CHAMBERLAIN GIVES IN

WILL MODIFY HIS PROTECTION IDEAS TO SUIT BALFOUR.

Blue Book Is Issued Showing the Decline in British Exports and the Effect of Dingley Tariff,

LONDON, Sept. 16.-On the heels of Premier Balfour's academic expression of his personal views of the fiscal problem, conained in the pamphlet on "Insular Free Trade," advance sheets of which were issued last night, came the long promised and much demanded government statistics dealing with that subject. They were issued today by the Board of Trade, in the shape of a blue book of hearly 500 pages of bewildering tables of figures, showing the various aspects of British and foreign trade, and the industrial conditions. deductions were drawn, though the publication teems with interesting notes what are regarded as points of fact. references to foreign trade were chiefly onfined to France, Germany and the

The Pall Mall Gazette says it under stands the Cabinet has concluded the consideration of its fiscal position and its policy in regard thereto; that no further Cabinet meetings will be held for the present, probably not until late in the Autumn, and that in the meanwhile the Colonial Secretary, Chamberiain, will pro-ceed with his expository programme. The

it will probably be found that he has edified his proposals so as to bring them in harmony with Mr. Balfour's views as in the pamphlet. The main feature of Mr. Chamberlain's modifications will be the disappearance of all sugges-tions in the direction in the further taxa-tion of foodstuffs and raw materials. "Consideration of the war commission's

The Pall Mall Gazette believes it is still possible that there will be more than one resignation from the Cabinet. One of the most important phases dealt with in the The tables show that the exfrom the United Kingdom to the United States declined from \$145,006,000 in 1890 to \$97,500,000 in 1962, while the imports rose from \$485,000,000 to \$635,000,000. The to tal exports to all foreign countries de lined in the same period \$30,000,000, though when the colonies are included, the decline only amounts to \$5,000,000. The proportion of the United Kingdom's exports, tween protected and unprotected coun tries, in the markets of the world, has been reversed since 1850. Then it was 5 per cent to the protected countries and 44 portion was 42 per cent to the protected countries and 58 per cent to the others.

A valuable bit of information is given

on the quoted excess of imports over exsign of British trade decline. The blue hook says that while the excess yearly averages about \$800,000,000, the income reelvable from foreign investments, calcuof the British merchant fleet engaged in foreign fleet, calculated at \$450,000,000, "is probably more than sufficient to account for the average excess of imports."

"Americans have made large invest-ments in the United Kingdom of recent years and American repurchases of rail-road and other securities are admitted to have to some extent affected the fiscal figures, but 'they are not likely to form a serious factor."

Much attention is devoted to the tin plate industry and the effect of the Dingley and McKinley tariffs. The figure show that the total exports of tin from the United Kingdom has declined only little over \$5,000,000 since 1897, with a marked in crease in the quantity produced and in the value of a number of mills since 1898,

ROGUE RIVER VALLEY FARMERS PROSPER.

> Fruit That Made Oregon Famous Brings Good Prices and Has World-Wide Market.

John D. Olwell, a well-known apple grower of Central Point, Jackson County, has been in the city several days attend-ing to private business and Lewis and Clark matters. Mr. Olwell is a member of the lower house of the Legislature, and has charge of the horticultural department of the 1905 exposition. He is a young man and is one of the very fore-most figures in the apple industry in Ore-

"The apple market is strong and active fore going to the carnival. "There is a good market for all the apples Rogue River produces. At what prices? About \$1.50 a box for Jonathans, Newtowns and Spitzenbergs.
"I am informed that Hood River grow

ers are selling Spitzenbergs for \$2 a box and Newtowns for \$1.80. The disparity between Hood River and Rogue River is only apparent, however. The Hood River boxes are larger than ours and consequently are quoted higher in the market. But the fact is that prices at both places are on the same level, Our boxes are the California size.

"Rogue River orchards will export about 150 carloads of apples this season Our orchards of 160 acres will yield be tween 50 and 55 carloads. Rogue River is fast becoming one continuous apple orchard. The valley is 25 or 30 miles long and six or seven miles wide. Farmers have been setting out 1500 acres of trees every year for the past several seasons. "Apples are good money makers. This fact strongly impresses farmers up our way. The result is just as I have said apple acreage is growing fast. It won't be long before all parts of Rogue River valley, which are adapted to apple culture, will be supporting orchards.
"As I have already said, the fruit is

in strong demand. Three buyers from London have been with us, also two from New York and one from Chicago. Do I think prices will advance? I can't say as to that. Such speculation is too much of a gamble. But I am quite assured of this, prices will not be lower this year, Our crop we have not yet sold.
"The harvest of Newtowns and Spitzen-

