A Bogus Officer Liberates Three Prisoners.

TURNED OVER BY INDIAN POLICE

One Man Has Been Retaken, and Officers Are Searching for the Others—Outcome of the "Sooner" Trouble on Reservation.

SPOKANE, June 13.—After impersonating an officer twice, and thereby not only escaping the law himself, but also effecting the release of three other prisoners, Jake Griswold is being hunted for by Deputy United States Marshals near Davenport, Wash. The arrests are the outcome of the recent "sooner" movement on the reservation. When the men who had camped on the reservation in the hope of its early opening to settlement, were driven off, Jake Young, Al Hughes and George McDonald did not leave the reservation, and were captured by the Indian police. Just then, it is alleged, Griswold rode up and declared himself to be an officer of the law. He said the prisoners were wanted for horsestealing, and exhibited an officer's star. He asked for assistance in handcuffing them. The Indians complied, and Griswold started away with his prisoners. Later, a similar occurrence happened near the house of an Indian farmer, and again, it is said, Griswold impersonated an officer, and secured the prisoners. This occurrence was reported to Indian Agent Anderson, who grew suspicious, and started a movement to apprehend the quartet. McDonald was arrested late Thursday night, and the other men are being sought for. Hughes is a well-known prospector, who headed the rush to the north half of the reservation three years ago. Griswold was formerly a deputy Sheriff in Stevens County. He was arrested several years ago by Deputy Sheriff Gardner on a horse-stealing charge. At Gardner's command to surrender, Griswold ran, and was brought down by a shot in the leg.

FRUIT PEST IS SHOT-HOLE BORER.

Department of Agriculture Passes on Insect in Clark County.

VANCOUVER, Wash., June 13.—Captain B. F. Packard, of the firm of Packard & Smith, prominent fruitgrowers and packers of Clark County, visited the department of entomology while in Washington, D. C., last week, and left specimens of the little insect that is now perplexing the fruitgrowers in this section. Mr. Packard also left small branches of the trees that the insect had affected, showing the nature of their attack on the trees.

Mr. Smith today received a letter from L. O. Howard, entomologist, today stating that the insect is the so-called pear-blight beetle, or shot-hole borer (xyleborus dispar fab.); that it is a European importation, and has not hitherto been reported from the Pacific Slope; that the latest advices in regard to this and other ambrosia beetles are that they do not attack perfectly healthy trees, but those which are weakened from some cause, such as too close growth, the lack of proper sunlight, drainage, etc. Mr. Smith also received under separate cover a pamphlet, published by the United States Department of Agriculture, containing figures of the species, and a full treatise of the nature of the beetle, injuries caused, and the best remedies for putting an end to their colonies. Under the head of remedies the pamphlet says:

"From what has been said of the nature of the food of these beetles, it is evident that any method by which the entrances of their galleries in the bark can be closed will effectually put an end to the progress of their colonies. Perhaps the best means of accomplishing this is by coating the trunks with dendrolene or rampeuleim. A light brushing or spraying of the bark with creosote or kerosene will sometimes accomplish the same result, especially at the beginning of the attack."

FIRST KLONDIKE GOLD THIS YEAR.

Two Steamers Arrive From Dawson—Low Water on Yukon.

VANCOUVER, B. C., June 13.—What may practically be termed the first gold to arrive from the Klondike this season was brought here today on the steamer Princess May. Approximately $150,000 in dust came on that boat. About $70,000 came down on the City of Seattle. Accurate news of the clean-up is difficult to obtain, owners keeping the results very quiet. It is the opinion of the Canadian customs officials at Caribou that much gold dust is surreptitiously being run down the Yukon to St. Michael when the officials are not on the alert. Such gold, of course, does not pay the royalty now in force, and therefore will never be classed among the outputs of the Yukon district.

When the Dawson passengers of the Princess May left the Klondike metropolis, five cases of smallpox had broken out among the passengers of the steamer White Horse, and it seemed likely that there would be a somewhat lengthy detention of that vessel and her passengers and crew. Those on board the White Horse when she was quarantined, and the vessel itself, are detained at Dog Island, below Dawson.

The low water on the Yukon is still giving the river steamers a great deal of trouble. At times, the water rises under the influence of the warm sun, but a fall in temperature sends it down again.

The White Horse road is this season transporting a great deal of Atlin freight and the volume is reported to be greater than at the same time last year.

Contractor Porter, who had charge of the repairing of the cable connecting Juneau with Skagway, performed his work successfully, and on June 9 the first messages between the two points were transmitted.

