AN ABERDEEN SENSATION

EDITOR ATTACKS THE CHARACTER OF JUDGE IRWIN.

Result of an Adverse Decision on County Printing Contract-Perhaps Not the End.

ABERDEEN. Wash., Nov. 17 .- A sensation has been caused here by an attack upon Judge Irwin, of the Superior Court, by J. J. Carney, editor of the Herald (Democrat), under the editorial heading, "A Judicial Curto." The article is the result of a decision made against Mr. Carney by Judge Irwin on the county printing contract. Carney having brought suit to prevent the printing going to an-other paper, on the claim that Carney's bld was the lowest.

Members of the bar practicing before one. Judge Irwin yesterday presented a me-morial address expressing confidence in the court. During its reading the Judge shed tears. As the case for which the Judge was criticised has not been en-tirely disposed of, Editor Carney will be cited to appear in contempt proceedings. Judge Irwin stands very high in the circuit, and the attack upon his character is regarded as mendacious,

One Dollar Damages, The jury in the case of Stewart vs. the City, to determine title to portion of a county road, brought in a verdict for the plaintiff, giving him damages of \$1. This has been a stubbornly fought case. The road is the only present outlet to a large farming territory, and Stewart, who is a member of the Board of Aldermen, claimed a part of it as private property. The majority of the Council voted to pay him \$3000 for it, but the minority, who opposed, took the matter into court, and the court's decision was against the pur-chase. Stewart then built a fence, and the city tore it down, hence the suit. The city will now condemn the property, and Stewart must either take the actual as-sensed value or go into court again.

LEWIS COUNTY BONDS.

Refunding Issue Sold to a Chicago

Firm. CHEHALIS Nov 17 - The County Com missioners of Lewis County yesterday sold an issue of \$100,000 of Lewis County 10 and 20-year bonds to N. W. Harris & Co., of Chicago. Harris & Co. bid \$3328 premium for the issue at 4½ per cent interest, which with the various accompanying conditions to the bid will make the net interest rate to the county about 4 and 9.100 per cent, There were 10 bids for the bonds, as follows: Thompson, Tenny & Crawford, of Chicago, 4% per cent and \$2101 premium; Denison, Prior & Co., of Cleveland, O., 5 per cent interest and a premium of \$3240; Rudolph Kleybolte & Co., par, interest \$45 per cent; Coffman & Kepner, of Che-4½ per cent; Coffman & Kepner, of Che-halls, 4½ per cent interest and a premium film; Seasongood & Mayer, of Chein-nati, 4½ per cent interest and \$50 pre-mium; D. M. Farson & Co., of Chicago, 4½ per cent interest and \$50 premium; Coffman, Dobson & Co., of Chehalls, 4½ per cent interest and \$100 premium; Charles H. Coffin, of Chicago, 4½ per cent interest and \$23 premium; N. W. Harris & Co., of Chicago, 4½ per cent interest & Co., of Chicago, 6½ per cent interest and EMES premium; W. J. Hayes & Sons, of Cleveland, 4½ per cent interest, and to be allowed \$700 cash at once for expenses, amounting to a below par bid, which, to-gether with other indefinite conditions attached, destroyed the value of the bld. P. A. Fagg, representing Messre. Harris & Co., was here in person, being the only outsider present. The county is at present paying 5½ per cent interest on these bonds, and a material saving in interest is to be effected. The 514 per cent rate was regarded 10 years ago as a most ex-cellent one. However, as Lewis County is one of the most substantial in resources in the entire Northwest, the security is regarded as glit edge and the sale at a lower rate will be much appreciated by

WASHINGTON SCHOOL FUND. Apportionment Made by State Super-

intendent Bryan. dent Bryan has apportioned the current school fund for the quarter ending Oc-tober 31, among the various counties at the rate of .61 per day's attendance, amounting to \$146,571 66, as follows:

Total\$146,571 65 INCENDIARY FIRE.

Valuable Threshing Plant Destroyed at Palouse.

