CHANCE FOR TRADE

Prestige of United States In Orient Is Good.

MAY SOON BEAT ENGLAND

Russian Influence Is Merely Political and Is Confined to the North—Report of War Department's Special Commissioner.

SAN FRANCISCO, Aug. 24.—Dr. Jeremiah W. Jenks, special commissioner of the United States in the Orient for the War Department and professor of political economy and politics in Cornell University, has returned from his year's journey through Europe and Southeastern Asia and is spending a few days with friends at Stanford University before starting for the East next Tuesday. This journey he had undertaken at the call of the War Department, having been appointed by Secretary Root special commissioner to investigate the workings of the currencies of Eastern countries, their systems of internal taxation, the importation of coolie and Chinese labor to work the plantations of the East Indies, the use of native police and the organization of the constabulary—in general to report upon the internal administration of the Dutch and English possessions in the far East. The purpose of the investigation was to throw all the light possible upon the problems which confront us in the government and industrial development of the Philippines. Mr. Conant, holding a somewhat similar commission, went to the Philippines direct, and made an investigation of the currency in use among the islands.

Dr. Jenks' report in regards to matters of currency was completed during his seven weeks' stay in the Philippines and the reports on taxation, imported labor and police control while he was in Japan. The reports are now in the hands of the Secretary of War.

Professor Jenks found that the prestige of the United States throughout the East had been vastly increased by the events of the last four years. In trade, particularly in China, no power except England has the future before it that the United States has, and commercially England herself is likely soon to be outstripped by the great Republic. Germany has a vast and rapidly growing trade with the East, but her geographical position will enforce a severe handicap upon her in the future. Russia's influence is largely political and is likely to be confined strictly to the North.

Following out his instructions, Dr. Jenks visited the different countries of Europe which have colonies in the East to learn what their experience might teach in government of the peoples of the Orient and trade with them. After passing some weeks in Egypt he sailed for India, touching at the Island of Ceylon. His itinerary and investigations also included Burmah, Java, Sumatra, the Straits Settlements, China, the Philippines and Japan.

While in India, the Dutch colonies and Japan, gold has been declared the standard of value; silver, except in Japan, is almost exclusively the medium of exchange. A par of exchange between gold and silver was reached in India about four years ago. The silver in use throughout the East Indies is pretty generally the Mexican dollar or some similar coin, dating back to the old days of Spanish supremacy in war and trade. A peculiar state of affairs exists in some of the islands, particularly in East Sumatra, where the Dutch coinage is the official currency, demanded in taxes and imposts and paid to all government officials, while the silver money of the Straits Settlements is used exclusively to pay the coolie and Chinese laborers who work the plantations and in ordinary retail trade.

BERLIN LOOKS TO NEW YORK.

Rumors About Schwab and Morgan—Imports and Exports.

BERLIN, Aug. 24.—The bourse showed a decidedly better tone last week and operators eagerly anticipated J. P. Morgan's return to New York and hoped for a bull impetus from that market. The bourse of yesterday responded strongly to New York exchange of Friday. The bulls also worked the rumor, but without success, that Charles M. Schwab, president of the United States Steel Corporation, was coming to Europe to organize commercial combines in England and Germany upon the American type.

Another favorable factor last week was a considerable number of Belgian orders for German pig iron; this, however, was wholly offset by a number of disappointing reports and the despondent tone of the iron trade. Coal shares were buoyed up by increasing sales of coke and the larger output of pig iron, which in July amounted to 707,921 tons, or 56,600 tons above the output for July of 1901.

During the week irons advanced three to five points; coal shares one to two points. Among foreign rentes Russians were strongest upon being listed at New York. Domestic government loans were quiet but steady. Money is growing easier. The grain markets were most active upon the continuance of the rains which are delaying harvests and damaging crops.

For the first seven months of this year, the imports of Germany amounted to 23,869,407 tons as against 25,119,073 tons imported in the corresponding period of 1901. Germany exported 18,185,433 tons up to August 1 of this year as against 17,863,087 tons imported during the first seven months of 1901.

Money Limited in London.

