

CASTORIA

The Kind You Have Always Bought and which has been in use for over 30 years, has borne the signature of

Chas. H. Fletcher.

and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

WHAT IS CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—the Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

The Kind You Have Always Bought. In Use for Over 30 Years.

TROLLEY HITS AN AUTO

RESULTS IN INJURY TO TWENTY-TWO PASSENGERS.

Auto and Its Occupants Narrowly Escape Destruction by Going Over High Precipice.

NEW YORK, Oct. 26.—A trolley car and an automobile collided at Yonkers today and 22 passengers on the trolley were injured. It is believed that the accident occurred in front of Greystone, the home of the late Samuel J. Tilden. Those most seriously hurt and who were taken to a hospital were: Miss Merle MacIntosh, of Mount Vernon, torn and lacerated scalp, one ear nearly severed, bruised and cut by glass. Miss Wenona H. Bailey, New York, shoulders and body cut and bruised. Kate Callahan, Yonkers, scalp wound and bruised. Others of the injured had their wounds dressed and went to their homes. A man and two women who occupied the automobile and whose names could not be ascertained, together with the chauffeur, escaped injury. The driver of the motor car said he was running on the track of the trolley line when the car ran into him from behind. The trolleyman says the automobile, while going down grade, swerved on the track and, before it could get off, his car bore down upon and hit the machine. When the car struck the automobile, it left the track and turned over in the direction of Greystone. Had it gone to the other side of the road it would have been thrown over a precipice 80 or 90 feet to the New York Central tracks. The automobile was not slightly damaged.

Killed in Football Game.

STANTON, Ill., Oct. 26.—Edward Schmidt, right tackle in the local football team, was injured in a game today with a St. Louis team and died within 10 minutes. The first half was almost completed when Schmidt complained of a pain in his head. A physician was summoned hurriedly, but Schmidt died just as he arrived. The coroner will hold an inquest.

Freight Train Smashed Electric Car. CHATTANOOGA, Tenn., Oct. 26.—A Belt Railroad locomotive drawing seven freight cars, collided with an electric car outside the city limits today. Seven persons were injured. Dr. J. L. Eaton and Charles Harris, both of this city, seriously. The engineer and fireman jumped, leaving the throttle open. Fireman Ramsey remounted the engine and closed the throttle, not, however, that the collision had occurred. The electric car was demolished.

Explosion of 600 Kegs of Powder. FAIRMOUNT, W. Va., Oct. 26.—The Fairmount Powder Works, located 18 miles from this city, was damaged to the extent of \$30,000 by the explosion, tonight, of 600 kegs of powder. No one was injured. The machinery was completely destroyed and iron was thrown for miles around.

The Depth of Glaciers.

London Telegraph. For many years efforts have been made to ascertain the exact depth of glaciers by boring, but mechanical and other difficulties have hitherto frustrated the carrying out of this method of inquiry. A few days ago, however, Professors Blunke and Hess, from Bavaria, who are well known for their studies of glaciers, succeeded in

boring, through the Hintereis glacier in the Otztal Alps at a point where the ice was found to be 150 meters deep. The machine used for boring was driven by hand, and is somewhat similar to that usually employed for experimental boring in mines, but was fitted with special arrangements for washing out fragments of ice from the borehole to prevent their freezing together again. The expenses of the undertaking, which amounted to many thousands of marks, were borne by the German and Austrian Alpine Club.

TICKET AGENT MISSING.

Suspicion That He Was Murdered and Office Robbed.

CARBONDALE, Ill., Oct. 26.—Frank M. Plaz, ticket agent of the Illinois Central at Texas Junction, is missing, and the contents of the money drawer are also gone. It is alleged that robbers entered the office, killed the agent, took the money and put the body in the Big Muddy River. Trainmen say they saw some one prowling around the building before Plaz disappeared. The amount of money is believed to have been small.

Preparing for Lynching.