PALOUSE, Wash., Nov. 17.-A disastrous incendiary fire occurred in the sub-urbs of Palouse at 3 o'clock this morn-ing when two threshing machines, owned by W. L. Nesbitt, of Palouse, were totally destroyed, together with tanks, cook-house, stackers, feeders, etc. One of the machines was almost new, having been used but one season. The other was old, but in good repair. Both machines had been stored in a shed built for the purpose, the last one being placed there yes-terday. At 3 o'clock this morning the shed was discovered to be on fire, and there being no water nearer than a half mile the shed and contents was soon a smoulder-ing mass of ruins. As there had been no fire within a long distance of the shed. there can be but one solution of the origin of the fire, and that is incendiarism.

The loss of the two machines with the other property stored with them is placed at \$3500, with \$1500 insurance, Mr. Nesbitt had closed a successful season's run with one of the machines, but the loss is greater than his profits for the season. The affair has caused considerable excitement here and a liberal reward is offered for the arrest and conviction of the incen-diary. Palouse has had a number of incendlary fires recently, but this is the

MINING IN CARIBOO.

Extensive Improvemnts Planned at

VICTORIA, B. C., Nov. 17.—Senator Campbell, intimately connected with extensive mining operations in the Control of the Contro tensive mining operations in the Cariboo country, left last night for San Francisco to consult with his company and place orders for a holat to handle 10,000 pounds and two water-skips with a capacity of 1900 gallons each to handle water in case of an emergency in the Miocene Company's three-compartment shaft at Har-per's Camp, Horsefly, which is now 560 feet deep. It is far the deepest shaft

plans of which were finished a week ago and the boiler and engine are now or-dered. A complete sawmill outfit will be installed also at Harper's Camp. In con-nection with the steamboat company, stores will be started at various points.

OREGON CITY ELECTION. Interest Centers in the Fight for

Mayor. OREGON CITY, Nov. 17 .- The city election is only a little more than two weeks distant, and, while no convention has been held, the candidates who will enter the race are well known. Interest centers in the fight for Mayor. Grant B. Dimick, the present Mayor, is a candidate for re-election, and his most prominent opponent is J. Eugene Hedges. The former is a Republican, while Hedges is a Democrat, but politics cuts little or no figure in an Oregon City municipal elec-tion. Both men are lawyers and have ac-tive supporters. Dimick was elected by a large majority last year, but Hedges is regarded as an exceptionally strong man. The contest is sure to be a warm

The matter of granting further privito the Portland City & Oregon Railway Company may be a prominent fac-tor. At the present time the validity of the company's franchise to operate freight cars on Main street is being tested in the Circuit Court, and there is a strong sentiment among the citi-zens against passing any ordinance to give additional privileges to the rallway. Oregon City's Mayor has considerable ap-pointive power, as in him is vested the charter right to appoint a City Attorney, City Recorder, police force and Street Commissioners, subject to confirmation by the Council. He also names the Council

Three Councilmen retire in January, and their successors will be chosen at the coming election. The members whose terms expire are Bruce Zumwalt, First Ward; William Shekan, Second Ward; E. D. Story, Third Ward.

John R. Humphreys, of the Bank of Oregon City, is the leading candidate for Treasurer. At the last election Linn E. Jones was elected without conception He.

Jones was elected without opposition. He left the city last Spring, and since then Mr. Humphreys has transacted the business of the office. His reputation in financial matters is well known. F. J. Myers, cashier of the Commercial Bank, is also mentioned for the position.

Phenomenal Memories.

Prof. E. S. Holden in Harper's Magazine. Many of the greatest men have had phenomenal memories. Caesar knew the names of thousands of soldiers in his legions. A modern man of science often has a prodigious memory for special terminology. Professor Asa Gray assured me that he could at once recall the names of something like 25,000 plants; Professor Theodore Gill can do the same for fishes. Our memory for mere words is itself much Our memory for mere words is itself much more extensive than is generally admitted. The average well-to-do child of 2 years of age has a vocabulary of some 500 words. and its father may have the command of 30,000 more. The 10,000 verses of the "Rig Veda" have for 3000 years been accurately preserved in the memories of the Brah-mins. Not one Brahmin alone, but thousands, can today recite it word for word. Thousands of Mohammedans likewise know the Koran by heart, as all learned Chinese know their classic books. chiefs of Polynesia can and do repeat hun-dreds of thousands of words in their genealogies, taking days, and even weeks,

Hundreds of planists can play all day, and many days, by memory, and I have myself seen Von Bulow conduct Beetho-ven's Fifth Symphony without a score. Chessplayers have a visualizing memory, musicians have an auditive and a motor memory, while arithmetical prodigies may have any one of the three or a combina-

In addition to carriging on the regular mining work of the company, Senator Campbell has arranged to put on Horseffy Lake a steamer, the Boston Transcript.

