FIGHT COMING IN SENATE

A NEW DEMOCRATIC LEADER AND ISSUE MAY ARISE.

Interesting Developments Expected When the Philippine Tariff. Bill Is Taken Up.

This week the two houses of Congress will resume their sessions. The Payne Philippine bill, which already has passed the House, will be taken up in the Senate among the first subjects for consideration, and it is confidently expected that there will be developed new Democratic leadership, if not a new Democratic issue. With a shrewdness not looked for either by the older element of Democrats or the Republican leaders, the new element of the minority got complete control of their side. of the important Philippine committee, of which Senator Lodge is chairman, and such experienced and astute Reupblican leaders as Allison, Hale, Proctor and Beveridge are members. Opposed to them are Culberson of Texas, Rawlins of Utah, Dubois of Idaho, Patterson of Colorado, and Carmack, of Tennessee-all belonging to that young, vigorous crowd of minority Senators that is expected to snatch the reins of leadership away from the old crowd which for so long a time has been dominated by Jones of Arkansas. Cockrell of Missouria, Daniel of Virginia and their like, who aroused such a storm of protest in the Democracy throughout the country "lying down" at the last session, when they could have forced an extra session of this Congress by fighting the Spooner Philippine resolution

Culberson for Minority Leader. The exact line of policy on the Philip-

pine question that will be pursued by the new crowd has not yet been laid out definitely. It is known, however, that the programme of "drift," followed with such care by the House minority when the Payne bill was brought forward only a few days before adjournment for the Christmas holidays, and which was ad-vised by the Jones-Cockrell cult in the Senate, will be rigorously avoided by the new crowd. Since they have captured their side of the Philippine committee without the factional opposition apparent-ly suspecting what they were up to, it is said that their next move will be to force on Senator Jones a call for a Senate Democratic caucus at an early date, and they will there attempt to bind the mi-nority to a policy of unyielding hostility to the passage of the Payne bill. Senator Culberson is said now to be working on the details of the plan which he will submit to his committee associates for ap-proval as soon as they return from their The Texan is generally regardad as the best-equipped leader for such an emergency, since he has experience, tact and concededly a high order of ca-pacity—rare qualifications to find in a single Democrat in either branch of Con-gress at present. While he refuses at this time even to adm! that the plan here hinted at is on foot, it is neverthicss known that he is hard at work on it, and will spring it on the Senate in the form of a minority report when Senator Lodge presents the majority report on the Payne

Plans of Republican Senators. How soon this will be depends on a va-

riety of conditions, not the least important of which is that not a few influential Republican Senators would rejoice should Senator Lodge and his party associates on the Philippine committee see fit to amend the Payne bill, so as to bring it more in accord with the spirit of the Foraker legislation for Porto Rico than the measure is as it came from the House. In view of the settled determination, however, of the Senate to carry the Philip-pines along with Cuban legislation, it is pines along with Cuban legislation, it is prime along with Cuban legislation, it is considered likely that the Republican opposition to the harsh features of the Payne bill will be content to permit that measure to go through just as it came from the House, and then provide for its an explanation, could go sway and make the served likely operation by the people of Walla walla, the rest coming from New England and the Middle West.

"As soon as this endowment fund was raised, Dr. Pearsons offered the college. Over \$60,000 of the amount was given by the people of Walla, the rest coming from New England and the Middle West.

"As soon as this endowment fund was raised, Dr. Pearsons offered the college. Over \$60,000 of the amount was given by the people of Walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the walla, the rest coming from New England and the rest coming from New England and the pressure to go through the very description of the dozen or more funds is now investigation. Cuban Government is organized and fully equipped to assume all the duties of independent sovereignty and responsibility. At the same time it may be decided by the real Republican leaders of the Senate Senators of their opportunity to make po-litical capital out of the Philippine question at this session by agreeing to report from the committee amendments to the Payne bill, which would give concessions Philippines without waiting for the slower but surer process of joining the Philippines with Cuba in tariff legisla-

