Senate Adopts Elkins' Little Measure.

ALSO PASSES ARMY-STAFF BILL

Chief of Staff to Be Exclusively Under President-Quay and Beveridge Have a Tilt-Payne Fights Against Private Claims.

The Senate yesterday passed without discussion or objection the Elkins bill to further regulate railroad transportation. It is one of a number of measures presented in this Congress concerning orporations, and has particular reference to railroads. The text of the bill, with the amendments made in commit-

ter, have been published heretofore. The Army appropriation bill, which went over yesterday at the request of Pettue, was passed. The provision establishing a general staff was climinsted. Later the independent measure identical in its provisions with the general staff section of the Army bill, was named, after having been reconsidered to permit the incorporation of an amendment by Berry placing the chief of staff exclusively under the di-rection of the President. The bill now

WASHINGTON, Feb. 2.-Upon the con clusion of morning business in the Sen-ate today a bill was passed amending ns 5191 and 5192 of the revised statutes. The effect of the amendment is to allow National banks to keep their reserves in cities of 30,000 population, instead 50,000 population, as at present. A House bill was also passed for the

relief of the officers and crew of the United States cruiser Charleston, which was lost in the Philippines. The following bills also were passed: Granting the Central Arizona Railway Company a right of way through the San Francisco Mountain forest reserve in Arizona; providing for free homsteads on lands for actual bona fide settlers

in the northern half of the Colville In-dian reservation, Wash., and reserving the public lands for that purpose: Clapp called up the bill to regulate com-merce with foreign nations and among the states, known as the Elkins bill. Before its reading was concluded the Army ap-propriation bill was laid before the Senate. The general staff provision of the measure, on motion of Proctor, was stricken out. The committee amendment regarding the payment of and reimburse ment of payments made of just bills and charges for the support, care and treatent of sick officers and culisted men was withdrawn and a substitute adopted ap-propriating \$200,000 for the purpose. As

ended the bill was passed Berry (Ark.) then asked that his motion made Saturday to reconsider the general staff bill be acted upon. He offered an amendment, which was agreed to, putting the chief of staff under the direction exclusively of the President, and not jointly with the Secretary of War. Berry then withdrew his objection, and the bill

The reading of the Elkins bill was then resumed. An amendment was agreed to broadening the immunity to persons giv-ing testimony in cases coming under the provisions of the bill. The committee amendments were all agreed to, and, as

FIGHTS BOGUS CLAIMS. But Payne Only Defeats Three Out

of Thirteen. WASHINGTON, Feb. 3. - The House spent practically the whole day on the claims bills coming over from last week. Payne, the floor leader of the majority, fought them all, but succeeded in defeating only three bills. After the claims measures were disposed of, general debate on the postoffice appropriation bill

on the postoffice appropriation bill was resumed, and Robb (Mo.) addressed the House on the trust question. Under the order made last Saturday, the 13 claim bills favorably acted upon in committee of the whole Friday, but not

disposed of, were taken up. Payne, the Republican leader, who opposed the bills in committee of the whole, attacked the first one, which provided for the paynt of two years' pay and allowances (about \$7000) to the widow of Charles B. rough, an assistant surgeon in the Marine Hospital service, who died of blood poisoning contracted in the service. REPORT ON CANAL TREATY. Morgan Will Continue His Fight

Begun in Committee. WASHINGTON, Feb. 3.-The Paname Canal treaty was reported to the Senate in executive session today by Senator Cul-

that the committee had agreed not to report the treaty until amended. Senator Morgan offered in the Senate the amendments which he had offered in co tee. They were ordered printed without being read.

The agreement to report the treaty was reached after three or four sittings de-voted in the main to hearing Senator Morgan's objections to the document in its present shape. He had not concluded when the vote to report was taken today, but he announced that he would be will-ing to transfer the discussion to the floor of the Senate. This was in accordance with a suggestion made by Senator Cuilom, chairman of the committee. Only two Senators, Morgan and Bacon,

voted against it. Senator Bacon an-nounced that his opposition was to the ime of reporting and not to the treaty a result of which between 40 and 50 lives itself. He said he was favorable to the were lost. The steamers Yokohama treaty as it now stands and would vote Maru and Genkai Maru were being refor it, but he believed that it should not paired and the steam launch Hayabusu be reported until consideration in committee should be exhausted.

Senator Cullom says he has formed no plans for calling it up in the Senate. The general opinion of members of the com-mittee is that Senator Morgan will continue his opposition on the floor of the Senate and that several long sessions will be necessary to secure a vote,

CONTRACT FOR CRUISERS.

One Goes to Cramps, Other to New York Shipbuilding Company.

WASHINGTON, Feb. 3.—Again today the Cabinet discussed the award of bids recently received for the armored cruisers Tennessee and Washington. A decision was reached, and at the conclusion of the meeting Secretary Moody made public the following statement:

"The Navy Department has decided upon the award of contracts for the two 14,500-ton armored cruisers Tennessee and Washington. The bid of William Cramp & Son, of Philadelphia, for two vessels at \$4,665,666, has been accepted for one vessel, with the stipulation offered that the plans of the Government shall be fol-lowed. In view of the fact that the New York Shipbuilding Company of Camden, N. J., one of the largest and best-equipped shippards in the world, is the only large shippard in the United States not now ac ned to naval work, and as this company was also the lowest bidder for two ships on the Governments plans, the sec-ond vessel has been awarded to it at the same price of \$4,05,000.

"The only bid received from the Pacific Coast was \$4,35,000, which was not within the 4 per cent increase over the lowest accepted bid allowed by law for vessels built on that coast. These awards are approved by the President as required by

Transfer of Interstate Commission Rock on Which They Split.

WASHINGTON, Feb. 3.—The Senate and House conferees on the bill creating the Department of Commerce held their first conference today. The House provision, conferring upon the President authority to place the Interstate Commerce Commission under the control of the proposed department, proved to be the principal feature of difference, the represen-tatives of the House standing out stiffly for the House provision and the Senate's representatives standing as firmly for its elimination from the bill. All the Senate conferees, Messrs, Hanna, Nelson and Clay, stood together on this point. Senator Clay went so far as to say that

he would never agree to a report accept-ing the House provision.

The House conferees indicated a willingness to accept the amendment sug-gested by Senator Nelson and inforced by the Senate committee on commerce for the control of trusts, and members of the conference express the opinion that this provision will be incorporated in the bill without substantial changes. PLAINFIELD, N. J., Feb. 3.-The Coroner's investigation of the recent wreck on the Central Railroad of New Jersey near Graceland, in which 23 per-sons were killed, began here today. The most important testimony was that of Dr. Westcott, County Physician of Union County, who read the statement made to him by Engineer James Davis on the night of the disaster. Davis was in charge of the Reading Express, which

crashed into the local. In this statement Davis stated that his engine had a leaking steamchest, which had been cracked for a month or so, and that the steam escaping from it prevented him from seeing the tower signals. He did not see the train ahead until within 69 feet of it.

David H. Deeter, master mechanic the railroad at Philadelphia, admitted that he had known of the leak in Davis' engine, but insisted that the escaping steam was not sufficient to obstruct the
