## WHEAT STILL DULL

Western Yield Attracts Attention of the East.

### **EXPORTS ASTONISH NEW YORK**

Wool Continues Stendy, With Little Doing-Late Estimates Show a Decrease of From 5000 to 10,-000 Bales in Hop Crop.

The local markets the past week were marked by the usual Summer quietness, and although the receipts in the produce line were steady demand. A strong inquiry for poultry turkeys that were received found ready pur-

and receipts and sales were comparatively small. The most interesting news received in the market during the week was the statement of conditions in the Willamette Velley. The announcement that the farmers would not sell except at figures that were suitable to themselves, had little apparent effect, for the supply was sufficient to meet all demands. New York reports showed that the yield of the West is attracting more than the usual

New York Commercial said editorially:
Approximately one-quarter of all the emormous wheat experts of the United States goes out from the ports of the Pacific Coast. The general public's comprehension of the volume of the wheat crop of that section and of the manner of its handling up to the foreign consumer is imperfect at best. When it is reflected, however, that the two Puget Sound peris of Seattle and Tacoma can store about 11,000,000 bushels of wheat, and that of the average of 333 grain-freighters clearing annually from the Pacific ports for foreign lands New York Commercial said editorially:

ion of a news article which it published the

average of 353 grain-freighters clearing annu-ally from the Pacific ports for foreign lands about 40 per cent load at the Portland and Pu-get Sound piers, some idea of the grain busi-ness in the far Northwest may be had. The country tributary to the Pacific Coast seaports raises about 65,000,000 bushels of wheat overy year on an average; about 27,000,-000 husbels of it or nearly 60 per cent-are exported in the form of grain or flour. During the 10 years ended with 1901 an average of more than 110,000,000 bushels wheat was exported annually from the United States; of this amount the Pacific Coast perts shipped than 200,000 bushels wheat years and period of the same of the pacific Coast perts shipped than 200,000 to be the pacific Coast perts shipped than 200, about 27,000,000 bushels each year. The chief points of destination from the Pacific ports are Cork, South American ports, St. Vincent, Liverpool, China, Japan, Siberia, South Africa, Riswati and Alaska. The average price of freightage on wheat from Pacific ports to Engineering Country of the Country of t

land is about 27 cents a bushel.
Since January last the Northwestern Pacific ports have sent over 2,000,000 bushels of wheat, including flour, to the ports of South Africa.
This is said to be more than double the amount that was ever shipped there before in an enseason-and it is expected that at least \$,000,000 bushels will be sent to South Africa from Portland and the Puget Sound ports be-fore the close of the year. From this one item will be made plain how

while concessions of any sort are steadily re-fused. The off-expressed opinion of holders of the raw material that prices will advance as the season progresses seems to have little effect on manufacturers. A thorough canvass of the market for bargains has only served of the market for bargains has only served to show that they are few and far between. On the other hand, buyers who have kept in close touch with the market are firmly of the opinion that heavy purchases at the present time will only result in an advance in prices all along the line. Consequently they are willing to purchase in a hand-to-mouth way and await developments.

all along the line. Consequently they are willing to purchase in a hand-to-mouth way and await developments.

For current demand pulled wools have moved fairly well during the week. Good A's have been taken to some extent at prices ranging from 40042c. Fine A's are firmly held at Migistic. Somewhat of a better inquiry has been in evidence during the week for Texas and Territory wools, but manufacturers are still at variance regarding prices, and have only purchased when necessity compelled it.

Millstuffs—Middlings, \$23624; bran, \$18920 per ton.

the season—and it is expected that at least 5,000,000 bushels will be sent to South Africa from Portland and the Puget Sound ports before the close of the year.

From this one item will he made plain how important it is that the rallway carriers running to the Paoific ports should co-operate with the farmers for increasing the crops and for keeping the rates of freight always equitable under shifting conditions. And it is noteworthy in this connection that the Northern Pacific Company will immediately build a line from the terminus of the Central Washington at Coulse City to Adrian, on the Great Northern, about 25 miles south. This will cut of 150 miles of the haul to the Coast. The estimated coet of this rallway is \$3,500,000, and President Mellen declares that it is a "gift to the people of Big Head, as the road goes through a barren country."