Democrats for Free Trade. Naturally Senator Culberson and his

committee associates would greatly prefer a straight-out favorable report on the Payne bill by the Republican majority, as then their minority report would stand out in sharper contrast. In that event they could define accurately what they conceive ought to be the Democratic colonial policy, and in spite of the jealousy with which their work would be viewed by the old element under the discredited leadership of the Arkansas Senator, it is confidently believed that they could carry their policy through with practical unanimity on the minority side of the Senate. The chief feature of this new solicy will be a clear and resolute demand for free trade with the insular possessions The decisions of the Supreme Court de-claring the government and administration of the islands to be wholly and exclusively in the province of Congress will be re-ferred to in support of the demand for free trade, and the example of Porto Rico will be cited as proof that free trade with the insular possessions is mutually bene ficial to the people of the United States and of the islands, as well as practicable. The alleged part taken by the beet-sugar magnates in frightening the ways and means committee of the House into surrender will be recited with elaborate detail, and statistics will be produced to show that the domestic beet-sugar interest does not need the protection against either the Philippines or Cubs which that industry now loudly proclaims it needs, Long and Lively Fight Promised.

In brief, there seems a real prospect of a lively and interesting fight in the Senate over the Philippines, now that the new blood of the Democracy appears determined to assert itself with courage and intelligence. At any rate, the debate will last several weeks, and may be extended far into the Spring if the Democratic "youngsters" succeed in binding the old element to their programme of obstrucelement to their programme of obstruc-tion for the sake of making political capital. It is realized, however, that Messrs. Jones, Cockrell and others of the old crowd have become so accustomed to running away from a fight that the younger element may find itself unequal to the task of prolonging the discussion beyond the usual limits. But even if the contest should not be long, it will be of unusual

have placed too high an estimate on the young Texan, though the fact that they are going to try him lends peculiar inter-est in Washington to the only promising political struggle of dignified proportions that is likely to be fought at this session

SEEING BY TELEPHONE.

New Invention Opens Up Great Pos-

The wonderful device which Dr. Sylvestre, of Paris, says he has invented, by which one can see as well as hear the person with whom he converses over the telephone, opens a new and hitherto undreamed-of field of usefulness for the telephone. An idea of this was formed on hearing a lawyer a day or two ago taking an acknowledgement of her signature to a legal document over the telephone from a woman who was several miles distant from his office, and afterward administering an oath in the same manner. When it is resulting to the control of th manner. When it is possible to see the person speaking over a telephone it will be feasible to take the testimony of witnesses in a case being tried in court over the telephone and to transact much other business in this way which could not be so transacted heretofore. The

DR. PEARSONS' GIFTS

WHAT WHITMAN AND PACIFIC UNI-VERSITY HAVE RECEIVED.

Heads of the Two Institutions Tell How the Money Was Given and Expended.

In the history of the development of Whitman College, of Walla Walla, and Pacific University, of Forest Grove, the benefactions of D. K. Pearsons, the Chicago millionaire philanthropist, will stand out prominently as having given néeded aid at critical periods in the ex-pansion of the two educational institutions. The heads of Whitman and Forest Grove have prepared for The Oregonian statements of Dr. Pearsons' gifts. President Stephen B. L. Penrose, of Whitman College, says:

"Dr. Pearsons began his benefactions to

PORTLAND WOOLEN MILL AT SELLWOOD.

versity faculty, writes under date of Jan-uary 2, as follows: "The dispatch from Chicago in today's

Oregonian, relative to Dr. D. K. Pear-sons and his plans of future gifts to Western colleges, and the mention of Paclific University as being one of the insti-tutions which he looks upon with spe-cial favor, is gratifying to all friends of the university. During the last 10 years Dr. Pearsons has given nearly \$3,000,000 to colleges in different parts of the country; for the most part to the smaller institutions in the West. He says that he formed his pians to do this when he first went to Chieses 10 years are white still went to Chicago 40 years ago, while still a poor man. And he declares that, though he has given away so much, he has now more than when he began his

children, and plans to dispose of all his property while he lives. His health is still vigorous for a man of his years, and he looks personally after his large business interests, going into his office in Chicago every day. He has aiready donated to Pacific University \$50,000 giving \$15,000 seven years ago to complete Marsh Memorial Hall, and in 1898 sending his check for \$15,000, when the additions other business in this way which could onto be so transacted heretofore. The idea of seeing as well as hearing by telephone is not generally accepted as a fact, one to be so transacted heretofore. The idea of seeing as well as hearing by telephone is not generally accepted as a fact, one to be for endowment, the income alone when the gifts will be made, he has not

per cent of the Dingley tariff rates. The bill as it passed the House requires full Dingley rates, but it will, according to the authority in question, not be accept-ed without amendment on many points by the Senate, and when the bill goes into conference it will be modified as already noted, to 50 per cent of the Dingley rates in the matter of sugar.

