time an injection of camphor caffeine. OPERATION A GREAT RELIEF. Pope Arises, Takes Down a Book and

Begins Rending. ROME, July 10 .- The Pope rose at 'clock this morning. He said he thought the air of his room was somewhat vitiated and wanted it changed. An attendant, Plo Centra, after having been authorized to do so by Dr. Lappont, opened the windows of the whole apartment, including that of the sick room, the Pontiff having previously been carefully covered with blankets. After remaining open for a short time, the windows were closed, with the exception of the window in the sick room, Dr. Lapponi having decided that the balmy, fresh air could only do the patient good. The opening and the shutting of the windows was watched from the plazza by the people who had gathered there to hear the latest news, and some of them interpreted it as a meaning that the Pontiff was dead, which necessitated a prompt official denial.

In His Normal Condition.

On leaving the sick room Monsigno Angeli remarked to those who surrounded him and asked for news that, in his mind, the Pope was doing well, and from his appearance he would say he was in his normal condition. The monsignore added that the Pontiff referred to several difforent matters, recalling especially the most minute details and remembering facts, figures and dares with marvelous prompiness, and all tris to the accompaniment of snuff-taking. The same impressions were formed by Count Camille Pecci, who visited the Pope with Mondages to the country to t

Pecci, who visited and the operation followed. The operation this morning was almost identical with that of Thursda morning. The Pope lay on his couch with his skin exposed. The affected parts we his skin exposed. his skin exposed. The affected parts were washed with a solution of alcohol, co-caine was hypodermically injected, and Dr. Mazzoni inserted a praval needle, which, by suction dret out the vittated matter. The operation was comparatively painless and was performed without recourse to choloroform. recourse to choloroform.

Examination of the Patient, During the morning's examination of

the patient, the doctors, after a thorough sounding, found that a pulmonary sound had reappeared in the obtuse zone, except (Concluded on Page 5.)

New York Has Thirty-

Hottest July 10 in History of

MANY SLEEP ON PARK BENCHES

Temperature Is Now Falling, and Relief Is in Sight - Other Pastern Cities Suffer, and Deaths and Prostrations Are Numerous.

NEW YORK, July 10.-Thirty-eight eaths and & prostrations in and around New York and Brooklyn tell the story of today's heat. It was the hottest July 10 in the history of the local weather buau, the highest previous record being 91 degrees, recorded July 10, 1880.

The early threat of a temperature that would break all records, however, was not fulfilled. Thursday's record of 94 degrees at 4 o'clock, the high weather mark of the year, was reached today at 20 minutes past 1 o'clock, without signs of rellef. But by 2 o'clock the temperature had fallen two degrees, where it resained during the next two hours. Fortunately the humidity was only 46 per cent when the temperature stood at 94, and increased but slowly from that time during the afternoon, as the heat subsided. At 8 o'clock it was 55 per cent, but by that time the temperature had fallen to 86 degrees, 6 degrees lower than at the same hour Thursday. Between 5 and 7 o'clock the temperature fell seven degrees following a thunder storm southeast of the city. The city had been sweltering so long in the hot wave, however, that it was hours before the offices and tenements began to feel the effects of the

coler weather. In the streets the cooling process was difficult, men, women and children crowd-ing the walks to recover from the heat of the day. Many slept on the park benches and, where the police would permit it, in

the grass. Daniel Lewis, a heat-crazed negro, Daniel Lewis, a heat-crazed negro, at-tacked with a club two girls who were currying a large place of ice. A mob-quickly gathered and shouted "Touch him!" Lewis was rescued by detectives and sent to the hospital. and sent to the nospital.

There was intense heat throughout the state today. At Albany there were many prostrations, and one child died. Several prostrations occurred at Middletown.

Philadelphia Still Suffers.

BOSTON, Mass., July 10.—Sweltering conditions prevailed here today. At noon 92 degrees was the record.

tow had a long conference today over the Postoffice investigation. Mr. Payne said

Engineers' Plans at The Dalles.

NOW UP TO CONGRESS

Appropriation Wanted for Ship Canal.

