

BURTON MAY RETIRE

He Is at Outs With Men in Control in Ohio.

DECLINES TO BE A CANDIDATE

Firmly States His Friends Must Manage Congressional Campaign - Bill to Change Control of Forest Reserve Is Doomed.

WASHINGTON, June 9.-Oregon men are very much interested in the controversy that has arisen in politics at Cleveland, O., because it possibly means the elimination of Chairman Burton from the river and harbor committee. Burton has announced that he will not run for the county committee, as now constituted, is to conduct the campaign, and insists that one of his friends shall be chairman of the committee. While Senator Hanna is not directly responsible for the present condition of affairs, as he signified a desire to have Burton men chosen, yet it is the contention that have grown up with the Hanna machine that have caused the trouble. Great efforts are being made to get Burton to reconsider his determination, as his withdrawal no doubt means a Democratic member from the district, and perhaps the loss of the county to the Republicans. Burton is regarded as a very strong man in the House, and valuable as head of the river and harbor committee. He has independent and pronounced views on a number of subjects, being strongly opposed to the ship subsidy bill and to an isthmian canal.

Forest Reserve Control Bill Doomed.

Whatever may be the merits of the proposition to transfer control of the forest reserves to the Agricultural Department, it is impossible for the bill to become a law under present conditions. The opposition in the House today showed where there would be a very hard fight and enough Senators from the West would oppose the bill to cause its defeat. What is needed more than a transfer is a bureau of the Interior Department dealing with forest reserves, and controlling them with some such man as Gifford Pinchot, or some other practical and expert forester, at its head.

To Trade Lands With Railroads.

Representative Miller, of Kansas, today introduced a bill providing that whatever lands within the limits of any railroad grant are arid or semi-arid, and for that reason are not filled in tracts of single sections, the Secretary of the Interior in his discretion, with the approval of the President, may exchange vacant public arid or semi-arid lands, non-mineral in character and timberless, which are not required for reservoir sites or other public use, for such railroad lands of like area, character and value so far as such exchanges may be necessary to assemble the granted lands in more compact areas so that they may be advantageously improved. Lands so exchanged must lie in the immediate vicinity of the original grant to the company, so that the amount of taxable land in any state, county or territory shall not be diminished. Lands surrendered to the Government will at once become part of the public domain.

GOOD ARMY APPOINTMENTS.

Men Just Promoted Will Be Credit to the Service.

WASHINGTON, June 9.-The appointments made today by the President to the Army are very commendable. Men have been selected for Major-Generals and Brigadier-Generals who will be a credit to the service. They are men who are capable in every way for high command. Colonel Carter, who has been named for Brigadier-General, is a personal selection of Secretary Root, and he has been named on account of the hard work he has done for the Army, although it has been inside an office all the time. Carter has been in the Adjutant-General's office from the beginning of the Spanish War, and has been an able assistant to General Corbin, and Secretary Root's right-hand man in nearly all the laborious work which has followed in the train of the war with Spain. He was a cavalryman before entering the Adjutant-General's department. The selection of Colonel Lee is a reward for brilliant service in China, when Lee commanded the bulk of the American troops at the battle of Tien Tsin. More than that, it has a personal bearing upon the peculiar condition in which the War Department at the present time. Lee, at the close of the Spanish War, was a Major, and was the prosecutor selected by General Miles in the investigation of Army supplies. He has been regarded as a Miles man, and belongs to the Miles faction of the Army.

Records of Smith Court-Martial.

WASHINGTON, June 9.-The records of the court-martial proceedings in the case of General Jacob H. Smith, who was tried for the Philippines for alleged cruelty in the prosecution of the campaign in Samar, reached the War Department today. Pending consideration by the President, no statement in regard to it is available at the War Department.

To Favor American Ships.

WASHINGTON, June 9.-Senator Perkins today introduced a bill directing the Secretary of War to favor American built ships in transporting supplies for the Government to the Philippines.

Mrs. Roosevelt Goes to Oyster Bay.

WASHINGTON, June 9.-Mrs. Roosevelt and children left Washington this morning on the Dolphin for Oyster Bay, where the family will spend the summer.

Nomination Confirmed.

WASHINGTON, June 9.-The appointment of J. P. Jewell, of Illinois, to be Consul at Martineque, was confirmed by the Senate.

