ose testimony can be relied upor

There is a woman still living in Salt

his father in the city of tasson. Set to use his own language, he "prefers to believe the contrary." That is to say, positive, definite testimony of living witnesses to a given fact, corroborated by written documents and indisputable circumstances, are to be counted for nothing in view of a preference to disbelief in their accuracy.

in their accuracy.

It has been urged in contradiction to this evidence that some of the women, whose names are here given, signed a statement to the effect that they had

they are unable to prove, and which is immaterial anyhow. For the lack of off-spring can scarcely be viewed as dis-proof of the marriage relation, or, what

proof of the marriage relation, or, what would be the social status of many estimable couples in this country?

In rejecting the revelation on plural marriage, Mr. Smith and his followers will have to reject also the doctrine of marriage for eternity, which is an essential part of the same communication, and which is one of the most sublime to the same communication.

and glorious principles ever made known to mortals. Under it, a man and a wom-an may be sealed together here as hus-

band and wife in the Lord, and sealed in

this was, that they were too wicked to be permitted to enter into those sacred relations and covenants comprehended in the divine order of celestial or plural

marriage.

In referring to that ancient inhibition, which has no bearing upon the present age or the people of these times, Mr. Smith omitted an important and essential part of the case. The Book of Mormon declares that the Nephites of that early age should have but one wife. But this clause follows: that commandment which

clause follows, that commandment which

was carefully omitted by Mr. Smith:
"For if I will, saith the Lord of Hosts,
raise up a seed unto me, I will command
my people, otherwise they shall hearken
unto these things." The quotation of that
clause would have taken away the entire
second of his position. The command-

ground of his position. The command-ment that the Nephites should have but

ment that the Nephites should have but one wife, was for that people and at that time, with the intimation that a further and different commandment might be given at another time and to another neonle and that the the description

SURVEYS IN ORECON

Work Mapped Out for Topographic Parties.

FIELD TO BE TAKEN AT ONCE

Eastern Section of State Will Be the Principal Scene of Operations-International Boundary to Be Marked Finally.

OREGONIAN NEWS BUREAU, Wash-OREGONIAN NEWS Belogical Survey has completed the details of surveying that is to be done in Oregon and Washington the coming Summer, and is about ready to announce the official programme. It has been decided that one topographic It has been decided that one topographic party will be engaged in Oregon during the country lying east, north and south of Union, including a portion of the Wallowa Valley. This party, consisting of eight or ten men, will be in charge of C. W. Sutton, and will commence active work about the middle of May, outfitting at Union. They will gather data upon work about the middle of May, outfitting at Union. They will gather data upon which to draw the topographic map of the Union quadrangle, as the area will be known. Something over 800 square miles will be covered by the surveying party, a portion of it extending into the proposed Wallowa forest reserve, which has never been completely surveyed by the General Land Office. Some of the data collected by this norty will be condata collected by this party will be con-sidered by the Secretary of the Interior in finally fixing the boundaries of this

Canyon City to Burns. A party of surveyors under C. F. Urquhart will enter the field immediately south of Canyon City, and work southward as far as Burns, traversing a considerable portion of the proposed Blue Mountain forest reserve. Most of this country has been heretofore surveyed by the Interior Department, but never before the Interior Department, but never before by the Geological Survey. The work in this region will be purely triangulation, forming the basis for more complete to-pographic surveys next year. After crossing the mountains and reaching Burns, the party will turn westward, working towards Princville and if sufficient time remains, triangulations will be extended withward towards the headwaters of the Deschutes River. The destrability of this region for irrigation purposes has at-tracted the attention of the Geological Survey, and notwithstanding private interests have gone in ahead, the Govern-ment has not taken its eye from the Deschutes Valley as a possible site for a future National irrigation system. All these surveys will prove valuable alike to the Government and to private Irri-

Establishing Levels.