SMALL RIOT AT GRANT'S PASS.

Japanese Section-Men Attack White Crew of a Wood Train.

GRANT'S PASS, June 13.—The Japanese laborers, some 50 in number, employed on the Southern Pacific wood train, engaged in a general hand-to-hand fight with the white crew of the train in the Grant's Pass yards this morning. The Japanese became angered because a string of freight cars was jammed into their train, jolting them up severely and upsetting things in general. They rushed out of the cars and attacked the trainmen. A riot ensued with many blows and considerable bloodshed. One Japanese was knocked in the head with a heavy club and almost killed. Officers interfered and restored quiet after much difficulty.

MEAT TRUST WAR BOOMS SALMON.

Demand for Canned Fish Has Greatly Increased at Astoria.

ASTORIA, June 13.—The fight against the meat trust in the East is already having its effect on the local salmon market. The demand for the canned product has greatly increased, with the result that the hold-over stock has been disposed of and the packers are rushing this season's pack to the trade centers as rapidly as possible. The prices have not advanced materially, but the demand is good, and there is ready sale for all that can be packed.

The catch of salmon yesterday and last night was the best so far this season, and as it has been gradually increasing, it is expected to continue. The seines are beginning to be operated again with fair success, and the traps are also going well now. A number of gillnetters who have used small mesh nets have as high as six tons of fish to their credit already this season.

GREAT CELEBRATION ASSURED.

Baker City Proposes to Have a Grand Time July 4.

BAKER CITY, June 13.—The Fourth of July will be celebrated in this city this year with more than the usual amount of enthusiasm. The several committees having the matter in hand have been hard at work for some time getting everything in shape for an old-fashioned celebration. Judge Stephen A. Lowell, of Pendleton, was invited to deliver the oration, but a previous engagement prevented his acceptance.

The parade during the early part of the day promises to be something beyond the ordinary. The militia company and many of the civic societies will take part, and besides the liberty car there will be a number of floats prepared by merchants and the various trade unions. In the afternoon there will be special amusements on Front street, which will include races of all kinds. A special feature of this part of the day's exercises will be the arrangements made for the accommodation of the spectators. Seats for those wishing to see the games will be provided on each side of the street. In the evening there is to be a display of firworks, which is to be in keeping with all the other features of the celebration.

ADVERTISING BAKER COUNTY.

O. R. & N. Will Distribute 10,000 Copies of an Excellent Pamphlet.

BAKER CITY, June 13.—The O. R. & N. passenger department has undertaken to distribute 10,000 copies of the Chamber of Commerce pamphlet, advertising the natural resources of Baker County. This method of distribution insures that the work will be well and carefully done, because the railroad people have a mutual interest in the work of building up this section of the state. Baker County is larger, by several hundred square miles, than the State of Delaware, and more than twice as large as the State of Rhode Island. It is richer in natural resources than both states combined, and is capable of sustaining a population as large as either one of those states.

SMELTER FOR SUMPTER

LOCAL FIRM INTERESTS EASTERN CAPITAL IN THE PROJECT.

Preparations Under Way for Inauguration of Work—Plant Will Be of Good Capacity.

SUMPTER, June 13.—Arrangements have been completed for the inauguration of work on a smelter in the Sumpter district. Killen, Warner & Stewart, of this city, are the moving spirits in the project, and will soon contract for brick and stone for the foundation, or provide for burning the brick on the site purchased for the smelter. A site has been secured, also lime and iron deposits, which will supply all of these minerals needed by the smelter. Regarding the copper flux required to mix with the dry ores of the Cracker and adjacent districts, it will be secured in the Quartzburg section, or shipped in from some other quarter. Efforts have been made to secure the copper matte from the Standard smelting plant, on Dixie Creek, should it get into shape for work.

Mr. Warner, of the firm promoting the enterprize, stated today that the furnace will have a capacity of 120 tons, and that a 400-ton sampling works will be erected in connection with it. He further states that this sampler is to be of the automatic pattern, according to the most approved machinery of Montana and other large mining sections.

A smelter for this district has been discussed pro and con for a considerable time, and especially since the erection two years ago of the 40-ton matte smelter, by St. Louis interests. It is argued by some that there is not enough ore in sight to keep a 100-ton plant in continuous operation, nor is there enough variety here to permit operation with the necessary metallurgical saving and economy. Against this argument, it is held by mining men that smelters have been erected in Montana and Wyoming, where they were dependent upon a single property, and kept in successful operation for years. In the face of these criticisms, Killen, Warner & Stewart undertook the work of financing the undertaking. Mr. Killen making a trip East for the purpose. He has just concluded the sale of ample stock to erect the plant, and reports interest sufficient to warrant depending upon a good ore-purchasing fund being created by the time the plant is ready for work. The firm expresses faith in the success of the project.

