Portage Railroad Bill Is Also a Popular Measure-Governor Believes Mistake Was Made in Passage of Exemption Measure.

SALMON, Or., May 7.-(Special)-If the desire of the people of this section of the state is fairly representative of the opin-ion of the people of the rest of the state, there can be no doubt of the outcome of a reference of the Eddy corporation tax bill. That bill was passed in response to a de-mand that came from every part of Ore-gon. Such a measure had been twice urggon. Such a measure had been twice urg-ently recommended by Secretary of State Dunhar and had been advocated by Gov-ernor Geer and Governor Chamberlain. The press of the state, volcing the winhes of the people, demanded that Oregon re-main no longer in the list of states that grant corporations special privileges with-out exacting compensation. The Eddy bill was framed by one of the splicer and most conscientions members

The Eddy bit was trained by one of the ablest and most conscientious members of the Legislature, acting in conjunction with Secretary of State Dunbar, who had given the subject exhaustive study. The bill was considered and modified by one bill was considered and modified by one of the strongest committees on assessment and taxation that Oregon has ever known. It passed both houses by an almost unani-mous vote. Instead of being passed as a part of a "deal," as has been falsely insinuated, it was enacted solely with a view to meeting the wishes of the people. While the measure is not perfect, and becaute how detand as such it, is recor-

has not been claimed as such, it is recog-nized by all impartial men as a move in the right direction. When the people have an opportunity to be heard they will overwhelmingly indorse the course of the Legwhelmingly indorse the course of the Leg-islature in this regard. From present in-dications they will go farther and demand the enactment of some such measure as the Harris bill, which was also framed upon the plan of similar laws in other states. The attempt of mining corpora-tions to defeat the Eddy bill has only made the people more determined that the text shell be imposed tax shall be imposed.

Upon the merits of the portage railroad bill there has been less discussion. That measure was also passed in response to a popular demand voiced by all the leada popular demand voted by an the read-ing papers of the state. It was passed for the sole purpose of promoting the com-mercial and industrial interests of the state, and unless it appears in the dis-cussion of the question that the judgment

cusation of the question that the judgment of the prom of the state was in error, this act also will be informed by the people. When Governor Chamberlain was asked recently for his impression of the wishes of the people regarding the acts of the inst Legislature, he replied that his con-versation with péople from different parts of the state leads him to believe that there is no popular demand for submis-sion of any act, except perhaps the bill repealing the tix-exemption law. Gov-ernor Chamberlain suys he believes that if all the acts under discussion should be if all the acts under discussion should be If all the acts under discussion should be submitted to the people, all would be in-dorsed except the repeal of the exemption law. This latter act, he believes, was a mistake. He'did not understand its im-port when he signed it, and he thinks the Logislature did not understand it when they passed it.

ASTORIA. Or., May 7.-(Special.)-A plan has been suggested to the Council and is now under consideration by that body for the improvement of streets in the central portion of the city, which are over the water and which have heretofore been improved by trestlework and plank covering. This class of improvement is very expensive, as it lasts but a short very expensive, as it lasts but a short time, and on streets that are heavily traveled the covering must be renewed every few years. To obviate this, the new plan has been suggested. It is to bulk-head the street on each side and at the ends, and then fill it in with dirt sluiced down from the hillside, the fill when completed to be covered with a thick layer of crushed rock.

layer of crushed rock. Estimates prepared by contractors show that an improvement of this kind can be made about 1240 cheaper per block than with trestile and planking.
