

HE FORGOT HIS ORDERS

ENGINEER WHO CAUSED CALIFORNIA TRAIN WRECK TALKS. Assumes Full Responsibility for the Collision—Four More Names Added to the Death List.

SAN FRANCISCO, Dec. 20.—John Coffey, the engineer of the northbound Southern Pacific train whose failure to stop at the Uplands switch yesterday morning caused the collision in which two men were killed and more than 20 persons were injured, is suffering from a shock to his spine sustained when he jumped from his engine. He has not denied his responsibility for the disaster. In an interview he said: "I admit that I had received my orders. I knew I was to stop at the switch to let No. 10, south bound, take the siding. No, the orders were not misunderstood. Both I and the fireman were watching the siding San Ardo we compared watches. It was a dark night. At the switch there are no houses, no landmarks of any kind, only the switch light and a power line. I did not notice it until we were abreast of it. I had been greatly worried over the action of the engine. It is a new one and very powerful. The machine did not behave properly. I can't be more explicit about the trouble with the engine; that is between me and the railway officials. But the fireman and I were both busy inside and we forgot the switch. I have no excuse only that I forgot. I saw the switch light race by. Then the conductor pulled the rope which operates the little signal whistle in the engine. I remember seeing almost the same moment I put on the emergency airbrakes. We were rounding a sharp curve. I could not see any light ahead, but I knew that No. 10 was due. I had a heavy train. I was rounding along nearly 30 miles an hour. I jumped down to the cab steps and looked out. There was the light of No. 10 swinging around the curve ahead. I knew it was all up. I don't know what became of the fireman. I waited until we were past the siding. To have jumped there would mean death. I jumped, and I know I went beyond the engine crashed together."

Death List Has Reached Six. SAN FRANCISCO, Dec. 20.—The death list of the wreck on the Coast division of the Southern Pacific yesterday morning has reached six. All the injured are expected to recover. Two Italians, John Cardona and Francisco Savanna, died early today at the Southern Pacific Hospital. Two charred bodies were discovered from the wreckage at Upland at noon. It is supposed they are the bodies of tramps who were riding on the brakebeams.

Two More Fatalities. SAN FRANCISCO, Dec. 20.—Two more names, making four in all, have been added to the list of fatalities resulting from the collision of trains No. 5 and 10 on the Coast division of the Southern Pacific yesterday. John Cardona and Francisco Savanna, section-hands, both of whom were terribly burned, died at the Southern Pacific Hospital in this city today.

SENSATIONAL SCENE IN COURT.

Hated Remarks by Judge and Lawyers in Lynching Case. ALTURA, Cal., Dec. 20.—There was a sensational scene in the Superior Court here today during the proceedings in the case of the People vs. Brown, otherwise known as the Lookout lynching case. Considerable feeling has been exhibited by both sides ever since the case came up for hearing a week ago. Today Attorney Harris, for the defense, was endeavoring to break down the testimony of Agnes Wilson, a witness for the prosecution, when the court objected to the line of questioning, saying: "There is no such conduct in this case while I am on the bench."

"Well, you won't be there long," retorted Attorney Harris. "I will be here until my term is up," replied the court, "unless some of you assassinate or shoot me from behind."

At this point Attorney Baker, of counsel for the defense, said: "I am sure that's a nice remark for a man to make on the bench. There is no man here that wants to assassinate you."

"I can prove by a previous witness that Courtwright (a previous witness) said that he came down from the stand to kill me, and he would have done so had the Sheriff not interfered," replied the Judge.

After some further heated remarks from both sides, the whole subject was dropped, without apology from either of the contending parties.

PRIZE POULTRY.