All mining men of this district admit the advantage that will result from construction of a smelter in Sumpter.

The outcome of the present enterprise will hold public attention throughout the mining region till its success has been demonstrated or disproved.

There is but one other sampler in the district, that being the Baker City plant, located at Baker City, and owned by Bela Kadish. It is not of nearly the capacity of the 400-ton plant projected by the Sumpter firm.

Gold Hill Mining Notes.

GOLD HILL, June 13.—E. A. L. Smith, the owner of the Uncle Sam mine in Sam's Creek district, reports cutting a two-foot vein of high-grade ore in the lower cross-cut tunnel, which was run in to strike the original vein for a working and drainage tunnel. A great deal of good ore has been taken from the old shaft, which was abandoned on account of water.

The clean-up has been completed for the season at the Hays placer diggings, at the mouth of Water Gulch on Rogue River. The exact amount of dust is not known, but in former years it generally averaged $3000 to $5000. The present lessee, F. W. Hoffman, has leased the mine for another season.

TO PRISON FOR SIX YEARS.

Sentence of Man Who Aided Prisoners to Escape from Jail.

SALEM, June 13.—Circuit Judge Burnett this morning sentenced John Daly to six years' imprisonment in the State Penitentiary for aiding prisoners to escape from the Marion County jail. Daly was tried before a jury yesterday afternoon, the case being submitted at 6 o'clock last evening. A verdict was rendered at 10 o'clock this morning. Barker, the man who supplied the Marion County prisoners with a steel saw with which to make their escape, last week pleaded guilty and got five years. Daly stood trial, but it was shown in the trial that he had been one of the leaders in the movement to effect a jail delivery with the result given.

The Spite of Faction.

Gervais Star.

Mr. Brownell, of Clackamas County, was referred to recently by certain of the press in Marion County in uncomplimentary terms. An editor from this county went down there to help aid in his defeat. One thing is certain, and that is: George C. Brownell carried Clackamas County by a handsome majority, and the significant fact remains that Mr. Furnish was also the recipient of almost the same vote as Mr. Brownell in Clackamas County, which speaks volumes. Can the successful political aspirants of Marion County lay claim to such a record? The vote does not show it. Too much work was given to personal gain, and not enough principles and patriotism, we regret to report.

He took passage at Seattle for Los Angeles, and met his death off Mendocino City. The steamer Navarro had been sighted, flying a flag of distress, and the passengers of the Nelson flocked to the side of the vessel as she put about to give assistance to the Navarro. HALE AND HEARTY AT 75

Mrs. Susan B. Ryerson, who is over 75 years of age, says Duffy's Pure Malt Whiskey prolonged her life; she is as hale and hearty and feels as young as when 20 years old.

MRS. SUSAN B. RYERSON, 75 years old

GENTLEMEN: I was very ill with grip and so run down that the doctors had given me up on account of my age—I am now 75 years old. Duffy's Pure Malt Whiskey saved and prolonged my life.

I was induced to try it not because I thought it would benefit me, but for the reason that I had read that others had been cured by the use of Duffy's Pure Malt Whiskey. I never am without it. It gives me great strength. It makes me feel young, and I enjoy ripe old age. Not long ago one of my grandchildren was taken ill with a cold, and I know that a few doses of Duffy's Pure Malt Whiskey saved it from serious sickness. I have asked my son, Dr. John W. Pierce, a well-known physician of West Eighth street, Coney Island and Sheepshead Bay, to recommend it to his patients. I cannot speak too highly of Duffy's Malt Whiskey.

SUSAN B. RYERSON.

We receive thousands of letters from old women and old men whose experience has been similar to that of Mrs. Ryerson, who say Duffy's Pure Malt Whiskey is a Godsend to suffering humanity.

Tired, Tired

Tired. That one word tells the whole story. No rest. No comfort. No particular disease. Just all tired out. Fortunately, physicians know about Ayer's Sarsaparilla. They prescribe it for exhaustion, anemia, depression, general debility. $1.00. All druggists.

No matter what ails you nor what medicine you take, you cannot get well if your bowels are constipated. Correct this at once by taking Ayer's Pills, just one pill each night. These are a great aid to the Sarsaparilla.