For some time a party of surveyors under charge of C. H. Semper has been working northward along the line of the working northward along the line of the Southern Pacific Railroad, establishing the exact elevation above sea level of points about three miles apart. This party started at San Francisco Bay, at sea-level, and has pushed northward until it is now in the vicinity of Eugene. It is expected that Portland will be reached some time in June, where connection will be made with a similar system of levels that has been hought un from levels that has been brought up from Astoria. The Geological Survey has had considerable difficulty in getting accurate levels from the Southern Pacific; not that the railroad surveys were inaccurate. but that the level of the road has beraised or lowered at so many points since their surveys were first made that it is impossible at this time to tell just what the level is. The present party is locat ing iron posts at the points whose levels have been accurately ascertained, and these marks will be preserved for use as the basis of future surveys. Hereafter, in working custward from the railroad, even across the mountains, levels can be as-certained from the marks now being ex-

Several parties are to operate in Washington this Summer, one or two being al ready in the field. Most of this work is of the topographic character, although in one or two localities triangulations are to be made. L. C. Fietcher is in charge of a party that is completing the survey of Chapaca quadrangle. When this work in done, he will commence the survey of the Okanogan quadrangle, which will include the geven townships on the Okan ogan River, recently withdrawn with a view to determining their adaptability for Irrigation. Mr. Fletcher will be as-sisted by W. C. Guerin and a small field

party.

Early in May. A. E. Martin. with a party, including H. R. Ferriss as assistant, began the field work in the Oakcedale quadrangle in Eastern Washington. This is to be topographic survey work.

A. H. Sylvester has entered upon the survey of the Mount Adams quadrangle, within the Washington forcest. within the Washington forest This area has never been carefully sur-veyed, and but little is officially known of the character of the lands in this vicinity, beyond general reports hereto-fore made after mere reconnoisances. Mr. Sylvester will have Ralph Cowgill as his assistant, and will make North Yaki-ma his base of supplies.

B. Robertson, field assistant, will organize a small party at North Yakima in June, for the purpose of extending the existing triangulation into the arid region east of the Columbia Biver, in Franklin and Adams Counties. It is expected that this party will also be able to report facts that will be considered in tasks. will be considered in taking up trigation works in Washington next sea

Define Forest Reserve Boundaries After inspecting certain level work that has been done heretofore in Northern Central Washington, along the lines of the two rallroads, R. A. Farmer will take up the survey of the southern and easiern boundaries of the Washington forcet reserve. The boundaries are described by land office subdivisions, but have never been marked off accurately, nor been fully determined in the field. The bound-

and work of actually and finally mark-ing off the international boundary line between the United States and Canada west of the Rocky Mountains will be commenced this Summer, and pushed ahead as rapidly as possible. Most of the country traversed, however, is mountain-ous and rough, making surveys slow, and it is believed it will take several Sum-mers to complete the final survey and marking of this stretch of line. In this work the Geological Survey will co-operate with the Coast and Geodetic Survey, and with a party of surveyors designated to assist, on the part of Canada. ignated to assist, on the part of Canada.

Last Summer these same parties made a preliminary survey of this line, but made but few markings. In disputed areas, where mining property was in disputed areas, where mining property was in disputed to because of the lack of knowledge of the exact location of the boundary, a few marks were put down, but only in such cases. The Geological Survey party this year will consist of E. C. Barnard, the face, and all skin diseases. 80 cents.

topographer, assisted by D. L. Reaburn and J. G. Hefty. They will enter the field early in May, and work as long as the weather permits. In this connection the survey party will also gather sufficient data upon which to base a topographic map of the region lying jues south of the boundary line, triangulations having been made heretofore.

In making their preliminary examinations a year ago, the surveying party

tions a year ago, the surveying party found the original marks laid down by found the original marks laid down by the boundary commission over 10 years ago. These marks were found to be accurately placed in most instances, but too far apart to prove of any consider-able assistance, now that the country has developed. The old markings are 25 to 55 mileo apart, and are valuable only in the immediate vicinity. There is no difference of opinion between the Ameri-can and Canadian surveyors engaged on this boundary survey. It is only a mat-ter of accuracy in surveying, and with one side acting as a check upon the other, this is insured. other, this is insured.

