Great Imperial Army Contemplated.

NEW YORK, Feb. 10.-The Government is understood to be contemplating the de-sirability of raising an imperial army of considerable dimensions, says a dispatch to the Tribune from London. The idea is not a novel one, but it always hitherto has been regarded by military people here as impracticable. The War Office committee is now, however, said to be seriously considering a system for the con sideration of an imperial army by colonial aid instead of leaving the young nations of the empire to support only sufficient irrgular soldiers for local defense. There undoubtedly are a great many difficulties in the way, but if it were possible to carry out such a project the ties which bind the mother country and the colonies would be drawn tight, indeed.

The greatest tangle in city affairs will be in the tax office. So far as can be ascertained, the records of the depart-ment are destroyed. There is a set of

books which shows the valuation, etc. of each piece of property in the city, and the Assessors have their field books, from which all this could be duplicated without overmuch work. It is said, however, that it is almost certain the records showing who paid their taxes, and who had not, are destroyed, and that there is not in existence anything from which the infor-mation could be obtained.

Work of Clearing Up Not Yet Begun,

The work of clearing up the burned district has not begun, but the firemen were busy until night with ropes and dynamite tearing down the shaky walls that endangered those who had to be inside the burned area. So well did this work progress that in the afternoon the public was admitted to the ruins, and sentries were posted at every important point keeping the crowd moving briskly. and viewed the rules during the two hours and a half allowed them. Dozens of tiremen and the volunteers who labored with them were slightly injured by falling bricks and timbers, burned by flying fire brands or temporarily overcome by smoke, but only a few of them needed surgical or medical attention. The small casualty list is explained by the fact that the perple had ample warning and time to abandon their homes before the flames came upon them.

There was comparatively little suffering on the part of those rendered homeless by the fire, and the armory, churches and public shelters opened their doors to but few applicants during the night. Prac tically every home that escaped the affmcs was thrown open, and nearly every refu-gee found shelter at the home of some
