NEW YORK, Sept. 19. - President Roosevelt, accompanied by Secretary Cortelyou, Assistant Secretary Loeb, and Dr. Lung, arrived in this city at 12:45 o'clock today, having come from Oyster Bay on the yacht Sylph. The President cordially greeted Representatives Babcock, Hull and Overstreet, who were waiting for him. The party was then driven to the Pennsylvania ferry at West Twenty-third street. At 2 o'clock the President boarded the special train that is to take him on his trip through the Middle West. Secretary Cortelyou said the President and all of the party were in the best of health.

President Roosevelt left Jersey City at 2:30 P. M. At the Pennsylvania station in Jersey City, a special train consisting of six Pullmans was waiting. There was a good-sized crowd on the station platform, and the President was applauded as he walked to the train. He responded by lifting his hat. As the train pulled out the President, standing on the platform of the "Colonial," lifted his hat and bowed to the crowd, who cheered and shouted "Good luck."

Large Crowd Out at Harrisburg.

HARRISHURG, Pa., Sept. 19.-President Rooseveit's special made a five-minute stop here this evening, and then proceed-ed west. Frank P. Sargent, Commissioner-General of Immigration, who joined the party at Philadelphia, left the train at this point. United States Senator Quay rode with the President from Trenton to Philadelphia. A large crowd greeted the President here, and gave him three hearty cheers. He responded with a few words of thanks. A little child was held up to him. "I have a number of those at home," he said.

Makes Short Speech at Altoons. ALTOONA, Pa., Sept. 19,-The Presi dent's train arrived here at 10:33 P. M. The President, who had not retired, found several thousand people assembled to greet him. They gave him hearty cheers when he appeared on the platform of the car. The President delivered a short speech of thanks for the greeting

PRAISE FOR NAVAL OFFICERS. Admiral Higginson Files His Report on the Late War Game.

WASHINGTON, Sept. 18.—In his report to the Secretary of the Navy upon the combined operations between the Army and Navy, Admiral Higginson is most generous in his distribution of praise his distribution of praise among the officers of the squadro especially does he commend Rear-Admiral Coghlan for his leading the squadron into Newport at night through blinding searchlights and smoke and against a strong rrent. This is pronounced to have been a brilliant piece of navigation, requiring a steady and undaunted nerve. Great credit is awarded to Captain Lyon, of the Olympia, for his cable-cutting, and to Captain Brownson, of the Alabama, and Captain Manney, of the Massachusetts, for their able work. In fact, nearly all the squadron officers receive their share of praise in the Admiral's report, wherein is noticed the particular service each ren-dered. Touching the operations them-selves, Admiral Higginson says:

The whole and only intention was to develop, if possible, any weak points in the line of defense established by the Army, but whether we have done not remains to be decided by the Board of Arbifration. The work has been arduous and trying, including much night nav igation, and I cannot speak too highly of way in which it has been carried out by the officers and men of the squadro The Admiral comments interestingly pan some of the lessons to be learned from the maneuvers. For example, he

"Much valuable knowledge in regard to searchlights has been obtained during these operations, and the general opinion seems to be that they are not so effective searchlights has been obtained as has been supposed. In approaching positions at night, the flash lights would flash very often on the ships, lighting up the smokestacks and hulls so that large prints could be easily read, and every one posed the ships had been discovered, the searchlights would turn away. and evidently the observers had not seen the vessels. In rainy or misty weather the vessels. In rainy or misty weather the value of searchlights is, I think, decreased 25 to 30 per cent. I had no op-portunity to test the value of fog for runing past batteries. I was, therefore obliged to run past Fisher's Island and into Newport during clear nights-'Army nights'-where every chance was with the enemy, and I had little hope of a suc-cessful issue, but as my guiding motive was to help the Army test its equipment,

rather than to gain points, I did not hesitate to take the losing side. "To those officers not in the Spanish War the experience of keeping position and cruising at night without lights has been invaluable, and has educated them to war conditions, and it is for this pure, in my opinion, that these exercises suid be continued each year."

The work of the marines is said to have been of great value, and their efficiency is said to have been greatly increased by is said to have been greatly increased by their stay on shore. The Army officer who acted as observer on board the Ala-bama expressed himself as being very much impressed by the efficient manner

vance as skirmishers, and the way they availed themselves of cover, keeping behind stone walls and other natural objects. The Admiral states that he will, in due course, submit separate reports on the by the fleet.

ROOT APPROVES THE DEFENSE, Army Board Reports in Favor of Dis-

appearing Gun Carriages. WASHINGTON, Sept. 13.—Secretary Root has approved the findings and recommendations of the board appointed to conduct tests and report upon the value of disappearing gun carriages and seacoast defenses. Colonel Wallace F. Randolph Chief of Artillers, was president dolph, Chief of Artiliery, was president of the board, which is composed of artil-iery, ordinance and Navy officers and one civilian member. The board is unantmous in recommend

ing the continuance of the manufacture of disappearing gun carriages for eight-inch, 10-inch and 12-inch guns, without regard to high or low sites. It recommends that no more six-inch guns be mounted on disappearing carriages, as the development of rapid-fire six-inch gune made it cesential that they should be mounted on barbette carriages. The board recommends increased allowances in order that expert mechanics may be induced to engage in this branch of work. It also suggests that more protection be given to gunners, who are the only men serving and much exposed, by providing small movable shields. In conclusion the board says: "The board desires to record its opinion that the general mechanical principles involved in the chief elements and movements of the Buffington-Crozier disappearing carriage are admirably adapted to their purposes."

adapted to their purposes."