Figures of the Hungarian crop are given in detail in the Bulletin des Halles. They are based upon conditions July 1, upon which date the close of the Hungarian crop are given in detail in the Bulletin des Halles. detail in the Bulletin des Halles. They are based upon conditions July 1, upon which date the crop promised to exceed the harvest of 1901 by 50,000,000 bushels, or nearly 25 per cent. 50550c; house cat, 5010c; fox. common promised in rye, barley and outs.

WOOL New Witte business was done in the prioritised in rye, hariey and oats.

WOOL—Very little business was done in the wool market, and while receipts were light, prices were firm and remunerative. Conditions in the East were thus reviewed by the New York Journal of Commerce, under date of August 11:

Conditions in the local wool market have not shown any material change since list reports. Buyers continue to display considerable conservations and refuse to purchase more than their actual requirements. Notwithstanding a quiet business, prices show up as firm as ever, while concessions of any sort are steadily rewise.

## FIRMER TONE TO STOCKS

GOULD LINES COME IN FOR THE MOST TRADING.

Northern Securities Company Is Believed to Be Getting Rendy to Distribute Its Stock.

NEW YORK, Aug. 13.-There was no im NEW YORK, Aug. 13.—There was no improvement in the activity of the trading on the stock market today, but the tone was firmer, and did not reflect the disposition to liquidate on all advances, which was a feature of yesterday's market. For the most part, however, the representative stocks were neglected and sluggish. The Gould stocks were the most complecuous in the trading. Missouri Pacific leading in point of activity. There were heavy dealings also in all of the Wabash securities and in Texas & Pacific. The Southwestern railroads are expected to gain a spesecurities and in Texas & Pacific. The South-western railroads are expected to gain a spe-cial benefit from the large corn crop, and the Winter wheat crop in that territory is also in a high condition. The Walsan stocks were especially affected by reports of aggressive steps being taken to secure terminal facilities both in Pittsburg and in Baltimore, for the use of the Walsan Eustern sutensions. These use of the Wabash Elastern extensions. There was fitful speculation in the soft-coal stocks, based upon the benefit that trada is receiving as a result of the paralysis of the anthracite trade. There were persistent rumors as well of an intention on the part of the Norfolk & Western directors to advance the dividend rate on that stock. The settlement of the elevated railroad troubles helped Manhattan and the Goulds as a group. There was a notable show of strength in a number of minor railroad stocks, especially in the granger region. The brokers employed by the speculative interest brokers employed by the speculative interest which accomplished the Louisville & Nashville which accomplished the Louisville & Nashville transfer were conspicuous in these operations. The National Lead stocks responded to the reports of a combination in the lead interests of the country. United States Steel shot up lic on the news of an additional distribution of \$10,000,000 profits to the underwriting syndicats, thus beinging the total distribution up to \$30,000,000 on actual paid-in subscriptions of \$25,000,000,000 on actual paid-in subscriptions of \$25,000,000. \$25,000,000 on actual paid-in subscriptions of \$25,000,000. The stock relapsed quickly into comparative inactivity, but with a fractional

comparative inactivity, but with a fractional gain retained.

The aggressive steps being taken in behalf of the Northern Securities Company to clear up litigation against that corporation, and the hopeful views expressed of its earnings by James J. Hill, give the impression that active steps are pending toward a distribution of the stock. This and many other plans are supposed to be waiting upon the return of J. P. Morgan, who is en route home from London. Among the weak features, Amalgamated Copper was affected by the unstable tone of the raw copper market. The price of Rhode Island was lowered, supposedly with a view to discourage the disposition of misority holders to liquidaic their holdings, rather than consent to the conversion plan. Funds were more freely offered on call today, and the rate was easier. The active export demand of wheat emocuraged the offering of exchange bills, and the rate for sterling showed no recovery from yesterday's decline. The closing was quite active find irregular.

Wabash debenture bonds were the feature of the bond market. The Central of Georgia second incomes were also in demand. Total sales, par value, \$2,710,000. United Status and state bonds were unchanged on the last call.

ds were unchanged on the last call. Closing Stock Quotations.

Money, 2% per cent.

The rate of discount in the open market for short bills is 2% per cent; do three months' bills, 2% per cent. Join in Request to List Bonds.