Two surveying parties are to be sent to Alaska during the present month. One, inder T. G. Gerdine, assisted by R. B.

MORMONS

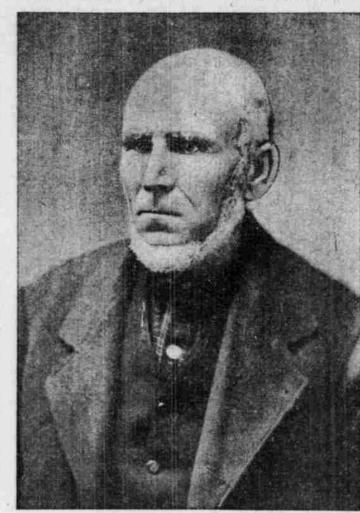

THREE ELDERS AFTER THE SCALP OF PRESIDENT SMITH,

Pay Respects to Reorganized Church of Latter Day Saints-Deny Belief in Polygamy.

PORTLAND, May 8 - (To the Editor.)-In The Oregonian of April 17 an editorial appeared under the heading: "Polygamy not Orthodox Mormonism." giving a synopsis of what was spoken of and done in a conference held in Kansas City, Mo., by the Beorganized Church of Latter Day Saints. The hackneyed subject of polyg-amy, which seems to be uppermost in the minds of the ministers of that society, was

Alaska during the present month. One, under T. G. Gerdine, assisted by R. R. Oliver, will make a topographic survey the Reerganized Church, contained so

ONE OF THE OLDEST LIVING OREGON PIONEERS

FRANCIS REVENUE, AGED 90, WHO CAME IN 1853.

Francis Revenue, the venerable ploneer of Sandy, Clackamas County, Or., was born in New Orleans, La., on the 12th day of September, 1813, and will therefore soon be 90 years of age. At an early age he learned the cooper's trade, and he also spent three years studying in the City of Paris, France. He married Liddy A. Lawrence, with whom he lived of Paris. France. He married Liddy A. Lawrence, with whom he lived in peace and happiness until her death, which occurred at the family homestead near Sandy, March 1s. 1906. Mr. Revenue crossed the plains to Oregon in the year 1833, taking several months to perform the journey. Upon arriving in Oregon. Mr. Revenue immediately took up a donation land claim, upon which he has resided ever since. In those pioneer days, the Indians were quite numerous, and the nearest neighbors were five or six miles distant. Shortly after his arrival in Clackamas County he went to work with energy to hew out a home in the then unbroken wildsmeas. The difficulties to be encountered in this herester test. wilderness. The difficulties to be encountered in this herculean task was so very great that many would have given it up as hopeless. But Mr. Revenue persevered, and finally triumphed. Three years of his pioneer life was spent in merchandizing, and his kindness and generosity to the needy and distressed were proverbial. This nonogenarian patriarch is very interesting, very intelligent and very patriotic. A constant and close observer for more than three-quarters of a century, it is simply wonderful to think of the number of incidents and events, now passes into history, of which he was, so to speak, an eye-witness. He never envised any person, no matter how distinguished his role, but, on the con-trary, felt sympathy for those burdened with the cares of church or state, and was perfectly satisfied to act his own part-that of an independent farmer. His children now living are John, Edward, Theodore and Lawrence, and Alice (Revenue) Wedle, Lucy (Revenue) Roberts and Lil-lie (Revenue) Howard. Though Mr. Revenue will be 59 years of age on the 12th day of next September, he is as active as ever.

of the area between Tanana and the many inaccuracies and misleading state-Yukon, westward, from the vicinity of ments that it becomes necessary to give Circle City, over a territory that has some correct information on this will peretofore been triangulated.

of the Nome peninsula. This work in Alaska is intended to be used as the basis for subsequent geologic examinations of the regions triangulated and topograph-

OF EFFICIENT TYPE.