LONDON, Aug. 24.—The supply of money continues to be limited, although the market was considerably assisted by government disbursements. The particular adverse feature of the week was the weakness of consols. The firmness of discount rates in spite of the growing bank reserve, reflects the general impression that gold will be shipped to the United States. Shares were dull and neglected during the last week and the attendance at the stock exchange was small. In view of the indisposition to buy or sell, prices were holding well. The present apathy is partly due to the holidays and is chiefly attributable to the uncertainty of the outlook. American railroad shares alone showed animation and this was due to excellent traffic showing. Kaffirs were firmer and in great demand on the continent than in London.

TAFT ON WITNESS STAND

Ex-Filipino Generals Good Civilians—Wright to Come Home.

MANILA, Aug. 24.—The defense in the Freedom sedition case has called Governor Taft as a witness to show that many former insurgent leaders who were guilty of various offenses not recognized by the laws of war have been appointed to civil positions. Governor Taft gave testimony to the effect that many such former insurgents had been appointed but that they had proved honest, straightforward and earnest. He said that some of them had been guilty of murder from American standards, but that from their own standpoint they undoubtedly believed their conduct of the war to have been legitimate. Governor Taft said that he had found these appointees to be loyal and that they were not chosen because they happened to be insurgent Generals, but because they were men of influence among their own people. He said the experience of the civil authorities with these men had been most satisfactory.

Governor Taft has resumed the Governorship of the archipelago, relieving Luke E. Wright, who has been acting Governor during Judge Taft's absence. Commissioner Wright is preparing to visit the United States.

Native Constabulary Ambushed.

MANILA, Aug. 24.—Ten members of the native constabulary were ambushed last Tuesday at a point near Magdalena in the Province of Sorsogon, Luzon, by a band of 60 ladrones. The latter were armed with rifles and bolos, and a desperate fight at close range took place. One member of the constabulary was killed, two were wounded and three were captured. Seventy constabulary have taken the field in pursuit of the ladrones.

More Deaths Than Are Reported.

MANILA, Aug. 24.—Cholera official statistics show a total to date of 24,266 cases and 18,060 deaths. The actual number of cases and deaths is greatly in excess of the official reports. In Manila there were eight cases reported last Saturday. In some of the provinces of Luzon, the cholera situation is bad, 414 cases and 317 deaths were reported from the Province of Ilocos Norte, last Saturday.

ON BRINK OF CHASM.

Plucky Tennessean Saves Two From 300-Foot Fall.

MONTEAGLE, Tenn., Aug. 24.—At Forest Point last night, Miss Vinnie Tucker, a prominent young woman of Decherd and one of a party on a mountain trip, stepped over the cliff. Sidney Cowan, of Nashville, sprang to her rescue. He caught her, but too late to prevent her fall. Both were dragged over the precipice together and landed on the incline 35 or 40 feet below. Though Cowan was badly shaken up he was still conscious as his body rolled down the ledge and he caught hold of a brush which staid his descent. Miss Tucker, bleeding and unconscious, was rolling down the way he had gone. As she passed he caught and held her. They were but three feet feet from a 300-foot chasm.

NAVAL GAME ENDED.

(Continued from First Page.)

rather than to try at the last moment to run unseen by Admiral Higginson into Gloucester harbor.

NEED WIRELESS TELEGRAPH.

Higginson Says It Would Render Torpedo Scouts Unnecessary.

ROCKPORT, Mass., Aug. 24.—To an Associated Press correspondent Admiral Higginson praised the signal service men. He scored the telephone service and said it appeared very inadequate. He emphasized the necessity of the wireless telegraph, and illustrated the benefits if ships of the Navy were fitted with this new invention.

"There would have been no need of the torpedo scouts," he said, "for I would have known at all times the exact location of my ships. We need the service badly. We are three years behind our foreign friends in this respect, and I hope the system will be installed on the ships of the Navy very soon."

Commander Pillsbury was asked regarding his movements, and stated that when he left Provincetown last Tuesday his fleet sailed directly to sea, running off some 400 miles about southeast of Cape Cod. His plan was to lay off there until Saturday night, and then to try for Salem harbor. Coming on the coast last night, he had first thought of making a feint with one of his ships in the direction of Portland, hoping to draw off Admiral Higginson and the big ships of his command in that direction, but as a heavy sea was running and as his ships were slow of speed and their bottoms foul, he decided not to do this, and made his run direct for Salem harbor. The only ship of Admiral Higginson's fleet he saw during the entire period was the torpedo-boat Barney, which he sighted just about the same time he found he was discovered.

