BAKER CITY, Nov. 19 .- As Miss Or phoa Kelly was returning home last night, about 7:30, from the Baker City Steam Laundry, where she is employed, a man who was hiding in the shadow of a pile of wood close to the sidewalk, near the residence of Henry Rust, on Center street, common out and stienmide to seles her by residence of Henry Rust, on Center street, sprang out and attempted to selse her by the throat. Miss Kelly called loudly for help, broke away from her assallant and ran to a woman coming down the street, a short distance away. Her cry for help brought a number of people to the scenes. At the first outcry her assallant ran down the street, pursuad by several men, but he succeeded in making his escape. The attack was made on one of the principal streets, and at an hour when a large number of people were on the street. Miss Lena Wattermore passed the man standing in the shadow of the woodpile, just a few moments before the stack on Miss Kelly, and she was able to give a better description of him than Miss Kelly. better description of him than MRs Kelly. The police made an effort to find the man, but he could not be located. GRANT'S PASS, Or., Nov. 19.-Superin-tendent J. W. Berrian, of the Rogue River hatchery, below this city, reports that about 5,000,000 eggs have been hatched this season at the hatchery. This hatchery is working wondors for the salmon industry as working wondors for the salmon industry of Southern Oregon, more especially along Rogue River. The hatchery is owned by R. D. Hume, who owns large caming in-terests at the mouth of Rogue River, although it is under the direct control of the United States Fish Commission. This station was established in 1897, but was not operated until a year later, on account of poor water supply. Since the establishment of the hatchery, 15,000,000 quinnat salmon eggs have been hatched, all of which have been planted in the Rogue and its tributaries. Besides the quinnat, near-ly 2,000,000 silver salmon and steelhead trout have been hatched and planted. The hatchery selects only the largest and best fish from which to secure eggs for hatching. In connection with the salmon hatch-ery is operated a steelhead trout hatch-ery, from which the 2,000,000 trout eggs mentioned were hatched. This latter insti-tution is situated well up Elk Creek, several miles above the main Rogue River hatchery.
