MOROS ARE DEFIAN

Their Strength Is Greater Than Expected.

NO EASY TASK TO QUELL THEM

Pershing Is Unable to Reach Macin but at Any Rate He May Wait for Reinforcements Before Making Attack.

WASHINGTON, Sept. 24.-That the task of reducing the Moros to terms is proving difficult is indicated by the following cable-gram, received today by the War Department from General Chaffee:

"Mantia, Sept. M. — Adjutant-General, Washington: Captain John M. Pershing

to Vicars; unable to reach forts; water and swamps prevented. CHAFFEE." The disputch means that Captain Pershing has been compelled to retreat to his base, at Camp Vicars, and that the Moros' position is much stronger than was believed by Army officers.
Earlier in the day the department re-

ceived the following dispatch: "Captain John J. Pershing, Fifteenth Cavalry, left Camp Vicars, September 18, with a battalion of infantry, troop of cavalry and plateon of mounted battery. Marched toward Himig, nine miles south of Vicars, and in that vicinity took three forts at Gonan; 19th, visited Rayabas, took two forts; 20th, marched northward to Sanir, took two forts. Has communicated with two Sultans. Macin still ob-stinute. Expect arrival at Macin today.

"Pershing was fired on frequently when approaching Sanir. No loss of our troops. Moros report their loss 25 killed. Macin about 18 miles northwest of Vicars. Brigadler-General Samuel Sumner instructed to limit the use of firearms as much as possible, and not to destroy property, the object being to obtain promise of noninterference with our troops in the future. REBELS' POSITION A STRONG ONE. Americans May Wait for Reinforce ments Before Attacking It.

MANILA, Sept. 24.—Captain John J. Pershing, of the Fifteenth Infantry, operating against the Moros in the Island of Mindanao, has found the Moro posi-tion at Macin, Island of Mindanao, to be strong, and has delayed his attack on it. He must throw a pention bridge across a swamp, and possibly receive reinforcements before engaging the enemy. The Captain made a reconnor-sance close to the More position, and found a fort on an elevation, close to the lake shore, flanked by swamps, virtually making the promontory an island. The Americans built rafts preparatory to attacking the Moros from the lake, and then decided to bridge the swamp and make an attack from all sides. The Sultans of Macin regard the position as impregnable, and have refused to treat with Captain Pershing.

Brigadier-General Samuel S. Sumner vill send the Moros an ultimatum, demanding peace and the return of stolen operty. If his demands are rejected e-place will be assaulted. Captain Pershing has carefully examined the position and its surroundings, and is confi-dent of his ability to capture it without serious losses. He has returned to Camp Vicara, whence he reports that the Sul-tans of Macin are hostile in that section of the Lango country.

WASHINGTON, Sept. 24.-The cruiser Montgomery sailed yesterday from Cape Haytien for Gonaives, St. Marys and Fort de Paix, to investigate the altuation at these ports in connection with the blockade declared by the provisional govern-ment of Hayti. These three places are in possession of the revolutionists, and the Montgomery will investigate to de-termine whether the blockade is effective or simply a paper declaration. So far as known here the provisional government has no ships with which to enforce a

SEPPERS WANT WARSHIP. American Interests Desire, Protec-

tion on the Orinoco River. WASHINGTON, Sept. 24.—Large American shipping interests operating in the waters of the Orinoco River again have requested the State and Navy Depart-ments to send a warship up that river

for toe purpose of protecting their steamers and keeping navigation unobstructed The Marietta was sent up the Orinoco recently with very good immediate results, but now that no American warship is in that locality, it appears that the dis-turbed situation which took place there is returning. The Navy Department desires to afford every possible and practicable aid for the protection of these trading interests, but is not in a positio to do so just at present, on account of the lack of ships in Venezuelap waters,

Lutest in Lifebonts.

The Norwegian Lifesaving Society has experimented with Captain Doenvig's new lifeboat, which consists of a life-saving globe that can carry sixteen persons, 400 kilogrammes (about 880 pounds) of provisions and 500 kilogrammes (about 1100 pounds) of water. It carries an air pump and a water pump, and is equipped with sail and rudder. It is eight feet in diameter, and is intended to stand on the deck, floating off as the ship carry ing it goes down. The trials were successful. Captain

Doenvig, twelve seamen and three news-papermen entered the globe, which was then thrown overboard. It disappeared under the water for a time, but come to the surface, when the occupants hoisted a flag to show that they were no worse for their immersion. The sailing powers of the invention were tested successfully for an hour.

Cargo of Wild Cattle,

The steamer Nell has an interesting mission before her, namely, that of trans-ferring a band of wild cattle from Masset to Essington, says the Victoria Times. The stock belonged to the late Mr. Alexahder, the customs officer at Port Simpson, and have been running wild for a number of years. They have been roaming about on the pasture lands surrounding Masset, and are said to be in excellent condition for marketing. They are extremely wild, however, and have to be approached with a good deal of caution, as on more than one occasion men have taken to trees to avoid a mad encounter with them. It is stated that there are in all over 300 head, 180 having been counted in one band. It is now proposed to shoot the larger of the animals and corral the others, taking all to Es sington.