Report of the Panther.

VINEYARD HAVEN, Mass., Aug. 24.—The United States ship Panther, Commander Wilson, of the defeated white squadron, anchored in this harbor this afternoon on the way from Salem, bound for New London, at which port she will remain until August 31, when the vessel will take on board the naval militia of Connecticut and report to Admiral Higginson to participate in the continuation of the naval maneuvers.

The executive officer on board the Panther stated tonight that three ships of the Atlantic squadron had been lying about 80 miles off shore waiting favorable weather to make a dash for the coast. The weather was delightful, and the bright moonlight nights had been extremely unfavorable for an attempt to gain an anchorage on the coast without being discovered. It was decided, however, to make an attempt last night, and the fleet steamed toward shore in an effort to reach Salem harbor. No lights were visible from either ship, and they succeeded in passing the line of scouts without being observed. They were off Manchester this morning when daylight broke and they were discovered.

White Squadron Handicapped.

WASHINGTON, Aug. 24.—Prompt information of Commander Pillsbury's defeat in his attempt to enter Salem harbor and hold it against the ships of Admiral Higginson's fleet came to the Navy Department this morning in the following dispatch from the commander of the attacking fleet:

"Gloucester, Mass., Aug. 24.—White squadron surrendered to blue at daylight this morning while entering Salem harbor. The Panther and the Supply have been ordered to proceed in obedience to the Department's instructions. The Prairie goes to Boston tomorrow for repairs.

"PILLSBURY."

The white squadron's defeat was anticipated by the Navy officials here. They believe he was handicapped by the the limited area of the defending line, the slow speed of his ships and the small number of ports which he could enter under the rules.

MacArthur Going to New London.

NEW LONDON, Conn., Aug. 24.—Major-General MacArthur, who is to be in command of the Army maneuvers in the coming Army games with the Navy, is expected to arrive here tomorrow to assume personal direction of the preparation in the forts at the Eastern entrance of Long Island Sound. With him will be General Randolph, chief artillery officer; General Gillespie, of the Engineer Corps, and General Greely, chief signal officer.

Deal for Mexican Mines.

MONTEREY, Mexico, Aug. 24. — A deal has just been closed for the Bolonitas mines, in Quanajuato, for $1,000,000. The purchasers are Boston capitalists principally, and their company is capitalized at $5,000,000.

Mount Allomonte Is Active.

ROME, Aug. 24.—Mount Allomonte, in Calabria, has been in eruption since last Friday, and is emitting showers of stones and flames.

Cholera Morbus.

This is an extremely dangerous disease. In almost every neighborhood some one has died from it, and in many instances before a physician could be summoned or medicine obtained. Mrs. E. H. Delano, of Durant, Mich., is subject to severe attacks of cholera morbus. During the past four years she has kept at hand a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and says it has always given her quick relief. During this time she has used two bottles of it. This remedy can be depended upon in the most severe and dangerous cases. The safe way is to keep it at hand, ready for instant use. For sale by all druggists.

PRESIDENT IS GODFATHER

HIS OFFICE AT CHRISTENING OF THE CHANLER BABY.

Enthusiastic Greetings on Way to Home of Senator Lodge, at Nahant—Another Speech Today.

NAHANT, Mass., Aug. 24.—President Roosevelt left Newport today at 2 o'clock in a sumptuous train of four special cars. Accompanying him to the station were Mr. and Mrs. Winthrop Chanler and Senator and Mrs. Lodge, the two latter journeying with the party to Nahant, the home of the Lodges, where the President will spend the night.