Roosevelt Directly Responsible for the Settlement of Great Issues.

Collier's Weekly. As the vigorous trial and prompt de-cision in the Northern Securities case are undoubtedly due to the President, our strention is again called to the kind of Executive who now heads this Govern-Executive who now heads this Govern-ment. Mr. Roosevelt has few resemblances to any of the men who have preceded him in office. He belongs to the popular and efficient type, yet he is utterly unlike his leading predecessor in that type. Presi-dent Jackson was more original than Mr. Roosevelt, but the power of his nature was often used for evil, because he was willful and without doublity. Mr. Roosevelt illful and without docility. Mr. Rooselt has shown much ability to learn. It may be Mr. Hay, Mr. Knox or Mr. Root, who thinks out an intellectual problem, out it is Mr. Roosevelt who employs the men and largely makes their ideas effec-live. Anybody who remembers the tone of his observations on the Venezuelan affair of 1890, and compares it with the moderate and tactful conduct of the re cent complication, will appreciate how Mr. Roosevelt has ripened. He is no longer looked upon outside of Wall street and the besidquarters of political bosses, as ry line, as survey or marked.

Already a party of surveyors under Sledge Tatum has started in to mark the castern and northern boundaries of the Mount Rainier forest reserve. When this work is well under way, Mr. Tatum will leave this party in charge of an assistant but cautiously along, under the best adjusted that the strength only means that he is going earnean; but cautiously along, under the best adjusted to the Bitter Root forest reserve, in Eastern Idaho, and survey portions of the western and norther wrong. Mr. McKiniey had rare tact and survey portions of the western and norther thing town only means that he is going earnean; but cautiously along, under the best adjusted to the Bitter wrong. Mr. McKiniey had rare tact and survey portions of the western and norther wrong. Mr. McKiniey had rare tact and survey portions of the western and norther thing town.

See Hout, and will proceed to the Bitter wrong. Mr. McKiniey had rare tact and survey portions of the western and norther thing town.

The Mount Rainier forest reserve. When this year and another thing town.

When the largest and extirpute wrong. Mr. McKiniey had rare tact and survey portions of the western and norther thing about the base.

The Mount Rainier forest reserve. When this year and another thing about the base.

The Mount Rainier forest reserve. When this year and another thing about the base.

The Mount Rainier forest reserve. When this year and another thing about the base.

The Mount Rainier forest reserve. It is a solution with the base.

The Mount Rainier forest reserve. It is a solution with the base.

The Mount Rainier forest reserve. It is a solution with the base.

The Mount Rainier forest reserve. It is a solution with the base.

The Moun since the war-one who will be much praised by historians, but he had, with his courage and his building patience, a lack of tast that limited his utility. He lack of that limited his utility. He saved the currency and he raised the moral tone of politics, but he would have done more had he possessed Mr. Roosevelt's adaptability, his rendiness to yield little points in order to gain large ones, his unexpected but notable ability to take part in team play. It now looks as if, with six years ahead, the President would leave a remarkable record of and west.

some correct information on this sub-Another party, under D. C. Witherspoon and C. E. Hill, will make a topographic survey of the eastern portion not offering in argument a plea for polygamy, but merely stating the facts in relation to the introduction in this dispense tion by Joseph Smith, the prophet, seen and revelator. Why Mr. Smith and his followers should attempt to give the origin of plural marriage at this late date, when such marriages have not been solemnized for many years in the church founded by Joseph Smith, the prophet, is not ex-plained. The purpose appears to be under the plot of absolving that religious lender from the charge of teaching and practicing plural mar-riage, to brand with willful falsehood all his successors in the prophetic and presiding office, together with a large number of men and women noted for truth and veracity and of unimpeachable char-acter, some of them still living,—who have given the most direct and solemn testimony that Joseph Smith taught them the doctrine of plural marriage as contained in the revelation dated July 12, 1848, and also practised what he taught. This num-ber includes several highly respected women who have given evidence under oath that they were scaled to Joseph Smith as his wives for time and all eternity, and

