COURT CLERK TELLS OF JUDGE AT CAPE NOME.

George V. Borchsenius Thinks No Attempt Will Ever Be Made Again to Defraud Miners.

George V. Borchsenius, who was appointed Clerk of the United States Court at Nome, by the now notorious Judge Noyes, and whom the latter subsequently removed, was in Portland yesterday. en route from Nome to San Francisco, to testify in the United States Court of Appeals, where Judge Noyes is to answer to a charge of contempt of court. The case is set for October 7.

Mr. Borchsenius says he was removed from his position by Judge Noyes for not "standing in" on the various deals by which miners were alleged to have been judicially swindled out of their

He considers the swindling of the miners the result of a conspiracy on the part of Judge Noyes, Alexander McKenzie, who was receiver for a number of mining claims, and Judge Debose, at-torney for a number of plaintiffs in mining legislation. McKenzie was sentenced to the Alameda County (Cal.) jail for contempt of court in not returning to the United States Marshal between \$200.600 and \$300.000 in gold dust that had been placed in his hands. He was pardoned by President McKinley on condition that

ne should do so. Mr. Borchsenius thinks Noyes was weak tool in the hands of McKenzle, and that he did not make anything out of the various transactions. Neither Noves nor McKenzie, however, is likely to re-turn to Nome, as the feeling there is so strong against them as to endanger their lives. Mr. Borchsenius says their pres-ence at Nome did more to retard the development of the gold fields than any other cause, as it discouraged the efforts of prospectors, who felt that to make any valuable discovery was to draw the fire There were 62 in actual attendance, and 13 of the conspirators, who made no bones more students have registered and will of the conspirators, who made no bones of claiming the placer mines of the region under a trumped-up prior discovery. Mc-Kenzie would be appointed receiver and Noyes would back him up, thus stopping 9:30 o'clock. development work on many promising

"But this phase of mining is all over ow," Mr. Borchsenius said, "and prospectors will not be interrupted in the future. I think the district is destined to become a permanent gold producer, as prospectors have not gotten down below the frozen surface in many places yet.

This frozen cover on the body of the country ranges in thickness from 14 to 20 feet, and mining can be pursued all Winter, when once the pick and shovel get sistant demonstrator of anatomy. below this depth. Rich beds of gravel were dug out last Winter and dumped vice Dr. F. Cauthorn, resigned. where they were frozen solid-fuly. Then a short period of thawing set in, and the sluice boxes were | Hon, W. D. Fenton, lecturer on medic worked for all they were worth, but in jurisprudence, vice the late L. B. Cox.

August the face of the country froze up again and so the miners had only about six weeks of the entire year to do their gravel washing. When we get a season of average length we can operate sluices for four months and make placer mining

between 10,000 and 12,000, but a large proportion of the inhabitants are transient and not more than 3000 will spend the Winter there, and this should be reduced to about 1000, as there is a large class of persons there who did not go up to work, but rather to prey on those who did work. These people have lived from hand to mouth and have little or nothing to live on during the long dreary Arctic night. They had hopes of being taken away in transports, but they do not deserve to be, as they went North of their own accord and then made no honorable effort to better their condition." Mr. Borchsenius does not believe in

the Government sending transports after such people. Among the enterprises that are making money at Nome he mentions the Wild Goose Mining Company, represented by Lane & Ullman, of San Francisco. These men have spent about \$3,000,000 in developing mining on Anvil Creek, and have a seven-mile railroad in operation, be-tween the town and their diggings. They are also preparing to lay a line of pipes eight miles long, from Snake River to the "Mattle" bench claim, on Dexter Creek, where the gravel proved to be of

ensime is value. The ponderous machin-ery has been arriving on the ground the past Summer, and will probably be in operation next year.

Mr. Borchsenius left last evening for San Francisco, and hopes to return to Nome with his family from Baraboo, Wis., when navigation opens, early next

JUDGE FRAZER SO HOLDS IN OVER-RULING A DEMURRER.

Question Came Up in Mandamus Suit of H. Volp Against State Board of Medical Examiners.

