

MCKINLEY MEMORIAL ARCH

NATIONAL ASSOCIATION ISSUES A STATEMENT TO THE PUBLIC.

Contributors to the Fund Will Be Members—Appeals for Subscriptions From All Classes.

WASHINGTON, Oct. 27.—The William McKinley National Memorial Arch Association today issued this statement to the public:

"President McKinley's memory is enshrined in the hearts of his countrymen. But their unexampled affection demands expression in a material memorial, National in character and scope."

"It is proposed to place the memorial arch preferably at the Washington approach of the Potomac bridge across the Potomac, connecting Washington with Arlington, which President McKinley earnestly desired and recommended to Congress as 'a monument to American patriotism.'"

"Contributors to its fund will be made members of the William McKinley National Memorial Arch Association, Inc., with headquarters at 1200 Pennsylvania Avenue, Washington, D. C., which will receive all contributions and will forward certificates of membership to all contributors."

"The association is in entire sympathy with the proposition to erect a suitable memorial to the President at his grave in Canton, O."

GROWING FILLER TOBACCO.

Planting for Proper Soil.

WASHINGTON, Oct. 27.—Secretary Wilson announced today that experts of the Agricultural Department will hunt all over the United States and its new possessions for the best filler tobacco, such as is now raised in Cuba, so that if possible all the filler tobacco used in this country eventually may be raised within the boundaries of the United States.

"We have succeeded in finding in this country," says he, "the conditions under which all the wrapper tobacco we need can be raised here. Several weeks ago the Agricultural Department of the Department of Agriculture for the first time are seeking soils adaptable to the cultivation of the fine filler product. Land will be selected in all our new island possessions, and a view taken of the soil here and under what conditions the filler product can be pulled up."

CRITICAL STAGE PASSED.

Industrial Situation in Germany Seems to Be Improving.

BERLIN, Oct. 27.—Last week the bourse had a quiet and uneventful experience, with no considerable changes of quotations and general confidence in the market now having passed without fresh revelations of business disaster, the opinion is gaining ground that the most critical stage of the economic disease has been passed. Although the Cologne Volks Zeitung issues that the German iron industry shows a slight improvement, it is not a fact that the most recent sales in Great Britain and the United States have made a good impression. The Bourse Courier learns that the Americans have recently taken 15,000 additional tons of pig-iron.

Two Kinds of Tariff Revision.

San Francisco Bulletin.

The apparent movement of public opinion in the direction of reciprocity has not changed Chairman Babcock's purpose of bringing up his no-tariff-for-trusts bill when Congress meets. Mr. Babcock is easily found by Washington interviewers, and he says that he has no objection to a tariff revision by the two houses of Congress to treaty tariffs negotiated by the State Department and ratified by the Senate. Tariff revision by Congress, he says, has been constantly urged by the people of this country, while tariff revision by treaty is a bargain to which there are two parties. It is the duty of the other party to give its assent to the measure and to give as little as may be. The other party to the treaty uses his superior knowledge of the condition of industry in his own country, and takes care to protect his own interests. The American negotiator cannot be expected to have the intimate knowledge of the industries of the several countries with which treaties are made, and the foreign negotiator would possess of the industries of his own country.

Shooting Near Corvallis.

CORVALLIS, Oct. 26.—A party of hunters near here today engaged in a quarrel, in which Pier Cooper shot John Post in the arm. Cooper alleges that he fired without taking aim, in the hopes of stopping the quarrel, and had no intention of shooting Post. Cooper was brought to Corvallis this evening, and is held under \$500 bonds.

Poison Pet in Their Food.

SOUTH BEND, Ind., Oct. 27.—Lying unconscious in their home in this city, Mrs. Rebecca Webb and her son Charles were found today, evidently suffering from slow corrosive poisoning. The young man died tonight and his mother cannot survive. Grant Webb, a brother of Charles, who it is alleged was ordered from home several days ago, is under arrest and his sister, Cora, aged 20, is under police surveillance. She says she

Ship Subsidy Bill Wrong in Essential Principles.

Philadelphia Times.

The fault with the Frye-Hanna-Payne bill is in its essential principles. The essential principles of the measure are abandoned. The opposition to it is based on the general proposition of paying large subsidies to the shipping industry, which is a tax on the people for the subsidization of an industry which already appears to be very profitable. Our yards never were so busy. We have never before in our history built warships for Russia. We have never turned out larger merchant vessels. Until within a year or two there was no such craft as a shipbuilder in the United States. Ships are exported to Great Britain and are used by builders in the shipyards on the Clyde. There are no poor or bankrupt shipbuilders or shipowners in the United States today. They are so prosperous that they can with no grace plead for aid from the American taxpayer, who is obliged to make his own living without Uncle Sam's aid, and who perceives no reason why a man in the shipping trade should not subject himself to the same natural law. The owner of ships is entitled to the same protection as the owner of land, and that is the privilege of purchasing vessels in the cheapest market. When Congress gives him that permit he will have all he needs and all he ought to have as an American citizen.

STATE TRAPS IN DENIED

NEVADA CONTROLLED BY A FEW CATTLEMEN AND POLITICIANS.

Act of Congress 20 Years Ago Ruined Prospects of State—Has Now Expired by Limitation.

CARSON CITY, Nev., Oct. 24.—The question is often asked: "What is the matter with Nevada?" with an area of 110,000 acres, 85 per cent of this thirty-seven-year-old state is owned by the federal government. With much fertile soil, less than 3 per cent of the area is under fence and only about one-half of this is under cultivation. The climate is unsurpassed, the soil produces all desired and profitable crops, there are farming land, stock ranches, mines, railroads and eight large streams with their branches furnish water. Notwithstanding these advantages population and wealth have steadily decreased, and during the past 12 months but 18 homestead filings have been made in Nevada out of the 83,000 or more recorded in the general land office at Washington from the public land states.

It is not difficult at this time to say just what has hindered the development of this Western state, for Nevada has reached a turning point in her history. There have been many difficulties such as competition of California on the west and Colorado, Utah and other states on the east, the earlier disincorporation of the Central Pacific Railroad to develop intercontinental routes of commerce and a decrease in the general prosperity of the silver-mining interests. The cause of Nevada's trouble, however, lies deeper than this, and may be said to have largely originated in the policy adopted twenty years ago by Congress in the disposal of public lands.

Every public land state, upon being admitted to the Union, has received from the federal government title to sections 16 and 36 in each township. In every state this has amounted to a magnificent domain, as provided by the enabling act of each state, has been leased or sold, as the case might be, and the revenue devoted to the public schools. Nevada was given this same donation when admitted to the Union, and as the result of the federal government title to sections 16 and 36 in each township.
