# **FURNITURE ON FIRE**

Flames in Warehouse Do \$25,000 Damage.

### WATCHMAN AND FAMILY ESCAPE

Dregon Furniture Manufacturing Company Suffers Loss, Covered by Insurance, of \$15,000-Metal Walls Hinder Firemen.

Fire, probably of incendiary origin, last hight destroyed the contents of the ware-house of the Oregon Furniture Manufac-turing Company, at East Clay and East Water streets. Beginning at the back of the building, the interior of the structure was quickly affame. The building was sheathed with corrugated from which im-peded the efforts of the firemen to break down the walls and turn the streams into

Peter Lynch, the night watchman, his wife and child, were asleep in the second story when the fire broke out, and so rapidly did it spread that they fied from the biazing building in nothing but their night clothes. Lynch is unable to give any ac-

like those parts of our beautiful water system where 16 to 26 inches of water pipe are calmly conducted into a 13-inch outlet. Ine trunk lines between Chicago and the Atlantic Coast cannot carry as much business as is brought them by the transcontinental and Missouri River lines. They must improve their facilities or lose the business.

business.

Some of them are rising to the emergency. The Pennsylvania Railroad spent \$12,500,000, half its income, for betterments last year. It is planning to spend \$67,000,000 in the next three years. Perhaps this foresight and energy explains why Pittsburg was the first place where the freight blockade was broken. The Bailtimore & Onio road, which apent \$70,000,000 in betterments under the receivership, has fallen belind again and sizesly cannot carry the behind again and simply cannot carry the Western business offered it. It is said that the road could increase its business 20 per cent if it had the facilities. Therefore, per cent if it had the facilities. Therefore, it is going to spend \$20,000,000 for improvements the coming year. The Erie has made a new loan of \$50,000,000 to increase its facilities. The New York Central does not advertise its intentions; but it will have to do something to cure a paralysis of traffic in New England which deprived Boston of coal last Winter and is stirring intention of the probability of the coal last winter and is stirring intention of the probability.

BRAIN GLAND GOVERNS.

### SERMON FOR NEXT SUNDAY

By special arrangement with his publishers, The Sunday Oragonian, April 26, will print a sermon by Rev. George C. Lorifner, D. D., LL. D., formerly pastor of Tremont Temple, Boston, now of New York City. His topic is "The New Life in the Old Church." It is undoctrinal, and while it appeals in lofty vein to orthodox Christians, it is broad enough to lay hold on modern day agnostics. Its key-

Holisday avenue, Chemical 2 and Hose Gompany 2 came from First and Jefferson streets, and Hose Company 3 from East Seventh and Stephens streets. Within a few minutes six streams of water were turned upon the building and into the interior as fast as the sheathing could be ripped off. Chief Campbell arrived on the scene as soon as the East Side companies reached the spot.

The fames seemed to extend through.

The fames seemed to extend through.

Dr. Satous begand and is be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery, it is said, will also be the greatest covery.

The finnes seemed to extend throughout the entire pile of furniture inside the
blazing building, and so solidly was it
packed that the streams of water could
play only upon the part nearest the outside. Ten feet away from the building
no heat could be felt, and the firemen,
unimpeded by heat and but little smoke,
fought the fiames close at hand.

With hooked poles they tore off the
sheathing and oulied out what they could
gen and formed a new substance, "ad-

With hooked poles they tore off the sheathing and pulled out what they could gen and formed a new substance, "adrenoxin," which then became mixed with the fluid part of the blood and coursed pieces. There was never any danger of the fire spreading, as the metal sheathing prevented anything of the kind. After the first outburst of flames the fire was easily confined to the interior, but that was as much as the firemen could do, for the was almost impossible to get the tissues were composed.

ments of those who first saw the flames, 'When studied from the standpoint of the fire started near the back of the building and seemed to be inside, among the furniture piles, in an instant. Then spreading rapidly, the watchman and his family were driven from the building and forced to seek shelter in the house of a constant of the body, as it proved to be the organ upon which all disease-producing polsons and all other poisons acted. Some forced to seek shelter in the house of a

I certainly cannot account for the fire the flames playing havoc with his fine furniture. "The workman who assembles the furniture has a small coal oil stove upon which he warms his glue pot, but as he quits work at 5 o'clock I don't see that could have had anything to do how that could have had anything to do with it. Yes, it would be very easy for anyone to get under the building and set fire at the back. The floor is not of metal and one could quite easily cut his way up into the main part and set fire to a with it. Yes, it would be very easy for anyone to get under the building and set fire at the back. The floor is not of metal and one could quite easily cut his way up into the main part and set fire to a furniture pile. Then, of course, it would spread very rapidly. We have always taken great care with this building on account of the other fires in this neighborhood. A night watchman has always been employed and I do not doubt his with Asiatic cholera, the form makes the case with Asiatic cholera, cholera infantum and other foes of mankind.

"A subject with a strong pituitary has in his blood all that is necessary to destroy disease germs, since he receive a large supply of oxygen."

