COMES WITH A RUSH

Front-Street Produce Markets Are Booming.

HEAVIEST TRADE ON RECORD

Prosperous Times in All Lines of Johbing Business - Hop Market About to Open-Local and Eastern Wheat Situation.

Cereals-Trade in wheat quiet and prices depressed; oats slow and firmer; barley in good demand and steady. Hops-Picking under way and small lot received; crop of finest quality;

prices nominal. Wool-Small trade locally; Eastern Oregon brings good prices in Boston. Fruit-Receipts about the largest ever known; prices maintained under active

demand. Vegetables - Big trade and steady

prices for Oregon produce.

Dairy and Farm Produce - Fancy creamery butter scarce and firm, cheaper grades moving freely, especially to the country; poultry market in better shape than last week; eggs active and

Meat and Provisions Large receipts of beef and veal and good prices reorived; saiable hogs scarce.

Front-street produce merchants are enjoying the biggest trade they have ever known Never in the history of the street has there been such a run of trade, nor has the quantity of farm, orchard and dairy products that is passing through the hands of commission men and dealers ever been equaled. The demand so far has kept pace with the supply. In the merchandise lines, the same satisfactory report is made by jobbers, not only the local, but also the interior, trade being exceptionally heavy. In cereals, the market is inclined to be somewhat quiet, and receipts, especially of wheat, are not large at present.

WHEAT-Foreign markets yesterday were very discouraging, though New York and Chiengo both closed a shade higher. The local market was reported as stagnant. For export purposes, 60 cents was all wheat was worth, some dealers may have paid a little more. Bluestem is quoted around 63% or 64. cents, and Valley about the same. Very little wheat is coming in, whereas receipts at this time of the year should be quite heavy. Buyers find it difficult to get cars, which accounts for the light arrivals. It is hoped that the shortage of rolling stock is only temporary, as harvesting is about completed, and there is need for all the cars that can be brought into In a few districts in Eastern and Southern Oregon and in the Valley there are fields yet to be threshed, and the machines will be occupied for a week or 10 days to

din for the senson of 1901-2 has just been given dis for the season of 1902 out by the statistical department of the Government of India. The yield is estimated at 5,008,082 them of 2240 pounds, being 750,090 tons less than the pravious year and about 500,000 tons less than the average for the preceding 10 years. The estimated area is given at 23,300,000 acres, or 300,000 acres more than the previous year, and 2,000,000 acres less than the average for the preceding 10 years. The the average for the preceding 10 years. The "raht." or what we call the "Winter crop." is planted in India in October and November. gets its start from the moisture held in the soil from the monsoon, and is nourished either of 15,000 pounds of strictly clothing Oregon, old weed creditive flux. erally harvested in the month of February, and is superior in acrenge, yield and quality to the Summer wheat crop, called "kbarif," which is sown in the month of June or just before the monsoon rains.

The reason under consideration was on the and in Western and Central India conditions nated early, and the Winter rains were an almost complete failure, except in the United Provinces, where there was some rain, and the crop, sided by liberal irrigation, was better than the average. In the Punjab and the northwest frontier province, whence so much of the wheat exported from India is drawn, a poor barvest has been gathered. In Bengal, also, the drought was injurious; in the Central Provinces the yield is better than in recent years, but the harvests are limited in comparison with the results before seasons of drought and scarcity set in. The failure is very great in Bombay, Berar, the Nizam's ter-ritory, and Rajputana, where the injury done by the drought was completed by the depredations of rate and insects.