The sugar interests that received this report expressed themselves as absolutely confident of the reliability of the fore cast of the bill's future progress, and the point was made that the 50 per cent reduction in duties on sugar coming from the Philippines would mean an easy step to a corresponding reduction in the rates from Cuba.

There probably has never been a time when so many rumors connecting the sugar industry with efforts to influence National legislation have been current. The rumors are general rather than specific, and while they are quite freely current in financial and sugar circles it seems impossible to trace them to any definite, responsible source. The first of these reports was that the beet sugar in-terests have established a fund for the purpose of preventing any relief to Cuba in the form of reduced duties on its sugar. And the recent decline in sugar prices was in turn declared to reflect alleged definite information that any reciprocity with Cuba, if it involved a reduction in sugar duties, was out of the question. The al-leged fund is, it is asserted, being util-ized to pay the expenses of most expert lobbyists on behalf of the beet sugar in-terests. The second report took the form of a statement that the decline in Sugar shares had been an adopt move to allow shares had been an adroit move to allow legislators at Washington an opportun ity to "load up" at low prices in the open market; that the tip had been given that it was the time to buy, and that the sugar refinery interests were depend g upon self-interest among legislators cause them to vote for a modification of the duty with Cuba, on the ground that such modification would be of direct profit to the Sugar trust and should therefore be reflected in a higher value for Sugar

WHAT'S THE USE Sticking to Any Habit When It Means Sure Death?

Old King Coffee knocks subjects out tolerably flat at times, and there is no possible doubt of what did it. A lady gives her experience. "I used to have liver trouble nearly all of the time and was compelled to take some liver medicine like calomel which relieved me only for a little while. Then ever once in a while I would be suddenly doubled up with an awful agony in my stomach. It seemed as though every time I took a breath I would die. No one could suffer any more and

Taking the musical programme as whole, it was a trent to hear such excel. lent work with the voice and organ, and the choir's next vesper service will be over in bed, and my stomach did not digest even milk. The doctor finally told gest even milk. The doctor finally told

me that if I did not give up drinking coffee I would surely die, but I felt I could not give it up.

"However, husband brought home a package of Postum Food Coffee and it was made strictly according to directions. It was the only thing that would stay on my stomach, and I soon got so I liked it very much.

"Gradually I began to get better, and In Sugar securities was that interests re-sponsible for the recent demoralization in health. Now I am in perfect condition.

TUB TRUTHS.

DROP of ink will color a whole glass of water. It is an inch of yeast which makes a pan of bread rise, and a single cake of soap containing unabsorbed alkali can ruin a hundred times its cost in laces and fine embroidery. After all, is it wise to take such risks with common soap? Of course you can get along without Ivory Soap. So can a wagon without axle grease-but it goes hard.

OO brittle and tender, so in every way delicious, are only possible by using The H-O Co.'s Pancake Flour, a combination of rice, corn and wheat flour, ready to use.

Contracted Disorders

Under the treatment pursued before irrigations were established six weeks was deemed the duration of an acute contracted disorder. If it proceeded beyond six weeks it was considered to have gone past five years, covering over 500 cases, we can show that 90 per cent of our patients have recovered in 14 days or less. It is, therefore, equally proper to hold that a case not entirely cured within two weeks must be considered a chronic one, and some complication has arisen, for which the patient should see a specialist. We invite free consultation on this subject, and offer an experience of over 20 years; in fact, we can positively assert that we have never failed to cure in a single instance.

San Francisco Office, 90 7 Market, Corner Sixth.

NEW ENTERPRISE WILL START ABOUT FEBRUARY 1.

The Portland Woolen Mill, located on Johnson Creek, at Sellwood, will be started about February 1. The building and the east side stands the two-story warchouse, connected with the main building with a wide extension, and between is the While the power will be furnished by a turbine water wheel a steam plant has been installed for emergencies. factory faces the north, and the entrance into the office and packing-room is from this direction. The big flume, which will take the water of Johnson Creek, a quarter of a mile northeast, is 7x8, and strongly constructed. It is estimated that there will be about 70-horsepower most of the year, except in the extreme dry season. The mili is a six-set woolen plant, with new and modern machinery.

