## THEIR PLACES CONE

Result of the Freighthandlers' Strike at Boston.

## TROUBLE NOT ENTIRELY OVER

Railroad Companies Refuse to Dis charge Men They Have Hired in the Place of the Strikers.

BOSTON, March 14.-The labor situation in Boston tonight is extremely perplexing. To give weight to statements of labor men who speak without authority, and who say that harmony is not restored, is to make the outlook far more critical than at any time since the Allied Freight Transportation Council began its fight against the R. S. Brine Transportation Company. On the other hand, Governor Crane and the State Board of Arbitration believe that the problem is being solved quite rapidly, considering the immensity of the strike, and only ask for time and patience from both laboring and business men to relieve all obstacles to a resump tion of freight traffic under ordinary con-

As a matter of fact, the strike was con pletely broken today, although troubles cropped out in many quarters, some of which were arranged without delay and others dragged along in an uncertain state, so that they came in for considera-tion by the labor bodies late tonight. During these meetings, judging from what was argued by the men, independent strikes of bodies seem impending, but the leaders in the strike just ended are sanguine that they still hold control of the entire organized labor body and will be a strike of the control of the contr not again be obliged to order a strike of the freight handlers or its more serious accompaniment, a sympathetic strike of affiliated bodies. Tomorrow will show more clearly the conditions in this re-

The special side of the strike-breaking today presented an army of workingmen rushing helter-skelter to get their old places. More than 20,000 places had been vacated, but fully 10 per cent of the men found their places filled. This was the reason for friction all day, affecting only the men themselves, for concerns were too busy raising the embargo on goods in their keeping to give heed to talk of

Freight began to move at docks, freight sheds, from and to wholesale houses and factories and upon the streets, and by night great inroads had been made on the four days' accumulation of goods. With the breaking of the strike employers of freight-handlers, team drivers or lumpers rushed into print with calls for more help. Even concerns which heretofore have been bound to unionism seem to have grasped the opportunity of hiring whom they liked. It is on this point, above all others, that the critical phase

of the situation tonight hinges. The real battle today was between the men who control the strike and the rep-resentatives of great interests who had been prevailed upon to consider certain propositions as a way to the settlement of the trouble. As for three days past, was Governor Crane, at his office at ise, who stood between the parties at tesue.

The Governor received many delegations during the afternoon and by great exertion got together President John M. Hall, of the New York, New Haven & Hartford Railroad; President Tuttle, the Boston & Maine, and Samuel Hoar, general counsel for the Boston & Albany, at the Statehouse at 4:30 o'clock. W. E. Chamberiain, general manager of the eastern division of the New Haven Railroad, also was admitted to the executive chamber. Selectmen were with the Gov-ernor an hour and a half. In the meantime, a number of the labor leaders, who had been holding conferences with the State Board of Arbitration and at the labor quarters, arrived and were taken into the council chamber. For an hour the Governor had alternate interviews between employer and employe.

During these conferences, Secretary Easley, of the Civic Federation, came into the waiting-room and saw the Governor. He was accompanied by Frank P. Sargent, of Cleveland, chief of the Brotherhood of Locomotive Firemen, and George E. McNeill, of this city. Mr. Easley said that he had attended a meeting of the longshoremen during the afternoon and there with Mr. Sargent and Mr. but at the close the men all voted to sus tain the officers and to return to work.
The several conferences ended early this evening, the men leaving before the rail-The Governor then granted an interview

with the newspaper men. He said:
"The situation looks very much more encouraging than last night. The rail-roads have all agreed to take back as many men as possible without discrimi-nation. As far as the steamship lines are concerned. I understand that the men have returned, or practically all of them. The railroad companies will not consent to discharge men they have hired in place to discharge men they have hired in place of the strikers, but they are well disposed to the men and are anxious to take back as many as possible. The question of the loading and unloading of teams, while it came up incidentally today, was not very much discussed. It will be

taken up next week."

The Governor further said that President Tuttle and the Boston & Albany offcials had used every effort to get the men back. At East Boston, where 30 of the Boston & Maine men went out, all had been taken back. At the same place, where 120 of the Boston & Albany men went out, 108 had been given places by the railroad company. In the case of the New Haven Road, he said, the com-pany would be willing to take back as many as possible, but the question of requiring the men to sign an agreement has ot yet been arranged.

freighthandlers formerly employed turned to work, to do so in the morning, The men finally revoted to go back tomor-row. Freighthandlers of the Boston & Maine Railroad voted to return in the morning, but inasmuch as the company has already a number of men at work in their places, and is reported as having 200 more new men to put on, it is not just clear how many of the old employes will succeed in regaining their positions. The members of O'Connell Assembly, Long-shoremen's Union, of Charleston, exressed their determination to apply for

their old jobs tomorrow.

The different steamship lines entering Charlestown have quite a number of Ital-iane and French Canadians taking the places of strikers. The action of the lumber dealers in closing their yards until Monday is taken by the lumber teamsters as amounting to a lock-out, and consequently at their meeting no vote was taken that the men should return tomor-

Representatives of the trans-Atlantic steamship lines here have agreed to a res-olution that if their regular longshoremen do not return on Monday morning they will not be afforded an opportunity to get back on the former terms. Tonight Nee-dles Island Assembly of Longshoremen

formally voted to return to work. This action relieves all Knights of Labor longnen from the strike.