A quieter day could not have been spent by the President. As is his custom, he rose early, and after eating a light breakfast left the Chanler house about 9 o'clock and went out to meet Mrs. Roosevelt, who had come up on the Sylph during the night. The President was aboard the ship about two hours. Mrs. Roosevelt accompanied him ashore, and spent about half an hour at the Chanler residence, taking a look at the baby, but did not remain for the christening. She left shortly before the event for Oyster Bay. The President remained at Chanler Villa, where the christening of the baby was performed by Rev. John Diamond, of the Episcopal church, in the presence of the President, who acted as godfather; Senator and Mrs. Lodge, the latter acting as godmother; Mrs Julia Ward Howe and a large number of the personal friends of the family. The affair was regarded as one of the most auspicious events of the season at that fashionable resort, due not only to the prominence of the Chanlers but to the fact that the President of the United States would act as godfather to the child.

The traveling Sunday was something new for the President, but in this instance he was obliged to depart from his usual custom, as he went to Newport for no other purpose than to attend the christening, and it was necessary to make the short journey to Nahant today in order to maintain his schedule.

Lieutenant-Governor Bates and Adjutant-General Dalton, of Massachusetts, boarded the train at Newport and completed the arrangements for the entertainment of the President and party in Boston tomorrow night.

That the enthusiasm attending the President's journey shows no abatement was evident today by the crowds gathered about the station at Newport, which cheered his arrival and continued cheering until the train was lost to sight. Stone Bridge, R. I., Fall River, Taunton and Mansfield, Mass., turned out in force to greet the President, and as each place was reached the train was slowed down, the President appearing on the rear platform and bowing his acknowledgements. At Boston the entire party entered the special train, which was standing on another track, the crowd in the meantime continuously cheering.

Upon arriving at Lynn, where carriages were in waiting to take the party to Nahant, the sight was one to be long remembered. Stretched from the station, through the city and across the peninsula to Nahant, a distance of four miles, were fully 60,000 people, who cheered again and again as the President passed. There were two miles of carriages on either side of the road. The President rode with Mrs Lodge, and was escorted from Lynn to Nahant by a troop of cavalry.

The arrival at Nahant was a signal for another outbreak of applause, and the two places seemed to vie with each other as to which should be more cordial in its greeting. Flags and bunting were displayed everywhere.

Tomorrow afternoon the President will deliver an address from the steps of the Public Library building in Nahant.

Mrs. Roosevelt at Saunderston.

NARRAGANSETT PIER, R. I., Aug. 24.—Mrs. Theodore Roosevelt, with her son, Theodore, Jr., arrived at Saunderston, in Narragansett Bay, on the Sylph, and was entertained by C. G. Le Farge, of New York.

SUNDAY TROLLEY WRECK

Three Persons Killed and Many Seriously Injured.

NORFOLK, Va., Aug. 24.—In a head-end collision between two cars on the Bay Shore Terminal line late today three persons were killed and many others badly injured. The dead:

W. H. Yandell, motorman.
C. B. Golden, motorman.
Linwood Fentress, aged 10.

Seriously injured: W. R. Waller, R. J. Davis, George Stephenson, Mrs. J. P. Stephenson, Joseph White, M. V. Ahern, of the Virginia Pilot; Benjamin Rowson, managing editor of the Humorist; Mrs Lillian Land, John Taylor (colored), Maria Fentress (colored), Mrs. Ruth Banks, Phoebe Frederick (colored), Corliss Waller, Miss Victor Parks, Louis Parks.

The accident occurred 3½ miles from Norfolk. One car was coming from Ocean View and the other going to Ocean View. The orders were that the southbound car should wait at the siding for the other. Motorman Yandell failed to obey the orders, and the crash came 400 yards beyond the siding. Yandell endeavored to jump, but was crushed in the telescoped cars, and died. Motorman Golden, of the other car, applied the air brakes as soon as he saw the danger of the collision, and then tried to jump, as did Fentress. Both Golden and young Fentress were caught under the platform of the Shore bound car, which was piled up on the other, and were killed outright. Golden's head was almost torn from his body, and both legs were cut off. Both cars were full of Sunday excursionists, and few escaped injury.

Five Killed by Freight Wreck.

NEW ALBANY, Ind., Aug. 24.—In a disastrous freight wreck on the Southern Railway, near Georgetown, 10 miles west of here, early today, Engineer Duval, Fireman Cox and Brakeman Ross of one train were killed outright, and Engineer Harry Goedal, and Fireman George Meyers, of the other train, were fatally hurt. Fourteen box cars loaded with wheat, together with two locomotives, were tumbled over a trestle into a ravine, 40 feet below, and were demolished. All traffic on the Southern between Louisville and St Louis has been blocked all day. The loss to the railroad company is $35,000.