POPLAR BLUFF, Mo., Oct. 26.—A large crowd has surrounded the jail, and it is feared an attempt will be made to lynch William Brock, a negro, in custody for murder. Brock was arrested last night on the charge of having killed John McKenna, foreman of a spoke factory, and highly respected. McKenna was found lying on the street, having been shot. Just before he died, Brock had attempted to rob him and shot him. Attorney Hill made a speech in front of the jail tonight urging the crowd to disperse, but to no effect, and trouble is anticipated.

GEORGIA TOWN FLOODED.

Heavy Rain and Wind for Two Days Did It.

BRUNSWICK, Ga., Oct. 26.—As a result of continued heavy rains for 48 hours, five blocks in the center of this city are under water tonight, and heavy damage has been done. In Newcast street, one of the principal business streets in the city, the water has risen into the stores, and is 10 to 15 inches deep. The city fire department house is under water. The jails are both flooded, and from Bay to Union streets, a distance of a quarter of a mile, traffic is impossible. The Brunswick Electric Supply Company has been put entirely out of business by the water, and not a light furnished by that concern is burning tonight.

A heavy northeaster has prevailed for two or three days, and the only reason assigned by mariners for the downpour is that these gales contributed their share to the deluge. Railroad traffic has been badly interfered with, and several washouts are reported.

DELAYED BY LANDSLIDE.

Southern Pacific Trains Coming Three in a Bunch.

REDDING, Cal., Oct. 26.—Traffic on this division of the Southern Pacific was delayed 20 hours by the landslide of Saturday night. The Oregon express, due here at 10:20 o'clock Saturday morning, did not pass through until 3:20 o'clock this afternoon. Two other passenger trains followed it 15 minutes apart. The slide covered 200 feet of track to a depth of 30 feet.

Mexican Railroad Consolidated.

MEXICO CITY, Oct. 26.—Documents providing for the transfer of the Mexico, Cuernavaca & Pacific Railway to the Mexican Central Railway Company have been prepared. The Central acquires the property, free from all incumbrances, merely by paying its liabilities, which, approximately, are \$4,500,000 silver. The government has granted to the Central Railway Company an amended concession, which empowers it to build either to

Acapulco or Zihuanenejo, as surveys may demonstrate to be more desirable. The subsidy, it is reported, is to be \$800 per kilometer.

FLOWERS OF THE OCEAN

Anemones and Sea Cucumbers That Grow in Neptune's Garden.

Honolulu Star. The sea anemone is one of the commonest of flowering animals. It is found clinging to rocks in sheltered places along shore in practically every part of the world, for it is not confined to any special region. It grows only in comparatively shallow water, that is, in depths of less than 500 fathoms, although there is one species that lives in the open sea, but, wherever found, it is essentially the same in structure. It is a tough, leathery tube, spread out below into a "base" that fastens it to rock and other foundation, and expanding above into the flowerlike "disc" with the mouth in the center. All around the opening of the mouth are curling tentacles, not unlike the petals of a modern chrysanthemum. Some varieties are almost or entirely colorless, while in some others the tentacles are gorgeously tinted, and rival the flowers in the field; but in all lurks death in a certain and horrible form. Watch some little creature touch the curving arms, and they will be seen to curl inward and wrap the intruder in their folds as they push it toward the mouth. The inner sides of the tentacles are covered by poison glands that sting the prey to insensibility or death, and so stop the struggles that might prove disastrous to the anemone. When the mouth is reached, the captive is pushed into the hollow interior, and the anemone shuts up into a reddish-brown ball until its meal is digested, when it spreads its fatal beauties for another victim.

Another great family of flowering animals is that including the "sea cucumbers," very plentiful in the shallow waters of Pearl Harbor. These animals have long, flattened bodies of a dark color that ranges from brown to reddish purple, and their most active movement is a slow creeping along the bottom. At one end is the mouth, surrounded by long, flattened tentacles of a dark color that ranges from brown to reddish purple, and their most active movement is a slow creeping along the bottom. At one end is the mouth, surrounded by long, flattened tentacles of a dark color that ranges from brown to reddish purple, and their most active movement is a slow creeping along the bottom. At one end is the mouth, surrounded by long, flattened tentacles of a dark color that ranges from brown to reddish purple, and their most active movement is a slow creeping along the bottom.

