

BC STRIKE ENDED

Compromise Is Reached in Freighthandlers' Dispute.

BOTH SIDES MAKE CONCESSIONS

Men Accept the Advance Offered Them July 1, but the Railroads Refuse to Recognize the Union.

CHICAGO, July 9.—The strike of the freighthandlers is virtually settled. Meetings of the strikers will be held tomorrow to ratify the action taken tonight by President Curran, of the order.

By the terms of the settlement, the strikers accept the schedule of wages offered them by the railroads July 1. This schedule was emphatically refused by the strikers at the time it was made. It offered an average increase of 20 per cent for all classes of labor connected with the freighthandlers' union.

The railroads at the time of offering the increase, July 1, said that under no circumstances would they recognize the union of the freighthandlers to the extent of allowing the strikers to organize to make terms for the men with the officers of the railroads by which they were employed.

President Curran, of the Freighthandlers' Union, said that he had practically been compelled by his own men to accept the terms of the roads.

The agreement reached by President Curran with the managers tonight must be ratified by the men tomorrow, but there is only a very small probability that this will not be done.

TRACY LIES LOW

(Continued from First Page.)

hounds at 5 o'clock this morning returned at 2 o'clock this afternoon after a fruitless search. It is believed that Tracy is hiding in the dense woods of that district.

TRACY'S REAL NAME

Ex-Montana Sheriff Is Certain It Is Henry Garr.

"The real name of Harry Tracy, the Oregon desperado, is Henry Garr, who began his career of crime in Montana in 1881," said A. O. Rose, ex-Sheriff of Beaverhead County, Montana, to a Spokane Spokesman-Review representative.

Rose has for the past five years resided near Pocatello, Idaho. He was four years Sheriff of Beaverhead County, Montana, and later was employed as a special detective by the Oregon Short Line Railroad Company, with headquarters at Dillon, the county seat of Beaverhead County.

Prior to being elected Sheriff of Beaverhead County, he was a freight conductor on the Oregon Short Line. He is visiting R. C. Hinkle, president of the Grand Hotel, in this city, who was a passenger conductor on the Oregon Short Line running out of Butte, Mont., at the time the former was running freight trains.

"An incident of his final disappearance from Montana, which shows that he had 'cleared' a career of crime, was that when he rode the 'woodchoppers' camp there was owing him in wages about \$30, and that the stolen goods did not exceed the value of \$15. He could not resist the temptation to steal. When he returned for his clothes after serving time in the Deer Lodge Penitentiary, about the first question he asked me was whether I had

CAUSES OF THE LATE WAR

APPEALS TO WILD AND RECKLESS PASSION.

Archbishop Ireland's Address to Educational Convention—Methods of Part of the American Press.

MINNEAPOLIS, July 9.—High-water mark in the attendance at the National Educational Association has probably been reached and it is undoubtedly the record for numbers present at any meeting of the association yet held.

The principal address of the session was delivered by Archbishop John Ireland, of St. Paul, a well known churchman and orator. He was given a warm reception by the great assemblage.

"Devotion to the Truth, the Chief Virtue of the Freighter," was the subject of the archbishop's address. Particular interest was shown in the archbishop's reference to the Spanish-American War, and to conditions in the Philippines. He said in part: "I am one of those who see in the sequence of the late Spanish-American War the guiding hand of a mighty Providence and the outbreak of forces long gathering in the bosom of the Nation, sure at one moment or another to break out in a resolute self-assertion."

BELIEVES SUSPECT IS MERRILL

Sheriff Wires Prison to Send Man Who Can Identify Convict.

SOUTH BEND, Wash., July 9.—The suspect whom Sheriff Roney has in custody under suspicion of being Merrill gives his independent air that he does not give a clear account of himself. He so closely resembles the description of Merrill that Sheriff Roney has wired the warden of the Penitentiary at Salem to come and see the man.

Lee Will Send Man to South Bend.

SALEM, Or., July 9.—Superintendent J. D. Lee, of the Oregon Penitentiary, received a telegram tonight from Sheriff Thomas Roney, of Pacific County, Washington, saying that he has arrested a man at South Bend answering the description of Merrill. Roney asked that a man be sent from the penitentiary to identify the man arrested. Superintendent Lee replied that he would send a man tomorrow, unless the identity of the man shall be earlier determined.

Plan to Hold Professor Loeb.

CHICAGO, July 9.—The installation of a completely equipped aquarium at the University of Chicago is the possible result of the offer made to Professor Jaques Loeb, the head of the department of physiology, by the University of California. The university authorities are said to be determined to keep Professor Loeb at all costs, and to carry on his experimental work with marine animals. He is talked of as a means of holding him.

late or distort; never to omit, when that which is omitted may be of relevancy in the formation of public opinion; never to publish the doubtful assemblage of mere gossip as well as ascertained news; never, above all else, to put before readers error and falsehood.

A striking paper was read in the kindergarten section by Mary C. May, director of the kindergarten department, State Normal School, Salt Lake, on defects in the teaching of English.

James Reber, Bishop, of Cincinnati, aroused the enthusiasm of the secondary education department by his demand for a closer system of supervision of schools. The speaker was most important, and do not supervise thoroughly and well, because too small and unimportant.

In the department of business education the president, I. O. Drury, of the State Normal School, Salt Lake, on defects in the teaching of English.

W. H. Norton, professor of geology at Cornell College, Iowa, in his address as president of the science instruction department, commended the second annual report for the committee on accredited schools, whose object it is to establish closer relations between the colleges and secondary schools of the North Central States, and to effect reasonable uniformity in requirements for admission to colleges.

Of the department meetings held this afternoon the one of most general importance was that of special education, held at the Hennepin Avenue Methodist Episcopal Church. Dr. Graham Bell, the inventor of the telephone and president of the department, explained the objects of the department and the wonderful work that it and the educators of defective throughout the country are doing.

NEW YORK, July 9.—Mrs. B. P. Cheney (Julia Arthur) was operated upon for appendicitis at her home on Lith Street, Boston Harbor. The operation was entirely successful, and it is expected that Mrs. Cheney's convalescence will be rapid, unless any unexpected complications should manifest themselves.

RIVERS OF BANKS

CONTINUED RAINS FLOOD LARGE TRACTS IN IOWA.

Streams in Nebraska and Kansas Overflow—Raccoon River Levee Breaks at Des Moines.

DES MOINES, July 9.—The continued rains have forced nearly all Iowa's streams from their banks and the destruction of crops, livestock and other property is assuming immense proportions. It is impossible to estimate the damage from the Indiana reports received. The damage is especially extensive in the Central, Northern, Western and Southwestern parts of the state.

The continuous rains are paralyzing business in Port Dodge, and the railroads are almost at a standstill. The west end of the city is inundated and families are moving out. The Des Moines River is up six feet at that point. Because of the saturation of all the insulation on the wires, electric power has been shut off and the town is in darkness.

Near Oxford, in Johnson County, in a wind storm last night, Jacob Burkhardt was crushed to death by the falling of a barn on the farm of Wesley Frush. Half a dozen barns were destroyed in the same neighborhood. Near North Liberty, the residence of Jacob Neidhart was wrecked and the family had a narrow escape.

The levee on the Raccoon River, near Murray and Railroad streets, commenced to weaken this afternoon and at 3 o'clock water was flowing over and through it in many places. Heroic efforts were made to strengthen it, while nearly 100 residents of the district thus endangered fled for their lives, many leaving their household goods behind them.

DES MOINES, Ill., July 9.—The Des Moines River reached the high-water mark of 1882, which was 20 feet, at midnight. At this hour the levee on the west side of town broke, flooding a large residence section. Most of the families removed earlier in the evening. A small break occurred in the Raccoon River levee just after midnight, and a large force of men is attempting to hold the flood in check.

Steady Fall for Eight Hours. HIAWATHA, Kan., July 9.—It rained steadily for eight hours last night. Many fields are filled with water, and the small streams are assuming big dimensions.

AGAIN A CANDIDATE.

Wilcox Likely to Be Nominated of Hawaiian Home-Rulers.

HONOLULU, July 9, via Victoria, July 9.—Delegate to Congress R. W. Wilcox returned here from Washington yesterday, arriving on the steamship Zealandia. He is in feeble health as a result of his illness in Washington, but expects to take an active part in the coming political campaign. Wilcox is likely to be the nominee of the Home Rule party to succeed himself, and openly avows his candidacy.

Situation in Nebraska.

OMAHA, Neb., July 9.—The rain that began falling last evening continued today. Reports received show the conditions in the flooded districts to be worse than at first reported. Morning trains were from one to five hours late into the city, and some of them had been abandoned entirely. At Superior, the Burlington Railroad had to suspend service, and the Missouri River bridge east of town began to slide away.

Disastrous to Railroads.

PEORIA, Ill., July 9.—A terrific electric and rain storm swept over Peoria and the adjacent country last night. Rain fell in torrents for several hours, and the damage wrought was extensive. All the railroad lines entering the city are more or less affected. A Lake Erie & Western freight train went through a bridge at Harnden, six miles from here. The engine and several freight-cars are piled in the bottom of Farm Creek. The engineer was fatally injured, and the trainman has died beneath the engine. It will be several days before traffic is restored.

Colorado Valley Torrent-Swept.

PUEBLO, Colo., July 9.—Accounts are coming in tonight of a cloudburst which swept the Wet Mountain Valley, the Grape Creek region and other portions of the Colorado Valley. The rain was four feet deep in a portion of Florence. The Santa Fe Railroad lost two iron bridges and 100 feet of track. It is reported that the Chandler Creek, which the Chandler coal mine and filled it, but this may be exaggerated. Crops in the Wet Mountain Valley were washed out. It is feared that the Grape Creek, the most fertile stream in the country in time of freshet, has damaged the fine irrigation system there which supplied orchards and nurseries around South Canyon. The Arkansas River rose four feet here, but has done no damage as yet.

The Flood at Kansas City.

KANSAS CITY, Mo., July 9.—The rain-fall at Kansas City thus far in July is four inches in excess of the normal fall for the whole month. Rain fell generally today in Kansas, Nebraska and Western Missouri. Many passenger trains arrived here late because of inundated tracks. The Missouri River bridge at Hannibal last night and will reach the danger point before morning. Rain is falling tonight. When clear weather comes the river will fall as rapidly as it rose. The only damage so far done is by the flooding of cellars in the bottoms.

Wheat Damaged Irreparably.

ATCHISON, Kan., July 9.—Unprecedented rains in Northern Kansas during the past few days have it is believed, damaged wheat irreparably. A heavy rain fell last night and this morning generally over Northern Kansas from 1 to 1 1/2 inches of water falling. Two Missouri Pacific trains were washed out of Clay and the branch from Yuma, Kan., to Prosser, Neb., a distance of 104 miles, is completely

AN ITALIAN CAPTAIN

Cured By Pe-ru-na of Catarrh of the Stomach After Doctors Failed.

Hon. J. D. Botkin, Congressman from Kansas, Writes an Interesting Letter.

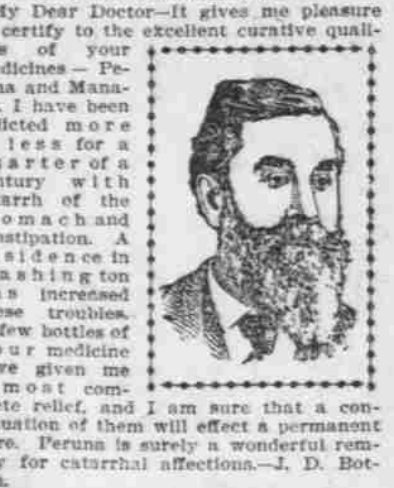

CAPTAIN O. BERTOLETTO.

Captain O. Bertolotto, of the Italian Barque "Lincolnea," in a recent letter from the chief office of the Italian Barque Lincolnea, Pensacola, Fla., writes: "I have suffered for several years with chronic catarrh of the stomach. The doctors prescribed for me without any result, the least benefit. Through one of your pamphlets I began the use of Peru-na, and two bottles have entirely cured me. I recommend Peru-na to all my friends."

In catarrh of the stomach, as well as catarrh of any part of the body, Peru-na is the remedy. As has been often said, "Peru-na will cure catarrh of one part, it will cure catarrh of any other part of the body." Catarrh is catarrh wherever located, and the remedy that will cure it anywhere will cure it everywhere.

The following letter from Congressman Botkin speaks for itself: HOUSE OF REPRESENTATIVES, WASHINGTON, D. C.

Dr. S. B. Hartman, Columbus, O.: My Dear Doctor—It gives me pleasure to certify to the excellent curative qualities of your medicines—Peru-na and Mananin. I have been afflicted for some time with catarrh of the stomach and constipation. A few bottles of your medicine have given me a most complete relief, and I am sure that a continuation of them will effect a permanent cure. Peru-na is surely a wonderful remedy for catarrhal affections.—J. D. Botkin.

This is a case of catarrh of the stomach which had run for twenty-five years, according to his statement, and Peru-na has at once come to his relief, promptly accomplishing for him more benefit than he had been able to find in all other remedies during a quarter of a century.

It stands to reason that a man of wealth and influence, like a Congressman of the great United States, has left no ordinary means untried and no stone unturned to find a cure.

MAN'S MISSION ON EARTH. Medical Book Free. "Know Thyself," a book for men only, regular price, 50 cents, will be sent free (sealed postpaid) to any male reader of this paper, 5 cents for postage.
