COMMERCIAL AND FINANCIAL NEWS

cidedly favorable for farm work, and corre- and there is a distinct tendency toward adcities. With the entire farming population than it is getting of this fruit. attending to belated work at home, there were but few buyers in the cities and towns. Prices for farm products have shown some improve-

Veal and pork, especially the latter, have been scarce for the past few days, and recelpts are inadequate for the demand. Onts are quilet, but stendy, and barley is firm. Eggs are firm, and poultry is on the up grade. For nearly a week there has been such a scarcity of chickens that high prices have been reached. Butter is not sharing in the general pros-perity, but continues to sag, and some dealers are predicting that it will be impossible to make a clean-up until the price shall go to 20c flat for best creamery. This is nearly 10c under the Chicago price, and if the product were available in sufficient quantities the unusual performance of shipping butter East from Oregon would be witnessed. The California article is beginning to cut considerable figure in the Oregon market.

Grocery lines are without notable features. Bugar remains unchanged since the 10c advance in the 5th. There has been a slight advance on Cordova coffee, and Japanese rice fell off a This rice is grown in our Southern States from seed obtained in Japan, and the supply is so farge that it has been found advisable to lower the price in order to stimulate the demand

WHEAT-It has been over 'a week since a spot charter was effected, either at Portland on Puget Sound, and in the meantime there have been no fresh arrivals of chartered toninge. This shows plainly that there is little susiness doing, and it is doubtful whether ough wheat to load a ship has been purchased within the past 10 days. The compara-tively small stocks still in the country are in the hands of men who can hold indefinitely if they are not entisfied with the price, and the rence they are showing would indicate that the present quotations are not attractive The mills which figured quite promnently in the market earlier in the reason ave, in many localities, completed all of their ingagements, and with only a moderate demand for feed are not forced to enter the market and pay the premium over export values that is sometimes exacted from them. For Walls Walls quotations are hanging around 64c and 64%c, but only an occasional small lot can be obtained at these figures. A round lot of bluestem was reported sold Tuesday at 66%c. but this figure was something above the ex; port value. There is nothing doing in Valley wheat, and it is hardly probable that there will be any further shipments of this variety. Ship-owners seem to be about as firm in their ideas egarding freights as farmers are about an imregarding freights as farmers are about an im-provement in the price of wheat. There are three dhengaged ships in port, and with 36s being paid for new-crop ships, it is apparently 114012%c: backs, 11012c; bellies, 12013c; plates, 11012%c; 114012%c; backs, 11012c; bellies, 12013c; plates, 11012c; backs, 11012c; backs, 11012c; backs, 11012c; plates, 12013c; plates, 12013c; plates, 12013c; plates, 11012c; backs, being paid for new-crop ships, it is apparently impossible to secure these vessels at rates anywhere near those paid in San Francisco. Sem-timent in the local market is divided as to the future of freights, but the general opinion amony exporters seems to be against a free chartering at the rates now demanded. If a stand is made against high rates for new-crop ships, owners will soon be willing to accept reasonable rates for spot or hear-by tonnage. Weather conditions in the Pacific Northweat have been quite favorable for the past few days, and the wheat is looking well, but it is hardly possible under any circumstances that may prevail from now on to bave as large a crop as was grown last year. The crop in the East and the Middle West is sho unsatisfactory where near those paid in San Francisco. Sen-timent in the local market is divided as to the

crop as was grown last year. The crop in the
> East and the Middle West is also unsatisfactory
in many districts, and the outlook in general
was sufficiently bad to cause a sharp advance
in the Eastern markets near the close Tues-
day, and dealers look for a good, hard mar-
ket for wheat for some time to come. The dow
freights are a considerable element in this sit-
uniton, and crop bonditions generally give
prices an upward tendency.Green fruit-Lemons, \$303, 50; oranges, \$250

ers on the part of the Southern Railway in-terests of any participation in the Louisville & Nashville purchases, present or prospective. But the distinction drawn between, J. P. Mor-gan & Co., as bankers, and the same firm as the controlling influence in Southern Bailway, seemed somewhat strained. The extensive power over the affairs of Louisville & Nash-ville allotted to the firm seemed sufficient se-curity for its operation in harmony with South-ern Railway. The brokers most active in the selling of that stock today were those who were the heaviest buyers yesterday, and who have operated complexies for the so-called Gates element in all the railroad deals of late. They ers on the part of the Southern Ballway in The market los not yet shaped up so that