NEW YORK, Aug. 13.—In their application to list 2.100,000,000 rubles of Russian Government bonds on the Stock Exchange, J. P. Morgan & Co. have been joined by the National City Bank, August Belmont & Co. and Baring, Magoun & Co. It is believed that a large amount of the bonds will be marketed in this country. The application to list the Russian remiss was made, it is understood, in the name of the imperial government. The banking houses mentioned, as well as the City Bank, will act as the fiscal agents of the Russian Government, eashing such coupons as may be presented for payment.

MARKET SLIPS OFF, THEN MAKES RALLY, AND CLOSES HIGHER.

Onts Continue to Show Strength, but

CHICAGO, Aug. 13.—Wheat was unsettled. Strong Livespool cables on the bad weather abroad gave a builtab incentive to the early trade. Winter wheat receipts, however, proved heavy and much of the short wheat covered yeaterday was for sale again. Selling in good volume began, and prices slipped off rapidly until almost ic was lost. Then came reports of disappointing yields in the Spring wheat country. The weather Northwest was too rainy. Buying set in for the foreign account. Bradstreet's reported the world's available supply decreased by 1,343,000 bushels. Minneapolis expected atook there to decrease \$00,000 bushels. The seaboard reported 50 loads for export. Shorts at once covered aggressively, and prices jumped 3c from the low prices of the day. September opened 4,6%c up, at \$00,000 bushels. The seaboard reported 50 loads for export. Shorts at once covered aggressively, and prices jumped 3c from the low prices of the day. September opened 4,6%c up, at \$00,000 bushels. The seaboard reported 50 loads for export. Shorts at once covered aggressively, and prices jumped to 68,5465%c, and reacted to a strong close, 14,671%c up, at 705,670%c.

Prices in corn started strong on a fair cash demand and filling of buying orders by commission houses. Then began selling, in sympathe with the wheat break. On fresh buying mission houses. Then began selling, in sympa-thy with the wheat break. On fresh buying by influential houses, started principally by the wheat raily, prices reacted wall. September

wheat raily, prices reacted with dependent elosed firm at 12%c.

Oats showed more consistent strength than anything on the floor. Bears declare prices eannot hold, but at the same time the butis are giving the market much support and prices may advance. September closed strong, to up, at \$1621%c.

COLORED GLOBES.

Bulbs Used in Druggists' Windows Are Geing Out of Fashion.

Philadelphia Record.

Those huge glass bulbe of red and yellow and blue water, which are called show bottles, are gradually ceasing to be a feature of the decoration of druggists. windows. In the past they were as neces-sary to every drug store as a red and white pole is to a barber shop, but they have

All that druggists know of them is that they have always been used as window ornaments. The brilliant liquids that they contain are made cheaply and plainly of chemicals and water.

Thus, a solution of copper and ammonia makes blue; bichromate of potash makes orange. Aniline dyes have of late been used in the chemicals' place, but the liquids fade in a strong sunlight, and have frequently to be renewed. The liquids colored chemically, on the other hand, last well-night forever.
In the drug store at the southwest corner of Broad and Spruce streets there is a

show bottle of a very clear and shade of green. This is a green so fine that many druggists have been asked for the recipe that makes it. This, unfortunately, is unknown.

A clerk in the shop Z years ago colored A clerk in the shop Z years ago colored a clerk in the shop Z years ago colored a clerk in the shop Z years ago colored by the water and filled the bottle, and a little she water and filled the bottle, and a little street Dock.

Water permitting.)

STEAMER T. J. POTT

only by a cork of cotton from the air, the liquid has ever since remained as brilliant as it was in 1877. There are, indeed, many show bottles in this city whose contents are from 25 to 50

A Kingly Prerogative.

Tit-Bita: It is not generally known that King Edward since his accession to the throne has become the guardian of the children of the Prince and Princess of Wales, and of his other grandchildren, over whom he has complete control, the rights of their

parents being superseded.

This was decided to be law nearly 200 years ago, by a majority of ten to two of the judges. The right was frequently used by the Georges, who had a habit of, quarreling with their sons. Before members of the royal family can marry they will have to obtain King Edward's consent, or the marriage is void. George III managed to secure this power by means of the royal marriage act, in con-sequence of his brothers marrying sub-jects, to his great annoyance.

If you wish to enjoy a day of rest and pleasure, take the O. R. & N. train from Union depot at 3 A. M. for a short trip up the Columbia, returning, if desired, by beat from Cascade Locks. Takets and particulars at O. R. & N. ticket office, Third and Washington.
