SHOWERS HELP GROWTH

INLAND EMPIRE CROPS ARE SOME-WHAT BACKWARD.

Grain Is Small, and Favorable Weather Must Be Had to In sure a Good Crop.

SPOKANE, Wash., June 7.—(Special.)—Four days of warm weather following copious showers have given crops all through the Palouse country, and, in fact, the Inland Empire, a fine growth. Prospects for a good crop of grain are much better than a week ago. In some localities rain is needed, but crops are not suffering.

Reports from mountains are that snow is melting rapidly and all streams are rising. This is almost certain to bring rain. Grain, potatoes and all kinds of vegetation are about three weeks behind

vegetation are about three weeks behind what they were one year ago, the season being at least that much backward. As a consequence, the grain is small and must have favorable weather to make a good crop. Some of the best crops ever grown in this country were in seasons almost identical with this one.

Fruit is late, owing to a cool Spring, but a big crop of all varieties, with the possible exception of cherries, which were elightly injured by cool nights, is all but assured. Cherries will yield an average crop. All other varieties are expected to yield record-breaking crops.