trong, in contrast with a reactionary tendency in some parts of the market. There was a large number of minor stocks which showed gains of a point or more at one time during the day, but the cases are rare where the full sdvance was sustained. Sugar where the full sdvance was sustained. became strong for a time on the decision to became strong for debate on the decision to limit the period for debate on the Cuban reci-procity bill. Amalgamated Copper was sold on account of the reduction in Anaconda dividend and fears that similar action would be taken tomorrow in the Amalgamated dividend. Inter-national Power made an extraordinary upward movement of 10% noints closing with a net movement of D% points, closing with a net gain of 17%. Rumors were current of some combination with American Locomotive. The gains were not well maintained in any case, and there were not a few declines during the day among important stocks. But the evidence that the financial powers which have been leading the speciation are still active. Keret leading the speculation are still active, kept

leading the speculation are still active, kept the interest in the market awake, The money market showed no disturbance, and there was no advance in the exchange market, despite large sales of stocks for London account, and the prospective demand for ±x-change on account of American subscriptions to the new British consol loan, the time of issue of which was announced today. The market placed active and irregular.

closed active and irregular. The doubt market generally was irregular. Total sales, 14,356,000. United States bonds were all unchanged on the last call.

The Cincinnati Price Current has the following on the eituation:

No essential change has occurred during the week in condition of Winter-wheat crop, which continues fairly good. The weather has been cool, but this was favorable rather than othercool, but this was favorable rather than other-wise, by preventing too rapid a growth, and al-lowing the plant to stool better. A too rapid growth of the plant early in the Spring is sel-dom good for it. There is sufficient moisture for the present over most of the wheat area, but pertions of Iowa. Northern Missouri, Kansas, and especially Nebraska, are very dry. In the Spring-wheat states seeding has commenced, with the ground in good condition in most places, and the ground fairly well provided with moisture.

with moisture. Out seeding has been progressing rather slow-ly during the past week, due to cool weather and too much moisture in some places. In a general way the crop is starting well, and a full average acreage may be expected. The in-terior movement of grain is without particular feature. Farmers are generally busy in the fields and marketing little. The offerings of wheat are comparatively moderate, and the marketing of corn and oats is generally report-ed as light, with little held for market. ed as light, with little held for market.

HOPS-The local hop situation holds promise of better prices, but so many elements remain to be determined before the crop will be ready for market that present quotations are not affected. A few more contracts have been re-ported at 12c and 12%c. It is estimated that the increase of hop acreage in Oregon this year is about 3 per cent, making the total for the state about 17,000 acres. But a S per cent increase in acreage means only about 1 per cent increase in yield, inasmuch as new vines do not produce as freely as old ones do. Pacific Coast hops now range in New York from 15c for medium to 15% for choice.

The London Brewers' Journal of March 15

says: Exits heavy as was the crop in 1901, the quantity now left in planters' hands is lighter than in ordinary years, and it is surmised that before the next season arrives hardly any Eas-ble for immediate delivery. This comparative is in minimatic delivery. This comparative heaves of the market is due, not to the en-arged wants of commers, for, as proved by the social returns, the quantity of beer retained for home use in the United Kingdom last year have dwants of commers, for, as proved by the bone use in the United Kingdom last year have dwants of the market is due, not to the en-have dwants of the market in the source of the source of the second the second the second have dwants of the prevailing cheapness of the print the sonitiness of supply is chiefly dwing to the action of brewers, who, availing the the facilities afforded for putting her goods away in cold storage, almost free print of hops they could all the suitable par-perior of future needs and this clearing any extent to be difficult to complete, such at tense price.

This week's demands are particularly strong on account of the Jewish holiday next Monday, which is already apparent in the market. do kits, 50@75c. Chickens sell readily at the present high quotations. Foultry prices are firm all over the country, East as well as West.

The price of eggs is as high as the market will stand under the present conditions, and there was a slight tendency to soften yesterday afternoon. The prospect, however, will not warrant much reduction in price.

Butter is slow. Lower prices are inevitable, and will probably be quoted today. Receipts are large, and the quality is good, but the pro-duction at this time of the year will not warrant holding to the prices that have prevailed for nome time.

NEW YORK STOCK MARKET.

Southern in Head Again, but More

Southern in Head Again, but More Normal Condition Prevails. NEW YORK, April 16.-The stock mar-ket reverted to a more normal condition to-day, after yesterday's extraordinary movement in Southern Railway. The transactions to that stock, although scarcely more than one-tourth of those of yesterday, still overshadowed the market, and were on a scale beyond precedent, with a very few exceptions. Heavy profit-tak-ing was in evidence all day long, which kept the price almost constantity below last night's level. The stock's net loss was %. There was some selling induced by the emphatic discialm-
