

SECOND SUPPLY BILL

House Passes Legislative and Judicial Appropriations.

ADOPTS BUT FEW AMENDMENTS

Senate Passes the Pension Bill and Turner of Washington Speaks on the Philippine Question.

WASHINGTON, Feb. 7.—The House today passed the legislative, executive and judicial bill, the second of the regular supply bills. As passed it carries \$25,718,000, which is in excess of the current law. Only two amendments of importance were adopted. One provides for a commission to redistrict the legislative districts of Oklahoma, and the other authorizing the President, in his discretion, to cover into the civil service the temporary clerical force employed on account of the war with Spain. By the terms of the amendment the President must place all or some of them under the civil service.

The Philippine tariff bill was taken up early in the Senate today. The session was notably quiet. Turner (Dem., Wash.) delivered a carefully prepared speech on the general Philippine question, and had not concluded when the bill was laid aside for the day. After the adoption of only minor amendments, the pension appropriation bill was passed early in the session.

THE DAY IN DETAIL.

Debate on Legislative, Executive and Judicial Bill in the House.

WASHINGTON, Feb. 7.—This was the day in the House which, under the rules, belonged to the committee on war claims, but which, because of the absence of the committee, was devoted to the consideration of the legislative, executive and judicial bill. The House then went into committee of the whole and resumed the consideration of the legislative appropriation bill.

Smith (Dem.) offered an amendment to increase the salary of the governor of that territory from \$3000 to \$2000, and used his amendment as a text for an assault upon the appropriation committee for discriminating against Arizona, New Mexico and Oklahoma, and in favor of Hawaii in the matter of salaries for executive and judicial officers.

Robinson (Dem., Ind.) suggested that Newlands (Ill., Rep.) should append to his resolution for the annexation of Cuba, recently introduced, the statement that "the annexation of Cuba should be in line with the Government's general policy."

Newlands resisted this statement, declaring that his proposition was not in the line of perpetuation of a colonial policy, that, on the contrary, it was in exact accord with our traditional policy of annexing adjacent territory necessary for the defense of the United States.

On motion of Flynn (Rep., Okla.), an amendment was adopted to provide for the appointment of a commissioner of the territory into legislative districts prior to the next territorial election.

Littauer (Rep., Wis.) offered an amendment to authorize the President, in his discretion, to place in the classified service the temporary clerks appointed during the war with Spain whose services have been since retained.

Jenkins (Rep., Wis.) proposed an amendment to the amendment to require the President to place all the temporary clerks or none in the classified service. About 125 clerks at present are on the temporary roll.

Hill (Rep., Conn.) offered an amendment to require the Controller of the Currency to furnish each year a list of all persons employed by the Controller, whether paid out of the United States Treasury or out of the proceeds of failed banks.

Hemenway (Rep., Ind.) said that the purpose of the amendment is to secure information as to the existing abuses in the management of the currency. The bill was then passed, and at 5:05 P. M. the House adjourned.

When the Senate convened today it disagreed to the amendments of the House on the urgent deficiency bill, agreed to the conference asked, and appointed Hale, Allison and Teller as conferees on the part of the Senate.

At the conclusion of routine business Patterson made a statement in relation to what he had said concerning Governor Taft's attitude toward the treason and sedition laws enacted by the Philippine Commission. Patterson said he had stated in his own way the impression Governor Taft's original statement had made upon him.

Gallinger, chairman of the pension committee, called up the pension appropriation bill and offered an amendment, which was adopted, prohibiting the collection of any fee for adding or changing the passage by Congress of any special pension bill.

At the conclusion of the session, the House adjourned. The session was notable for the quietness of the day. Only two amendments of importance were adopted.

At the conclusion of the session, the House adjourned. The session was notable for the quietness of the day. Only two amendments of importance were adopted.

THE ADMIRAL'S REASONS

WHY HE RECOMMENDED ACCEPTANCE OF PANAMA OFFER.

Explains to Senate Committee the Engineering Features of the Two Routes—Other Hearings.