"The Legislature simply gave the Board of Medical Examiners of the State of Ore. gon power to determine if a man is quali-fied to practice medicine or not; if qualifled, to grant him a license, if not, to re fuse the license. The board has no right to require a man to take an examination every year, nor more than once; if once granted a license, he can continue to practice, and the board must revoke a license according to law for certain enu-merated offenses. It was a fair construc-tion of the law that after a man had passed an examination entitling him to practice medicine, and had obtained a li-cense, the board can go no further; its

discretion there ends.' This decision was rendered yesterday by Judge Frazer in the case of H. Volp against W. H. Saylor, Byron E. Miller, W. E. Carll, A. B. Gillis and H. E. Currey, comprising the State Board of Medical Examiners. Volp filed a mandamus proceeding asking the court to order the board to rescind a resolution revoking a

license to the petitioner to practice medi-cine, and also for \$1000 damages. The facts, as stated by J. R. Stoddard, attorney for the petitioner, and as out-lined in the complaint, were that Voip was granted a license, June 13, 1891, under the law of 1889 which was marked "TNI Delaw of 1889, which was marked "Till December 12, 1891." Thereupon the petitioner was again ordered to appear before the was again ordered to appear before the board for examination, and a license was issued to him, good until March 9, 1893. Under the act of 1895, Dr. Volp filed his license in the office of the County Clerk. On January 4, 1901, the defendants, sit-ting as a medical board, passed a resolu-tion. "The license heretofore issued to "The license heretofore issued to Heinrich Volp is hereby revoked, and he is barred from the practice of the profession of medicine and surgery in the State of Oregon. The board notified the County Clerk, who made an entry in the license

book, in conformity with the resolution.

It was urged that the law provides that a complaint must be filed and notice of the same served upon the accused licen-tiate, and before a license can be revoked the accused is entitled to appear before the board for trial. Dr. Volp, it was alleged, was absent from the state from June, 1900, until April, 1901, and never received any such notice or copy of com-

Mr. Stoddard argued that to begin with, the act does not provide for any limita-tion of time for a license, and that the lition of time for a license, and that the li-cense was perpetual. He quoted section 3 of the act, showing that a license can only be revoked for unprofessional or dis-honorable conduct as follows: The pro-curing, or aiding or abetting in the pro-curing of a criminal abortion; the em-ployment of cappers or steerers; the ob-taining of a fee on the assurance that a manifestiy incurable disease can be cured; the wilfully betraying of a professional the wilfully betraying of a professional secret; the advertising of medical business of which untruthful and improbable statements are made; conviction of any offense involving moral turpitude, and habitual

Counsel asserted that no complaint was made against Volp for any of these of-fenses, nor any such mention made in the resolution which pretended to revoke the also with sending a letter to another doc-tor telling him not to take Dr. Volp in as Locke Chapel, on the border of Cayuga classes in operative dentistry, special ested.

board in such matters.

Mr. Stoddard contended that the board had not followed the law as laid down in the statutes. Judge Frazier, in passing upon the case, as previously stated, held that a license must be revoked according

to law. Mr. Chamberlain said he did not know what the record shows. He said he was quite busy and would like time to examine it, as he might like to file an answer and try the case out. He was granted 15 days in which to do so.

St. John's Line Condemnation Suit. A second suit of the O. R. & N. Co. to condemn lands for right-of-way purposes for the St. Johns line, was placed on trial in the State Circuit Court yesterday, before Judge Cleland. The defend-ant is the Peninsular Real Estate Com-pany, and the land in dispute adjoins that of the Columbia Real Estate Company, which figured in the case tried out last week. Mrs. Emma R. Brown, who was interested in the first suit, also figures in this. The property which it is desired to condemn comprises tracts 16, 17, 18, 19 and 20. Melvin Addition. The defendants estimate the wharfage rights as worth \$5636; the land itself is appraised at \$2400, and it is alleged that the building of the railroad will cause the land to slide and render it unfit for residence purposes, resulting in a damage of \$1406. Altogether, the defendants want \$9436 for the property. The O. R. & N. Co. contends that the land is worth little, about \$200, and will be benefited by the building of the road \$2500. The jury went to

Birthplace After 43 Years.

Ex-Governor Pennoyer, who went East to visit his old home near Groton, Thomp-kins County, N. Y., after 43 years' ab-sence, has returned, having made the round trip in two weeks. He was in Philadelphia 14 years ago but did not have time to go home. He arrived in Groton in the evening, and the next morning went license previously granted. The board pled by a stranger, and a flouring mill, was charged with having published an article accusing Dr. Volp of having unlawfully obtained a license, and that he a trace of them left, except a few of was barred from further practice, and the foundation stones of the mill.

The case came up yesterday on a demurrer to the petition. District Attorney Chamberlain represented the board. He called the attention of the court to he differen laws upon the subject of medical licenses, and the powers granted to the

visit the scene yesterday afternoon, and the trial will be resumed this morning.

Court Notes.

the jury today. Joseph Falco has sued W. L. Carmack

He began to imagine himself a modern Rip Van Winkle, and spent only two days in the place. He realizes that there is not much pleasure in revisiting early scenes after an absence of 43 years. He found one of his old friends who had been for years in the business of manufacturing steel bridges in Groton, and had employed 300 men and made a million. He had just sold out to the steel trust and mortgage on property in Tibbett's Addihad just sold out to the steel trust and his shops were being dismantled and the 300 men were turned adrift. This did not