Awards Made at the Show of the Willamette Poultry Association. EUGENE, Or., Dec. 20.—There are now on exhibition at the poultry show of the Willamette Poultry Association 350 fowls. The following awards of prizes have been made by W. W. Brooking, of Ogden, Utah, who is acting as judge: Barred Plymouth Rocks—Cock, 3, S. E. Elliott; cockerel, 1, 2, 3, B. F. Kenney; hen, 1, S. E. Elliott, 2, 3, B. F. Kenney; pullet, 1, E. F. W. Watts, 2, F. B. Kenney, 3, J. O. Watts; pen, B. F. Kenney, 1, F. B. West, 2, J. O. Watts. White Plymouth Rocks—Cock, 1, J. O. Watts; hen, 1, 2, 3, J. O. Watts; pullet, 2, J. O. Watts; pen, 1, 2, J. O. Watts. Buff Plymouth Rocks—Cock, 1, J. O. Watts; hen, 1, 2, 3, J. O. Watts; pullet, 1, 2, 3, J. O. Watts. Seattle Produce Company; pullet, 1, Seattle Produce Company. White Leghorns—Cock, 1, Mrs. A. Kirkland. White Wyandottes—Cock, 1, F. Hurlbut; hen, 1, F. Hurlbut; cockerel, 1, 2, Mrs. Kirkland; 3, F. Hurlbut; 4, Amos Wilkins; pullet, 1, F. Hurlbut and Mrs. Kirkland; 2, F. Hurlbut; 4, Mrs. Kirkland; pen, F. Hurlbut, 1, Mrs. Kirkland. Single-Crown Browns—Cockerel, W. L. Wheeler, 1; E. Dow, 2; H. C. Wheeler, 3; cockerel, H. C. Wheeler, 1; E. Dow, 2; W. L. Wheeler, 3; hen, W. L. Wheeler, 1; H. C. Wheeler, 2; pen, W. L. Wheeler, 1; Amos Wilkins, 2; Black Leghorns—Alden Hurlbut, 1 on cockerel, hen, pullet and pen, and 2 on pullet. Brown Leghorns—Cockerel, L. St. John, 1; Grant Thompson, 2; hen, G. Thompson, 2; pullet, L. St. John, 1; G. Thompson, 2; pen, G. Thompson, 1.

NORTHERN TRAIL IN FINE SHAPE.

Travel From Skagway to Dawson is in Full Swing. VANCOUVER, B. C., Dec. 20.—The steamer Amur, which arrived today from Skagway, brought the news that the winter route from White Horse to Dawson is now in excellent condition, and that travel is in full swing. The first stage from Dawson to reach White Horse arrived at that place on Saturday afternoon last. The trip out was made in very fast time, only 10 days being occupied on the journey. The drivers reported the trail to be in excellent condition. A record run from Lower Labarge was made on Saturday, the four-hour team leaving the lower end of the lake at daybreak and galloping into White Horse early in the afternoon. The drivers of the first stage reported that the ice on Labarge was as firm as could be desired, despite the fact that on Friday last a report reached White Horse that the ice was going out, and that the water was rising. There are fears, however, that there may be a partial break-up owing to the mildness of the weather, the barometer registering only 2 degrees of frost on Saturday morning in the neighbor-

A PRIZE FOR MR. LINGO

YES, HE WOULD MARRY, IF SUITED; BUT JUST LOOK AT THIS! The Lady, All the Way From Michigan, Tips the Beam at 204 Pounds.—What Can a Bachelor Do?

JUNCTION CITY, Or., Dec. 20.—Among the recent arrivals from the East is Mrs. Morrison, of Quinnessee, Mich. She weighs 204 pounds, avoirdupois, and came through on a 1 1/2 fare ticket. Some say she brought a child with her, but others are inclined to believe that the extra baby fare was demanded by the railroad company for extra weight of the passenger. Mrs. Morrison came to Junction City to marry a man. When he appeared at the press office this morning he was placed under arrest, after he had received the package containing the ore. Easley said, when placed in jail, that he had carried away a few specimens of ore, as all miners did when they left a mine. He admitted that some of the ore had slipped from his pocket.

OLDEST WOMAN IN THE STATE OF WASHINGTON.

Mrs. Elizabeth Poulson. WASHINGTON, Dec. 20.—Mrs. Elizabeth Poulson, who is believed to be the oldest woman in the State of Washington, is celebrating her 97th birthday December 12, at the home of her grandson, Elmer McKinney, near Walla Walla. Mrs. Poulson is a native of Pennsylvania. She was the first child of Richard and Sarah Margaret Grosvenor, and grand-daughter of Lord Grosvenor, of London, England. Her mother died when she was 3 years old, and her father when she was 8 years old. When 25 years of age she married Elmer McKinney. To them were born eight children, four sons and four daughters. John Poulson, aged 62, and Mrs. Sarah McKinney, aged 60, both of this city, are the only ones living. She has one grand-son and seven grand-daughters. Early in her younger Mrs. Poulson moved with her husband from Pennsylvania to Illinois, and from there they moved to Illinois, where she lived with her husband until, in 1864, with her family, she crossed the plains, and settled on the McKinney farm, near Walla Walla, where she still resides with a grandson, Elmer McKinney. She is a pioneer in every sense of the word.