Gas Killed Three Persons.

CHICAGO, Aug. 24.—Bryant Schick was awakened this morning with the impression that a mishap had befallen his wife. He found the house filled with escaping gas, and his wife and two children, one a girl of 2 years, and the other an infant, dead. It is supposed that Mrs. Schick turned on the gas while temporarily insane.

Five Suffocated in a Fire.

PORTLAND, Me., Aug. 24.—The four children and the servant girl of William Kronberg were suffocated in a fire today in his house.

More Pay for Telegraphers.

ST. PAUL, Aug. 24.—Four hundred telegraph operators, one-half of the force employed by the Northern Pacific, will get an increase in wages September 1. An order increasing the minimum salaries in amounts from $2 50 to $10 per month was issued by the company Saturday. This action, which was voluntary, will add $25,000 to the pay-roll of the company and affects operators along the entire system. O. C. Green, superintendent of telegraph of the Northern Pacific, when asked about the order, stated that it was entirely voluntary on the part of the company and was decided upon without the least agitation on the part of the employes.

SOME GIRL WENT WRONG

Into Basement of Bartholin House at Untimely Hour.

CHICAGO, Aug. 24.—Whether or not the exhuming of the body buried in Calvary cemetery as that of Minnie Mitchell shall develop that the missing girl's family was correct in accepting the body as that of their missing daughter, the police have secured ample evidence to indicate that some young woman was lured into the basement of the Bartholin house on the Wednesday night that William Bartholin and his sweetheart vanished from sight. An important witness, whose name will not be made public for the present, has been found. He is a business man whose home is not far from the Bartholin house.

According to this witness he alighted from a forty-third-street car shortly after 9 o'clock, an hour after Minnie Mitchell and her lover bade adieu to the Mitchell family on the steps of the house at 604 Forty-fourth street. He walked along Calumet avenue and his walk led him past the Bartholin home. As he went by he noticed a woman, apparently quite young, standing on the grass plot in front of the building. The pedestrian had gone beyond the Bartholin residence when he heard a man's voice, and looking back he could just discern a figure outlined against the staircase leading to the basement which two weeks ago gave up Mrs. Bartholin's body. The man on the steps, who is assumed to have been William Bartholin, said something that could not be heard and the girl responded, asking why the first speaker wanted her to go into the "filthy basement." Turning back again, when he had gone some distance in his walk, the man caught a glimpse of the woman descending into the basement.

The police today found a canvas overshoe covered with blood in the Bartholin house. Its size precludes its having belonged to Mrs. Bartholin, but it has not been identified as belonging to Minnie Mitchell.

RACE WAR IN INDIANA.

Started at Ball Game and Two Persons Are Dead.

INDIANAPOLIS, Aug. 24.—A race riot broke out today at Haughville, a suburb of this city, between 200 negroes and whites employed by the National Malleable Casting Company. There has been bitter race feeling between them for several years and trouble has frequently broken out. Two people have been killed.

A ball game this morning between the two factions caused excitement. As the crowd left the field hostilities broke out. Stones, bricks, clubs and other missiles were used. Two hundred persons were immediately crushed together in a fighting mass. Twelve or 15 shots were fired, and it is reported one negro was shot, but he was taken from the field before the police arrived. The whites were victorious, driving the blacks from the field and wounding a number of them. Several white people were badly injured. Ten arrests have been made and others will be made as rapidly as the persons are found.

Woman Killed in Street.

ALBANY, Ind., Aug. 24.—Mrs. Minnie Masterson, wife of James Masterson, was murdered here today, and her husband is in jail charged with the murder. He denies the charge. He says that he and his wife were returning from Louisville to their home on South street, this city, and had just got off a car when a man stepped from behind a post and grabbed his wife, who was a few steps ahead of him, and the woman screamed "For God's sake, Willie, don't!" and three shots were fired in rapid succession by her assailant. Masterson insists that the murderer of his wife fired two shots at him, one of which took effect in his arm. He was bleeding profusely from a wound in his arm when arrested.

Wounded Marshal Dead.