FILES CLARED WITHOUT THE KNIFE.

ICHING, Bleding or Pressing Pile, No Cure, No Pay. Druggists are authorized by manufacturers to file a statement to refund money where it fails to cure any case of piles, no matter of how long standing. Cures often made in a few days. This is a new discovery. One application gives ease and relief. It is the only file remedy sold with a positive guarantee, no cure no pay. Price, 50c. Write for full particulars to Dr. J. M. Smith, 1015 N. 10th St., St. Louis, Mo., who manufactures the medicine.

EXPLAINED TO WRIGHT

PRESIDENT MITCHELL, OF MINERS' UNION, VISITS NEW YORK.

Commissioner of Labor Gathering Information for an Official Report on the Great Strike.

NEW YORK, June 9.-President John Mitchell, of the United Mineworkers, arrived here late this afternoon, having been sent for by Carroll D. Wright, United States Commissioner of Labor, who is here investigating the anthracite coalminers' strike. Mr. Mitchell first called on Secretary Ralph M. Eastey, of the National Civic Federation, and on the night went to the Manhattan Hotel, where Mr. Wright is staying. President Mitchell went to the Commissioner's room, where he remained in conference with Mr. Mitchell for two hours. When he left, Mr. Mitchell said: "I have little to say, further than that I have talked with Mr. Wright and have explained to him the situation from the miners' standpoint, and have told him of the causes which led up to the strike." "Was there any suggestion of a settlement made during the interview?" Mr. Mitchell was asked. "No; I understand that Commissioner Wright was simply seeking information for an official report under the law." "Did Commissioner Wright express any views to you President Roosevelt's views concerning the trouble?" "He did not." "Mr. Mitchell said he would leave for Wilkes-Barre in the morning." "Mr. Wright made this statement today: 'I cannot interfere or act as arbitrator. Although possessing no power under existing conditions, my patriotic attitude President Roosevelt is interested in settling this trouble. He cannot interfere, but can advise or suggest, and the official investigation may reveal chinks in the situation which the streets of Wilkes-Barre touched upon in the general report, and upon which he may be able to act. He wants all the information obtainable, and all the suggestions that may be of any help directed to that end. Perhaps we may be able to discover something below the surface.'" Commissioner Wright said of the visit of President Mitchell: "President Mitchell has given me all the information I wanted and it will be presented to President Roosevelt. I am now in possession of the views of the miners' side of the issue and tomorrow I will see the operators."

MINES FILL WITH WATER.

HAZLETON, Pa., June 9.-Superintendent Kudrick, of Cox's Brothers, was attacked by water in the streets of Hazleton today, but was not injured.

Two Small Boys Drowned.

DEER LODGE, Mont., June 9.-Two of William Zosel's little sons were drowned when their horse tumbled in a creek two miles north of Valverde, between the fishermen's train returning from Platte Canyon and the westbound passenger train. Railway officials attribute the collision to the failure of Engineer Latham to follow orders.

Fireman Mangled by Cars.

TOWNSHIP, Mont., June 9.-Fireman L. W. Hubbard, on the Northern Pacific Railroad, fell beneath the cars today and was instantly killed. Hubbard had exchanged positions with a brakeman when the accident occurred. His body was fearfully mangled, being literally cut into pieces.

Flunkers Drowned.

CHILBOOTH, O., June 9.-While returning from school at a late hour last night, a rowboat in the Ohio & Erie Canal, Howard Faucett, a traveling salesman, and Minnie Buckart were drowned by the boat capsizing. Six others were rescued.

NAMED BY PRESIDENT.

WASHINGTON, June 9.-The President today sent the following nominations to the Senate: Brigadier-Generals, John C. Bates and George W. Davis, to be Major-Generals; Colonel, to be Brigadier-General; Theodore W. Swanwick, Captain; Frank D. Baldwin, Twenty-seventh Infantry; Jesse M. Lee, Thirtieth Infantry; William H. Carter, Assistant Adjutant-General.

Quiet in West Virginia.

HUNTINGTON, W. Va., June 9.-Quiet reigns tonight in the coalfields in the southern part of the state. No violence has been reported from any quarter. Probably 25,000 miners were idle in West Virginia today.

