County division bills are more numerous than ever before this. There is enough politics in every one of these measures to have some bearing on the Senatorial fight. While the market was disappointed over Fi-nance Minister Rheinbeben's pessimistic utterances on the business stituation and the lower estimates in the Prussian bud-get for railroad supplies than were expected, values were generally well maintained. The most striking feature of the week was the recovery in the shares of ocean navigation companies upon the an-nouncement that the dividend of the Ham-burg-American Steam Packet Company would reach 4% per cent as against 6 per cent last year, whereas operators had ex-pected a dividend of only 3 per cent. The statement issued by the Hamburg Com-pany that the outward freight market had greatly improved through heavy shipments to the United States also aided the recovery. LONDON PAPERS APPROVE.

Think Chamberlain's Speech Will Be Productive of Good.

LONDON, Jan. 19.-Colonial Secretary Chamberiain's frank admission that he started for South Africa with the idea of obtaining a much larger war contri-bution from the Transvaal than he had secured explains the rumors which have been current for the last few days that this mission has resulted in disappoint-ment to himself, and although the arrangement completed meets with hostile criticism in a few sections of the London press; on the whole it is favorably re-ceived because it is recognized that if Mr. Chamberlain had not gone to South Africa no contribution at all might have been forthcoming and also because the been forthcoming, and also because the contribution is not forced, but voluntary on the part of the Rand interests. Great relief also is felt that everything pos-sible is being done to avoid the intro-duction of Chinese labor into the Col-

ontes The comments in the papers this morn-ing on Mr. Chamberlain's Johannesburg speech shows it to be regarded as one of his most brilliant efforts, breathing the hest hopes for the prosperity and the tranguility of the new colonies. Mr. Chamberiain's reference to the labor problem has been construed as indicating his desire for measures either to re-strain Kaffir polygamy or for a system

of taxation to compel the natives to work by placing a heavy impost upon every additional wife.

In Johannesburg the idea has been mooted that the \$150,000,000 war contribu-tion might be spent in building new warships. The suggestion does not meet much approval in London, where it is thought the contribution ought to be applied to the relief of taxation.

In editorial articles this morning great hopes are built on Mr. Chamberlain's optimistic view of the colonies' future and the fact that the settlement errs, if anything, on the side of generosity to the

the nervous shock. The Des Moines and Minneapolis special, running at a high rate of speed, struck a broken rail just as it was about to cross a bridge. The speed of the train carried it across the bridge on the ties; then the entire train pitched down a 20-foot embankment, the cars turning on their sides and being jumbled together in a hopeless mass.

The engineer was so badly injured that he died in a short time.

The passengers who were not injured succeeded in pulling the other passengers through the car windows, and as soon as all were taken from the debris they were carried to a neighboring farmhouse, where they were cared for till one of the party walked to Waco and telegraphed to Syca-more, two miles away, for help. Assistance arrived in a couple of hours, and the injured passengers were brought to the Sycamore Hospital.

Accidents on the Railroads.

WASHINGTON, Jan. 18.-A statement prepared by the Interstate Commerce Commission shows that during the three months ended September 30, 1902, there were 263 persons killed and 2513 injured in train accidents. Other kinds of accidents, including those sustained by em-ployes while at work and by passengers in

getting on or off cars, etc., bring the total number of casualties up to 12,007, the killed numbering 845 and the injured 11,-162. During the three months covered by the statement, the traffic of a large ma-jority of the railroads has been heavier than ever before, necessitating the em-ployment of new men in train and yard work. The total number of collisions and deraliments was 2448, of which 1444 were collisions and 1014 deraliments, of which 51 collisions and 12 deraliments affected passenger trains. The damage to cars, engines and roadways by these accidents amounted to \$2,198,500.