Experienced men have superintended the placing of the machinery. The large room in which the looms and other machines stand is lighted from above, the roof being constructed on the saw-tooth plan, with great glass space. Certainly ventilation and lighting are perfect. All the shafts for the transmission of power are under the floor. On the east side of the mill there is a sidetrack connecting with the Southern Pacific Railway. A wagon road will be opened to the plant from Milwaukie road. The capital stock of the company was originally \$50,000, but this has already been doubled, although but \$75,000 is invested, the remainder being held in reserve. W. P. Olds is president of the company, and E. L. Thompson secretary. Since construction was begun on the mill, there has been a considerable building movement all about the place in anticipation of the starting of

The Sellwood Sub-Board of Trade will celebrate the starting of the mill by a banquet to be held either at the mill or in

plumbing for a hot-water kitchen boiler and in part a pump for driving beer from that the wisest course will be to deprive a cellar. There is a motor connected the ambitious crowd of young Democratic Senators of their opportunity to make pomix drop by drop, and a phosphorescent vapor, which falls on the mirror, all go to make up an apparatus which puts one in mind of that used by magicians, soothsayers and fortune-tellers of the dark ages. However, it may be all right, all right. Dr. Sylvestre states that his liscovery was brought about in the fol-owing manner: He has a "theater tele-phone" in his laboratory, and one evening as he was listening to an opera suddenly on the white wall of the room he saw depicted the stage scene from the theater, colors and all. Investigation revealed to him the secret, which at first 'sight" impresses most as incredible There is nothing haif as incredible about Dr. Sylvestre's invention as there is about his seeing the view of the stage scene on the wall of his laboratory, and if any one can believe that, he can swal-low the entire wonderful discovery and

But a Persistent Cough, but Permanently Cured by Chamberlain's Cough Remedy.

cough Remedy.

Mr. H. P. Burbage, a student at law, in Greenville, S. C., had been troubled for four or five years with a continuous cough, which, he says, greatly alarmed me, causing me to fear that I was in the first stage of consumption. Mr. Burbage, having seen Chamberlain's Cough Remedy advertised, concluded to try it. Now read what he says of it: "I soon felt a remarkable change, and after using two bottles of leadership as will deeploy and the front, even after Gorman gets back. It is possible, of course, that the demoralized and disheartened Democrats, in their esser and desperate search for a leader.

Cough Remedy.

Mr. H. P. Burbage, a student at law, in Greenville, S. C., had been troubled for four or five years with a continuous cough, which, he says, greatly alarmed me, causing me to fear that I was in the first stage of consumption. Mr. Burbage, having seen Chamberlain's Cough Remedy advertised, concluded to try it. Now read what he says of it: "I soon felt a remarkable change, and after using two bottles of the 25-cent size, was permanently cured." A persistent cough is one of the first symptoms of consumption, and his fear of that disease was well founded. He exercised good judgment in selecting a remedy, as this preparation is one of great merit and is famous for its cures. All druggists sell it.

joints in his vertebra, and all that sort amount was secured and a firm founda-of thing, no one can say it is impossible or impracticable.

early-modification by the President in a one for himself; so, until the French Gov-resolution that will define what tariff con-ernment buys his invention for \$5,000,000, for whose heroic lives he had long felt cessions shall be made to Cuba when the the price he wants, the doctor declines to a deep admiration. This gift was condiexhibit the device. The illustrations he has allowed to be made of his invention dormitory, to cost not less than \$25,696. are rather curious, in part resembling the The effort to secure this was soon successful, and in 1839 both buildings were completed, \$10,000 of the necessary amount having been given by citizens of Walia Walia. As the largest individual giver was Mrs. Frederick Billings, of New York City, the dormitory, which cost \$31,000, was named Billings Hall, in memory of her two sons Parmly and Ehrick. These two buildings are large and handsome structures, of light-colored pressed brick and stone, probably the most beautiful

college buildings in the Northwest.
"Meanwhile Dr. Pearsons had shown a of the college, and had given \$30,000 additional on separate occasions. Last Spring he again manifested his affection for Whitman and his close watch of its actual necessities, when he offered us \$50,-600 more for endowment, conditioned on the securing of a giris' dormitory, to cost not less than \$25,000. It had become evi-dent that the rapidly growing college could not live on an endowment of only \$200,000, with rates of interest steadily falling year by year. Moreover, the Ladies' Hali, as the old dormitory for girls was called, was overcrowded and inadequate to present needs. He has kept in the closest touch with the col-lege and thoroughly understood the condition of affairs.