CHARLESTON, W. Va., June 9.-The strike situation in the same town today. The New River field is completely tied up. Reports from Winfield, Cabin Creek and Carbon are that all the men are working.

POLITICAL PARTY.

Western Union Will Start a Paper to Advocate Socialism.

DENVER, June 9.-The executive committee of the Western Federation of Miners and the American Labor Union, whose conventions adjourned Saturday after a two weeks' session, will meet during the week from next to the next to discuss the plans and form for organizing the workmen in the West into state, county, and city organizations along the lines of Socialism, and for independent political action in the fall election and Presidential election in 1904. As a part of these plans, a weekly newspaper will be established.

Rebecca Taylor's Dismissal.

WASHINGTON, June 9.-Representative Shallenbarger, of Nebraska, a member of the House committee on civil service, today introduced a resolution requesting the Secretary of War to communicate to the House "the causes and reasons for the dismissal of Rebecca Taylor from her position in the classified service of the War Department. Miss Taylor is the clerk dismissed recently by the War Department for writing letters to the press, criticizing the President in connection with the administration of Philippine affairs."

Eastern Oregon Comment.

It was said in these columns at the beginning of the campaign everything possible would be done to elect Democrat to elect Chamberlain and defeat Furnish. The Democrats had it in for Furnish because he left that party and affiliated with the Republican party. For his nomination, Republicans had it in for him because he was a new recruit and asked, as they thought, too much from the party. He was placed on the electoral ticket and that was very acceptable to Republicans, as it was very desirable to secure as many Gold Democrats as possible to secure the election of Mr. McKinley, but when it came to placing him at the head of the state ticket and saying to the old war horses who had been through many battles and faced the enemy in evil as well as in good times, that they must stand back and let this new recruit take their place, they resented the matter. Another thing that was resented by the Democrats was the fact that it was industriously circulated that he had large sums of money to spend on the campaign and that he spent large sums of money for his nomination. His close friends know that this was not true, but there is a large element in the voting population of Oregon

The Danger Period for the Nervous and Broken Down in Health is Rapidly Drawing Nigh.

Health is Rapidly Drawing Nigh.

Paine's Celery Compound

Banishes All Symptoms of Disease and Nourishes the Nervous System.

Paine's Celery Compound has saved thousands of people from nervous prostration and collapse brought on through overwork, weakened nerves and impoverished blood. The great medicine has made thousands well. It has conquered weakness and ill health when everything else has failed. This is the time when nervous debility and nervous prostration begin to manifest themselves. The coming hot weather will only add fuel to the fire of suffering and disease. If there is mental depression, loss of energy, lack of vivacity, dullness of the eyes, blanched cheeks, light confusion in the head, defective memory, love of solitude—all these are direct indications of coming nervous collapse and call for the immediate use of that nerve feeder, strength giver, and blood enricher, Paine's Celery Compound. This heaven-sent prescription is a peerless remedy for your various troubles. T. J. Shaffer, of the Amalgamated Association of Iron, Steel, and Tin Workers of the United States, writes from Pittsburg, Pa.: "In 1891 I was compelled to abandon my profession because of nervous prostration consequent upon exposure, hard study and overwork. A number of physicians declared I would never recover, but I tried Paine's Celery Compound, and in less than a year increased in weight from 145 to 215 pounds. During the recent epidemic of influenza, finding myself ready to collapse, and fearing a recurrence of my former trouble, I returned to my former friend, Paine's Celery Compound, and already am feeling more vigorous and able to meet and discharge the duties of my office."

That are supposed to be purchasable, and as Mr. Furnish did not supply this element as they expected, they resented it as a refusal on his part to contribute, and supported the opposite candidate to show their resentment.

The election returns show conclusively that Mr. Chamberlain is elected Governor. Mr. Chamberlain, accepting the Governorship of the State of Oregon at the hands of his enemies. His enemies loved Chamberlain more, but to revenge themselves for being turned down. It seems a sacrifice had to be made to satisfy the disgruntled soreheads, and to show a sacrifice Mr. Furnish. We say to the men who helped Mr. Furnish to satisfy their selfishness, you have shown yourselves to be men of small and mean caliber and unworthy the confidence of the people of Oregon. We are proud of the vote Gilliam County gave Mr. Furnish and Mr. Williamson. We know that some Democrats helped to swing the vote in their favor, and every Democrat that voted for Mr. Chamberlain, as he was the nominee of his party, and as such was entitled to the full Democratic vote.