CAIRO, Ga., Aug. 24.—Town Marshal Goodwin, who was fatally wounded in a battle last night with Galey Tyrus, a negro desperado, charged with the murder of a companion, died here today from his wounds. A posse is in pursuit of the negro.

PUFF OF POWDER SPOILS IT

Society Refuses to Dress in Colonial Costume for Mrs. Fish's Ball.

New York Journal.

Poor Mrs. Stuyvesant Fish is experiencing no end of difficulty and disappointment in connection with her colonial ball at Newport next week. First it was the men who protested so much against her edict exacting that they should shave off their mustaches and beards that she was obliged to withdraw it, although hirsute adornments of this kind will appear ridiculously incongruous with costumes of the times of the Colonial epoch.

And now I hear that quite a number of women—and some of the most fashionable ones at that—have made up their minds to content themselves with merely powdering their hair, refusing to go to the trouble and expense of having gorgeous 18th century costumes made solely for that one evening.

If Mrs. Fish objects to their attending her dance in this guise and they stay away in consequence thereof, the entertainment will be doomed to failure.

Indeed, the outlook for the ball is not a rosy one by any means, for, what with half the men wearing beards and mustaches in conjunction with colonial dress, and many of the women being arrayed in ordinary modern, up-to-date gowns, with powdered hair as the sole concession to Mrs. Fish's decree of fancy dress, the dance as a spectacular effect will be disappointing, while a number of those women who go to the length of donning 18th century costumes will feel uncomfortable by the knowledge that they are attracting invidious and unfriendly attention to their ancestry, which would scarcely be described as colonial.

In one word, New York society, no matter whether in town or Newport, does not take kindly to fancy dress balls. The Bradley Martin entertainment of that kind was a dismal failure, while the only thing that preserved the celebrated Vanderbilt ball costume from a similar fate was the presence of Consuelo, Duchess of Marlborough, and the curiosity of the fashionable set here to know something more of the W. K. Vanderbilts, then bursting forth on the social horizon of this city.

"Skeeters" in Atlantic City.

New York World.

Millions of mosquitoes swarmed over Atlantic City Thursday and bit every one they came in contact with. The board walk was a living field of them, and they hovered in millions around the lights.

On the Ocean Pier the situation was worse. It was necessary for the management to place lighted punk all over the pier. Hundreds of women with their escorts carried lighted punk on the boardwalk, while the drug stores did a land office business and the price of citronella oil went up several cents.

Some of the mosquitoes are the largest ever seen here. Professor H. S. Wright, of the Atlantic City High School, had one sent to him which measured three-quarters of an inch. The professor stated that the poison from the insect was strong enough to kill an Army mule. The pests "queered" everything that was good and the actors had a disagreeable experience.

Both Sides Made Concessions.

HUNTINGTON, W. Va., Aug. 24.—The 600 employes of the Ashland sheet mill who have been on strike for several months will resume work at midnight. Concessions have been made by both sides.

YIELDS TO UNCLE SAM

PORTE COMMANDS THAT OUR DEMANDS BE ACCEDED TO.

Relations Between Legation and the Sultan Again in Normal Condition.

CONSTANTINOPLE, Aug. 24.—An Imperial order has been issued commanding that all the demands made by the United States upon Turkey be conceded, and the relations between the Porte and the United States Legation have resumed their normal condition.

(The non-execution by the Turkish Government of certain agreements reached long ago on several questions affecting the interests of American citizens led to somewhat strained relations between the United States Legation and the Porte. Last week Mr. Leishman informed the Porte that he would not discuss other matters until the terms of the settlements already agreed upon had been carried out. The demands made by the United States include the rebuilding of the American mission house at Kharpoot, destroyed at the time of the Armenian massacre there, and granting of permission to Armenian women and children to join their husbands and fathers who are naturalized Americans. Mr. Leishman also had difficulty in negotiating with a responsible Turkish authority. His intercourse had been with the Turkish Minister of Foreign Affairs, whose agreements have been annulled by the Grand Vizier.)

Murderers Ordered Punished.

