

House aggregated 7515; in the Senate, 2552. The total number passed by both the House and the Senate was 1151. A resolution offered by Morgan, calling on the Secretary of State for a state-ment of the expenditures of the Isthmian

Canal Commission, was adopted. The Senate insisted on its amendments to the naval appropriation bill, and the following conferees were named: Hale, Perkins and Tillman. Bills were passed as follows: To pro-

hibit the killing or taking of seals, por-poises, whale or marine animals or fish of any kind in the waters of the United States by means of explosive materials; to establish regulations in the District of Columbia during the National encampment of the G. A. R., in October, 1902; to authorize the Director of the Census to compile statistics relating to irrigation: relating to the transportation of dutiable merchandise at subports of Ta-coms and Seattle, Wash. of

Elkins for Annexation.

Senator Elkins then addressed the Sen ate in support of his resolution providing for the annexation by the United States of the Island of Cuba. Elkins said that his resolution had been misunderstood. It had no bearing on Cuban reciprocity and was not intended to have any. The resolution did not suggest annexation of Cuba in any offensive way. If provided that the Cubans must take the initiative and orly after they had asked for annexation could the United States act. He pointed out that many distinguished and patriotic American statesmen from Jefferson to McKinley had favored an-nexation and he thought the present was

the well-defined wishes of a majority of the people of Cuba and the United States in regard to annexation. It is in the interest of both countries. The environments of Cuba with the trials and difficulties that beet her on the threshold of her national life stand in the way of ing long an indepe ident natiwhile as a state in the American Union her people would be prosperous and progressive and enjoy the liberty and all the blessings that would flow from being part of the best, greatest and freest Government in the world. "It is claimed that annexation would destroy the promising and growing beet-sugar industry of the United States. Not so, however. The prices of products among the states of the Union always an equilibrium. With proper pro seeks. ction in favor of the cane sugar Cuba which she will enjoy as a state and the beet sugar of the United States within 15 years, the United States would not only produce enough sugar for its own consumption, but largely compete with other countries in the markets of the world "But for the war with Spain, although so successful and glorious, Cuba would now be a part of the United States. Even with the war, had it not been for our declaration that the war was not waged for conquest and aggrandizement, known as the Teller amendment, Cuba would now be a part of us, as Porto Rico and the This amendment has Philippines are, proved both mischlevous and unwise. "When Cuba shall become a part of the American Union and the isthmian canal shall be completed, which is now assured, Porto Rico, Cuba, Hawaii and the Philippines will be the outposts of the great republic, standing guard over American interests in the track of the world's commerce in its triumphal march around the There is a tendency in all human affairs in government, trade and commerce to concentration and combination. Mete-ors go to the sun, small nations are becoming parts of great nations, and Cuba in her present environment, situated as she is, cannot be expected to resist this tendency. The effect of the Platt amendments will be to help bring about annexation. A a cannot long remain half free and half dependent; such a condition embarrasses healthy progress in national life and leaves but little room for the exercise of the genius and intelligence of a people in the affairs of government, especially when under such restrictions as these amendments impose. 'The question of annexation forces itself to the front and will claim from now on the attention of the people of both countries. Reciprocity with Cuba affords no adsquate remedy for what threatens her interests. A 29 per cent reduction in her tariff and ours will do Cuba as a people as a Government little or no good. while it will work great harm to the interests of the United States, There was long discussion and fierce opposition to the annexation of Texas-much more, 1 think, than there will be to the annexation of Cuba. There is not a loyal and true American to be found within the confines of the Republic who would give up Texas, and within a few years after Cuba be-comes a state in our Jinion not an American will be found willing to part with the

AFTER SMELTING TRUST. Proceedings Begun in Colorado to Dissolve It.

DENVER, June, 30.-Proceedings on behalf of the State of Colorado to dis-solve the smelter trust were started in

the Supreme Court today. In a voluminous complaint, filed by At-torney-General Post, it is set forth that the American Smelting & Refining Com-pany and several other smelter concerns are in a combine to restrict com petition in the smelting business; the results of the monoply are injurious to the industries of the State; that it is violating the laws, and that it is pay-ing unreasonable dividends upon excessive and fictitious capitalization The complaint concludes with a demand that the defendants be adjudged to have forfeited their rights to do business in the State and that they be ousted and forever excluded from doing business in the State, and that a receiver be appointed to take charge of their property. The court stated that in fairness to the defendants, they should receive notifica-tion of the suit therefore, filing of pro-ceedings was withheld until they can be informed of the contents of the Attorney-General's complaint. The hearing of the State's right to proceed with the suit will probably be set down for next Satur-

day. The defendants in the case are: The The detendants in the case are: The American Smelting & Refining Com-pany, the Omaha & girant Smelting Company, the Pueblo Smelting & Refin-ing Company, the Bimetallic Smelting Company, the Colorado Smelting Com-pany and the Philadelphia Smelting & Refining Company.

Refining Company. The complaints recites the fact of the formation of the trust in New Jersey with a capital stock of \$55,000,000, and adds: "That said American Smelting & Refining Company was organized by women,

offered to it by the citizens of Colorado, it is stated, and "that said American Smelting & Refining Company, in order to further carry out its said conspiracy and unlawful monopoly, and in disregard of its public duties and obligations, has shut down and dismantied divers of its smelting and refining plants to the great injury of the public said Ameri-can Smelting & Refining Company was supposed to serve. That said plants were prosperous and going concerns prior to their conveyance to said American Smelting & Refining Company as afore said, and would but for said conduct of said American Smelting & Refining Company be prosperous and going con-cerns to this day."

Further in the complaint it is alleged that "by reason of the awe which said American Smelting & Refining Company has inspired in the hearts of the railway managers in the State of Colorado, there by securing secret and more favorable freight rates than are enjoyed by the general public of the State, as aforesaid, and by reason of the extortionate and unreasonable charges demanded and received from the people for the smelting and reduction of their ores, as aforesaid, the said American Smelting & Refining Company has been enabled to pay, and does now pay, excessive and un-
