The market situation, as usual on Monday, presented no features of special interest. Produce receipts were quite liberal, but prices were well maintained, the only weakness apparent being in butter, which will be uneasy until it takes another drop. Eggs were quite firm, and as all of the poultry on the market was sold out Saturday the market in that direction was firm. The high prices for potatoos brought out some very liberal offerings, and the market was easier yesterday, some of the buyers staying out until matters present a more settled appearance. Onloss were also weaker. There was the psual amount of California produce on the market, and early vegetables from local gardens were also more plentiful. No transactions were reported in hops, and wool was also quiet, although mohair is active. By the end of the week a considerable portion of the mohair cilp will have been soid, as the recent improvement in prices has caused it to move much more freely than last season. The market for oats is now very brink, although receipts are light and stocks in the country are by no means large. Groceries were steady at unchanged prices, the S-cent decline in sugar in the East having no effect locally.

NEW YORK BANK STATEMENT.

NEW YORK, April 18.—There was a fever-ish and excited close in today's stock market, after a day of varying sentiment. The early

sreat financial and railroad interests are now striving to readjust the situation from the standpoint of railroad policy, which necessitates a settlement to the satisfaction of the interest which has secured the control simest by chance. The action of the stock today did not indicate any very definite prospect of settlement, but rather the profound unsettlement and uncertainty of the speculative mind. The remarkable rise in Northwestern grangers was without explanation, unless it was the result of pure manipulation to further profit-

volved in the great speculative operations go-ing on in the stock market is not entirely maistactory to the conservative minds, and was the subject of much comment and some criticism today.

FOREIGN FINANCIAL NEWS. London Stocks Strong on Hope of

Peace in Africa.

NEW YORK, April 14.—The Commercial Advertiser's London financial cublegram says:
A moderate amount of activity characterized the stock market today and shares were ised the stock market today and shares were strong all around, on hopes of peace in South Africa. Balfour admits that overtures are passing back and forth. Consols touched 95, and closed at 94%. There is talk that a new issue of from £25,000,000 to £30,000,000 will be announced in tonight's budget.

Americans were more active, but there was not much local buying. The shares opened well above parity. New York became a general buyer, but as a result the close was nominal. Louisville & Nashville was again the feature. The stocks opened at 112%, which was nearer parity than since the beginning of the present upward movement. The Grain, Flour, Etc.

The local wheat market was dull and uninteresting as usual posterday. The East took its customary tumble, which is always overdue if it fails to follow two days of strength. The roport that a duty of 3 cents per bushel would be leviced by Engiand caused some apoculation locally as to the effect it might will hardly checks consumption, it is not have on the situation. Inasmuch as it will hardly checks consumption, it is not probable that American prices will be affected. If a sufficient period is permitted to clapse before the duty is effective, the market will undoubtedly be benefited, as there will be as to the effect; as the probable that a first probable that a first probable that a duty of 3 cents per bushel will undoubtedly be benefited, as there will be as took market is not entirely satisfactory to the stock market is not entirely satisfactory. are bolder, on the arrangements for future

deliveries.

Rio Tintos were % down, to 44%, and Copped % up, to £53% the ton; Andoodda % down, to 5%, on sympathy with Amalgamated Supper.
The Government is disbursing funds, Bil-ver is flat and looks lower on New York realizations.

GRAIN MARKETS.

Panic at Chicago Caused by Shorts CHICAGO, April 14.—Shorts in the corn pit were the cause of the panicky action in grains. At the start there was an inclina-tion to sell because of the easy feeling in wheat. It only took a few spurts of the St.

Louis market, however, to create a strong demand by the unfortunate early sellers. The naturally bullish situation in the corn trade, with continued reports of depletions of stocks at all prominent centers, and an increasing at all prominent centers, and an increasing demand, scared the shorts badly. The rumor that was started in March of a possible corner was renewed again and a hot start resulted. Great buying was indulged in and prices were higher before the market was under way. May opened the higher to the lower, at 61%c to 61%c, and fumped to 63%c. This was an advance of about 6 cents over the low price on the deciline of a week or 10 days ago, and of almost 4 cents since Saturday morning. St. Louis was buying supposedly to finish the covering of the big short line begun Saturday. Offerings were not enough to supply day. Offerings were not enough to supply the demand. Everybody in the pit was nerv-ous. Trade was guesswork all around. After the early excitement there was con-siderable selling by people who thought corn had all the twist needed for the present.

Business quieted down and wheat reacted from its sympathetic higher prices. Liquida-tion at top prices brought good profits. There was a good demand for the cash article, which, together with strong cables, helped in which together with strong cables, helped in putting a bullish interpretation on every bit of news. Traders in all pits were talking of the remarkable outlook for speculation and manipulation in corn. News continues to ar-rive of farmers feeding corn to stock because of the advanced prices of cattle and hogs. May corn at Southwestern markets is ic to 1%c over Chicago prices. The country, tradtwo over Chicago prices, Ine country, trad-ers say, must have Chicago corn, and there is little of that. After high prices, May corn sold off to 61%, but railled again and closed strong, &c up, at 62%. Wheat started out with a sickly aspect on unresponsive cables and rains in the South-

demand sent May to 75%c. As torn began its decline after the opening bulge, wheat ensed off. Then a big line was sold for a leading bull professional and as the "failers" filed in to sell the market slumped off below Saturday's close. The Southwest sold here and those markets were lower. Commission-bouses were on both sides of the market, but principally sold. Liquidation for profits was very popular. The visible decrease of 1, 800,000 bushels was a little more than expected, but had no effect. Trade was active. May closed weak at its lowest point, \$40 off.

at 72%c. Trade in oats was fair and on the corn influence prices advanced. May closed 14c up, Provisions had a fair general trade. May pork closed 5 cents up, lard a shade lower and ribe 5 cents higher. The leading futures ranged as follows:
