NAVAL FORCE IS WEAK.

Americans Intrust Affairs to Men of Rank of Commander.

OREGONIAN NEWS BUREAU, Washington, Aug. 12,-There are 24 Rear-Admirals and 73 Captains on the active list of the Navy, yet the critical affairs of the United States in South America and the rank of commander. Of all the big ships and cruisers which belong to the United States, there is only one of the third class in those waters, yet there is an urgent call for war vessels to protect the interests of the United States. There is yet a "pull" in the Navy which Secretary Moody has been unable to overcome. The small vessels have only a small number of marines, not enough to more than assert the authority of the United States if they were landed, and not sufficient to make a warlike componstration. It is the big ships that carry the marines in considerable force. The inadequacy of the naval force in the south seas has been commented upon quite vigorously in Washington during the past few days.

It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, with or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the ex-traordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. WITH THE PRINTERS' UNION.

Official Organ Will Hereafter Be Monthly Instead of Semi-Monthly. CINCINNATI, O., Aug. IL-The International Typographical Union convention to-day heard statements of Secretaries Born and Kemper, of the United Brewery-Workers, asking for the boycott of the Cincinnati and Boston beer. A resolution for the same went over under objection. Frederick Driscoll, commissioner of the American Newspaper Publishers' Associa-tion, delivered an elaborate address on arbitration, contracts, and the relations between publishers and the printers' unions, Mr. Driscoll asked for the enactment of several amendments to the general law of the union which would promote the business interests of the publishers, as well as members of the union, by broad-ening the foundations of industrial peace. The address of Commissioner Driscoil was

ordered spread upon the minutes, and re-ferred to the various committees. It was decided that the Typographica Journal should hereafter be published monthly instead of semi-monthly, so as to make the official organ self-supporting.

The session was devoted to consideration the report on laws.

At the afternoon session consideration was continued on the report on laws, which is unusually long this year. The committee was sustained in disapproving most of the 80 propositions for changes. The most notable revision of the committee was on restricting the time of machine operators. The committee re-ported unfavorably on the plan of limiting machine men to six days per week, and other restrictions so as to give bet-ter opportunities to substitutes, but the convention overruled this action, and the law committee was instructed to con-struct a new law on restriction, in com-pliance with the action of the convention.

Tomorrow night there will be an elaborate musical programme in the Music Hall in honor of the 50th anniversary of the union. Among the speakers will be Governor White, of West Virginia, ex-President of the National Editorial As-sociation; President J. M. While the men were fighting it fire appeared in another portion of the field, and was extinguished with difficulty. The loss is partly cov-ered by insurance. Helmkee, of this city, has just returned from the Breitenbush Hot Springs in this county. He reports several fires in the prests above the Breitenbush Springs, but says the binses thus far have been ex-tinguished by the forest rangers of that district before any great amount of damage had resulted. Mr. Helmkee reports further that hunters in the mountains are this year more careless in the start-ing of fires and the result has been a larger number of fires than usual. He says that the hunters become lost in the mountains and as a means of finding their way light torches and in the reckless handling of the same dres are frequently started. Owing to the fact that Oregon's full quota of forest rangers has not this year been appointed and assigned to duty, the task of guarding against forest fires falls heavily on those doing duty, especially in this district

A reward of \$1000 has been offered by the town of Coquille for his arrest. A despatch from Gilroy, in Santa Clara County, recently received, said that Landle had visited his wife at that place and had then left for this city, followed by Mrs. Landis, who had presumably come here to join him. As soon as this news arrived both Landis and his wife were sought for by the detectives ar the latter was soon located in a house on Russ street, where she remained a couple of days. During this time both she and the house were shadowed night and day, but Landis did not appear at any time. When she left for Gilroy, however, she was ac-companied by a man, who was shadowed to Gilroy, where it was discovered that he was her brother. No trace of Landis was found, and the police believe that if he was in Gilroy he returned from there to the Middle West, where they have believed him to be for some time, merely passing through San Francisco e
