

MARION COUNTY TRUE

NO DOUBT THAT IT WILL HELP
REPUBLICAN TICKET.Entrustful Reports Have Brought
Reaction, and Entire Ticket Is
Safe at State Capital.

SALEM, Or., June 1.—There is an element of uncertainty in Monday's election that makes the contest in Marion County of doubtful result as to gubernatorial candidates. This element cannot be definitely ascertained, but will be measured by the extent to which Governor Geer's friends scratch Mr. Furnish. Many staunch supporters of Governor Geer, who at first expressed pronounced dissatisfaction with the choice of the convention, are now giving Mr. Furnish their hearty support, and the opposition to Mr. Furnish within the party in this county is believed to be more nominal than real. But the fact remains that Furnish will be scratched to some extent, and it is not believed he will be able to carry the county by more than 200. This is considered a conservative estimate.

The dissatisfaction among the Republicans in this county, that has created some adverse sentiment against Mr. Furnish, has existed principally in this city and at Woodburn, and, while the feeling has not been entirely removed, many realizing the importance at this time of endorsing the principles enunciated by the Republican platform, will vote the entire ticket straight and exonerate the party in this county from the imputation that principles and policies are being here sacrificed for revengeful purposes. The attendance of farmers in Salem Saturday afternoon was exceptionally large, and it was apparent in conversing with them that a much better feeling exists within

POLITICS FOR PIONEERS.

Most Successful Day of Unsettled
County Session.

WESTON, Or., June 1.—Saturday was by far the most successful of the four days' reunion of the Oregon Pioneers' Association of Unsettled County. It was a "political day," even more so than to town than ever before in the history of the association, which has held its annual reunions here since its organization.

At least 2000 people attended, and 1500 of them occupied every seat in the brightly decorated pavilion when the morning exercises began. Band music and songs by Weston residents opened the program. The singing receiving an ovation. The leading speaker in the morning was James A. Tate, of Nashville, Tenn., who delivered a stirring address of 15 minutes, and celebrated temperance orator. He caught the crowd's fancy with an address at once impressive and humorous, and was frequently interrupted with applause and laughter.

Mr. Tate was followed by C. E. McCumber, Republican candidate for the Legislature, who was succeeded by Dr. J. S. Sumner, Democratic candidate for the state Senate. Each occupied about half an hour and ably presented their respective arguments.

SPOKE ON UNIVERSITY PROBLEMS.

Dr. Arthur Lachman's Address to
College Students at Eugene.

UNIVERSITY OF OREGON, June 1.—Dr. Arthur Lachman, who recently resigned the chair of chemistry, gave a short talk to the students at assembly Wednesday morning on "University Problems," in which he brought forth some very modern and plausible ideas as to what the university really stands for. Dr. Lachman said in part:

"Primarily, the university stands for the best possible education of those who are ready for it. While this is generally conceded, it is not always realized that the university is a place where the student is given the right training. Experience has shown, moreover, that what is called 'general culture' is an illusion—it does not exist. It is possible only if the nature of 'culture' be defined so closely that it becomes purely arbitrary. Thus, to read Shakespeare and Homer is culture; to read Darwin and Lyell is something altogether different."

"The whole question, therefore, comes down to this: What do we want? Here again experience has shown that we can take a short cut to the solution of the problem in each one of them the power to do a few things well. And, strange to say, it is usually the case that when this much has been accomplished, we have usually given those few students the power to think deeply and wisely upon nearly every other matter in which they become interested. We are thought of as a poet, but his color theory stands undisturbed today among the physicists. Huxley, a non-college man, prepared himself for medicine, but his writings on a wide range of philosophical subjects are standard literature. Roosevelt, beginning as a student in history, has made a success of all his undertakings."

"The whole question, therefore, comes down to this: What do we want? Here again experience has shown that we can take a short cut to the solution of the problem in each one of them the power to do a few things well. And, strange to say, it is usually the case that when this much has been accomplished, we have usually given those few students the power to think deeply and wisely upon nearly every other matter in which they become interested. WASHINGTON LAND RECEIPTS.

Half a Million More This Year Than
Ever Before.

OLYMPIA, June 1.—The receipts of the State Land Office for the last month carried the total amount of money received since the issuance of the last biennial report in November, 1900, to beyond the million-dollar mark. The total amount turned over to the State Treasurer since November 1, 1900, is \$1,000,000. The next biennial report will show an increase over the former two years of about \$300,000.

As showing the growth of the land office work it is stated by the Commissioner that in the first year of existence of the office the total receipts were \$170. This was from November, 1889, to November, 1890. During the two years following the receipts were only \$42,000, but in the next two years jumped to \$482,674.61.

Subsequent reports show the following figures:

Ending October 31, 1896, \$41,566.71
Ending October 31, 1898, \$62,254.81
Ending October 31, 1900, \$1,000,000.00
Ending October 31, 1902, (est.) \$1,600,000.00

The Two Parties in Clackamas.