Lingo should send for Mrs. Morrison. He did not send the money per fare, but deposited it here and the ticket was sent to Quinnessee. The lady arrived in due season Wednesday night, and next morning Lingo clapped eyes upon her for the first time. Mrs. Morrison has been incriminated to be 204 pounds, and she looked it. They were not married at once, and it is said that Mr. Lingo has taken the matter under advisement. The lady insists that it is. The value placed on this 12 pounds of experts is \$100 to \$1000. Easley waived examination, and will be held in custody for a night, before the trial of the case, which is set for Thursday morning.

BIDS ON REFORM SCHOOL WOOD.

It Looks as Though "Corner" Prices Will Prevail Again Next Year. SALEM, Dec. 20.—The Board of Trustees of the Reform School today opened bids for supplying wood for that institution next season. The bids received indicate that the Reform School will cost about as much next year as it did this year, when somewhat of a "corner" affected the local market. Last Spring the board purchased wood for use this winter and during the previous winter, for \$25 per cord for small fir. The bids received today show that large fir will cost the same, and that small fir will cost 10 cents more. The Reform School uses 800 cords of large fir and 400 cords of small fir.

Annual Meeting of Sealing Company.

VICTORIA, B. C., Dec. 20.—The annual meeting of the Victoria Sealing Company was held today, and an additional director was added to the list of officers, the other directors being re-elected. The board now consists of: President, W. Munroe; vice-president, Captain J. G. Cox; manager, Captain W. Grant; treasurer, R. H. Hall; J. J. Betchel, R. Beal, and Joseph Bosworth, the last named being the newly-appointed official. It was decided that about 300 sealions will be sent out, seven to the Japanese Coast and the others on the California and British Columbia Coast. Wages will be the same as last year. Two or three thousand skins remain unsold at the Hudson's Bay Company's warehouse in London.

Celebrated Mining Case Decided.

ASHLAND, Or., Dec. 20.—The celebrated mining case of Charles R. Ray vs. J. R. Mitchell, involving the right to certain mining ground in the Gold Hill district, was decided this week by Judge H. E. Hanna, in the Circuit Court of Jackson County. Each of the parties to the dispute has won certain of his contentions, but it is not yet certain whether the plaintiff or defendant is, under the decree, the owner of the land on which the valuable workings are in progress, that depending on a survey of the premises.

Not to Be Allowed to Land.

SAN FRANCISCO, Dec. 20.—In answer to a hypothetical question propounded by the Oceanic Steamship Company, whether an alien afflicted with consumption, traveling first-class and of ample means, might be allowed to land in this country, Commissioner of Immigration Hart H. North has decided that such an immigrant is not to be allowed admission to this country. The conditions surrounding a tourist in his travels are of a personal and social nature, and in no way affect his position as an alien from a statutory point of view.

Guilty of Manslaughter.

SPOKANE, Dec. 20.—At Rathdrum, Idaho, last night the jury pronounced the verdict of manslaughter in the case of killing John Keeler at Port Hill, Idaho, last June. The penalty for this crime is one to 10 years in prison. The men arrested from the killing were Keeler and another man, wayward Fleming, who gave him a terrible beating, but during the melee Keeler was fatally stabbed.

Portland Man Fined.

ASTORIA, Dec. 20.—J. W. Bush, of Portland, was tried in the Justice Court last evening on a charge of assault and battery on J. W. Whiting and was found guilty and fined \$5, which he paid. The trouble occurred last June, when Bush is alleged to have hit Whiting in the head with a rock.

City Marshal Will Resign.

WALLA WALLA, Dec. 20.—City Marshal Jacob Kaufman having formed a co-partnership with Thomas S. Page, to engage in the wholesale and retail meat business in Walla Walla, will resign the office he has filled half a dozen years.

INDORSES THE 1905 FAIR

LINCOLN COUNTY FARMERS' ASSOCIATION PLEDGES SUPPORT. Action Taken at a Farmers' Institute Held at Toledo—Agricultural Topics Discussed.

TOLEDO, Dec. 20.—The farmers' institute in session here yesterday and the day before proved a great success. The meeting was held under the auspices of the Lincoln County Farmers' Association. From the surrounding college professors were in attendance, and made excellent talks. City Attorney Long, of Portland, also honored the meeting by his presence for a short time, and was called upon to discuss the Lewis and Clark Centennial. Mr. Long forcibly set forth the need for and the benefits which would result from the holding of such an exposition. The meeting was a most magnificent showing made by the states of the Pacific Northwest at the recent Pan-American Exposition, but held that to appreciate fully our country people should in addition to seeing the products behold its many natural beauties and experience something of its matchless climate. So interested did the audience become that at the close of the institute a resolution was unanimously passed pledging the support of the Lincoln County Farmers' Association to the great Fair of 1905.

