Sunstroke Insurance

When the summer's heat gets about 90 degrees, you are liable to be sunstruck any time you are out in the sun, unless you take proper precautions. Several years ago, the writer of this, who has spent much of his life in the tropics, thought he was safe from sunstroke. One day he collapsed, remained unconscious for five hours, and at times his life was despaired of. As a matter of fact, any person whose stomach and bowels are in bad shape in the summer time, is liable to be sunstruck in tem-

perature that would be harmless under normal conditions. That's all there is to it. Sto ach and bowels full of festering, fermenting refuse that forms acids and gases, raise the heat of the body and blood many degrees. Scientists have found that natives of the South Sea Islands, living on laxative fruit, bananas, cocoanuts,

bread-fruit, have a temperature 20 degrees lower than that of white men who are careless about their food or their bowels. It has been found in years of experience, that a CASCARET Candy Cathartic taken at bed-time every night will keep the body clean and cool inside all day, and forms a safe and thoroughly reliable form of sunstroke insurance.

DISEASES OF MEN

And Their Certain Cure

There is a certain cure for these discusses without resorting to those unpleasant and painful methods still used by many, which aggravate, rather than give relief. With the same certainty as that of a perfect diagnosis, I adapt my special French treatment to the radical cure of Stricture, Prostatis.

Inflammation of the Bladder, Private Disorders, Varicoccie, And all Genito-Uniary Diseases And all Genito-Uniary Diseases
It affords instant relief. I remove every
vestige of disease witchut resorting to
those painful processes usually employed
and which do not give satisfaction. It is
not reasonable to suppose that a man can
exercise the essential functions while the
urinary channel is blocked by stricture
or other disease, which destroys the vital
power and which becomes more aggravated
under improper treatment. These diseases,
while they last, always detract from the
sexual and bladder functions, and an early
cure is always advisable,
