THE MORNING OREGONIAN, THURSDAY, JUNE 18, 1903

gulet in Valley. Green Produce-Pruits and vegetables, active, steady; potatoes and aulet Farm Produce-Poultry, weak; eggs, steady; butter, unsettled Ger eries-Rice, higher; Sisal rope, Meats-Beef and hogs, lower; yeal,

higher Provisions-Unchanged.

Brighter crop prospects in the great wheat wit of the Northwest are encouraging to the rocery and merchandlee jobbing trade. It red earlier in the season that some merchants were too heavily tocked, particularly as indications then point material decrease in the grain yield. but with nearly an average crop in sight, the situation has greatly improved. In the local markets, the past week was without special feature. Green produce was active, and in abundant supply. Farm produce as a rule is weaker. Nothing is doing in hops. Wool is nore active in Eastern Oregon than in the

WHEAT-Well posted wheat men say stocks in first hands are smaller now than ever before known at this time of year. No business at orders. The quantity of California vegetables arriving is small, Oregon products taking its all is reported with growers. Two large lots cently taken by millers from wareplace. en and shippers, equivalent to two carmilling of this wheat leaves a comparatively small amount at tide water yet to say four or five cargoes, and about half the quantity is provided for in the way The two transactions mentioned were reported to have been the basis of 75 cents Portland. Shippers quote the export value of club wheat today at one cent less. Bluestern is quoted usual premium of 8 cents, and valley ught at TOGTT cents. All crops were greatly benefited by the abundant rains of last but still it is believed the yield will than that of last year.

was printed in the Northwestern Miller of the 10th, from the pen of J. W. Rush, of London: United Kingdom-March and May were wet, which usually means a poor yield per acre; weather now excellent. -Weather hot and dry, and the

ttion of the greater portion of the crop im Probably one-third of the crop, howver, has been irremediably damaged.

has been irremediably camaged. many-The Prussian official report for 15 makes the average condition 3.1, at 2.5 last year. In other words, it is a crup, and likely to be 20 to 25 per cent the average. Moreover, 20.79 per cent a Autumn-sown wheat has been reployed. representing 550,000 acres. Applied to the whole of Germany this means a probable crop of 14,000,000 quarters, against 17,500,000 ins

-The prospects have improved in this ry, but it is not expected that the yield qual last year's, which was estimated at quarters. Italy is this season third tance among the wheat importing untries of Europe, the United Kingdom of urse coming first and Germany second. Spain-New reports better weather and good

LACK OF MOISTURE

Gives Some Strength to the Chicago

takes the wool off closer and with less harm to the sheep than the ordinary man can do. A Wheat Market. CHICAGO, June 17.-Trading in wheat early in the day was decidedly dull and with fa-torable harvesting weather, outside markets generally lower and cables without interest, the market during the first half of the session showed a tendency to decine. July opened is@ic higher, and September a shade to ic lower at T3kgT3kg to T3kg, and later selling to T3kg. Toward mon the sentiment in the pit assumed a bulletin aspect and prices ral-lied. July advancing to T6kg and September to 74kg. The late strength in corn, together with reports of a lack of meisture in the Northwest, was the reason for the rise. Sep-tember closed in up, at T4kg. Wheat Market. sheep-shearing plant has been established near Baker City, Or. The plant consists of 25 machines of the latest improved pattern. They are operated by steam and in the hands of a skillful operator will shear an average of 125 sheep aplece per day. Between 60,000 and 75,000 sheep are ready to be sheared by this concern, and it will take about 30 days to propulsion of the work. PRODUCE-Nearly every day sees the in-

troduction of some early variety of fruit or vegetables in the logal market. New ap-ples, plums, peaches, corn and cantaloupes are arriving in increasing supply. The lat-Northwest, was the reason for the rise. Sep-tember closed \$\frac{1}{3}c up, at 76\frac{1}{3}c. Con ruled easier during the first part of the session on the excellent weather conditions, but later in the day there was a renewal of the buying which has been a feature for the past few days, and the market became ex-tremely hullish. July closed \$\frac{1}{3}c up at 50\frac{3}{3}c. Oats were easy early on the favorable weather and the more assuring ions of the Govern-ment weekly crop bulletin. The close, how-ever, was firm. ter, which sold on their first arrival at \$12 per crate, were offering at half that price yesterday. Other early varieties are decilning shout as fast. The trade in strawberries is now largely between growers and retailers, jobbers only receiving enough to fill shipping

ever, was firm ever, was firm. Provisions were dull, with prices barely steady, there being little demand from any source. September pork closed a shade lower, lard 2% olower and ribs also down 2%. The leading futures ranged as follows:

Consequence is Singgish Trading on the New York Exchange-Probability of Gold Exports.

NEW TORK, June 17.-Today's operations in thocks were made up almost wholly of proje-sional operations of a testing character. These seemed to demonstrate to the satisfaction of the testers that atock was for rais and hed to be met on advances and that the offerings down of prices did not promise large success in disiodigns selling orders. The consequence a progressive duilness in the trading and sluggishness in fluctuations. This agrees with the general expectation of the most experienced observers who say in the sudde raily of last Thursday the natural course following a culturation of the long

the most experienced observers who saw in the sudden rally of last Thursday the natural course following a culmination of the long decline and loaying a large short interest uncovered after the urgent Houldation had been completed. With the satisfaction of this short interest, prices halted and then declined, but without getting back to the low level of last Wednesday, although they were near it yes-terday morning. After these various fluoro-ations the market naturally falls into a per-lod of feeble and besitating movements on op-rations by room traders while awaiting a new development in the general situation. In their attempt to more prices, the profes-sional operators made capital this morning of the expectation that gold would be en-saged for export to Germany tomorrow. Actual inquiry was made at the array office by one international bases looking to a shipment of gold, as the strength of foreign exchange heres and the trade decline in sterling at Berlin brought the operation closely within the range of profit. Some selling of stocks this morning for London account here added to the require-ment for exchange, but London turned buyer later in the day. On the upturn, Pennsylvania was made the beader of the market and was lifted at one time more than 2 points. The movement in this stock seemed to be due to organized ef-forts and was attributed to the rate at which eubscriptions are being made by stockholders

this stock seemed to be due to organized ec-forts and was attributed to the rate at which subscriptions are being made by stockholders for the new stock. It is reported that in many cases stockholders are paying their sub-scriptions in full, although the requirement is far the payment of only a 50 per cent in-stalment, and the time for its payment sa-tends to June 75. The rettlement of the anthracite conciliation board also helped Pennsylvania, as it did the coalere, notably Reading. A reactionary ten-dency in the grain and cotton markets was an unfavorable factor and was especially ef-fective in Atchison. Missouri Pacific and the Southwesterns. The bidding up of Wabah was based on rumors that the Gould-Pennsyl-vania interests have been harmonized, but the abropt relapse in the stock gave rise to an ap-pearance of manipulation. Colorado Fuel and it convertible bonds suffered a violent de-cline and only partial ralling due, officially explained as due to a misunderstanding. Re-siling during the last hour completely wiped out the day's gaina, except for a point saved to Pennsylvania, and the closing was lifelies and heavy. and heavy. and neavy. The movement of bonds was irregular in sym-pathy with stocks. Total sales, par value, \$2,060,000. United States coupon 3s advanced is per cent on the last call. STOCKS