Police Capture Plotter.

ST. PETERSBURG, Oct. 26.—The police have captured an accomplice in the reported plot against the Dowager Empress Marie Dagmar, of Russia, which was recently unearthed at Copenhagen.

Can May Visit Sultan.

LONDON, Oct. 27.—According to the London correspondent of the Daily Telegraph, the czar, after visiting Italy, will proceed to Montenegro, Athens, and probably to Constantinople. While in Rome the czar will have an audience with the pope.

GOING TO SOUTH AFRICA

JOSEPH CHAMBERLAIN TO EXAMINE SITUATION PERSONALLY.

Official Announcement Evokes Much Favorable Comment in London—A Popular Innovation.

LONDON, Oct. 26.—It is officially announced that Colonial Secretary Chamberlain has decided personally to visit South Africa and examine the spot the problems presented by the termination of the war and the settlement of affairs in the new colonies. King Edward has given his approval of this plan, which, he is said, has also the full approval of Premier Balfour and the Cabinet.

Mr. Chamberlain purposes to start for South Africa toward the end of November, and to return the early part of March. His visit will embrace the Cape, Natal, the Orange River Colony and the Transvaal. The Colonial Secretary hopes to have an opportunity to confer while in South Africa with representatives of all the different interests concerned, and to consider their views in his future policy.

The striking precedent to be established by Colonial Secretary Chamberlain in visiting a colony during his term of office is a subject of universal and approving comment this morning. The Daily Telegraph thinks that this will be the precursor of similar visits to Canada and Australia. Various references are made to the "new diplomacy" and the "new statesmanship," as well as to the political aspects of the absence of the strongest Ministers at a time when the government is passing through a critical phase of its existence. There also are some hints that Mr. Chamberlain will be glad to be absent from the government's education bill. On the whole, however, the Colonial Secretary's decision is warmly welcomed as timely and sensible.

END OF CORONATION.

Last Ceremonies Took Place in London Yesterday.

LONDON, Oct. 26.—The last ceremonies connected with the inauguration of the reign of King Edward VII. occurred today, when the King, accompanied by Queen Alexandra, the Prince of Wales and almost all the members of the royal family, drove to St. Paul's Cathedral and offered up thanks for the recovery of his health, which had enabled him to be crowned. The weather was rainy, and small crowds marked the royal progress through the metropolis. At Temple Bar the Lord Mayor of London and the Corporation met the King and escorted him to the cathedral. In the nave of St. Paul's were gathered several thousand persons, including Premier Balfour, leading members of the Cabinet, and the foreign Ambassadors to Great Britain, among whom was Mr. Choate. The Honorable Artillery Company formed an imposing line; the members wore their busbies and carried fixed bayonets. Before the service was over several of the artillerymen had fainted as a result of long standing. The Right Rev. Arthur Ingram escorted the King and the Queen to the throne under the canopy. There was a full chorus of service of thanksgiving, followed by a sermon from the bishop of London, who laid special stress upon the fact that this was the second time in His Majesty's life that he had entered St. Paul's to give thanks for his recovery from a dangerous illness.

At the conclusion of the sermon the "Te Deum" was sung.

The royal party then returned to Buckingham Palace and were well greeted on the way. In spite of the rain King Edward requested that the carriages be kept open, and Queen Alexandra bowed. The scene at St. Paul's was a brilliant one. All of the officials present wore their uniforms, and their decorations created a blaze of color seldom seen in the Cathedral. King Edward was dressed in the uniform of a Field Marshal, and wore the decoration of the Order of the Garter.

BERESFORD LIKES UNITED STATES.

Says America and Britain Could Whirl Rest of the World.