The wheat yield of India in 1900-1 was 6,765,-

717 tons, and in the preceding year 6,523,923

in the past week, best grades being quoted at \$3 05 to \$3 60 per berrel. But little is coming in from the interior. The Oriental demand has not opened up fully yet, but may be expected to soon. Various causes have operated to restrict the inquiry from Asiatic the current month. Although refiners are anmarkets—drought, plague, cholera and other derstood to be fairly well supplied with raw spidemics—but telegraphic reports indicate that sugar for both their current and flear-by future placers will soon be in better condition to draw on Pacific Coast markets for supplies. In this onnection it may be mentioned that two modern flouring mills with American machinery that it was not only good business policy amply to supply themselves with raw sugars to tanchuria, one with a capacity of 250 barrels and the other of 500 barrels and the product a said to be very satisfactory. The buildings re covered with American iron roofing. The lower from these mills is going into the marters of Manchuria in competition with flour continued the month of the continued the month of the fruit crops this season, it is generally understood, was an unusually large one, and it is therefore expected that the demand for sugar will be proportionately heavy. The soint is therefore expected that the demand for sugar will be proportionately heavy. The soint is therefore expected that the demand for sugar will be proportionately heavy. The soint is therefore expected that the demand for sugar will be proportionately heavy. The soint is therefore expected that the demand for sugar will be proportionately heavy. The soint is the sakes; odden as the country the crops are late, and that therefore ballow that therefore in the country the crops are late, and that therefore ballow that the sugars to take the sugar to the sugar that it was not only good business policy amply to supply themselves with raw sugars to the sugar the heavy demand now being experienced for supply themselves with raw sugars to the sugar the heavy demand now being experienced to continue throughout the month, but also a good investment to purchase sugar at its present low cost.

The fruit crop this season, it is generally understant the demand for sugar will be proportionately heavy. The soint is therefore sugar will be proportionately heavy. The soint is the sugar to the proportional terms of the covered to continue throughout the month, but also a good investment to purchase sugar at its present low cost.

The fruit crop this season, it is generally understant to purchase sugar at its present low cost.

The fruit crop this season, it is generally understant to purchase sugar at its present low cost.

The fruit crop this sugar to the have recently been constructed at Harbin Manchuria, one with a capacity of 250 barrels and the other of 500 barrels a day. They are operated by Russian millers, and the product is said to be very satisfactory. The buildings are covered with American Iron roofing. The Sour from these mills is going into the markets of Manchuria in competition with flour from the United States.

August 19, says of the foreign markets:

millers' limit for their bakers' grade flour, consumers have not thought fit to come into the market at anything like an encouraging rate, and as the reduction alluded to was by some considered ill-advised. Liverpool millers have today put their limit back to its previous level by establishing a rise of 6d per sack. There has been an entire absence of speculative buying, and the business transacted on the spot has continued to mark the unsatisfactory rut in which the trade has moved so long, and which now for some time past has constituted its most notable feature. It was thought, and not unreasonably so, that with small available stocks in the hands of importers, and also in view of the very small provision which consumers have made for themselves in the past, that a better demand would have been experienced for the milled article, but such expectations were entirely dispelled by the recent collapse of wheat prices in the States, since when there has been no confidence on this side of the Atlantic, and holders of foreign flour, while not pressing their holdings, were obliged to make certain concessions in

eign flour, while not pressing their holdings, were obliged to make certain concessions in order to effect a trade reser to enject a trade.

Pacific Coast flour is not offered for ship-nent, and parcels of this quality on the spot more very slowly at about late rates, but bons fide purchasers of lines would, no doubt, have little difficulty in obtaining concessions. The trade in French flour is very small. Shippers offer top brands at 22s delivered here, but this is about is too high, and keeps the article from competing successfully with American brands. Offers of Hungarian are put more thereby the property of the control more liberally upon the market, but most of these are for September-December shipment. There is also a fair quantity offering for August shipment at a premium of is per sack over the former position, but buyers are not anxious to take hold.

OATS AND RARLEY-There has been only a limited trade in date during the period under review, and no shipping demand to speak of. Receipts at this point have fallen off considerably. Prices offered by dealers of late have been so low that growers hesitate to market their stocks; while holding back for better prices, no reasonable offer is refused. Yesterlay best white oats were quoted at \$1 per hundred and gray 5 cents less. The demand for barley for export purposes holds its own, and thus the competition holds prices steady.

HOPS-This is the critical time in the hop market, in so far as prices are concerned. It is the period at which it is almost impossible to make a quotation. New hops have not begun to arrive in quantity sufficient to make a market, and contracting is a thing of the past. The best and, in fact, the only thing that can be said of the market is that prices are nominal, say at 20 to 22 cents. There are no uyers, brewers or others, in the market.