minds of the officers and members of the church of Jesus Christ of Latter Day Saints, which was organized April 6, 1830, and has continued with an unbroken line of authority to the present date, having its present headquarters in Utah, that column marriage was introduced by Joseph Smith in Nauvoo, Ill. That the reveisation herein mentioned was proclaimed by him to the prominent officers of the church, and was written under his direction by William Clayton, whose testimony is on record, as sworn to by him before John T. Caine, notary public in Salt Lake City, February 16, 1814. He testified further that Joseph Smith married to him, for time and eternity, as a plural wife, Margaret Moon, April 27, 1843—also that he, William Clayton, officiating as an elder, married Lucy Walker as a plural wife to the prophet, Joseph Smith, May 1, 1442. This woman is still living, and willing to re-

peat her evidence when necessary.

Among the numerous affidavits recorded, certifying to the plural marriages
solemnized by Joseph and Hyrum Smith. aworn to by the parties themselves, are the affidavits of Joseph B. Noble, B. F. Johnson, Lorenzo Snow, Wilford Wood-ruff, S. A. Woolley, Orson Pratt, L. O. Littlefield, Thomas Grover, J. C. Kings-Littlefield, Thomas Grover, J. C. Kingsbury, Erastus Snow. David Fullmer, Howard Coray, Edwin D. Woolley and others, whose character for honesty, veracity and general uprightness of life is unspotted and beyond reprosch. Among the women who have made similar affidavits are: Eliza R. Snow, Emily D. P. Young, Eliza M. Partridge Lyman, Melissa Lott, Lovina Walker, Mercy R. Thompson, Lucy W. Kimball, Sarah Ann Whitney, Helen M. Kimball, Fanny Young, Rhoda Richarde and many others,

but temporary.
This is in harmony with the spirit of the gospel, which is, that God will from time to time reveal his will to men, and that as fast as they fit and prepare themselves to receive his word. It was the same in the days of the Saviour, who said to his disciples: "I have many things to my unto you, but ye cannot bear them now." Continuous and added revelation is one of the fundamental doctri tion is one of the fundamental doctrines of the church established by Joseph Smith, the prophet. Therefore the notion that because plural marriage was not taught in the early years of the church it was not declared in later times is a fallacy, and contrary to the very order and porgrers that are essential features of the gospel of our Redeemer.

Mr. Smith also stated that plural marriage is settly authorized in Utah, which riage is still authorized in Utah, which is a missrepresentation, pure and simple. It is not authorized by the Church of Jesus Christ of Latter Day Salnts, nor under its auspices. The church, some years ago decided to submit to the law of the land, after a long contest in the of the land, after a long contest in the courts, when it was finally settled by the Supreme Court of the United States. The church has abided by that eince. All this is the truth, and it will some day be that they sustained this relation to him while he was living. There is not the slightest doubt in the

known.

To Mr. Smith and his followers and all other men and women who are desirous of misrepresenting the truth, and who are surrounded by the vice, the sin, the are surrounded by the vice, the sin, the sorrow, the poverty and wretchedness we see on every hand. To those who preach about intemperance, immorality and irreligion, we say: Don't wast your ammunition on game in the mountain region between the Rockles on the east and the Cascade Mountains on the west, when the woods all around you are full of it.

Let it again be said that this is not intended see an arounced in favor of piural tended as an argument in favor of piural marriages. That is not the question. Therefore arguments as to the right or wrong of plural marriages are needless. A dead issue need not be exhumed. But the eternity of the marriage covenant by which a man and his wife may be sealed on earth to be one through all eternity, and shall be scaled in heaven, was taught by the prophet, Joseph Smith. Connected with this doctrine was the law of the holy priesthood, by which men holding it, under divine command, might receive more than one wife in that covenant, under given restrictions and regulations.