The board recommends the abandon ment of all target practice with reduced charges as tending to create false im-pressions in the minds of officers and men. The suggestion is made that sub-calibe practice be continued and encouraged, and that when firing for target practice the full service charge shall be used, and that the allowance shall be increased to not less than 15 shots per gun each.

ON HAND FOR ARMY MANEUVERS. General Bates Arrives at Fort Riley

and Troops Are Now Pouring In. JUNCTION CITY, Kan., Sept. 18,-Major-General Bates, commander of the Department of the Missouri, arrived at Fort Riley today for the maneuvers. HENDERSON EXPECTED TO BE IN-VITED TO OYSTER BAY.

This May Be Responsible for His Declination-Speaker Has High Opinion of His Importance.

OREGONIAN NEWS BUREAU, Washngton, Sept. 19 .- Candidates for Speaker Hendersen's place continue to bob up. Tawney of Minnesota and Cushman of Washington are the latest. Of course, either could seriously consider himself a candidate, as no man who opposed the President's reciprocity plan for Cuba in present Congress will be elected Speaker at the next. Some are booming Cushman because of his vigorous onslaught upon the Speaker and committee on rules and the House management just before Congress adjourned.

QUAY HAS RELIEF BILL. Senator Will Consider Measure for a

State Receiver.

PHILADELPHIA, Sept. 19.—Daniel H. McCarthy, a lawyer of Hazicton, Pa., visited Senator Quay, at Republican state headquarters today, and submitted to the Senator the draft of a bill making provision for the appointment of a receiver to assume control of the anthracite coal mines under certain contingencies. Mr. McCarthy recently submitted the same bill to President Mitchell, of the United Mineworkers. The measure authorizes the Legislature to appoint a receiver for the cosi companies on the ground that the corporations have violated the state constitution, which profides in article 18, section 28, that charters and franchises of incorporated companies may be revoked if the business of the corporations is so conducted as the frequency of the corporations is so conducted as to infringe the rights of individuals or the public welfare. It could not be learned what transpired dura combination to defeat Henderson for ing the conference, but Mr. McCarthy in-

Speaker of the next House, and that was timated that Senator Quay had agreed to the cause of his withdrawal. This has been promptly denied by both Babcock and Hull, and no doubt will be denied by Tawney as soon as it reaches him. Another and somewhat plausible suggestion is that Henderson was ploued because the President did not invite him to the conference at Oyster Bay. Henderson's head has swelled largely since he became Speaker, and there have been occasions when he would not sit in the second place at a dinner table, holding that he was the most important functionary aside from the

KASSON TREATIES MAY COME UP. Roosevelt is Likely to Bring Them

Before Extra Session of Senate. OREGONIAN NEWS BUREAU, Washington, Sept. 19.-It is generally conceded that there will be an extra session of the Senate in November to consider a reciprocity treaty with Cuba. It may be that the President will also take occasion to recommend the consideration of the other reciprocity treaties negotiated by Commissioner Kasson under the McKinley Administration. At all events, President Mc-Kinley was pledged to these reciprocity treaties, and President Roosevelt has also taken occasion to indorse that policy. A reciprocity treaty with Cuba may adopted. In fact, it is believed that a majority of the Senate favors Cuban reciprocity, but it will remain for the House of Representatives to ratify such action and that can be done, of course, by the vote which passed the Cuban bill in the last session. The necessity for an early session of the Senate to consider the treaty without the House is in the fact that the unlimited debate in the Senate would so long delay the treaty in the regular short session that it is doubtful if it could pass. In the extra session, with nothing else to do, the probability is that talkers would become exhausted and the treaty might be put through by the time the regular session convened, in Decem-

TO STATION SHIP IN TROPICS.

Uncle Sam Proposes to Be Prepared for Trouble at All Times. WASHINGTON, Sept. 19.—The Navy De partment has hit upon a plan by which it can be much better prepared for the emergencies that are continually arising on the Isthmus of Panama, in Hayti, and in Venezuela. Orders have been issued by the department directing that the gunboat Bancroft, now at the Boston navy-yard, be placed in commission When the vessel is ready, it is the pur-pose of the department to assign her as a station ship at San Juan, Porto Rico. This move will enable the Government to have a warship ready to sail 900 miles to the Isthmus, 500 to Venezuela, or about 100 to Hayti, as occasion may demand, and do away with the long trips down from New York or Boston, which have been necessary many times recently be cause of the lack of a war-ship in close proximity to the scene of trouble. Of ourse, it may happen that more than one war-ship will be needed in an emergency which is apt to arise at any time in the South American republics, but nevertheless it is felt that one vessel on the ground at all times is a long step to en-

PANIC IN CHURCH.