Picking throughout the Valley is under fair eadway, and by the close of the week the work will be general. The crop gives every indication of being the finest in quality produced in Oregon in 10 years, if the present favorable weather holds out, as it gives every promise of doing. Even should some rain come, the effect need not be serious, as the yards are practically free from vermin. Of the situation in New York, the Journal

of Commerce of September 6 says: The only new feature was the receipt of cable advices from Germany reporting a dull and sagging market. London cable advices also reported a quiet market, and gave an es-timate of 300,000 hundredweight as the prob-able yield of the growing English crop. The advices received from the state reported no changes in the crop outlook, the yield com-ing down below referral consensations. ing down below gefferal expectations. Lice in me sections, it was stated, were beginning some sections, it was stated, were beginning to decrease. Coast advices report firm markets; crop prospects continued favorable. The local market was unchanged. Demand continued light, browers generally being disposed to hold off and await developments, and there was no trading in consequence among dealers. Old olds were in fair demand and firm.

The Cooperstown Otsego Republican of Septembr 3 says: "Hoppicking is now in full blast, but it will be a short job. In every case that we have heard of the hope are turning out much lighter than expected. It is

case that we have heard of the hope are turning out much lighter than expected. It is probable that the crop will be less than a quarter of last year."

The Cooperstown Freeman's Journal of September 4 says that the hop crop is turning out less than was estimated a month ago; will be from one-fourth to one-third that of last year, and the quality, as a rule is rather poor. and the quality, as a rule, is rather poor WOOL-There is but little to report in wool locally. The market is decidedly quiet, and prices are without change, Valley being quoted at 12% to 15 cents, and Eastern Oregon at 8 to 14% cents. A little more interest has been shown in Oregon wools in the Eastern market. The American Wool and Cotton Reporter, of September 4, reports:

old wool, grading fine and fine medium. about 50c. Staple wools have sold as high as 15c, to cost 52655c clean. In Valley wools there has been practically nothing doing. The Reporter quotes Oregon wool in the

Boston market as follows: "Eastern staple, 160 18c; Eastern Oregon choice clothing, 14915c; Eastern Oregon, average, 13914c; Eastern The reason under consideration wheat, whole unfavorable for the growth of wheat, oregon, heavy, 11@12c; Valley Oregon No. 1, and in Western and Central India conditions 19820c; Valley Oregon No. 2, 19820c; Valley were disastrous. The monsoon of 1901 termi- Oregon No. 3, 18@19c; Valley Oregon lambs, 16617c.

FRUIT-The season for the dealers in fresh fruit is at its height. The produce district on Front street is crowded from morning until night, and working overtime is an every-day experience. Prices vary somewhat, but in the main are well held up. Yesterday's receipts were unusually heavy, especially of apples, melons, pears and peaches. Arrivals included one car of bananas, three cars of watermelons and one car of peaches. All the produce that came in was taken care of. Secretary Lamberson, of the State Baord of Horticulture, places the total value of this year's fruit crop in Oregon at not over \$2,000,000, against a product last year of \$2,375,000. Last year the state produced about 22,000,000 pounds of prunes, whereas this year he thinks the crop will yield between 12,000,000 and 15,000,000 pounds. Pears are a light crop all over the state. In the southern districts the yield will be 5 per cent of normal, and in the Valley 25 per cent.

POULTRY, EGGS, ETC.-Chickens are selling betters than they were a week ago, and the market is in better shape. Last week it who have cold-storage facilities bought heavily. and the result was apparent with the opening the trade approximate 1,000,000 tons. It is of the present week, when brices stiffened up doubtful whether the exports of this year's materially. Enough eggs are coming in to wheat will exceed the restricted trade of last meet all requirements, but not enough to lower year. scarce, and correspondingly firm in price. Other grades are taken up as fast as received. More butter is going from Portland into the country this Summer than ever before, the opening of the hoppicking season creating quite

a demand for it.

MERCHANDISE—Practically no change can ground. The deliveries of wheat by farmers are small, as there is a disposition to hold trade, both locally and with the country, is repeted. Eastern sugar markets developed control of the North-siderable strength surface the next week. The siderable strength during the past week. The bulk of sugar received came principally from Cuba and went direct to refiners, they having purchased extensively of Cuban sugar early last month. The free movement of Cuben sugar, however, is about over. Stocks of the island have been reduced to 193,000 tons, and exports last week dropped to 19,800 tons, comparing with \$7,300 tons for the previous week. With the supply of Cuban sugar rapidly approaching a point of exhaustion, refiners will have to turn their attention elsewhere. Java sugars, in a measure, will supply their requirements, there being at present 225,000 tons affoat for the United States from Java, and this sugar should begin to be available during wants, they were ready buyers on the names of 3 7-16c for centrifugals 96 degrees, which

shows an advance of only 140 from the lowest

prices touched, apparently being of the opinion

that it was not only good business policy

BULLS WERE IN CONTROL

STRENGTH MARKED OPENING AT NEW YORK STOCK EXCHANGE.

