The French Government is fairly well satisfied with the programme already achieved in the dispute by the naval demonstrations. The Sultan has promised to settle all monetary claims, and has offered ing agricultural pursuits and abandoning the hereditary habits fostered by a long guarantees which fall little short of those demanded. France, however, will insist on full guarantees, and also on the surrender of Turkey in the matter of treaty rights before evacuating Mitylene,

No international complications are an cipated, in view of the powers' response to France's note, and no trouble is exected on the Island itself.

For the purpose of carrying out the provisions of this law, instructions were issued in 1886 to special examiners in the field to take depositions from widow claimants showing whether they have co the death of the soldier. These instruc-tions were in force until September, 187, shortly after the present Commissioner took charge of the bureau, when he modified them by directions that special ex-aminers must never question a claim-ant whether she has violated the act of August 7, 1882, unless the evidence pro

The Comm ssary neighborer says that while the law is a most delleate and difficult one to administer, yet he cannot recommend its repeal.

In January, 1900, a rule was adopted requiring guardians of pensioners to render to the bureau annual accounts of their recelpts and expenditures of pension money. The rule was followed by disclosures, which in some instances were of a startling nature. Guardians were found to be drawing pensions long after the death Roosevelt, of their wards. Mafly cases were found where insane pensioners had been placed in asylums and other public institutions as indigent persons, while the guardians had drawn the pension during the whole period and either diverted it for other purposes or allowed it to accumulate for the benefit of the pensioner's legal representatives. Other cases were revealed in which the guardians were appropriating the pensions to their own use, while the wards were being maintained at public

## FRENCH SCHOOL IN AMERICA.

#### Engineering Students Will Be Sent Over to Learn Our Methods.

PARIS, Nov. 7 .- The correspondent here of the Associated Press has had an inter-view with M. Boquet, Director-in-Chief of the Department of Technical Instruction of the Ministry of Commerce, who confirmed the statement, published by the Matin today, that the Minister of Com merce, M. Millerand, proposes to appoint a committee to elaborate a plan for the establishment of a French school in the United States devoted to the study of American industrial methods, M. Boquet mid

"M." Millerand himself is the initiator of the scheme. We realize that America now leads the van in industrial progress. She is far ahead of England, Germany and ourselves in organization and meth ods of work. Hitherto we have been sending numbers of engineering students to Germany, England and Belgium. But the Minister has come to the conclusion that the field which offers the greatest profit in their study is the United States. He has, therefore, resolved to concentrate his efforts there. A few students still will be sent to European countries to study special industries, but for general technical education they will go to the United States, where they will be able to study, under competent guidance, that au dacity, inventive genius and marvelous organization which has lifted the indus rial world of America above her Euro

pean rivais. A central bureau or college will be established at Philadelphia or Chicago, with a director and a couple of sub-di-rectors, who will be fully acquainted with working of the various industries under their guidance. The students will examine works specially chosen for superior methods and the newest plants. "The step we are taking ought not to excite suspicion, as it is really homage to the United States. The students will not go to discover industrial secrets, but finish their education; and before the scheme is put into execution we shall ask the co-operation of the American Government and the leading American in-dustrial concerns. The expense will be met partly by a Parliamentary grant and partly by subscriptions raised among the French Chambers of Commerce, the industrial associations and the big indus-trial concerns of this country. Many en-couraging promises have already been received. We hope the scheme may be narized out early not not? carired out early next year."