This is established by evidence as perfect and complete as anything ever offered in a conclusive case before a court, and is accepted without the shadow of a doubt by the many thousands of intelligent persons who compose the church which he founded under divine inspiration, and which has never been disorganized or discontinued, but stands today as a monument to the course and insulration of one There is a woman still living in Salt Lake County who testified to R. C. Evans, who is at present counselor to the president of the Reorganized Church, when he visited Salt Lake City some months ago, that she was married in Nauvoo by Joseph Smith to Hyrum Smith, as a plural wife. Her name at the time of marriage was Catherine Phillips, now known as Catherine Phillips Smith. This evidence, in connection with the testimony already mentioned, is doubtless well known to the president of the Reorganized Church. He and his brothers have visited Utah, and have met women who assured them that they were married to his father in the City of Nauvoo. But, to use his own language, he "prefers to ment to the genius and inspiration of one of the greatest prophets who ever lived on the face of the earth.

F. J. GRAHAM, Latter Day Saint Elders.

"BLAME IT ON THE PAPERS." Corrupt Politicians Sometimes Find Publicity Extremely Unpleasant.

Louisville Courier-Journal.

The politicians suspected of participation in corrupt or other illegal practices are pretty unanimous in laying the blame on the newspapers. They find that the publicity given to their acts is at times exceedingly unpleasant. When they do exceedingly unpleasant. When they do anything that they think praiseworthy they are careful that the news is "no-tated around," but it is quite otherwise when there is suspicion of improper con-

statement to the effect that they had never been taught by Joseph Smith and Hyrum Smith the "spiritual wife" doctrine, which was held and promulgated secretly by John C. Bennett and other persons, who afterward apostatized from the church. But when this is investigated it will be found that the corrupt and licentious ideas entertained by Bennett and his associates were as far to the secondary were secondary with the secondary were as the secondary were secondary with the secondary were secondary were secondary with the secondary were secondary were secondary with the secondary were secondary with th The newspapers are not faultless, but they are held to a severe responsibilities only occasionally that charges corruption against public men originate with them. They simply give publicity to what others have discovered or believe they have discovered. It is usually when this publicity become very damaging that complaint is made of the newspapers, alnett and his associates were as far re-moved from the plural marriage system set forth in the revelation of 1843 as the slime in the gutter is from the glistening snow on the summits of our lofty mounthough their columns are generally open to inculpated persons to make any de-fense which they may have. But when they happen to have no defense at all they feel all the more indignant against ain peaks.
The revelation on celestial marriage, including the plurality of wives, given as explained July 12, 1843, bears the impress throughout of the spirit and language of the other and earlier revelations given through Joseph Smith, as contained in the Book of Doctrine and Covenants. It the papers that have made their doings

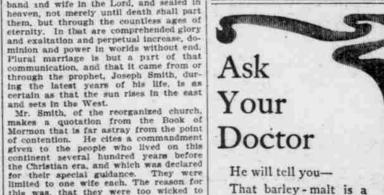

The libel bill passed by the Pennsylrania Legislature and now in the hands of Governor Pennypacker had its origin in the inconvenience experienced by the uncuraptulous politicinus of the state in consequence of newspaper exposures of the Book of Doctrine and Covenants. It bears no literary resemblance to the revelation contained in the same volume given through President Brigham Young. It has special reference to affairs in the family of Joseph Smith, which would be meaningless if concocted after his decease. It contains commandments to him personally and to his wife Emma Smith. It also refers to the wives that had already been sealed to Joseph Smith, in a manner that would be without sense, except for its application to those individuals during their lifetime. Mr. Smith and his followers make the bold assertion that there was no issue to any of these marriages. That is a mere assumption, which they are unable to prove, and which is their corrupt practices and schemes to rob the people. There is no doubt about this. The libel law of the state affords this. The libel law of the state allords ample protection against false and de-famatory publications. The boodlers wanted a law to protect them against the mental suffering produced by pub-lications made in the interests of the

people.

