BARGAIN BEATERS

The Portland flywheel has been turned with the filing of the latest Federal report showing a decrease of 55 percent in the number of cases of typhoid fever and epidemic fever. The report, issued by the Department of Health, shows that in the last quarter of 1902 the number of cases of typhoid fever was 3,500, as compared with 6,400 in the corresponding period of 1901. The decrease is due, it is stated, to the more conservative use of water and the increased use of milk, and the Department of Health is followed in its efforts to combat the disease by the State Board of Health.

The report also shows that the number of cases of epidemic fever has decreased from 9,500 in the last quarter of 1901 to 5,000 in the last quarter of 1902. The decrease is due, it is stated, to the more careful use of milk and the increased use of water.

The report also shows that the number of cases of malaria has decreased from 3,200 in the last quarter of 1901 to 2,400 in the last quarter of 1902. The decrease is due, it is stated, to the more careful use of water and the increased use of milk.

The report also shows that the number of cases of diphtheria has decreased from 1,800 in the last quarter of 1901 to 1,200 in the last quarter of 1902. The decrease is due, it is stated, to the more careful use of water and the increased use of milk.

The report also shows that the number of cases of smallpox has decreased from 2,000 in the last quarter of 1901 to 1,500 in the last quarter of 1902. The decrease is due, it is stated, to the more careful use of water and the increased use of milk.

The report also shows that the number of cases of typhus fever has decreased from 1,500 in the last quarter of 1901 to 1,000 in the last quarter of 1902. The decrease is due, it is stated, to the more careful use of water and the increased use of milk.

The report also shows that the number of cases of smallpox has decreased from 2,000 in the last quarter of 1901 to 1,500 in the last quarter of 1902. The decrease is due, it is stated, to the more careful use of water and the increased use of milk.
