THE MORNING OREGONIAN, WEDNESDAY, APRIL 23, 1902.

COMMERCIAL AND FINANCIAL NEWS

Francisco market absorbed the has previous lot, with a good show of strength, no further weakness is expected on the arrival of this has shipment. In the local market resterday \$1.50 was still obtainable for fancy upland Burbanks, and from that figure the price ran down to \$1 10 and \$1 25 per cental. New po-tators are more plantiful in San Francisco, but it will be some time yet before they will inter-fere to any great extent in the sale of Oregon fers to any great extent in the sale of Oregon spuds. The market is weak on onions, for anything except fancy stock. For the choicest the price runs up as high as \$2 15 per cents, but the bulk of the sales are at less money. New colons have appeared on the California market, but they still have a portion of the tops hanging to them. By another week they will be in condition to be sold without the tops, and will make some inroads on the demand for old onlose.

old onloss. A carload of cats of very good quality was sold yesterday at \$15, and there is consider-able weakness displayed all along the line. Receipts ars quite liberal and the demand is light. The market for pork and pork products continues very firm, but veal has been going into cold atomare to await a reaction in prices. But-ter came in freely sgain yesterday, and it is with great difficulty that a further break is prevented. Eggs were steady at unchanged prices, a variation of a few blocks in the loca-tion of dealers seeming to make a variation prices, a variation of a rew bolks in variation tion of dealers seeming to make a variation of 1c in the price. The bulk of the sales yea-terday were at about 1515c, with some sales being made at 15c and 15c. There was noth-ing new in groceries, and aside from sugar the new in groceries, and aside from sugar merchants and consumers alike are so well stocked up on sugar that there is not very much selling.

Bank Clearings. \$112,976 71,603 49,644 70,878 484,730 213,454 201,648 PORTLAND MARKETS.

Grain, Flour, Etc.

There has been a sufficient amount of strength displayed in the Chicago market for the past few days to infuse hope into the of sellers in this territory, and they are w holding back waiting for another upturn this market. Walla Walla was generally noted at 65c yesterday, with ict to 3cc more ssible where wheat was needed. There is thing doing in freights, but owners are not indicating anything in irright, but to be not a set in from the last rates paid. The rains in the east-ern part of the state and in Western Washingern part of the state and in western washing-ton have improved crop conditions quite mate-rially, and this, with a fairly good crop prac-tically assured in California, may convince owners that most of the tonnage affoat will be needed have at 30a. Difficulty is being en-countered in convincing all exporters of this fact, and unless freights improve in other parts of the world, ships may yet be secured for less than 30a.

the world, supe may be accovered another Paine, Webber & Co. have discovered another bull argument for wheat which has previously been overlooked. In their circular received

been averlooked. In their circular received yesterday they say: "According to the Agricultural Department this is to be by far the worst 'locust year' in this country since 1885. Next month, they say, will witness the sudden conflaught in 20 states simultaneously of the largest brood of 'I'-year locusts' ever seen in the United States. This wast insect army, numbering countiess billions, has been followed in its ravages from the year 1715, since when it has never failed to reappear in the last week of May at regular intervals of 17 years. Wherever it appeared in 1885, the year of its last outbreak, it is, ac-cording to the Agricultural Department author-ites, practically sure to reappear this year. The states to be involved, it is predicted, are New York, New Jersey, Pennsylvanis, Delaew York, New Jersey, Pannaylvania, Dela-are, Maryland, District of Columbia, Ohio, est Virginia, Virginia, Massachusetts, Vér-ant, Illimots, Georgia, North Carolina and

Chicago Wheat Prices Demoralized

at First, but Close Steady. CHICAGO, April 22.—Reports of rains in the wheat belt tended toward an early demoraliza-tion of the wheat pit. Reports kept coming in, however, tailing of the parched condition of the ground before the showers and stating that the rains were insufficient to save crops. The Southwest had weakened materially on the rains, but scon advanced above Chicago prices. Clearing weather was reported where the rains were most needed, and an unexpected rise in prices rollowed. May opened 160% lower, at 74%074%c, and sold off to T3%0740. Then came Bradstreet's report of 6,000,000 buphels decrease in the world's visible, and good huy-ing resulted. Commission houses that had sold liberally sarry for the Southwest bought back rapidly. The local crowd was bearishly affectat First, but Close Steady. rapidy. The local crowd was somewhat cloudy in Chicago. This, with reports of more rains Southwest caused a little late selling, and after May had sold at 75%c. It closed steady, a shade lower, at 74%c. Corn was largely under the influence of the wheat market, and was something of a wait-ing affair. May closed firm, %c higher, at 62%c. Oats followed wheat and corn. The close was firm, %c up, at 45%c. The leading futures ranged as follows: WHEAT.

lated by reports of showers in the Winter wheat bell, but the grain-carrying reads showed a nervous tone throughout, and the real sustaining influence in the market was the buying of the coalers, both hard and soft, and the Morgan railroads. The evidence of realizing in Beading left the market vulnerable again to the influence of a rally in the wheat market, although-that was said to be partly due to the heavy decrease during the weak in the visible supply of wheat. Speculative opta-ion is resigned to the hope of only an average Winter wheat erop under promising conditions, and is prepared to axpect a crop disaster in the event of unfavorable conditions. A reas-suring effect was produced by indifference et-pressed by the principals in the Northern Se-curities Company to the filing of the suit in the Suprema Court against the company on the properties is as fe in any event, since only the putchase of the constituent companies by the suit. uBt any decision which would defeat the purchase of the constituent companies by the supromage of their stock for the stock of the company would have far-reaching consequences on many argivers under way, and to which

company would have far-reaching consequences

company would have intreasing consequences on many projects under way, and to which Wall street looks for great results. London turned seller of stocks in this market foday, after having been a buyer for several days, and thus belowd to strengthen the foreign exchange market

exchange market. Speculative bonds were weak, and the market generally was irregular. Total sales, par value \$3,345,000. United States 2s advanced 16 per cent on the last call.

WASHINGTON, April 22.-The Weather Bu reau's weekly summary of crop conditions' in as follows:

as follows: The week ending April 21 was warmer than the average on the Pacific Coast and Rocky Mountain regions, in the Missouri Valley and the northern districts to the eastward. It was

teo cool in the Middle Atlantic and Souther

teo cool in the Middle Atlantic and Southern States, and decidedly dry over the greater part of the central valleys and Middle Atlantic States. Rain is badly needed throughout the Rocky Mountain district and central valleys, and would prove beneficial in the Middle At-lantic States, while excessive moisture bindered farm work in portions of the Central States. The latter part of the week was marked by abnormally high temperatures in Kansas and Nebraka, intenetiving the drouth conditions The latter part of the week was marked by abnormally high temperatures in Kanasa and Nebraska, intensifying the drouth conditions in those states. The general weather condi-tions, although not conducive to rapid advance in vegetation, were very favorable for farming operations in nearly all parts of the country. The progress of corn planting has been rather slow, except in Missouri and the Southern States, this work being about finished in the central and west Guil districts. The enry planted corn is coming up in Southern Kansas, where cultivation has begun. Winter wheat has continued to make slow growth, and on the whole is in less promising condition in the principal wheat states of the central walleys. The outlook in California continues promising, and the crop has expe-tienced improvement on the North Pacific Coast. The germination of early-sown Spring wheat over the southern portion of the Spring wheat region has been slow, and seeding has been related by freezing in North Dakota. Seeding has progressed favorably on the North Pacific Coast.

Pacific Coast

Valleys, continues promising.
