Cipher Too Many on Sheep Limit. The attention of the Interior Department has been called to the fact that its limit of sheep to be allowed to graze in the Washington forest reserve during the coming season is just 10 times the number ermitted last year. An investigation disclosed the fact that the limit of 250,000 was not what was intended, and through a clerical error a cipher had been inserted where it was not wanted. The number of sheep to be admitted to the reserve east of the divide and west of the Stikeen River and Lake Chelan will be 25,000. The Mount Rainier reserve will have 172,000 east of the Cascade Mountains, where it had 250,000 last year. During the past season it was found that this reserve had been overgrazed, much to its detriment, hence the

It is stated that the lands become better by allowing stock to run over them for several years, and the lands, when leased, bring from 10 to 15 cents per acre per year rental. About 10,000 acres were leased in Douglas County last week at these prices.