WASHINGTON, Feb. 7.—Admiral John G. Walker, chairman of the Isthmian Canal Commission, testified before the Senate committee on interoceanic canals today.

In reply to these inquiries Admiral Walker decided to present the engineering features of the two canals. Senator Harris questioned him especially with reference to the difficulty of excavating for the Panama dam, developing the fact that it would be necessary to sink the proposed piers to a greater depth than had ever been done for such a purpose.

The foundation of the pier will be 125 feet below sea level, and the witness said there were differences of opinion as to the atmospheric pressure and the possibility of seepage at this depth in that location.

DECIDES NOT TO ACCEPT CHAIR AT UNIVERSITY OF OREGON

Professor A. R. Sweetser.

PACIFIC UNIVERSITY, FOREST GROVE, Feb. 7.—Professor Albert R. Sweetser, of Pacific University, today decided to refuse to accept the chair of biology at the University of Oregon, for which he has been recommended to the regents by President Strong.

Professor Sweetser returned from Eugene a day or two ago with the intention of tendering his resignation as instructor in biology and botany at Pacific University. He is one of the most able and popular instructors at the university.

The announcement that he was considering the offer of the chair at the University of Oregon was made known to the faculty and the students. All these friends were much pleased today when Professor Sweetser said he had reconsidered his resignation, and would not accept the offer.

concerning the possibility of utilizing the Chagres River as a part of the canal, and admitted that the stream, which is torrential, could be safely confined. With reference to the estimate that 10 years would be necessary to build the Panama Canal, while eight years would be sufficient to construct the Nicaragua route, he said the difference against the Panama route was due largely to the extent of the great Culebra cut and the Bohio dam.

He thought that in ordinary weather steam vessels would be able to cross the Bohio through the Panama canal without being towed, but that towage might be necessary when the winds are high. He expressed the opinion that the Nicaragua route would possess an advantage over the Panama harbor, in that vessels would be immediately able to avail themselves in the former of the trade winds, while in Panama Bay they would not secure this advantage until towed out to sea.

He thought that good harbors could be cheaply secured at the western terminal of both routes. The committee held an afternoon session, during which Senator Morgan questioned Admiral Walker concerning the difficulties of constructing a canal by the Panama route.

He asked especially about the effect of the water discharge through the spillway from the artificial lake to be made by the construction of the Bohio dam. In response Admiral Walker said that he thought it possible that the water would find its way back into the canal, but he did not doubt that the canal would be injured by it if it did.

Admiral Walker will continue his testimony tomorrow. THE PHILIPPINE REVENUES. Governor Taft Continues to Give Senators Information.

WASHINGTON, Feb. 7.—The Senate committee on Philippines today continued its consideration of the question of the revenue of the Philippine Islands, Governor Taft still being on the stand. He began his statement with an explanation of that portion of his testimony of yesterday to the effect that sentiment was the main reason for asking a substantial reduction of the rates of the Dingley law so far as they apply to the Philippines, saying he feared that the statement might be misunderstood.

The idea he had meant to convey by that statement was that the Philippine Commission welcomes every evidence of a desire on the part of the American people to aid the Philippine people, and he believed that any such evidence of discrimination would aid the Philippine Commission in its work.

He said that the statement which he had made was not intended to convey the idea that the Philippines are not a part of the Philippine republic, but that such a restriction would be an advance in trade by "leaving and bounds." He did not mean to withdraw the recommendation on the contrary, he would be glad to have a reduction of 50 per cent.

Governor Taft also explained that he had not intended to convey the idea that the Philippines are not a part of the Philippine republic, but that such a restriction would be an advance in trade by "leaving and bounds." He did not mean to withdraw the recommendation on the contrary, he would be glad to have a reduction of 50 per cent.

Governor Taft next explained the committee which he had set for harbor improvements, involving an expenditure of \$2,000,000, and in response to questions by Hale he said that contracts also had been let for the construction of 20 launches or small sea-going boats for the transportation of mail and provincial officers. The cost of these boats would be \$1,000,000.

