# MANY COMING WEST

## Tide of Emigration Is From Eastern States.

## OREGON PUBLICLAND IN DEMAND

Commissioner Hermann's Annual Report Will Credit Large Portion of Land Entries to Newcomers-Praise for 0. R. & N.

OREGONIAN NEWS BUREAU, Washington, Oct. 6 .- In his forthcoming annual report, Land Commissioner Hermann will call attention to the remarkable trend of emigration toward the far Western States, While it is impossible to analyze this movement, reports received at the department from time to time show that a large portion of the new homestead entries are being made by experienced farmers, who have sold out valuable lands in the Missimippi Valley and Middle West at \$50 or more an acre, and have acquired equally valuable tracts at a nominal cost on the Pacific Coast, at the same time having a wide margin left for improvements. Oregon and Washington have particularly attracted this class of settlers, many of om, being unable to find homesteads to their liking, have purchased farms.

Through his annual report Commis sloner ...ermann intends to call attention to the wonderful discoveries made by the O. R. & N. Co., after costly experiments in Eastern Oregon and Southern Idaho, that large tracts of arid lands tributary to their road may be reclaimed by planting alfalfa and other hardy range plants. He will show that neveral million acres of this land now vacant are suited for pasturage without irrigation, and, being accessible to transportation lines, are doubly valuable. The Commissioner is confident these experiments will ultimately introduce countless settlers in this now practically uninhabited region.

Baker City. BAKER CITY, Or., Oct. 6 .- (Special.)-The demand for eggs is so great in Baker City that several carloads of Eastern eggs have to be shipped into this city every year. With such an unlimited demand for eggs, it seems very reasonable to believe that a chicken ranch would pay well if the farmer was located near this city. A gentleman who has looked into the poultry considerably insists that there is no better field in the United States for

a first-class chicken ranch, the hot springs near Haines, says he will establish an immense chicken incubator and employ the hot water from the springs to hatch the eggs. The improvements to be made at the proposed new resort have not been inaugurated, but just as soon as the material can be gotten to-gether work will begin on the new natatorium and the chicken-hoyse.

erage wages of female teachers is now \$37.61 per month, as compared with \$35.69 per month last year. When a teacher has paid his living expenses out of the sal-ary mentioned there is little left for exnses through the long vacation, during hich no salary is received. "While the average salary of male

teachers—\$47.58—is a living wage, there are many men who have been teaching for a much less sum than the average. Those who have been accepting the compensation offered by the smaller schools are now going into business or other occupations that pay better. In order to hold the teachers, it will be necessary for the school boards to ad-vance wages in accordance with the in-crease in other occupations."

#### WANTS NO CLOSED SEASON. Salem Man Says Black Bass Are Now Plentiful.

SALEM, Or., Oct. 6.-Gideon Steiner, a well-known fish dealer in this city, wants the next Legislature to repeal the law which creates a close season for catching black bass. He says the fish are plentiful enough now, so that they will not be exterminated even if the people are permit-Commission, in The Oregonian of Octo-ber 1, and says that he does not entirely agree that black bass are a dangerous foe to salmon. If that be true, however, he thinks it is sufficient reason why the law should permit black bass to be caught at

any season of the year and in any man-

Mr. Steiner placed the first black bass in the waters of the Willamette 14 years ago. They were supplied from the United States fish hatchery at Quincy, Ill., and were planted in the Willamette with the consent and approval of United States Fish Commissioner McDonald and State Fish Commissioner Thompson. The pur-pose was to supply the streams of the Willamette Valley with a species of game fish which would furnish sport for Oregon fishermen and fresh-water fish for Oregon tables. Since the planting of the fish was approved by the Fish Commissioners, he thinks there must be some mistake about their destroying any considerable number of salmon. As the purpose of the protecting law has been accomplished, Mr. Steiner now wants the black-bass season open the year round, so that the people can get fresh-water fish whenever they care to catch them.

The ambulance was summoned and he was taken to St. John's Hospital. where it was fully 10 hours before he regained consciousness. No bones were broken, nor did he sustain any internal injuries, as was first feared. To a reporter he said:

"I grew very nervous as a result of my fall, and was fast running into nervous prostration. I was under a doctor's care, but did not get any real benefit, and I was becoming very much discouraged.

"Then I began taking Dr. Williams' Pink Pills for Pale People. I could see a decided improvement in a short time, and by the time I had taken eight boxes I was fully restored to health. That was over a year ago, and now I am perfectly well and strong again, with nerves as sound as anybody's. Dr. Williams' Pink Pills for Pale People cured me when doctors' medicines failed."

The nervous system may be deranged from any of a number of causes. A physical shock, as was the case with Mr. Rogers, or a mental shock may bring it on. More common causes are worry, overwork, excitement, lack of rest and dissipation. Whatever the exciting cause, the results are largely the same and the remedy that cured the one will cure the other.