bergs will begin next month. Just now we are gathering Jonathans. Colorado produces great quantities of Jonathans, out Oregon's ripen three weeks earlier and therefore are not much in competition The difference between Newtowns and Spitzenbergs, Mr. Olwell explained as

coming from the peerless quality of Ore-gon Spitzenbergs. These apples have a character all their own and are in a class all by themselves in the world's markets "They are produced," said Mr. Olwell, "only in Rogue River and Hood River valleys and nowhere else in the world, Oregon Newtowns are very fine fruit, unexcelled anywhere, but the same variety is grown in California and other places." Mr. Olwell said that Oregon farmers need have no fear of over supplying the vorld's markets with their world's markets with their apples. De-mand, he said, would grow with the out-

put and he could see no limit to it. "Oregon apples," he remarked, "have fine reputation in the world's trade. That reputation has been won by Rogue and

"Some time ago a commission merchant of Portland in a newspaper in-terview stated that the apple industry is on the decline from codlin moth. Now I want to say that that man knew neither the business of growing apples nor the business of selling them. He must have got his apples somewhere in Willamette Valley where the codlin moth is allowed complete domination by many farmers, Only shiftlessness gives way to codlin moth. Up our way we don't tolerate the pest. A visitor in this State who has heard the fame of Oregon apples and who sees the pest-ridden trees of the Willamette Valley can't understand how

the fine apples are produced. "Growers should not forget to save "Growers should not forget to save samples of their fine apples for the St. Louis Exposition next year. I find them prone to neglect this duty. I call it a duty because Oregon should certainly be represented by the very best apples that grow from its soil. If the fruit is put away in storage this Fall it will be in good shape for exhibit next Spring. Yes, you'll find that we have put save a good you'll find that we have put away a good display of apples, the finest on earth, worthy in every respect of the name and

WITH STARS FOR GUIDES. A Device by Which a Ship's Location

at Sea May Be Taken Instantly, The stars have always been the guideposts of the sea, but only recently has a device been invented by which they are accurately identified. In an overcast sky they will appear for a moment and then lose themselves behind a cloud. The mariner must by guess or by some diagram of his own work out his location from them. The new invention consists of a star map over which swings a transparent scale, and it revolves from the point located on the map as the North Pole. On this scale are engraved the circles of alittude and the lines of bearing. From this map, by a slight calculation, and by revolving the transparent scale until it is opposite certain figures indicated on the map, the ship's location can be taken in-The stars have always been the guidemap, the ship's location can be taken instantly. The name of this particular star is obtained easily by reference to the nautical almanac by a guide on the chart. This seemingly simple device is already in use on the American line and the Red Star line of steamers, and every new test reports success. It is the result of many years' study and hard labor on the part of Dr. Gesinger, whose idea it is. Even after the working model had been made and found satisfactory a difficulty arose. It seemed impossible to duplicate by any mechanical means the transparent indicator. No engraver could be found who was willing to undertake the work of reproducing exactly the fine lines and fig-ures on this scale, the use of which deentirely on accuracy. The inventor immediately went at the task of planning a machine which would make the desired lines, and after infinite labor he constructed a mechanical device which his ingenious original model. This new invention is likely to be an added prevent of accidents and delays in ocean

Any woman ought to know that a man impulsive to the verge of temporary in-sanity is unsafe. It is absurd to suppose that such a creature could make a hus-band worthy of the name. No women, no matter how much she likes attention, is under the necessity of imperiling her life in order to enjoy the sensation of receiving a proposition of marriage from a man who puts the alternative of acceptance or death before her.

The proper course to pursue is to hand the crazy suitor over to an officer of the law before it is foo late.

SS THE BEST TONIC

every requirement of the system when in a debilitated, run down condition. It contains no strong minerals or drugs, but is a pleasant vegetable preparation. You can find no better remedy for toning up the nerves and bringing refreshing, restful sleep when

promptly in cases of chronic dyspepsia, indigestion and all stomach troubles, and does away with the uncomfortable fullness, nausea, shortness of breath,

drowsiness and dizziness that so often come after eating. S. S. S. is not only the best tonic but possesses alterative or purifying properties, and if there is any taint, humor or poison in the blood it searches it out, and removes it. Many times a low state of health is due to a bad condition of the blood and can only be remedied by a blood purifier

If you suffer from debility, insomnia, nervousness, loss of appetite, bad digestion, or any of the symptoms of a disordered blood, nothing will so soon put your blood in good condition, invigorate and tone up the system as S. S. S.