Governor Taft asked for power to pass general corporation laws. Most of the enterprises there now, he explained, are controlled by English capitalists. Dubois wanted to know if it would not be advantageous to repeal Governor Taft's "which the commission wishes to avoid."

Reverting to the subject of corporations, Governor Taft thought it would be wise for Congress to give to the commission

some discretionary power in the matter of building railroads. Governor Taft said that there is nothing more important to him than to authorize the purchase of the lands held by the friars. Nothing gives the Philippines so much trouble as the friars. It is hoped that the friars will go to other countries when their lands are purchased, but there is no power to evict them.

Governor Taft brought up the matter later referred to and explained by Senator Patterson on the floor of the Senate, relative to the treason statute of the Philippine Commission. In the course of his remarks Governor Taft said: "While I should like very much to earn the approbation of Senator Hoar for humanity, I must decline to do so at the expense of facts or at the expense of seeming to avoid the responsibility which is mine as much as any of my colleagues."

ANTI-ANARCHIST BILL. House Committee Reports on the Purposes of the Measure. WASHINGTON, Feb. 7.—Chairman Ray, today presented the report on the bill for the protection of the President and the suppression of crime against the Government. The report states that the committee has carefully considered the many anti-anarchistic measures, and has sought to present a wise, conservative, constitutional and effective measure. The purposes of the bill are summed up as follows: First, prevent resistance to and protect the President and Vice President of the United States and those by law in line of succession to that high office; second, protect the Ministers and Ambassadors of foreign governments accredited to and within the United States; third, prevent the open and deliberate approval of certain crimes, and also certain unlawful teachings, which, if permitted, are calculated to incite to breach of lawlessness and crime against the Government; fourth, prevent the coming to or naturalization of this country of those who teach or entertain such pernicious doctrines; fifth, prevent conspiracies in the United States to murder the rulers of other civilized nations; sixth, provide adequate and uniform punishments for those who are nevertheless committed, and the offenses against Government intended to impair or overthrow the Government of the United States.

MEN OF PERFECT NERVES AND THEIR MEDICINE.

Paine's Celery Compound Steadies the Hands That Run the Great Passenger Trains.

WHEN disease attacks the nervous system, the symptoms that at once manifest themselves differ in different persons. When the intricate and wonderful nervous system is in perfect condition, no man or woman is sick, except from infectious disease.

Sleeplessness, dyspepsia, rheumatism, most of the weaknesses and ailments that exhibit themselves in different ways in men and women are now known to be only the local symptoms of the beginning of a diseased nervous system.

It is no more possible to cure these afflictions by superficial treatment than it is to dam the Mississippi by a bar of sand. The only effective cure for these diseases is the repair of nervous tissue.

It has been absolutely proven that Paine's Celery Compound cures nervous exhaustion in every aggravating form, as no other remedy in the world can, or does. In fact, it was by the urgent advice of the ablest medical authorities in this country that this

VALUE OF DANISH ISLES

LATEST ACQUISITION OF GREAT STRATEGIC IMPORTANCE.

Provisions of the Treaty Explained—Report of the Senate Committee on Foreign Relations.

WASHINGTON, Feb. 7.—The recent favorable report by the Senate committee on foreign relations on the treaty for the cession of the Danish West Indies was accompanied by a written statement by that committee to the Senate. This report holds that during 1900 the islands exported to the United States sugar, molasses and distilled spirits amounting to \$58,345, and that during the same period the importations from the United States amounted to \$24,554. The annexation of the islands was sought by the United States years ago, and as far back as 1861 Denmark declined to sell the islands for \$5,000,000, but made a proposition to part with them for \$2,500,000. Secretary Sewell offered \$2,500,000, which was declined. He afterward agreed to pay that amount for the islands of St. Thomas and St. John, but the trade fell through because of complications which arose. Cancelling the report says:

"These islands, together with Porto Rico, are of great importance in a strategic way, whether the strategy be military or commercial. St. Thomas is a natural point of call for all European trade bound to the West Indies, Central America or Northern South America. These islands, together with Porto Rico, form the northeastern corner of the Caribbean Sea and are of great importance in connection with the American isthmus, where a canal will be constructed between the Atlantic and the Pacific. They are of first importance in connection with our relations to the region of the Orinoco and the Amazon and with our control of the Windward Passage. In view of the presence of a French regiment in the city celebrating the greatest incident of expansion in history would be most seemingly and appropriately France and America should be united in their efforts to acquire more ways than one, and an American regiment escorting a French regiment through the expeditious gates on the first day of the fair world. Mr. Skiff says, 'This is an event worth attention the world over.'"

