

WASHINGTON, Oct. 15 .- Stored with complete and interesting information concerning every branch of every army in the world, and replete with fine illustra-tions and maps, "Notes of Military Interest for 1991." made public today by Lieu-tenant-Colonel William M. Simpson, chief of the military information division, is one of the best volumes of the kind ever issued in the world. The matter was compiled and arranged by Captain Weed Edwards. Twenty-first Infantry; Captain J. S. Heron, Second Cavalry; First Lieutenant H. B. Furgeson, engineer, and Second Lieutenant Clark, of the Ninth Infantry, with the assistance of our military at-

taches at the various foreign capitals. The first pages of the volume are de-voted to the military budgets of the various countries for 1902, with interesting comments and comparisons. The organi-zation of military establishments is taken cades. Its valleys are fewer and up, and the changes in the make-up of the British; Russian, Swedish, Servian, Brazilian and Argontine armies are dealt with at length. Of especial interest, in view of the efforts of the United States Army to settle upon a type of field gun, is the chapter upon field artillery. It is pointed out that there are only two gen-eral types of modern field guns, namely, on rigid carriages and guns with devices on the carriages, and it is it shares in the circumstances of climate, stated that neither of these types has yet soil and general condition which have obtained unanimous preference. The greatest possible rapidity of fire is not but they possess marked advantages in simplicity, strength and lightness of material, and their faults are stated to be the failure of the carriage to maintain the exact first firing position and the uncertain action of the spade in hard ground. With the recoil-carriage guns, which mechanism returns the gun to the origwhich indi firing position, more rapidity of fire is obtained, but the weapon has its dis-advantages in the way of complexity of echanism, increased weight and liability to fatal injury in action.

FAVORS WOMEN FOR ARMY NURSES Surgeon-General Bixey Submits His

First Annual Report.

WASHINGTON, Oct. 15 .- The first an-nual report of Surgeon-General Rixey shows that the health of the Navy and Marine Corps was good throughout the the same tokens, is Californian. A vis-Marine Corps was good throughout the past fiscal year, the percentage of sick and the death rate being lower than for several years. The most important recom-mendation of the report, perhaps, is that Congress provide for the establishment of the same tokens, is Californian. A vis-tior who knows the sensibilities which mark the people of the two states in-stantly recognizes the social variance as he moves from one county into another. woman's nurse corps for the Navy, to It is not to be accounted for by compariconsist of one superintendent nurse, eight son of general conditions, for the con-head nurses, 15 first-class and 2i second-dition of one is practically the condition class nurses, these numbers to be in-

to Be Surrounded Again.

WILLEMSTAD, Curacao, Oct. 15 .- News has been received here from Caracas that the battle near La Victoria, between the forces of President Castro, numbering 4100 with 15 guns, and the Venezuelan lutionists, which began Monday men, revolutionists, morning, has so far been without definite results. General Matos, the leader of the revolution, and General Mendoza were not present. The only rebel Generals engaged were Guevera, Torres. Crespo and Antonio Fernandez, who had with them about 3100 men, representing the advance guard of the revolutionists. President Castro twice led a charge in person, and showed great courage and coolness. His Lieutenant-General, Alcantar, who was at one time at the West Point Military Academy, was mortally wounded. The gov-ernment forces had 247 men killed, while the revolutionists lost 310 men. Among the latter was General Guevera. ' The arrival at the scene of battle at 5 o'clock Monday afternoon of Vice-Presi-dent Gomes, with 800 mcn and a large amount of ammunition, saved the situa-

pansion of productive territory through the aid of irrigation are fewer. But with tion for the government. EX-GOVERNOR M. C. BUTLER. **********************

Ex-United States Senator and ex-Governor M. C. Butler, of South Carolina, in recent letter to the Peruna Medicine Co., from Washington, D. C., says:

"I can recommend Peruna for dyspepsia and stomach trouble. I have been using your medicine for a short period and I feel very much relieved. It is indeed a wonderful medicine besides a good tonic."-M. C. Butler.

Catarrh of the Stomach is Generally Called Dyspepsia--Something to Produce Artificial Digestion Is Generally Taken.

Hence, Pepsin, Pancreatin and a Host of Other Digestive Remedies Have Been Invented.

These Remedies Do Not Reach the Seat of the Difficulty, Which Is Really Catarrh of the Stomach.

This Deranges the System So That Proper Digestion Cannot Take Place.

The only rational way to cure dyspepsia is to remove the catarrh. Peruna cures catarrh. Peruna does not produce artifi-cial digestion. It cures catarrh and leaves the stomach to perform digestion in a natural way. This is vustiy better and safer than resorting to artificial

methods. 1 Peruna has cured more cases of dys-pepsia than all other remedies combined, simply because it cures entarrh wherever located. If catarrh is located in the blad Peruna cures it. If catarrh has fastened itself in the throat or bronchial tubes, Peruna cures it. When catarrh becomes settled in the stomach, Peruna cures it, as well in this location as any other.