Camille's Rose a Bunch of Celery.

While spinning of the serico-comic side of stage life recently Miss Clara Morris told the following story as an experience of her own: "Somewhere in the wide world," she said, "there is an actor—and a good one—who never eats celery without thinking of me. It was years ago, when I was playing 'Camille.' In the first scene, you will remember, the unfortunate Camille found a rose from Camille as a token of love. 'What had almost reached that point, when, as I glanced down, I saw that the rose was a bunch of celery. I was so shocked that I never saw the actor again. 'What could I do? On the flower hung the strength of the scene. However, I consulted my lines, and I saw that the actor, and began a still hunt for that rose or a substitute. My gaze wandered around the stage. On the dinner table was some celery. Moving slowly toward it, I grasped the celery and tucked the tops into my rose form. Then I began the fatal lines: 'Take this flower; the life of a camilla is short—if held and caressed it will fade in a morning or an evening.' 'Hardly had I begun to control myself, he spoke his lines, which ran: 'It is a cold, senseless flower. It is a strange flower.' 'I agreed with him.'"

Challenged to a Duel.

ROME, June 9.-Because of further differences of opinion regarding the Eritrean budget, Signor Prinetti, the Minister of Foreign Affairs, who fought a duel with Signor Franchetti yesterday, has been challenged by another deputy, Signor Borsone. Their respective seconds will meet today, but it is hoped that the dispute can be arranged without a duel.

COLDS

I regard my COLD CURE as more valuable than a life insurance policy. It not only cures colds in the head, colds in the lungs, colds in the bones, but it wards off dangerous diseases such as grippe, diphtheria, pneumonia, and consumption.—RUYNON.

Won everything in the Motor Cycle Races, at Salem Conductors' Excursion, Sunday June 8th-10 machines contending (3 Mitchells).

5-mile event (standing start), time 10:15
2-mile event (standing start), time 4:02
(The two other Mitchells in the race came in second and third.)

There may be other Motor Cycles but there is none that will compare with the Mitchell. Price, \$200.00.

Mitchell, Lewis & Staver Co. FIRST AND TAYLOR STS.

N. B.—The Mitchell Motor Cycle recently won over English, German and French machines in a hotly-contested race in London. The United States and Mitchell Motor Cycles beat the world.

Dr. Copeland's Earnest Advice to All Chronic Invalids Is to Take Advantage of Favorable Climatic Conditions for the Medical Attention They Require.

Advantage of Favorable Climatic Conditions for the Medical Attention They Require.

Of the hundreds of cases of asthma, lung troubles, rheumatism and catarrhal diseases treated and cured at the Copeland Institute during the past 10 years, under the inexpensive system now so popular with the community, statistics prove that the average time occupied in a cure, with patients beginning during the Summer months, is from one-third to one-half less than with those beginning a course during the rigors of Winter.

There are maladies that it requires time to master. Asthma requires

time. Seated lung troubles require time. Crippling rheumatism requires time, and the rot and poison of catarrh requires time.

Dr. Copeland feels that when human beings are to be lifted from the pit there should be expedition. His earnest advice to all who contemplate treatment at the Copeland Institute is to begin now, while the pleasant climatic influences strengthen the efforts of science to make recovery not only certain, but expeditious.

The Proper Course for Sufferers.

Great numbers of people suffer from the malign poisons of catarrh, as from other chronic maladies, without any correct or definite idea of the nature of their affliction. The following symptoms have been carefully arranged to enable many sufferers to understand just what it is that ails them. Many diseases, known under various specific names, are really of a catarrhal origin and nature. Every part of the mucous membrane, the nose,

the throat, eyes, ears, head, lungs, stomach, liver, kidneys and bladder, are subject to disease and blight by catarrh. The proper course for suffering is this. Read these symptoms carefully, mark those that apply to your case and bring this with you to Dr. Copeland and Montgomery, as you live away from the city, send them by mail, and ask for mail treatment. In either instance, and whether by mail or office treatment, the patient may be assured of the speediest relief and cure possible to medical science.

Dr. Copeland feels that when human beings are to be lifted from the pit there should be expedition.