THOUGHTS ON 1905 FAIR

BY ONE WHO WAS IN THE HEART OF THE WORK AT BUFFALO.

Oregon Can Master Every One of the Conditions Which Were Against That Exposition.

NEW YORK, Nov. 9.—(Special correspondence.)—At the close of the Pan-American Exposition people scattered to the four points of North and South Amer-ica. The closing scene was indeed a sad one. The exercises at the Temple of Music. just before midnight will never be forgot-ten by those present. When the "tapa" in the tower, far up in the heavens, slowly died away with the lowering and extin-guishing of the lights, the little band of Oregonians stood on the esplanade and with clasped hands bade good-bye to the beautiful illumination which had ever been so grand and inspiring. As the Oregonians wended their way home, the conversation was principally on the many glorious results attained at the exposition. They were far beyond expectations. All day long for a week before the close we received the congratulations of our neighbors and friends. No one seemed lealous, but all said, "You deserved it." How proud we were when Colonel Dosch was called before the Pan-American Board called before the Pan-American Board and given a medal for his part in prepar-ing an exhibit which had proven one of the greatest attractions, Only two of these special medals were given-one to Oregon and the other to New York. The board remarked, in presenting the medal to Mr. Dosch; "We have ever found the Oregon people courteous, kind and pa-tient. Our relations with you have been all that could be wished." We who were associated with Mr. Dosch from Oregon can truthfully say that the many auccesses attained at Buffalo were due in a great measure to his executive ability and his knowledge of how to plane and arrunge our exhibits to the best ad-

Oregonians Hold a Reception. On Friday evening before the exposition closed, the Oregonians held a reception, at which were present: Colonel and Mrs. Dosch, Miss Dosch, Miss Camille Dosch, Mr. and Mrs. Burgard, Mr. and Mrs. Motter, Henry Blackman, A. W. Miller, George Carter, George Slocom, Byron Nicholas, Fred Mellis, A. H. Johnson, Mrs. Clara Parsons, Miss Agnes Lane, Mr. Finch, Mr. Fred Pfar, Mrs. Parrott Pond, Mr. Will Witcht, Mr. and Mrs. B.S. Mr. Will Wright, Mr. and Mrs. B. S. Pague, Master Don Pague and Mrs. Edyth Toxier Weatherred. Quite a number of Buffalo people were also present, among whom was Mrs. Tifft, mother of A. P. Tifft, of Portland, president of the Oregon Commission. During the evening the Oregon people at Buffalo presented Mr. Dosch with a solid gold pen and penholder as a token of the esteem in which they held him. In responding to the presenta-tion speech Mr. Dosch highly complimented the earnestness with which each and all had worked.

Oregon began packing her exhibits immediately after the close of the exposition, and will soon have them installed at Charleston. Mr. Dosch will take his family with him. Mr. and Mrs. Frank Mot-ter, Mr. Blackman and Mr. Carter will re-turn to Oregon, A. W. Miller has been engaged to take charge of the Washington marble exhibit at Charleston. George Slocom, A. H. Johnson, Fred Mellis and Mrs. Weatherred will be with Mr. Dosch, Clara Parsons, who did such good work with the teachers and pulpils in showing the Oregon educational exhibit, will go to Charleston in connection with the general school display of the United States. Miss Agnes Lane and Byron Nich-clas will each have a good position. Byron Nicholas is now visiting at Richmond, Va., and Charlotteville. His relatives there are relatives of Major William Hancock Clark and of the noted Captain Clark.