HARTS PROJECT IS WEAK

New Scheme Is With an Eye to the Future.

GOOD WORK DONE BY MOODY

Special Roard Has Its Attention Forcibly Called to the Fact That a Great Empire Depends Upon a Cheap Rate and Open River.

The special board of engineers to report on the improvement needed at The Dalles will report for a contin ship canal and urge an appropriation of \$8,000,000 to \$12,000,000. Ex-Repres tative Moody thoroughly impressed on the board the overcoming of the ob stacle of the Columbia, and set forth that in the removing thereof the fu ture of a great empire was involved. It is quite probable that the board will make two estimates, one based on the present traffic, and that to accrue after the river is opened.

OREGONIAN NEWS BUREAU, Washngton, July 10.-Congress will be asked to ncorporate in the next river and harbor bill, which will be passed at the coming ession, an item authorizing the constr tion of a continuous ship canal from the harbor works to make public their annual | foot of The Dalles Rapids to the head of nual report of Major Langfitt of Oregon by the board of engineers. Before the next improvements, together with estimates for bill is framed, the special engineer board appropriations for the next fiscal year, will have completed its report, in which the weakness of the Harts plan will be report on Washington improvements will shown, and reasons will be set forth why a continuous canal, though costly, is more suitable than any other form of improve-

> It is quite probable that the board will make two estimates, one for a new canal sufficiently large to permit the passage of ships now engaged in Columbia River traffic, and another for a canal of such size as will accommodate the largest boats that will probably be put on the Columbia after the upper river trade has developed,

> In case Congress will not provide for the larger canal, authorization of the smaller one will be asked, with the understanding that as the commerce of the river expands and larger boats are brought into use the canal can be widened and deepened throughout. The locks, it is understood, will be of such size as to necommodate the largest vessel liable to ply the Upper Columbia.

Coat of the Canal.

From individual and rough estimates it is believed by the War Department that a continuous canal will cost all the way from \$8,000,000 to \$12,000,000, according to size, or two or three times the estimated cost of the original Harts plan. But the engineer board, while in Oregon, had its attention called to the fact that a great inland empire depends upon an open river for a cheap rate to the sea, and under the guidance of Hon. M. A. Moody was given an opportunity to view for itself a considerable portion of this territory. Having taken a comprehensive survey, not only of the site of the proposed canal, but of the field that lies tributary to the upper river, the board became very deeply impressed with the necessity for an open river, and will in its coming report strongly urge immediate action by Congress looking to this improvement.

Never before have the engineers been so deeply impressed with the immediate necessity of overcoming the obstructions between The Dailes and Celilo. Captain W. W. Harts, formerly in charge of Upper Columbia improvement, who was recently ordered from the Philippines to resume his former post at Portland, will upon his arrival be assigned elsewhere. The department explains that there is a shortage of engineer officers and that two officers cannot be spared to one city. This means, therefore, that if the proposed canal is authorized at the coming session of Congress the work will be carried out under direction of Major Langfitt.

Whidden & Lewis, the Portland architects, have been requested with nine others, to submit plans for the new Custom-House to be erected at San Francisco. The department will select the best plan of all submitted and only that architect will be paid for his work. However, the compensation will be liberal and lead to keen competition.

Rural Carriers for Washington, OREGONIAN NEWS BUREAU, Washngton, July 10.-George J. Looker was today appointed regular rural carrier and John Van Buskirk substitute rural carrier at Olalla, Wash.

MEDALLION OF THE POPE

BY RUDOLPH MARSCHALL, THE FAMOUS VIENNESE SCULPTOR.

This medallion of the pope is the work of the famous young Viennese sculptor and medallist, Rudolph Marschall, and was made for the Emperor of Austria and the City of Vienna as their offering to the pope on his purple jubilee as pope, hishop and priest, in 1990. The pope sat for the medallion to Mr. Marschall, who managed to catch just the right expression, and the peculiarities of his features. The medallion hangs in the Vatican library, in a position which Mr. Marschall himself chose, with the permission of the pone.