LIVERPOOL, Oct. 26.—Vice-Admiral Lord Charles Beresford arrived here today from New York on the Cunard Line steamer Umbria. In the United States Lord Beresford studied the construction of American battle-ships, and also investigated shipping matters. He was interviewed on his trip to America, and said he had had a splendid reception in the United States, and that he could vouch for the genuineness of the kind sentiments entertained in America for Great Britain. He said his investigations on the other side had convinced him that Great Britain had nothing to fear from the International Mercantile Marine Company. On the contrary, he believed this combine would benefit England commercially and otherwise.

SWAYNE ALL RIGHT YET.

Mad Mullah's Design Frustrated by the Weather.

LONDON, Oct. 27.—A dispatch from Simla, India, to the Daily Mail, reports that Colonel Swayne and his forces are continuing their march from Bohote to Berhale, Somaliland, East Africa, and that they are not pursued.

MAEDONIANS DEFEATED.

LONDON, Oct. 27.—A dispatch to the Exchange Telegraph Company from Constantinople says it is rumored that M. Zontcheff, the Macedonian leader, was killed during a fight between insurgents and Turkish troops at a point between Revrek and Melnik, European Turkey. The insurgents had 23 men killed in the engagement.

CONSTANTINOPLE, Oct. 26.—

The Porte has received news of the defeat of the revolutionary band under Zontcheff. Zontcheff himself was wounded, but escaped.

Wa Tung Fang Gets Sheng's Place.

Peking, Oct. 26.—An edict has been issued appointing Minister Wu Ting Fang to succeed Sheng as commissioner of the

new commercial treaties organization. Sheng resigned this office to bury his father, who died last Friday, and to perform other filial duties.

(Sheng was formerly director of telegraphs and railroads. He was also Tao Tai of Shanghai during the period of the Boxer rising. He is said to be greatly disliked by foreigners and has been described as thoroughly unscrupulous and cunning. It has been reported that he pushed the finger bowl away and began the position he has just vacated, a post of great importance to China's trade.)

Three Killed From Scaffold.

NEW YORK, Oct. 26.—Two men were killed and another fatally injured today by the collapse of a swinging scaffold of a 25-foot chimney of the American Sugar Refining Company, in Williamsburg. The dead are: John Mulroy and John Williams, both of Newark, N. J. Henry Cooper, of Newark, was injured.

MIGRATIONS OF NUTS

How Some Have Been Transplanted in Various Parts of the World.

St. Louis Globe-Democrat. "Yes, thank you," said the professor of botany, as the mistress of the house at which he was visiting passed him the nuts. "I am very fond of nuts," he added, as he pushed the finger bowl away and began deprecations with a pair of nut crackers on some peculiarly stubborn variety, which at first baffled his most vigorous attempts.

"I suppose you know every nut by name and all about their ancestry and birthplace," said the younger daughter of the household, who had just returned for the summer vacation from Vassar.

"I would like to know a great deal more about them," was the noncommittal reply. "I have always had the greatest interest in nuts ever since the time that as a boy I was carried out nutting parties. The children of this age do not go nutting, as their fathers and grandfathers did. Nuts have become a most important article of commerce at the present time, and I read only yesterday that 50,000,000 Brazil nuts, the kind I have in my fingers, are exported from the South American port of Para. These nuts are obtained from a remarkable tree, which attains the height of 100 feet before the branches spread out. The trees are buttressed in the lower part of the trunk, affording a sort of tentlike room for a small family. The nuts grow in large capsules, which, when they fall to the ground, are split open by the natives, and thus the nuts are gathered.