If you think Portland can make a noise after the result of an election, add 100 times to that and you might imagine what it is at a New York election. Arriving at the ferry dock about 8:30 last Tuesday evening, it beat anything I ever experienced. New York is noisy enough at any The election results, however, ed to meet with the approval of the

Glad Oregon Is His Home. The second day after my arrival in New York Dr. and Mrs. Fenton reached here from their European trip. They are very happy to get back to America, and more happy, they say, to realize that Oregon is their home. The doctor said to me: "Do not ever think that Oregon is behind the times. We have nothing of which we need to be ashamed." On Thursday we all went to Boston. At Boston the Boston Press Club entertained us at dinner, My visit to Boston was to consult with the secretary of the International League of Press Clubs relative to final arrangements for their trip to Oregon next July. At the dinner I presented the litnerary and told a few points of interest in the Northwest, all of which greatly enthused the Boston editors. I am told the only difficulty is too many wish to go, I am confident that this body of journal-ists will be one of the best that ever went West. I have thought it would be a wise and practical thing to have these journal-ists take part in the laying of the corner-stone of the Lewis and Clark Centennial, or, rather, the breaking of ground.

Much Interest in 1905 Fair. Here, in New York and Boston, I find much interest being taken in our exposition. On Monday afternoon, before I left Buffalo, I was invited to visit the largest school in Buffalo, where nearly 2000 scholars attend. In the large assembly hall 500 of the most advanced pupils had gath. ered with their teachers and the princiordered with their teachers and the principal of the school, to listen to the story of Lewis and Clark's expedition to the Northwest. On this day I was naked by the teachers if I would arrange for an excursion of Buffalo teachers for a trip West next Summer. So many people seem anxious to visit the Northwest after hav-ing seen our exhibits at Buffalo. We have been told that our exhibit would have heen considered a freak of nature if Wash-ington and Idaho had not also had excel-

lent exhibits. I have been reading in The Oregonian of the interest in the Lewis and Clark Centennial. Do not let a moment be lost in spreading the matter in the Northwest. Oregon cannot miss this opportunity. Do not be afraid of the proposition. Do not use Buffaio as an example from the financial standpoint. Too many conditions were against Buffaio, every one of which the proposition of Oregon is able to master. You have everything in your favor. Personally, at first, I was skeptical on the matter, but after six months in the heart of the work and doings of the Pan-American Exposi-tion, there is not one unfavorable condi-

tion for us.

Do not send off and import high-salaried men. You have men in the Northwest who have your every interest at heart; men who will-not at all times have the almighty dollar in view. Now this is an important factor. You will be besieged by exposition "followers." Consider the matter well and have confidence in your Western people to handle it. Buffalo had too many importations drawing big salaries. Look to your commercial and industrial interests, and not individ-

Lost With All Hands. HALIFAX, N. S. Nov. 17 .- The terrible gale that has been raging on the New-foundland coast during the past three days has carried death and destruction in its track. Shipping has suffered se-verely as a result of the storm, and many lives have been lost. A private dispatch which reached Louisburg, C. B., tonight states that the Norwegian steamer Ells, under charter to the Black Diamond Line Company, has been lost on the Newfound-iand coast in the vicinity of Belle Isle with all hands. The steamer left Montreal Friday with a general cargo for Bt. Johns, N. F. The Ella was 901 tons register and was built at Sunderland in Evening Bulletin.

1888. This was her last trip of the season on that route. She carried a crew of about 29 men.

MAY MEET IN PORTLAND

INTERNATIONAL MINING CONGRESS LIKELY TO COME HERE.

Colonel J. T. Grayson Is Active in Urging This City as Meeting Place in September.

The International Mining Congress is very likely to meet in Portland next Sep-tember, according to Colonel John Grayson, one of the executive committeeman who is at the Portland. He thinks that Portland can get the convention if her citizens desire it, as it will not meet in Butte, as had been decided, because Butte failed to carry out the promises given to the convention when it met in Boise, Idaho, last July. Colonel Grayson, being an Oregon mining man, desires very much to have the congress here, as he wants to show mining men what kind of ore Oregon is producing.
"Many of the delegates think Oregon is

a country of wheat, fruit and livestock," said he, "and they don't realize that it is fast becoming the best ore-producing state

in the Union "I have today received a letter from the secretary of the organization at Carlisle, Pa., in which he says Portland stands a good show for the meeting in September. We met in July last, but have changed the time of year, as that is the hottest month, and people do not enjoy traveling. September will be a very pleasant month, and we will have mining men from all over the world. Over 400 gathered at Boise last Sümmer, but the number will without doubt be increased next time, owing to the change in the time of meet-

OPEN UP THE COLUMBIA.

Inland Empire Should Demand Removal of Obstructions.

