atures of special interest. There was a good ade in most lines, and prices were well maintained. The advance in Arbuckle's coffee on Monday was expected to bring on new develments in the sugar and coffee trouble, but us far they have failed to materialize, although there is a vague feeling that sugar will boosted slightly in a few days. In the ice markets, there was very little change in orices. Eggs are still inclined to drag, and 23c is the top figure. Poultry is pouring in again in such quantities that low prices for the week are inevitable. Veni and pork are steady at unchanged prices. The grain markets are improving a little.

NEW YORK STOCK MARKET.

Erratic Movement, Ending in Wenk-

NEW TORK, Oct. 15.—The movement of prices in today's stock market lacked co-herency at all times. Opening weakness gave way to a period of strength, which was not by profit-taking, and the resulting reaction was vigorously contested by aggressive manipulation of Petnsylvatia. The whole market finally gave way to a weakness, and closed at a level lower than yesterday, not losses reaching a point or over in some of the leading stocks. The only aggressive force for a tise in the market was what might be called ness and General Losses. the formal invitation, issued by the nrch nei-nipulator in the strest to the public to follow his leadership in a speculation for the rise, with a suggestive glance towards Southern Pacific as an available market leader. This invitation nade its appearance in circular form vestering, with yesterday, with an appropriate demonstration in the market to herald it. As the author has been associated in the Wall-street mind with the organized support of the United States Steel stocks, those stocks shared in yesterday's demonstration, but the requence today was less convincing. Southern Paulis indeed convincing Southern Pacific, indeed, ted off with a flurry, and St. Paul made a

oreliminary advance of 18.
Other stocks to respond were few, and the obvious fact that heavy realizing was going on in the Pacific group of stocks and St. Paul, erved still further to disincline the public to coupt the invitation to speculate. A movement in Pennsylvania, which developed later, and which developed later, and which developed the group which the group was the group which the group which the group was the group which we want to be grouped the group which we will be group to the group which we will be grouped to the group which we will be grouped the group which we will be grouped to the group with the group which we will be grouped to the group which we wil ment in Pennsylvania, which developed later, and which carried the stock up 2 points, was nominally based upon the beavy traffic move—

ment over the company's lines, but the remembrance of old associations of the author
of the invitation referred to with marked
movements of this stock aroused a suspicion
of a possible connection on his part with the
movement. The buying was congested, but
as also was the selling, one brokerage house
being credited with sales of 20,000 shares. The
last price of the stock showed only a fractional remnant of the extreme advance. Last
week's enthusiasm over the alleged plan of a week's enthusiasm over the alieged plan of a proprietary company to hold control of Gress Northern preferred, Northern Pacific, Burlington, and the "release of large amounts of tied-up capital" has entirely evaporated, as the release of this capital is seen to be contrigent upon the investing public taking the minority portion of the stock of the projected new company off the hands of the projected new company off the stock of the projected new company of the stock of the projected new company off the stock of the projected new company of the stock of the projected