"One can buy at almost any grocery store more than a dozen kinds of nuts, each of which represents for the most part a different part of the earth. Here in this dish, for instance, are walnuts, pecans, chestnuts and our own American peanuts. The walnut is a strange sort of vagrant, and so it has earned its name, which in the German means foreign nut. It has changed its habitation until it has gone all around the world. It is a close relative of the butternut, and was first found almost as far north as the Arctic circle. At a later date it appeared in France, and then shifted to Japan. After several centuries it was again introduced into Europe from the country south of the Caucasus. Hence its name, as a foreigner. I don't know of a city where I have been that there is not a Filbert street," said the professor, after he had discovered a filbert nut at the bottom of the dish. "The reason is that the filbert has long been a popular nut. It is named after a German saint, whose day is August 22. The chief difference between filberts and chestnuts is that the first are longer, with the involucre completely covering the nut, while the chestnuts are rounder, with less husk.

"England is the home of the hazelnut, and English hazelnuts, by the way, are far superior to our American varieties. In the old country the cultivation of hazelnuts has been carried on with such success that the nut has become a dainty, and is ranked as such."

"But you said something about 'even our American peanut,' said the Vassar student, "and you said it as if the peanut

belonged to a lower class. You didn't mean to make fun of the poor peanut, did you?"

"Well, not make fun of it, exactly," replied the professor, "but we all know, nevertheless, that the poor peanut is made fun of, abused and regarded as a poor man's nut by a great many people. I suppose the reason is that it is such an easy nut to eat that it has become common, and hence regarded as vulgar by those people who are always trying to avoid doing what the majority or, as they term it, the masses, do. Peanuts can be carried anywhere, and by some are eaten about everywhere. Hence the contempt for the peanut has been caused, not by the peanut itself, but by those who persist in the abuse of eating it indiscriminately."

"But the peanut is not truly a nut?" inquired the girl colleague, as she looked at her mother to see what effect the question would have.

"Very true," answered the botanist. "Strictly speaking, it is a pod, much the same as peas or beans. And the reason that I said that it is American is because it was found growing in Central America. It was then transplanted to Brazil and Peru. It next found its way to China, and was carried by the Chinese to India, Ceylon and the Malay Archipelago. Then the Portuguese adventurers carried it in their slave ships to Africa. In later days it has invaded Australia as well."

"Which is another evidence of the 'American invasion,'" said the father of the household, who played mumbledegs with the professor 40 years before.

CORN BREAD.

Fond Recollections of the Days of the Hoe and Flapjacks.

Richmond Dispatch. With good meat and a cook following the lead and traditions of the old regime, delicious bread may be baked of Indian meal. But we have grave doubts whether it can be baked as well in a store as in an open fireplace. But, alas, of the latter only a few remain.

An asheake, of course, must have ashe. They are indispensable. As well try to produce a mint jelly without mint. On the other hand, "flapjacks" need only a well-greased frying-pan; but skill is required to turn them. That is done by pitching them out of the pan into the air and making them come down slap on the other side. The corn pone may be cooked in a stove or range.

The hoeecake was originally cooked on a hoe in the fields and in the negro cabins. A skilled cook will do well enough for it, but must be well greased at the bottom. So, too, with respect to egg or batter bread. As for corn muffins, the appliances of a range are admirably adapted to them.

We wish some millionaire would fit up a Virginia country home in ante-bellum style, and among other things have in it a large open fireplace, a black cook in a gingham dress, with a red bandanna on her head, and also have a half-acre mint bed, an icehouse and an old-time garden, filled with raspberries and gooseberries, thyme, sage, currants and all the ordinary table vegetables.

When one of those old-time homes and gardens and kitchens is restored, and the host and hostess have entered into possession, we desire to be listed as a frequent guest, with a reserved seat in the chimney corner. Then all we shall want will be the zest, the appetite, the voraciousness we possessed when we could eat 18 rolls and six eggs for breakfast, and consume a whole watermelon between meals. But, alas, it would be easier to restore old wells and open fireplaces than to bring back the digestion and storage capacity of a youth that's gone of a time that's past and never can return.

Northwest Field Trials. The preparations for the various events of the Pacific Northwest Field Trials Club meet, which will be held on Wildby Island, Puget Sound, this week, have been completed. Over 50 high-class dogs are included in the list of entries. The annual business meeting will be held today, and the field trials will begin tomorrow.
