Laying of First Section of the Pacific Cable.

MACKAY'S GREAT AMBITION

San Francisco Honors Heads of the Enterprise, Which Clarence Mackay Proclaims the Height of His Father's Ambition.

SAN FRANCISCO, Dec. 11 .- The commercial bodies of this city held a reception at the Palace Hotel this afternoon in honor of Clarence H. Mackay, George C. Ward, vice-president and general manager of the Commercial Cable Company; William H. Baker and Edgar C. Bradley, of the Postal Telegraph Company, who are witness the commencement of the laying of the new cable between this city and Honolulu. In recognition of the event and in honor to the distinguished visitors, the leading business men of the city planned today's event. Governor Gage represented the state, and Mayor Schmitz was present on behalf of the municipality. Governor-elect Pardee, Mayor Barstow, of Oakland; presidents of the universities, foreign Consule, Collector F. S. Stratton Harbor Commissioners, presidents of the improvement clubs of the interior cities of the state and representatives of the rall-road and telegraph companies were also among those present. Mr. Ward in an address said:

"You can form some opinion of the ex-tent of this great work when I tell you that the length of this cable will be 3½ times more than any Atlantic cable. When this is completed, our system will reach from England and France to China, three-fourths of the distance around the globe. And I venture to predict that we shall be able to best Puck's prophecy of girdling the earth in 40 minutes by sending a message from San Francisco to San Fran-

cisco in one-fourth of that time.

"The first section, now about to be commenced, will probably be completed about Christmas day, or, say, by the first of January, and if we have the good fortune to be in communication with Honolulu by that time, we shall be delighted to give you the free use of the cable to exchange your congratulations and greetings with your friends. The remaining sections, starting from Honolulu, touching at Midway and Guam, to Manila, 2000 miles of which have already been manufactured, will be laid and in operation by the end of June next. The whole length of the line

will be about 10,000 nautical miles."
In conclusion, Mr. Ward paid a glowing tribute to the character and deeds of the late John W. Mackay, who "crowned his wonderful career with an undertaking which should earn him in history a place among the most public-spirited men of his

Taxes Illegally Collected.

BUTTE, Mont., Dec. 11.—A special to the Miner from Miles City eays:
Custer County, through its legal representatives, today paid into the Federal Court \$12,500, the amount of a judgment which has been obtained against the county by the Western Ranches Company,

The plaintiff corporation several years ago ranged cattle on the Crow reservaenforced collection. The company con-tended that the county had no right to impose the tax, since the cattle were on Federal and not on state soil. On this contention the company sued for the taxes that had been paid, and secured judgment in the state courts. The county attempted to take an appeal to the Circuit Court of Appeals, but failed to perfect the appeal, hence the judgment stood.

treat the imposition of a countervalling duty as a breach of treaty. As practi-cally the entire British export trade with foreign countries is carried on under the protection of the favored-nation clause, the government faces the alternative of either dropping the Brussels sugar con-vention or risking the loss of favored-nation advantages. As one effect of Great Britain's adhesion to the sugar conven-tion would be to entitle the United States and Russia to place higher import tariff on British goods, it is expected that rather than risk such a serious disloca-tion of foreign trade the government will forego the imposition of a countervalling duty on sugar.

"MR. DOOLEY" TAKES A WIFE.

MR. AND MRS. FINLEY PETER DUNNE

Pinley Peter Dunne was married in New York to Miss Margaret Abbott, daughter of Mrs. Mary Abbott, formerly of Chicago. Miss Abbott, who used to reside in Chicago, of late years has made her home in Paris, where she recently achieved fame by winning a prize in the woman's

handicap game at the international golf matches. This was but to be expected, because Miss Abbott was noted for her skill at golf. She also was prominent in Chicago's society circles, and she achieved considerable reputation as an illustrator and inventor of children's games. Her mother is well known in literary circles. Chancellor von Bulow's speech today was disappointing. Both sides of the House considered it too vague and as falling to outline definitely the government's programme in the midst of the matter drop.

The government, in making the new commercial treaties, would guarantee to the domestic animal industry protection enough to insure its prosperous develop-ment and would accept no provisions in treaties which would render it impossible o adopt the necessary veterinary measures to prevent animal diseases coming into Germany from abroad. AUTOMOBILE SHOW OPENS,

American Makers Too Busy to Send Exhibits to Paris.

PARIS, Dec. 11.—American makers of automobiles are practically unrepresented at the fifth international exposition of at the international exposition of automobiles, which has just opened auspleiously at the Grand Palace, with President Loubet and several Cabinet Ministers among the throng of visitors. The vast amphitheater was filled with the latest types of racers and coaching and commercial vehicles, chiefly ponder-ous and powerful French, Swiss and Belgian makes, contrasting with the few light, graceful American machines. Among the noveltles exhibited were automobile canoes and launches. One of the latter, luxuriously equipped, was built for the Sultan of Morocco.

A representative of one of the American companies present said: "The absence of American types is due to the fact that the American manufac-turers are so busy supplying the home demand that they are unable to compete with the European trade, and the American types are chiefly for city streets, whereas the mountain coaching of the Continent requires powerful climb

President Loubet gave special attention to speed machines. He was also struck with the numerous and remarkable applications of automobiles to agriculture. The Minister of Agriculture, M. Mougeot, is said to have the intention of making a special study of the application automobiles to agriculture.