The furniture warehouse is directly across East Clay street from the buildings. furniture pile. Then, of course, it would spread very rapidly. We have always taken great care with this building on been employed and I do not doubt his care in the least. I was over here my-self this afternoon."

rose East Clay street from the buildings which were consumed by the great fire of June 21, last year. It was saved only by the metal sheathing and the attention of the firemen. This time the sheathing as proved the destruction of the con-

The smouldering furniture piles con-tinued to burn for several hours this morning after the recall had been sounded

between the engine-house and the scene of the fire. Instead of driving directly to the warehouse this engine was forced to go around by way of East Sixth street and thence down East Clay, which at the best is far from being in a safe condi-tion. The railroad track also hindered the firemen to some extent.

# TRUNK LINES TO BLAME. Carrying Facilities Can't Handle

Permanent Business.

Minneapolis Tribune. The trunk line railroads of the country must face enormous expenditures for in-crease facilities in the next few years. if they are to hold their natural territory and keep their natural business. The stoppage of flouring mills in Minneapolis because they cannot get their product carried fliustrates conditions from which every Western industry suffers more or laws. The conditions is not temporary. The less. The condition is not temporary. The trunk line railroads have let the perma-nent business of the country outgrow their facilities for carrying it. They shrunk from facing the enormous expenditure necessary to repair the physical decay of a long period, first of destructive competi-tion and then of bankruptcy. Those that were most willing to meet their responsa-bilities did not foresee the enormous

growth of business and are now as far be-The railroad system of the country is Argus

interior cities to rebellion.

Heavy expenditures for railroad con struction did not come to an end with completion of the main lines of traffic. They must spend more now to keep their business than they spent before to go after it.

# PRAISES THE DRYDOCK

EXPERT GOKEY TALKS TO THE PORT OF PORTLAND.

Suggests a Few Alterations in Its Construction-Bids Opened for Supplying New Pipe,

With a few alterations that he has suggested. Portland will have one of the fin-est sectional drydocks in the country. That is the opinion of W. J. Gokey, of New York. Mr. Gokey is an expert in his line, and probably knows more about dry-docks than any other man in the United States. He has built drydocks at many places, and has inspected every one in this country. He also owns a large dock in New York. Mr. Gokey has been over in New York. Mr. Gokey has been over to Vancouver and inspected the drydock that is being built there, and at a meeting of the Port of Portland Commissioners yesterday he told the members what he thought of it.

In the first place, he suggested to the Commissioners that the wings of the dock be planked on the outside, instead of inside a received for in the streetingstoners.

ide, as provided for in the specification side, as provised for in the specifications. It will not cost any more to make this change, and he says it will be found necessary in the future working of the dock. Another change that Mr. Gokey advises is the use of loose rock ballast, instead of concrete. As part of the ballast will have to be removed when the dock becomes old and the timbers water-soaked, loose material can be handled much easier than concrete. much easier than concrete.

A proper start has been made in build-ing the dock, according to Mr. Gokey, and the material entering into its construction meets with his approval in every respect. He examined the work thoroughly in company with Engineer J. B. C. Lockwood, and pointed out the changes he would make were the dock his own. Regarding drydock charges, Mr. Gokey said that a different scale prevails in nearly every, city. At New York the rate is 7 cents, at Philadelphia 10 cents, at Boston 12 cents, at San Francisco 40 cents, at Seattle 50 cents. This rate is on the gross tonnage of steamers and the net tonnage of salling vessels. He suggested that about 40 cents would be the proper rate for Portland, with a special rate for river steamers and local boats Mr. Gokey also explained the qualifica-tions of a dockmaster, and the other em-

the company, said last night that fully \$25,000 worth of furniture was stored in the building. Of this some \$15,000 is covered by insurance. Almost the entire contents will be ruined, either by the fire or the water poured into the building.

It was the metal aheathing which rendered the efforts of the firemen almost of flo avail. Inside the warehouse was a solid mass of flames, while, except for the first outburst, little fire showed upon the first outburst will probably try to make the present supply of pipe do service for some time longer.

## MORE TRANSPORT BIDS.

Proposals Invited From Pacific Shipping Companies.

Disbursing Quartermaster J. McE. Hyde has received an order from the United States Quartermaster-General to invite proposals for bids for freight and passenger transportation to and from the Philippines for the coming year. The Quartermaster-General's letter says in part:
"You will please invite proposals, sub-"You will please invite proposals, sul tect to the usual conditions, by early newspaper advertisement, for transporta-tion of passengers and freight for the Army to and from Manila, Philippine Isi-ands, and the following points in the United States: San Francisco, Portland, Tacoma and Seattle, for the fiscal year ending June 20, 1904. Bids will be received for transportation from one or more or all of the points mentioned. Bids are to

the first outburst of flames the streams of material particular data as much as the firemen could do, for it was almost impossible to get the streams of water into the building.

Beside the burning structure on a side-track stood two cars filled with imported furniture, which would have been unboaded today. The cars had not been unboaded today as a superior of the glands, and the brain, the 'anterior pitultary been unknown. This turned out to be a loaded before because the warehouse was loaded today. The cars had not been unknown, and the brain, the 'anterior pitultary been unknown, and to be the one which regulated the amount to be transported."