It certainly can be stated without fear of contradiction that previous to our announcement of the importance of urethral inflammations and chronic prostatic affections as factors in disorders of men that treatment was conducted in an impracticable and unsuccessful manner. Our brilliant cures and the adoption of our methods by others is proof of its correctness.

Varicocele

In the past few months we have perfected a treatment for these aliments that marks an epoch in the history of medicine. It seems impossible to make further improvements of our methods for the cure of Varicoccie, by rapid vibration, transmitted by a machine so delicately adjusted that there is not the slightest pain. But ten minutes a day is required for its use, and in five days the cure is complete.

Contracted Disorders

Upon the establishment of the irrigation treatment for contracted disor-ders, the time necessary to cure was reduced to two weeks. Our electric Rotary-nump method, for which we claim the entire credit, that uses enor-mous quantities of the irrigation fluid at each treatment, requires less than one week. Devoting our entire time to disorders of the male exclusively, and with an aver-increasing experience. We with an ever-increasing experience, we are naturally in a position to guarantee quick and effective results.

Many Men Treated for a Weakness Which Never Existed

ness Which Never Existed

In the largest proportion of cases of lost vitality, prematureness and the train of symptoms known as "weakness," certain morbid conditions of the urethra and prostate gland, damaged by early dissipation, too-often-repeated and too-long-continued excitement so react on the organs that a condition of diminished vitality and functions is induced. Our knowledge of the morbid changes in the organs themselves is quite clear and full, but how these changes operate on the nerves and apinal cord center are mysteries to the medical profession. Whatever the morbid change may be, however, the effects are apparent to the embarraseed sufferer; those troubles being symptomatic of the above-mentioned and well-defined morbid conditions, it seems that even the unprofessional patient must understand that atomach drugging will not cure, but efforts directed toward repairing the damaged tract will restore. In practice such is the case, as the treatment on these lines never falls to accomplish the desirer result. Colored chart of the organs sent on application.

Castro and Ortis Receive an Ovation at Panama-Final Blow to Be Delivered.

COLON, Colombia, March 14.—The fol-lowing report was obtained from the gov-ernment troops, which arrived here yea-terday from Bocas del Tore: Upon finding the revolutionary attack

upon Agua Dulce, February 22, to be irredstible, owing to the enemy's superior numbers, their artillery and their supplies of ammunition, General Castro tried to retreat to David and Chiriqui, which towns were known to be hard pressed by the revolutionists under Quintero and Perez This is a long and tiresome march of over 200 miles. Shortly after leaving Horconitos a small body of government troops was met. These men reported that Colonel Luque had been killed in battle February 2, and that the revolutionists were in possession of David. General Castro, therefore, decided to try to effect the difficult march across the mountains to Bo-cas del Toro. The march occupied 17 days, during the last five of which bananas were the only obtainable food. Drinking water was plentiful.

General Castro's soldlers report that 800 men on both sides were killed during the fighting at Agua Dulce. The revolutionists lost 550 and the government forces 250 men. It is also said that the Indian chief. Lorenzo, and his half-caste Indians participated in the attacks and killed many of the government soldiers with machetes. The rifle fire during the Agua Dulce battle was deadly and persistent. The din of the rifles was so great that the cannon fire could not be heard. The slaughter and

massacre at this battle are described as something awful.

The government is confident that the revolutionists are still unable to take either Colon or Panama. Reinforcements will doubtless arrive here from the in-

COLON, Colombia, March 14.-The Norwegian steamer Simon Dumels, which arrived here yesterday, bringing Generals Castro and Oritz and 300 men and 60 officers, also had on board about 40 gov-ernment officials from Agua Duice. The officials had all made their way through the woods to Bocas del Toro, where they chartered the Simon Dumois. Castro and Ortiz were engaged with General Her-rera, the insurgent commander, Febru-ary 21, 22 and 23. Herrera is reported have attacked Castro and Ortiz with 3000 troops, while the government com-mander had only 1000 men.

A decree issued at Cartagena March 8 permits the Liberals resident in that city and its suburbs to walk in the streets only from 6 A. M. to 6 P. M. daily. If seen on the streets after 6 P. M. they are liable to be imprisoned until public order is restored.

The Minister of War, General Fernan-dez, has issued a circular letter to the civil and military chiefs of the depart-ments, in which he declares that the recent engagements between the government troops and insurgents were alto-gether favorable to the government, reminds them of the value of individual good example and says that "morality and discipline in the army are the keynote of victory, while demoralization re-sults in laxity and annihilation."

Return of Government Generals Cas. tro and Ortiz. PANAMA, March 14.-The government

Generals Castro and Ortiz arrived here at 11 o'clock this morning, and received one of the most enthusiastic welcomes ever witnessed in Panama. The crowds in the streets leading to the railroad station made traffic impossible. The cheers for the Generals were deafening. Referring to the engagement at Agua Duice February 20, General Castro told the representative of the Associated Press that the government troops, numbering 900 men, were attacked by 3000 revolutionists. On the third day of the fighting both drinking water and ammunition in Agua Dulce became scarce, and General Castro ordered his troops to retreat. To do this the government forces had to break through the rebel lines. General Castro says he knows positively that of the forces under the revolutionary General Herrera, over 700 were killed or wounded. He characterized the bravery of the revolutionists as something extraordinary, and said that many of them were killed within three feet of the entrenchments. in crossing the Andes from Agua Duice to