"In every case he has given spontan-eously, without any solicitation or sug-I have never asked him to give a dollar for any object. His wise over-sight and great-hearted generosity are the chief springs of his giving.

...... The New Year's Oregonian.

The New Year's Oregonian for 1902 contains 64 pages. The subjects covered fully are Portland, including the trade and financial strength of the great city of the Pacific Northwest, every resource of Oregon, Washington and Idaho, the Lewis and Clark journey of exploration and the World's Fair that will be held in Portland in 1905. The price of the New Year's Oregonian by mail to any address in the United States or Canada, postage prepaid, is 9 cents a copy.

college has not yet secured the money for the girls' dormitory, and therefore this, his last offer, still hangs in the air. But plans for the building are being prepared, and we hope to be able to go forward with the construction as soon as Winter is over. When this shall have been done a new era in the life of the college will begin, and the total of Dr. Pearsons' gifts to Whitman will have reached the splendid sum of \$170,000.

.........

"As to his future intentions, I can say othing. He keeps his own counsel. nothing. He keeps his own counsel. But I infer from what he has written to me that he has not reached the end of his benefactions to Whitman, and that the sooner the college meets this last offer of his, the sooner he will again give to supply its needs. May other friends of the college come to its aid now and make it possible for it to grow, as grow it must! With the completion of the girls' dormitory, \$400,000 will have been given to Whitman College in the last

seven years.

W. N. Perrin, dean of the Pacific Uni-

but in these days, when, by the use of the X-ray machine, it is possible to look through a person, count his ribs and the meet this offer, but at last the whole he intimated that his further gifts would be made to the permanent endowment, not to the erection of buildings. "The fact that the permanent endow-

ed, appeals powerfully to so shrewd a business man as Dr. Pearsons, and gives him confidence that what money he may give will be used exactly as he designs it to be. Incidentally it may be said that Dr. Pearsons has full confidence in the future development of this Northwest of the great cities of the country."

FINE MUSIC AT CATHEDRAL Large Congregation Attends Vesper Service.

There was a large and reverent congregation present last night at the Cathedral of the Immaculate Conception, to "Meanwhile Dr. Pearsons had shown a lively interest in the growth and needs of the college, and had given \$20,000 addition to college. service was excellently rendered, and re-flected credit on the director of the choir, Mr. J. Adrain Epping, and the organist, Miss Edith M. McGinn. The vespers chosen were those written by Eduardo Marzo, opus 26, and the theme is a grand, dignified one. The opening "Domine ad dignified one. The opening "Domine ad Adjuvandum" is a fugue movement beginning in the key of A flat, and the motif is entrusted to the bass. It requires careful reading and attention to do the music justice but Mr. Enping's quartet accomplished this last night. The singing was bright, and the

intonation sharply taken. Mr. Beicher's tenor solo, "Fear Not, Ye, O Israel," writ-ten by Dudley Buck, of Brooklyn, was sung with fine dramatic feeling and breadth of interpretation. Godard's "Prayer," sung by Mrs. Walter Reed, was one of the most enjoyable bits of the service, and it was a pleasure to hear service, and it was a pleasure to hear the singer's mellow, even tones, and distinct articulation. Mr. Epping followed in a baritone solo by Max S. Witt, "The Everlasting Light," and the selection suited the singer's emphatic, vigorous style. In the grandloso movement, "The Light Is Come," Mr. Epping displayed quite a wealth of tone, and his declamation was very effective. The quaret then sang a pretty setting of the familiar sang a pretty setting of the familian hymn-anthem, "Ten Thousand Times Ten Thousand," from the productive pen of P. A. Scheneker. Mrs. Walter Reed was very successful with a lovely "O Salutaris," by Adam Geibel, and the mel-ody just suited her style. She sang the difficult plano passages softly and with artistic expression, especially in her low-

New York Journal of Commerce. One idea which found frequent expression in connection with the recent declines

Some circles from what was considered a most excellent source that the final form the bill providing duties on merchandles imported into the United States from the Phillippines would take, so far as sugar was concerned, was a modification to 50 ton, Mich.

TALK OF CONCESSIONS. Senate May Yet Amend the

Copper had taken up Sugar as an object of manipulation now that the life had left the Copper specialty; and the extreme activity with which outstanding short contracts in Sugar were covered was pointed to as strong evidence of this situation.

Still another explanation advanced for the rise was a report received in high Sugar circles from what was considered a fit of those suffering from the poleon-
