It was in anticipation of this action, it is presumed, that the Nicaraguan Government only recent-ly denounced the treaty of trade and commerce with the United States. This treaty contains sections conveying rights as to canal construction which are to be relaced by more modern provisions. There was no particular ceremony connected with the signature of the impor-tant convention. Lord Pauncefote has been indisposed for several days past and it was not expected that the treaty would be signed before the end of the current week. However, to the surprise of the State Department officials, the Ambassador appeared at the State Depart-ment at noon and the work of signing the treaty was soon disposed of. The

The treaty was signed by Secretary Hay with a gold pen in a silver holder, which has been used in the signing of other conventions, and is the personal property of the Secretary.

COMMENT OF ENGLISH PRESS. It is Generally Admitted That the

Move is One of Gain. LONDON, Nov. 19.-Except as affording a chance for the opposition journals to attack the government and the Foreign Secretary, Lord Lansdowne, the signing of the new 1sthman canal convention does

not excite strong interest in Great Britain. It is generally admitted that the British have nothing to gain by a retention of the Clayton-Bulwer treaty, while they have The Moriling Post congratulates both

countries on the completion of the treaty, and says it is glad that the convention of 1960 has been revised in accordance with American wishes. The Daily Mail fears that the signing may not terminate for-

ever a troublesome dispute, and thinks Canada ought to receive some equivalent for the concessions which probably have

een made. The Daily Chronicle says: "Lord Lansdowne has surrendered everything without compensation. The govern-ment has climbed down from the position it had deliberately chosen, and although the disappearance of the Clayton-Bulwer treaty will not cause much regret, many people will sigh for the business cabinet which Lord Rosebery recently suggested." In conclusion the Daily Chronicle characterizes a new treaty as "a full accept-ance by Great Britain of the Monroe docand says: "It would be strange, trine. indeed, if the Senate should object to such

a one-sided bargain. The Times says: "It is premature to assume that all difficulties have been overcome, and that the Senate will ratify the treaty, but England has no reason to regard the con struction of the canal with alarm or

We hope the treaty will be dealt with by our American kinsmen in the same spirit of international good-will with which it certainly will be received in Lon.

The Westminster Gazette publishes an article contending that even from a British view point it is desirable that the

tained for the abandonment of the Clay-ton-Bulwer treaty."

The St. James Gazette says: "We have confidence that the American people will recognize in the abandonment of the Clayton-Buiwer treaty a further

sign of the value we set on their good will and the earnestness of our desire to help forward their aspirations to greatness. Hearty relationship between mother and daughter are more to us than academic treaty rights."

ISTHMIAN CANAL COMMISSION.

Its Report Will Be Placed in the Hands of the President This Week. WASHINGTON, Nov. 18 -- The report of the Isthmian Canal Commission will, it is said, be placed in the hands of the Presi-dent at the end of the present week. The document is completed practically, but the necessity of including some important data concerning engineering problems makes it impossible to submit the report immediately. The Commisioners have reached an agreement upon all the salient facts to be presented in the report, and, as

already indicated in the Associated Press dispatches, the commission favors the much to gain by the construction of the Nicaraguan project, the cost of which is

placed at about 75 per cent of the Panama project,

John Alexander Dowie Having Tronble With His Employes.

CHICAGO, Nov. 18 .- Samuel Stevenson a brother-in-law of John Alexander Dowle, the "faith healer," today entered suit to have a receiver appointed for the Section Lace Industries, one of Dowie's enterprises, for which he imported 50 incemakers from England. Stevenson himself came from England. He alleges that Dowie has withheld from him re-muneration which had been promised. Ho charges that Dowie offered him a bonus of \$50,000, \$100,000 of the company's stock and the superintendency of the business at a good salary. He alleges that he got nothing but the superintendency, and that Dowle beguiled him into signing an inno-cent document which in reality gave Dowle entire ownership of the lace company.

Reciprocity had been talked and preached about for years, and unless a decisive step was taken now which would affect the whole subject, it might as well be abandoned. The members of the delegation said they had no particular interest in any of the treaties, but thought, taken altogether, that the French treaty more near-ly represented the best possibilities in the way of reciprocity, and that if it could be ratified a distinct victory would be

basis of non-competing articles. The 20 per cent cut on textile fabrics in the French treaty would destroy the textile

industries of Pennsylvania and New Jer-sey. While there is just now much talk of reciprocity, in my opinion nothing will be done during the coming session of Congress."

Representative Roberts, of Massachusetts, another of the President's callers today, said there was a strong sentiment for reciprocity in New England. "But," said he, "we do not want the sort of reci-