Prices Maintained Until Rumors of Illness of Sage Caused a Selling Movement.

NEW YORK, Sept. 10.—For the most part, the tendency of today's market was irregular, though opening with considerable strength, which was well maintained until the last hour. About that time rumors of the serious illness of Russell Sage caused a seiling movement in the Gould stocks, the remainder of the list being sympathetically affected. Conditions as a whole favored higher prices. London reported a strong tone for Americans, and gold importations were announced. Chil money, though nominaity as high as 9 per cent, was actually hardly higher than 1 per cent. Cropnews was encouraging, and early advices told of a truce between the Pennsylvania and Gould interests. Largely as a result of the last rumors, and aided by clever manipulation. Pennsylvania and B & C., whose interests are virtually identical, advanced over a point each,

sylvania and B. & O., whose interests are virtually identical, advanced over a point each, and the Gould stocks also gained.

In the same move, improvement was shown by St. Paul, Louisville & Nashville, Rock Island, New York Central, Illinois Central and Wabash, but the industrial list was neglected save for some activity and better prices in the gas stocks and American Ice preferred. Following a brief halt toward the end of the first hour, during which the list sagged, there came an active demand for Union Pacific, Beading, Manhattan, Atchison and some speciatities. At the same time there was some ctaities. At the same time there was some seiling of Missouri Pacific by the brokers who had been active on the other side. St. Paul on persistent romors of an increased dividend. made a further advance, and Reading strengt

on persistent rescors of an increased dividence, made a further advance, and Reading strength was well maintained, in spite of previous profit-taking in Pennsylvania, Baltimore & Ohio and New York Central. United States Steel shares were taken up, the common being extensively traded in, and simultaneous strength was shown by Tennessee Coal & Iron and other stocks of that class. There was no news to account for the increased interest in these issues, other than the general prosperity of the steel and iron trade.

In the miscellaneous list, the shares of the express companies advanced from 2 to 6 points on very light trading. Westinghouse Electric and Pere Marquette gained 6 points each. The feature of the last hour was a 3-point decline in Missouri Pacific, and the recessions in the standard railroad list, including Baltimore & Ohio, Norfolk & Western, Reading. St. Paul and New York Central. The seiling movement wiped out the day's balance, and in some instances caused net losses, Missouri Pacific making the most serious decline. New high records for the day included St. Paul, Missouri Pacific, Rock Island, Baltimore & Ohio, Reading first preferred, Southern Pacific. Missouri Pacific, Rock Islams, Battanove a Ohio, Reading first preferred, Southern Pacific, Missouri, Kansas & Texas preferred, Wahash cummon and preferred, Wheeling & Lake Erle second preferred, St. Joseph & Grand Island first preferred, Keokuk & Des Moines, Westinghouse, Republic Iron Steel and American Car & Foundry. The new issues of the Rock Island Company were again the feature on the curb, the 4 per cent bonds selling up to 80% in transactions aggregating about \$1,600,000.

\$1,00,000.

London's operations here amounted to perhaps \$0,000 shares, very equally divided as to sales. Increased public interest was reported by leading commission-houses, and the business, which was in excess of 1,112,000 shares, was distributed. Money condition

was distributed.

Mency conditions were somewhat easier, but
the loss of cash by the banks to the Subtreasury continued, and last week's surplus
was practically obliterated. The gold movement
from Australia was likely to assume formidable proportions. Foreign exchange broke some 29 points in the day. There were no transfers by the Subtreasury.

The bond market maintained a firm tone

The bond market maintained a firm tone during the greater part of the day, despite the heavy realizing in Wabash debentures, which depressed them 2 points. The market sold off in sympathy with the decline in stocks. Total sales, \$4,850,000. United Stares gold 4s declined 14 point, and the new 4s, registered, advanced 14 and the coupons 15 per cent on the last call.