MINERS DID NOT REPORT.

Big Mine of Lehigh & Wilkesbarre Company Forced to Shut Down.

WILKESBARRE, Pa., Feb. 7.—The big Nottingham mine, of the Lehigh & Wilkesbarre Coal Company, at Plymouth, had to suspend operations today because a sufficient number of the employees had not reported for work. The mine, when in full operation, employs 300 men and boys. The trouble has been brewing since Monday when one of the inspectors refused to permit a committee of the United Mine workers to examine the working cards of the men, and subsequently disallowing the men composing the committee who were employees of the mine. To-day a majority of the miners did not report for work.

Miners' Scale Restored.

INDIAN HILLS, Feb. 8.—In a secret session, which began last night at 6 o'clock and ended after midnight, the

Dollars Saved

by using PEARLINE. You save a few cents by buying some cheap washing powder, but you lose a hundred times as much in damage to your clothes. Where's the economy? They are entirely different from PEARLINE, which is absolutely harmless, and cheapest to use.

Pearline: Saving

The Nerves Control and Determine the Health of Every Function of Brain and Body.

monial for the benefit of the thousands of workmen in every calling who need a remedy that will restore nervous energy and purify the blood, and make and keep them well:

"An engineer on a fast passenger train came to the New York Central & Hudson River Railroad, running between New York and Albany. This is the fastest passenger train on the American Continent.

"I have to be thankful for a good constitution to begin with, which has enabled me to keep up this work for the long time I have been engaged in it. There have been times, however, when I have felt run down or worn out, and needed a tonic to brace me for my work."

"I have taken Paine's Celery Compound to do this work for me and it is simple justice to say that it has done the work well. Paine's Celery Compound has done me no end of good. I took it because I had heard it spoken of as the best medicine sold anywhere, good for those who suffer from brain fatigue, from the depletion of the system from any cause, and for those who are building up after sickness."

"What I had heard of it proved to be true in my case and I do not hesitate to recommend Paine's Celery Compound for a nerve-building or force-building medicine. I have taken more of it than of all other medicines for the last twenty years. It has done the work for me and I feel sure it will do it for any one else."

"W. H. RAYMOND." New York, Nov. 10, 1901.

Strelking Italians Threaten.

CONNELLVILLE, Pa., Feb. 7.—Tonight on a special train Sheriff Frock, with 15 heavily armed deputies, hurried to Brownsville, near which point 30 striking Italians threatened violence. Late tonight a telephone message from Brownsville says there is no outbreak as yet, but trouble is momentarily expected.

Cold Storage Plant Destroyed.

APPLETON, Wis., Feb. 7.—The offices and warehouses of the Neenah Cold Storage Company were destroyed by fire tonight. The fire started in the ice house, and spread to the main building. The entire structure and contents are a total loss.

Sewer Pipe Burns.

RED WING, Minn., Feb. 7.—The Red Wing Sewer Pipe Company's plant was destroyed by fire tonight, entailing a loss of \$3,000.

Impaired Digestion

May not be all that is meant by dyspepsia now, but it will be neglected. The uneasiness after eating, fits of nervous headache, sourness of the stomach, and disagreeable belching may not be very bad now, but they may be if the stomach is suffered to grow weaker.

Dyspepsia is such a miserable disease that the tendency to it should be given early attention. This is completely overcome by Hood's Sarsaparilla which strengthens the whole digestive system.

Hood's Sarsaparilla

which strengthens the whole digestive system.

CARTER'S LITTLE LIVER PILLS

SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

Small Pill. Small Dose. Small Price.