OREGON CITY, June 1.—Seven hundred at the Republican rally and 200 at the Citizens' showed the sentiment of the voters of Oregon City at the close of the campaign in this city last night. Shively's Opera-House was packed, and State Senator Brownell aroused much enthusiasm with one of the best speeches that has been heard in the whole campaign. E. H. Hofer, editor of the Salem Journal, made an address in the Armory for the Citizens, and while Mr. Hofer is always an interesting talker, the crowd was not particularly interested in his speech as correspondingly small.

PORTLAND-CHICAGO.

Seventy hours and thirty minutes (74 1/2)

is the time of the "Chicago-Portland Special" from Portland to Chicago. Leaves Portland for Chicago Monday, June 3, at 10:30 a. m. Arrives Chicago Wednesday, June 5, at 10:30 a. m. Ticket Co. Third at Washington, O. R. & N.

Vote for L. A. McNary, regular Republican nominee for City Attorney.

OREGON'S SILVER MINE

FIRST STRIKE OF IMPORTANCE IN
JOSEPHINE COUNTY.Placer Output of That Section This
Year Is Forty Per Cent Greater
Than Ever Before.

GRANT'S PASS, Or., June 1.—The first strike of silver in Oregon that promises to be of importance is the discovery recently made in the mines of the Alameda Mining Company, in Galice Creek district. Well up on the side of a mountain that rises abruptly from Rogue River the Alameda company has uncovered a 50-foot ledge, the principal value of which are carried in silver. Gold and copper are also carried in small quantities. The ledge has been opened to a considerable extent, and the owners are confident that the deposit is permanent. They are preparing to develop the ledge and mine it for its silver. This will be Oregon's first silver mine.

The placer mines of the various Josephine districts have practically all closed down for the summer season, and most of them have completed their final cleanup. It is estimated that at least \$100,000 in placer gold has already been shipped

took place last evening at the Vogt Opera-House, which was profusely decorated for the occasion. A musical programme was interspersed with the delivery of the orations and essays. Professor F. L. Campbell, president of the University of Oregon, delivered the diploma to the graduates, who were: Oscar Beck, Cora A. Wingfield, Lillie K. Cooper, Grace L. Davis, Albert J. Elton, Lucy E. Coney, William J. Cross, Nellie L. Roberts, Lillie C. Vredt, Lloyd Robinson, Mabel Jones and Bertha O. Williams.

PIONEER OF CORVALLIS.

A. Cauthorn, Fifty Years a Free-
man.

CORVALLIS, Or., June 1.—A. Cauthorn, for nearly 40 years a well-known resident of Corvallis, died in this city this morning. He had been a Freemason for more than 20 years, and the semi-centennial anniversary of his admission to the order was celebrated with an elaborate function given by the various lodges of the order in this city last year. He was engaged for years in the mercantile business in Corvallis, and has always been a highly respected citizen. He was the father of Dr. Frank Cauthorn, formerly of Portland, and of the late Senator Thomas Cauthorn. He was a native of Missouri, and came to Oregon in 1865. It is expected that the funeral will take place Tuesday.

Oliver Lipes, of Oregon City.

OREGON CITY, June 1.—News was received here this morning of the death

FOURTEEN HUNDRED DEAD BODIES RECOVERED FROM THE RUINS OF QUEZALTENANGO

SCENE SHOWING PALACE AND PALACE DESTROYED BY GUATEMALAN EARTHQUAKE. SAN FRANCISCO, May 31.—Later details of the earthquake in Guatemala only add to its horrors. Passengers arriving here on the steamer City of Sydney say they understand that 1400 dead were taken from the ruins of the city of Quezaltenango. One man who was there and aided in the work of taking out the bodies says that over 1000 had been taken out when he left there, on May 15, 25 days after the city had been destroyed. Reports of loss and damage on the coffee plantations are beginning to come in and they practically double the total reported from the towns. This estimated figures run into the millions. The earthquake destroyed about 35,000 and the damage to the town is estimated at about \$300,000. San Marcos, a town near Quezaltenango, was also destroyed, with great loss of life. There were 140 prisoners in the jail and every man was killed, crushed and buried under the falling walls. In Tuxtepec, a town of 2000 inhabitants, not a house was left standing.

NO THOUSANDS IN JEOPARDY.

Good Words for the Stites-Thunder
Mountain Trail.

STITES, Idaho, June 1.—There is no truth whatever in the published reports that thousands of men are in jeopardy along the Stites-Thunder Mountain trail. The danger is exaggerated. The trail is open, and prospectors with horses are daily reaching the gold fields. From Chamberlain Basin into the camp a new trail has been cut which not only reduces the distance 30 miles, but minimizes the hardships, and now many are coming from the lower roads and going into the upper country. The trail is open, and prospectors with horses are daily reaching the gold fields. From Chamberlain Basin into the camp a new trail has been cut which not only reduces the distance 30 miles, but minimizes the hardships, and now many are coming from the lower roads and going into the upper country.