Ellensburg Localizer, It is becoming more apparent every year that a concerted effort should be made by the people of the Inland Empire to have the obstructions removed from the Columbia River. This mighty stream. that courses through the State of Washington on its way to the Pacific Ocean, has innumerable possibilities for com-merce. It could be navigated from the British Columbia line to the sea, if a few obstructions were overcome, and these are by no means engineering impossibilities. Boats are now running, and have been for years, on the Upper Columbia above Priest Rapids, doing a freight and pas-senger traffic. The Government has al-ready made some desirable improvements at Rock Island and Cabinet Rapids, in the upper course of the river, which has been

an aid to navigation. The Celilo Rapids, at The Dalles, and Priest Rapids are at present the only serious barrier to navigation on the Upper Columbia in a long stretch of river, hundreds of miles in extent, and this obstruction can be overcome by intelligent engi-neering; and with the obstructions removed from the lower river, we would have a waterway 500 miles or more in extent, penetrating a region of vast richess in agriculture and mineral resources, and connecting with the sea a people who have grievously felt for years the necessity of cheaper transportation for their

It is a thing hardly accountable that this magnificent waterway has been so long neglected by the Government, and left practically closed to navigation on

account of only a very few obstructions found at intervals along its course.

The shippers of the vast empire contiguous to this majestic river are not interested in making it navigable for deep-sea vessels, and money expended in the past by the Government for that purpose is practically useless to the pro-ducer. What is wanted is a river open for river boats, thus affording an outlet for the products of the Inland Empire, and give such competition in transportation that will inevitably compel the rail-roads to reduce their rates throughout this roads to reduce their rates throughout this vast region. Since Nature has so largely provided the way, every energy should be bent by the people toward inducing Congress to take the matter up and make the PACIFIC COAST WEATHER.

Accidents to Steeple-Climbers.

necessary appropriations.

Cromwell Childe in Leslie's Popular Monthly, Accidents? Sure! I've fallen 125 ieet. A rope broke on me. And once a man I had as assistant tried some funny business instead of staying where I had told him, and he was killed like a shot. But there's no danger in high work if a man doesn't drink or smoke and always keeps his head clear. The main trouble I have when I'm up high is in keeping my mind when I'm up high is in keeping my mind on what I'm doing. Sometimes I get to thinking of other things while working along, and suddenly I find I must pull myself together. "See here, old man, this won't do," I have to say to myself. If a climber drinks or smokes, though, some day something happens to him.

day something happens to him.

Here's a queer accident, though, that I did have once. I was working on the inside of a high chimney, bolting together sections of the lining, and I was pretty well near the top. I was on a ladder up against one side, and the ladder was so fixed that I could raise or lower it and myself as I wanted. Somehow I took hold of the wrong end of the rope, let the one I ought to have held on to go. Quick as a shot that ladder and I dropped. But

GOOD judge must have both experience and learning. A housekeeper should be a good judge for she too must have experience and learning or she may think that the soaps made to look like Ivory Soap are just as good. With experience she will know that they lack the remarkable qualities of the genuine. Ivory Soap-9941/00 per cent. pure.

close to the wall, and I could hold on Fifty feet from the bottom it stopped for a second with a crash. I had already fallen nearly 100 feet. A new and extra fallen nearly 160 feet. A now and extra inside lining began here, which made a kind of ledge all round, and the ladder had struck on the side of this. It feel across the chimney. Being much longer than the chimney was wide the upper part broken off ahort. But there was enough left for the broken end to fall on the left for the broken end to fall on the ledge made by the top of the lining on the other side. It rested there, but there wasn't an inch to spare. Through all the three shocks I had managed to hold on. If they had all come in one shock I could never have held. But I just managed to keep my grip-and the rope. I tied this to the ladder as well as I could and let

"Turn" and "Cue."

Notes and Queries. As a rule a performer waits for his 'turn' in the wings, having already been 'called' from the dressing-room. The word is almost exclusively in this sense used in the music-halls and on the ricty stage. On the stage proper-stage of the drama—the word "cue used. An actor waits at the wings for his "cue," which is the last word of the actor or actress speaking, which gives him his entrance, or which, supposing him-the performer—to be on the stage, indi-cates to him that it is his turn to carry on the dialogue and the action of the play. "Extra turn" almost invariably means that a new performer is having his first public trial at that particular house. If he goes well he is tolerably sure of securing