Foreign Financial News.

NEW YORK, Sept. 10.—The Commercial Advertiser's London financial cablegram says:
English rails continue flat in the markets here, while American securities are strong. The latter remained at about par until the afternoon, when the New York support raised Baltimore & Ohio, Union Pacific and Southers Pacific. The close, however, was irregular, but near the top. New York seemed disposed to transfer speculative accounts to London, in anticipation of a money stringency abroad. Copper dropped % to 53%, and Tintos as much to 45%. The latter were well bought on the decline.

MONTHLY CROP REPORT. Pavorable Review of Conditions in Grain and Fruit States.

Grain and Fruit States.

WASHINGTON, Sept. 10.—The monthly report of the statistician of the Department of Agriculture shows the average condition of corn on September 1 to have been 84.3, as compared with 86.5 on August 1, 1902; 51.7 on September 1, 1901, 80.6 at the corresponding date in 1900, and a 10-year average of 78.8. The average condition, harvest of Winter and Spring wheat combined, was 80, against 82.8 last year, 60.6 in 1900, and a 10-year average of 78.9. Pennsylvania and California report 3 points below the 10-yeap average, Iowa 12 points below, and Kansas a condition of 49.23 points below the 10-year average of the state. state.

tate. The average condition of oats when harvested was 87.2, against 72.1 last year, 82.9 in 1900 and a 10-year average of 79.7. While correspondents report the harvesting of an exceptionally large crop of oats, there are indications that the crop will be very deficient in solve of quality.

cations that the crop will be very dencest in point of quality.

The acreage of clover seed had been considerably reduced since last year, only two of the principal states—Maryland and Ohlo-reporting even a small increase. The other important states, except Kansas, in which state the area is the same as last year, report decreases. In California, Utah and Colorado conditions are below their 10-year averages, while all other states except Maryland, in while all other states, except Maryland, in which state the condition is the same as the 10-year average, report conditions above such

During August the condition of hops declined is point in Oregon and 8 points in New York, and improved 2 points in California, while the condition in Washington remained unchanged

oring the month.

Of the states having 4,000,000 trees and up Of the states having 4,000,000 trees and up-wards of apples, II report an improvement in condition during August. All but six of the important apple-growing states report condi-tions ranging from 7 to 42 points above their 10-year averages. Reports as to the produc-tion of peaches, as compared with a full crop in the important peachgrowing states, range from 10 per cent in Illinois to 90 in Oklahoma. from 10 per cent in Illinois to be in Ukianoma. In all but eight of the states having 2,000,000 trees and upwards in 1890, a production ex-ceeding the 10-year average is probable. In all the states in which the production of grupes is of more than local importance, the ndition is equal to or above the 10-year

THE RANGE WAS NARROW

SCARCITY A STEADYING FACTOR IN CHICAGO WHEAT PIT.

Attempt to Break Prices by Heavy Selling Failed to Bring About the Expected Slump.

CHICAGO, Sept. 10 .- The scarcity of shipping wheat was the principal steadying factor in the wheat pit. Cables were firm, but the weather was about all that could be expected. An atwas about all that could be expected. An at-tempt was made early to break prices by sales of 500,000 bushels by a leading elevator. The fact that there was no appreciable slump in this drive seemed to indicate to the bulls a strong position of the principal grain. In con-eideration of this indicance and the small Northwest and primary receipts, prices rallied. The character of the buying after the early

The character of the buying after the early pressure was very good, but fluctuations were narrow. December started 14014c lower to a shade higher, at 631405075c, sold to 68c, and closed steady, a shade up, at 685c.

The absence of any damaging frosts in the corn beit started a small early selling movement in corn. Country offerings dried up appreciably, however, and bids for more stuff started a firmer tone. Cables were steady, and accordingly however and support. Septembers beit gave roof support. Septembers beit gave roof support.

started a firmer tone. Cables were steady, and a prominent buil gave good support. September closed firm, %c up, at 58%c. December closed easy, %c lower, at 42%g%ac.

Oats received fair support by a teading professional, and prices were steady on the weather. September closed firm, %6%c up, at 54%c. December closed steady, a shade up, at 54%c. December closed steady, a shade up, at 81%@81%c.

Provisions were very dull and weak. Jan