PEKIN, Aug. 24.—An edict has been issued ordering that the murderers of an English missionary named Lewis and an Australian missionary named Bruce be punished. The crimes were committed at Chen Chou, in Hu Nan Province. The government expresses deep regret at the occurrence and promises to make reparation. It is rumored that the murders were the outcome of an outburst of superstitious frenzy on the part of the populace based upon the idea that the missionaries in question had caused an epidemic of cholera, which is raging at Chen Chou, by poisoning drinking water. The mob wrecked the mission building and murdered the missionaries, who had but recently arrived at Chen Chou, where they were cordially welcomed.

Catholics Want Emancipation.

LONDON, Aug. 25.—In a dispatch from Rome, the correspondent of the Chronicle says that Rev. Benjamin T. Kiley, bishop of Savannah, Ga., had an audience with the pope prior to visiting other Italian cities, and took advantage of the occasion to urge upon the pontiff the wishes of a large number of American bishops for the emancipation of American Catholicism from the jurisdiction of the congregation of the propaganda at Rome, on the ground that the congregation was only intended to supervise religious affairs in infidel regions.

Baldwin Ordered to Proceed.

LONDON, Aug. 24.—Cabling from Copenhagen, the correspondent of the Daily Express says William Zeigler, of New York, who has financed the Baldwin polar expedition, has ordered Mr. Baldwin to proceed to Franz Josef Land on board the America, in search of the Frithjof, which has not been heard from since she was dispatched last July to search for and bring relief to Mr. Baldwin.

Americanization of the World.

BERLIN, Aug. 24.—The Lokal Anzeiger says an evidence of the growing Americanization of the world is shown in a plan to establish the post-graduate medical school at Frankfort after an American model. A private person has contributed 500,000 marks for the establishment of this school.

Wife of Duke Albert Dead.

BERLIN, Aug. 25.—Archduchess Marguerite Sophie of Austria, wife of Albert, Duke of Wurtemburg, died today at Gmunden, Austria, as the result of an operation for appendicitis. She was born in 1870.

Wireless Telephoning.

BERLIN, Aug. 24.—Experiments in wireless telephoning were conducted successfully today between Sassnitz and Kolberg, a distance of 105 miles.

INSURGENTS ARE WINNING

Capture Gunboat With 300 Government Soldiers.

KINGSTON, Jamaica, Aug. 24.—Details of the capture of the Colombian Government gunboat Boyaca by the insurgents outside of Panama have reached here. The Boyaca was captured August 1 by the insurgent gunboat Padilla, after a short and unequal fight. She had on board at the time nearly 300 soldiers, under the command of Generals Ferrero and Eano, who were to reinforce General Morales Berti, at Agua Dulce. The Boyaca also carried several cannon, a supply of ammunition and a large sum of money. Flying the insurgent flag, the Boyaca is now guarding the entrance to Panama harbor.

Nothing definite is known on the isthmus of the situation of the government General Morales Berti, at Agua Dulce, but many persons believe that the General, after withstanding a siege of several days, during which his forces were subjected, chiefly at night, to a severe artillery fire from the insurgents, proved the hopelessness of receiving reinforcements and supplies from Panama, and was forced to surrender to the insurgents. If the reported surrender of the government forces at Agua Dulce is true, the insurgent General Herrera is confronted by a big problem to provide food and shelter for and to control this large and hostile element.

Rumors are current on the isthmus that several detachments of insurgents have been seen at the various stations along the railroad line between Colon and Panama, and an attack at either end of the line is expected at any moment. Because of the presence of insurgents along the railroad, the government is most anxious to obtain reinforcements on the isthmus as soon as possible. Fresh trouble, however, is said to be brewing in the interior of the republic, and, owing to the frequent refusals of steamships to carry government troops, the bringing of reinforcements to the isthmus is apparently no easy matter.

The government gunboat General Pinzon arrived at Cartagena a week ago from Colon, after having made the voyage with difficulty. It is now said to be impossible for the General Pinzon to go to sea again in her present condition. Important parts of her machinery have been completely ruined.

Government officials on the isthmus assert that the newly acquired government cruiser Cartagena shortly will bring troops to the isthmus. In other quarters, it is said the Cartagena is neither at Savanilla nor at Cartagena, but that she has gone to Santa Marta, whence she will proceed to the British Island of Trinidad, in connection with the detention there of the steamer Liberatador, which has been in the service of the Matos revolution against President Castro, of Venezuela. The Colombian Government recognizes the revolutionary situation to be serious.