The freedom of the press is essential to the freedom of the people. Abuse of this liberty is amply provided against, and indeed nearly all of our libel laws give the advantage to the plaintiffs. The licentiousness of unprincipled publications is not defended by any reputable newspaper. But the press is prac-tically united, and the people should be against such attempts to muzzle the newspapers as that made in Pennsylvania.

BUSINESS ITEMS.

MEN CURED OF WEAKNESS, VARICO-CELE, STRICTURE,

Dr. W. Norton Davis

minor ailments is responsible for many a blighted life, Happiness and safety demand that skilled medical aid be sought upon the first manifestation of weakness or other disorder in men. Neglect means the oncoming aggravated condition that oncoming aggravated condition that will in time involve the general con-stitution. During our 21 years as specialists in men's diseases we have met with every possible com-pilitation of private aliments. Our success in effecting permanent cures has never been approached. We have acquired the understanding and perfected the methods that enable us to accomplish results, such as have been regarded as impossible

"Weakness"

Functional derangements, com-monly termed "weakness," are a direct result of inflammation, enlargement of or excessive sensi-tiveness of the prostate gland, brought on by early dissipation or resulting from some improperly treated contracted disorder. These conditions cannot possibly be re-moved by internal medicines, and any tonic system of treatment that stimulates activity of the function can but result in aggravation of the real ailment.

This is a scientific truth that we

have discovered, after careful study and observation in hundreds of cases, and is a truth upon which our own original system of trest-ment is based. We employ neither conics, stimulants nor electric belts. We treat chiefly by local methods, and our success in curing even those cases where others have failed is conclusive evidence that our method affords the only possi-

Contracted Disorders

The importance of quickly curing contracted disorders is being more fully recognized among the medical profession. The tendency of these diseases is gradually to extend backward, involving in a chronic inflammation the most vital centers of the organic system. The serious or the organic system. In serious results that may follow can scarcely be exaggerated. Safety demands an absolute, thorough cure in the least possible time. We have treated more cases of contracted disorders than any other physician or institute in the Northwest. Our cures are thorough, and are ac-complished in less time than other forms of treatment require in producing even doubtful results. We employ remedles of our own devising, and our treatment is equally effective in both recent and chronic

Varicocele

We cure every case of varicocele we treat, and our treatment is entirely independent of surgery. Our method is our own, and it cures in every instance. Others must oper-ate because they have been unable Our treatment is painless, harmless and prompt in curing. The patient need not be detained from his occupation a single day

Stricture

In our treatment for this disease mild and harmless methods have again triumphed over surgery. We cure without pain and without cut-ting or dilating. The obstructive tissue is dissolved, and all affected membranes thoroughly cleansed and estored to a healthy state

Specific Blood Poison

Others dose the system with mineral poisons scarcely less dangerous than the disease itself. The best they hope to do by this treat-ment is to keep the disease from ment is to keep the disease from manifesting its presence upon the surface of the body. Under our treatment the entire system is cleansed. The last taint of virus is destroyed. We employ blood-ciennsing remedice heretofore unknown in the treatment of this disease. They cure by neutralizing and absolutely destroying the value. and absolutely destroying the poison in the system. Such cures cannot be otherwise than complete and permanent.

PILES Quick Cures. Certain Cures.

We cure the worst cases of piles permanently without the use of olniments, without pain, cutting or detention from business, in from two to three treatments. Our treat ment is entirely new and peculiar to ourselves. Remember, no mat-ter who has failed before in your case, we will cure you with mild methode, and without danger, or else make no charge whatever for our services.

Should you live at a distance, we can treat you successfully at ho
