every year for a cruise of several months' duration, rarely seeing their homes again till late in the Autumn. By the end of this month the m