Many persons question the ability of the insurgents to hold Colon if they attack and capture that port, owing to the fact that they possess no gunboats on the Atlantic side of the isthmus. The government is endeavoring to purchase another war vessel in the United States for use on the Pacific Coast. There is at present no foreign man-of-war at Colon.

Blockade Is Terminated.

WILLEMSTAD, Curacao, Aug. 24.—News has reached here from Venezuela, that, in consequence of the reoccupation of the port of Carupano, Bermudas, by government forces, the blockade at that place has been terminated. The United States training ship Topeka has left La Guayra for Hayti. The departure of the Topeka from Venezuelan waters is taken to prove that the United States Minister at Caracas, Herbert Bowen, believes that the final movement of the Matos revolution will be delayed.

According to Venezuelan advices received here, the government of that country has replied to the protests lodged by Germany, Great Britain and France against the blockade of Venezuelan ports as not being effective, by declaring that the protests in question will not receive consideration. Two Dutch schooners which entered blockaded Venezuelan ports in ignorance of the existing blockade have been captured by government authorities.

WASHINGTON, Aug. 24.—United States Minister Bowen, at Caracas, Venezuela, has notified the State Department that on Friday last Carupano was occupied without opposition by the government troops, which recently evacuated Cumana. Carupano is a seaport town 57 miles northeast of Cumana.

To Be Married in Chile.

SANTIAGO DE CHILE, Aug. 24.—Norman Hutchinson, of California, secretary of the American Legation here, and Miss Janet Louise Davis, are to be married here next Wednesday. G. A. Lowther, British Minister to Peru, will act as best man.

Peru Adheres to Sugar Convention.

LIMA, Aug. 24.—A motion has been proposed in the Chamber of Deputies that Peru shall adhere for a term of five years to the terms of the Brussels sugar convention.

A Fortune for Newark Institutions.

New York Herald.

Thirty-five bequests, aggregating $325,000, are made in the will of Cyrus O. Baker, a member of the New York Stock Exchange, who died in his home, in Newark, on July 4 last. The will, which was executed on May 30 last, was offered for probate in the Essex County Surrogate's office, in Newark, Thursday. Eight Newark charitable institutions receive a total of $102,000, while the 27 other bequests are to relatives and friends, and range from $2000 to $60,000 each.

The inventory showing the value of the estate has not yet been filed, but it is said to exceed $1,000,000. The residue is to go, share and share alike, to Charles W. and Cyrus O. Baker, Jr., nephews of the deceased. It is stated in the will that the amounts left to charitable institutions shall appear on their records as the "Baker Memorial Fund," and that the bequests are made in memory of Mrs. Jane E. Baker and Daniel W. Baker, mother and brother of the testator.

Rumblings in Russia.

LONDON, Aug. 25.—Violent earthquakes were felt last Friday, cables the St. Petersburg correspondent of the Daily Mail, at Andishan, near St. Petersburg.

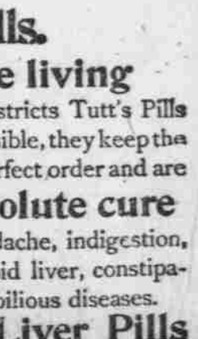
A Good Hearted Man,

or in other words, men with good sound hearts, are not very numerous. The increasing number of sudden deaths from heart disease daily chronicled by the press, is proof of the alarming prevalence of this dangerous complaint, and as no one can foretell just when a fatal collapse will occur, the danger of neglecting treatment is certainly a very risky matter. If you are short of breath, have pain in left side, smothering spells, palpitation, unable to lie on side, especially the left, you should begin taking



J. A. Kreamer.

Dr. Miles' Heart Cure.

J. A. Kreamer of Arkansas City, Kans., says: "My heart was so bad it was impossible for me to lie down, and I could neither sleep nor rest. My decline was rapid, and I realized I must get help soon. I was advised to try Dr. Miles' Heart Cure, which I did, and candidly believe it saved my life."

Dr. Miles' Remedies are sold by all druggists on guarantee.
