GREAT YEAR IN HOPS
Growers Receive Over $3,000,000 for Their 1908 Product—Small Increase in Acreage.

The first crop of hops grown in Oregon was harvested last summer, and the growers were able to sell their product for more than $1,000,000. The price of hops has been rising steadily, and the growers are now receiving as much as $100 per ton for their crop. This is a large increase over the price of hops in previous years, and it is due in part to the fact that the growers have been able to produce a larger crop.

The acreage of hops in Oregon has increased by over 2,000 acres since 1907, and it is expected that the acreage will continue to increase in the future. The hops are grown in a number of counties in the state, but they are most abundant in the Willamette Valley.

The hops are used in the manufacture of beer, and they are an important source of income for the growers. The hops are also used in the production of other alcoholic beverages, such as ale and porter.

The state of Oregon has a large number of hop growers, and they are an important part of the state's agricultural economy. The hops are an important source of employment for the growers, and they are also an important source of income for the state.

The hops are harvested in the month of September, and they are ready for market in the month of October. The hops are transported to the market in the month of November.

The hops are a hardy plant, and they are able to withstand the rigors of the Oregon climate. The hops are also able to withstand the stress of harvest, and they are able to produce a large crop in a short time.

The hops are a valuable source of income for the growers, and they are an important part of the state's agricultural economy. The hops are also an important source of employment for the growers, and they are also an important source of income for the state.