CHARGED WITH STEALING.

MINER SAID TO HAVE TAKEN THIRTEEN POUNDS OF ORE. BAKER CITY, Dec. 20.—H. Easley was arrested here this morning, charged with stealing 13 pounds of ore from the North Pole mine, said to be worth \$50 to \$100 per pound. The ore comes from a rich pocket in this mine. The manager and other officials are very reticent in regard to the value of the ore, but it is alleged that the better part of the extra baby fare was demanded by the railroad company for extra weight of the passenger. Mrs. Morrison came to Junction City to marry a man. When he appeared at the press office this morning he was placed under arrest, after he had received the package containing the ore. Easley said, when placed in jail, that he had carried away a few specimens of ore, as all miners did when they left a mine. He admitted that some of the ore had slipped from his pocket.

For strictly dairying, on high-priced land, and the best of the kind, the Albion Island breeds stand without a rival. But for the farmer who has cheap land and an abundance of feed, or an almost unlimited out-range, as is enjoyed in this country, the Dutch cow would be found profitable. In addition to the 200 or 300 pounds of butter annually produced by these cows with good care, there will be skin milk enough to grow a calf worth \$15 or \$20, as well as furnishing the principal sustenance for two growing pigs, which will be worth perhaps another \$15 or \$20, thus making an annual gross income of \$50 to \$60, and a profit of \$25 to \$30. As fast as the younger members of the herd grow up, the older cows in a short time can be fattened into good beef, which is going to be in demand, at paying figures.

STRAWBERRY CULTURE.

In discussing "Strawberry Culture," F. M. Wainwright said in part: "The strawberry is a plant adapted to all conditions of soil and climate than any other kind of fruit, but certain soils are better adapted to its growth than others. The ground should be plowed deep and replowed until very fine. The best plants to set out are those grown in September or October from a strong hill. Earlier grown plants seem to be lacking in vigor. Plants should be set out in October 'beached in' and planted in the rows in March. Before planting cut off all old runners and trim the roots to a length of about four inches. Set out in rows three feet apart, plants two feet apart in the rows. In setting out the plants do not bunch the roots, but spread them out naturally. Do not let the plants bear during the first season. The first year they will be a loss of a plant the next season. The runners should be cut off about every two weeks during the first year. Do not use the cultivator until late in the fall. Don't use the hoe to get rid of weeds. No crown bears more than once. The ground should be planted every second year is generally practiced. Many failures are due to the absence of pollen-producing plants."

CARE OF MILK.

Professor F. L. Kent discussed "Care of Milk" with great attention. He pointed out the proper feeding of turnips, cabbage, alfalfa and other strong flavored foods, to avoid imparting the characteristic flavor of these substances to the milk produced. Cleanliness in all respects and rapid cooling of milk in all districts were given as the essential points to be observed in the production of high-class milk.

PARADE FOR THE LIFE.

Hon. Wallace Nash delivered a most excellent address on the topic, "Farm Life vs. City Life." The subject was considered from three points of view, namely, the child, the wife and the head of the family. The welfare of the child as influenced by the public school system of the country and of the city was ably discussed. An appeal was made for more consideration of the wife's interests, both on the farm and in the city. The speaker called attention to the narrowness of life in the daily occupation of the city resident, and the varied lines of work on the farm make life more enjoyable. Mr. Nash concluded by saying: "Life on the farm for the family is a vastly higher thing than for the animals on the farm. The danger is that the very ease with which the earth yields to us her bounteous supplies, makes from us the stimulus to enterprise and exertion. We are apt to imitate the ox, for we eat and drink daily and tomorrow we die. Let the farm dweller then learn from his city brother the office of enterprise and ambition in the pursuits of the farm, and then his life will be more enjoyable. Mr. Nash concluded by saying: "Life on the farm for the family is a vastly higher thing than for the animals on the farm. The danger is that the very ease with which the earth yields to us her bounteous supplies, makes from us the stimulus to enterprise and exertion. We are apt to imitate the ox, for we eat and drink daily and tomorrow we die. Mr. Nash concluded by saying: "Life on the farm for the family is a vastly higher thing than for the animals on the farm. The danger is that the very ease with which the earth yields to us her bounteous supplies, makes from us the stimulus to enterprise and exertion. We are apt to imitate the ox, for we eat and drink daily and tomorrow we die. Let the farm dweller then learn from his city brother the office of enterprise and ambition in the pursuits of the farm, and then his life will be more enjoyable. Mr. Nash concluded by saying: "Life on the farm for the family is a vastly higher thing than for the animals on the farm.