Peruna is not simply a remedy for dys-pepsia. Peruna is a catarrh remedy. Pe-

alling, and called on a physician. pronounced my trouble a species of dys-pepsia, and asked me after he had treated me about six months to get a leave of ab sence from the establishment by which I was employed (all told, about 25 years), and go into the country, where I would get a change of life and fresh air. I did so and got temporary relief. I went back to work and was again taken with very distressing pains in my stomach. I sel-dom had a passage of the bowels without force.

"I consulted another physician with no better results. My disease kept growing on me, until I had exhausted the ability of 16 of Rochester's best physicians. Can tell their names if necessary. The last physician recommended me to give up my work and go South, after he had practiced on me for one year. They gave me a thorough examination with the X-ray with no results. They could not even de-termine with my aliments were.

"I do not, nor never have, taken any stock in putent medicines, but your testi-monials in the Rochester papers were worthy of consideration. I told my wife I was going to try a bottle of the Peru-na. The next time I went to the city I nurchased a bottle and before the bottle purchased a bottle, and before the bottle was half gone I noticed a change for the better.

"I am now taking the fifth bottle and have not an ache or a pain anywhere. My bowels move regularly every day, and I have taken on 18 pounds of flesh, my usual weight being 16 pounds. I was down at one time as low as 125 pounds.

"I have recommended Peruna to great many, and they have recommended it very highly. I have told several peo ple that complained of that species of catarrh that if they would purchase a bottle of Peruna and take it according to directions, and if, when the bottle was gone, they could come to me and tell me candidly that they had no benefit, would pay for the bottle of medicine. have so far had no complaints, but a first-class recommendations."-A. the consternation of the Polish Zionists, out for a drive through the suburbs. It who strongly supported the trust. In lasted about two hours. On his return Lodz, Russian Poland, alone, shares to the amount of \$75,000 were purchased re-o'clock, left the temporary White House and went over to Secretary Hay's, where he had accepted an invitation to dine

creased at the discretion of the Secretary: The Surgeon-General says:

for the work of nursing there can be no not compatible with military conditions can scarcely apply to institutions of the character of our large naval hospitals." The Surgeon also makes a strong plea for the appointment of dentists for the Navy, pointing out that many otherwise good recruits for the service are lost for lack of dental care. An earnest statement is made by Ad-

miral Rixey that the present medical force under his command is entirely in-adequate. He shows that whereas since ndequate. the Spanish War the medical corps has increased only 15 per cent in numbers, the naval strength has increased 70 per cent, and the examinations for re-enlist-ment 192 per cent. He submits a recommendation for the appointment of 150 more medical officers, and refers to a number of resignations during the past year, ow-ing to dissatisfaction with the outlook for promotion, and the fact that the corps were undermanned.

A post-graduate course for the novitiate in the Medical Corps is said to be a necessity, and the first step already has been taken in the transfer of the medical school from New York to Washington. Carrying out his idea for the educati medical officers, Admiral Rixey further recommends that after each cruise sur-geons should be given a period of duty cither at home or abroad in some of the great medical centers, where they have opportunity to get in touch with the march of professional progress.

Based on the experience of the Spanish War is the recommendation that at least two permanent hospital-ships, one for the Atlantic and one for the Pacific, should be constructed. These should have the right to fly the Geneva flag. Other recommendations look to the creation of a sanitarium for the Navy for the treat ment of tuberculosis, like that established by the Army at Fort Bayard, N. M.; for the improvement of the sick quarters aboard ship, and for representation from the Modical Corps in the naval boards which design the ships, in order that sanitary conditions may be improved.

SHAW OUT OF BOND MARKET.

Time Has Now Passed Under Offer of Secretary for Purchases.

WASHINGTON, Oct. 15 .- On September 56, last, Secretary Shaw published a notice to the effect that the department would purchase any of the United States 5 per cent bonds of 1904 at \$105 flat if presented on or before October 15 (today). Under that offer the Secretary has purchased is to the amount of \$23,500.

Some days after this notice was issued, the Secretary announced that offers for the sale of Government'is and 4s would be considered by the department, but intimated that the prices must be low if sales were made. Offers under this announcement have been received aggregating as follows: \$3,700,000 4s of s follows: \$3,700,000 4s of 1905 at \$200,000 4s of 1907, at \$111 50, All

of these offerings have been rejected Secretary Shaw is now on his way to Indiana, where he will deliver a political speech tomorrow evening at Oakland City. When questioned in regard to the state-ment that the Secretary was planning to purchase a large block of bonds, the Treasury officials now here declined, in the Secretary's absence, to discuss the metter function than to any that the matter further than to say that the report probably was without foundation. The its annual session her fact that the Secretary has so far declined delegates are present.