(Continued from First Page.)

be moved by the ambulances were taken to the hospitals, and the rest were laid out on the ground, and there the physiclans attended them. At least 15 died before they could be moved from the ground.

Most of Dead Are Women. During the stampede Booker T. Washington and several other prominent negroes were on the stage, and were unwilling witnesses to the frightful catastrophe. None of those in the choir or in the pulpit was injured in the least. For a few minutes they attempted to restore order, but, seeing their efforts were futile, waited until the struggling crowd had advanced far enough for them to pick up the dead and injured. Most of the dead are women, and the physicians say in many cases they fainted and died of suffocation. A remarkable feature of the calamity is that no blood was seen on any of the victims, They were either crushed or died from suffocation.

Story of an Eye-Witness. Captain Frank H. O'Brien, ex-Sheriff of Jefferson County, and one of the most prominent citizens of Birmingham, was a witness of the catastrophe. He lives within half a block of the church, and, hearing the commotion, went to ascertain the trouble. As he reached the front of the church the crowd had begun blocking the entrance, and in describing it he said:

"I have witnessed many appalling sights, but the wild scene at the head of those steps is beyond description. Wildly ex cited negroes reached the top of the steps and began falling headlong down the incline. Others were pushed upon them, and notwithstanding the warnings from the outside the crowd continued to push. In a few minutes men and women were piled upon each other to a height of 10 feet. Presently a negro woman with a baby in her arms mounted the mass, and, climbing over the bodies, leaped to the ground without injury to herself or the infant. As quickly as possible a rescue party was organized, and as soon as the entrance was cleared the removal of the bodies was begun."

Rev. Dr. T. W. Walker, pastor of Shiloh Church, said tonight: "Shiloh Church is a modern brick structure, and has just been completed at a cost of \$75,000. There are four entrances to the building, and the main one is 16 feet wide. The deaths were caused by everybody trying to rush out the main entrance at the same time Inside the church not a bench was over turned, and all of those who were killed died in or about the entrance. The people near the front of the church were not injured in the least."

Mayor W. M. Drennen said: "Most of those who were killed were strangers, but their bodies will be cared for until identified and claimed by relatives."

Booker T. Washington Talks. Booker T. Washington, after the acci-

dent, sald: "I had just finished delivering my lecture on 'Industry' and the singing had commenced, when some woman back of

me was Leard to scream. Some members of the choir yelled 'quiet,' which the gallery understood to be 'fire.' This was repeated, and started the stampede. I found on investigation that a Birmingham man had stepped on the toes of a delegate from Baltimore named Ballou. Ballou resented it and made a motion as if to draw a gun. This caused the woman to scream. "There was little excitement in the cer

ter and front of the church. The rear of the church was congested, and some of the men tried to walk out on the heads of the crowd. At the time of the alarm there were probably 3000 people in the church and fully that number without. The crowd on the sidewalk surged in, and this in a measure accounted for the large loss of

"The majority of those killed were smothered to death, very few having bones broken. When I saw that a stam pede was imminent, I started the choir singing, and part of the audience joined them. I remained until the excitement had subsided, for fully 30 minutes. One good sister, whose name I don't know, caught me firmly by the waist, and held me throughout the excitement, saying:

"I am unable to say positively, but there is a probability that the convention will adjourn out of respect to the dead. The

Is the Medicine That Has Made Thousands of Country Toilers Well and Strong.

There are thousands of farmers in our land who are rich in broad acres of gold, yet lack that true wealth known as good health.

It is a melancholy fact that men and women in the country districts, breathing the purest air and drinking from God's bubbling fountains and limpid springs, are liable to the same diseases and ail-ments that come thick and fast to city people. We find rheumatism, neuralgia, debility, dyspepsia, kidney and liver troubles, and blood diseases almost as common in the farmer's family as they are in city homes.

Paine's Celery Compound, Heaven's

best blessing to the farming community, has done more for the banishment of dread disease, and the building up of health than all other combined medicines, Mr. John Zuspan, a prominent and well-known farmer of Middleport, Ohio, writes specially for the benefit of sufferers in the rural districts; he says:

'Last November I was so badly crip-"Last November I was so badly crip-pled up with rheumatism, which came on in June, that I could hardly walk without the aid of crutches or a heavy stick. About the 10th of November I commenced taking Paine's Celery Compound, and after using four bottles I was complete-ly cured, and was able to attend to my usual work as well as when I was 40. I am now 56 and can walk and un as well. am now 66, and can walk and run as well as a man of 30.

Impaired Digestion

May not be all that is meant by dyspepsia now, but it will be if neglected.

The uneasiness after eating, fits of nervous headache, sourness of the stomach, and disagreeable belching may not be very bad now, but they will be if the stomach is suffered to grow weaker.

Dyspensia is such a miserable disease that the tendency to it should be given early attention. This is completely overcome by

Hood's Sarsaparilla which strengthens the whole digestive system
