Portland Day a Record-Breaker.

CRANDSTAND IS JAMMED

Throngs Line Rail on Either Side of Race-Track.

EXHIBITS ATTRACT BIG CROWDS

Judging of Livestock Witnessed From New Reviewing-Stand-First Day's Sale of Fine Stock by Auction Attracts Buyers,

SALEM, Or., Sept. 17 .- (Special.) -- Portland day at the State Fair was the banner day of the week, and probably a recordbreaker in the history of the institution, so far as attendance is concerned. The attendance is estimated at fully 20,000. The grandstand at Lone Oak track was packed to the entrance steps all afternoon, and several thousand stood on the ground outside and inside the racetrack fence. At the same time the pavillon was filled and every department had its throng of visitors.

The crowd was large, and there was more or less jostling, but every one was good-natured and the day was most enjoyably spent. The weather was ideal, as It has been every day and promises to be the rest of the week. The principal events, aside from the racing, was the judging of livestock and the auction sale.

The people of Portland demonstrated their loyalty to the State Fair by filling three special trains and seven additional coaches on the regular overland. Among the visitors at the fair today were United States Senator C. W. Fulton, of Astoria, and Obadiah Everett Oldway, of Hoaxville, both well-known occasional correspondents of The Oregonian, Senator Fulton enjoyed the day immensely, and pronounced the fair a great success and a valuable aid to the development of the

Obadiah was in his pessimistic frame of mind, as usual, and does not approve of these new-fangled notions in fairs. He wouldn't have come but for Hannah : the children, and threatens to set fo his views of fairs in The Oregonian.

Premium awards have been made in the Dalry Department of the State Fair follows, the figures showing the scotting by each article entered in the contract.

Creamery butter-Commercial Cream Salem, 944; Golden Crown Creame Banks, Washington County, 534; Wh Clover Creamery Company, Portland, Silverton Creamery, Silverton, Silverton Creamer, Lyons Creamery, 92.

Cheese White Clover Creamery Co pany, Portland, 54%; Red Clover Crea-ery Company, Tillamook, 52%; Log Cheese Manufacturing Company, Clar amas County, 51; Salem Cheese Factor

The auction sales of livestock began day. Horsese were offered first, but I ding was slow and unsatisfactory, so meet the more general demand cattle w-put up. Charles E. Ladd's Shorthe helfer, Violet Queen, calved in Dec 1901, sired by Topsman, was sold to G. Vinston at \$300.

John L. Smith was highest bidder Lizzie McIntyre, 3-year-old Shortho brought Mr. Ladd \$150, W. O. Minor be highest bidder.

Roan Blossom, also of the Ladd herd. was sold when the hammer fell after N H. Bateman's bid of \$175.

J. W. Townley took Miss Campbell, 3-year-old Shorthorn, at \$145. J. A. Julien wanted Golden Athelstone 3-year-old roan Shorthorn, but he had to pay \$230 to shut out competitors in the bldding. Mr. Julien also bought Princ Alexandria, 3-year-old, at \$175; Cora III, 18 months old, at \$145, and Rosebud, 3-

year-old, at \$235, all from the Ladd herd. C. B. Wade paid \$160 for Godoy's Lassie, I years old, but another 7-year-old brought \$399, that sum being offered by N. H. Bateman for Jubilee Queen. Bateman also took Royal's Molile at \$165, 3 years old, and Lillie McIntyre, yearling, at \$60. W. O. Minor paid \$175 for Marguerite, 4-year-old Shorthorn.

The sales of horses were: Grande Ronde, a black stallion, owned by William McMullen, 2 years old, bought by S. F. Williams at \$300.

Agarine, brown filly, 3 years old, rec-ord of 2:14 in high sulky, bought from Lowe & Grigsby by S. H. Grigsby at \$130.

Professor A. B. Leckenby, in charge of the branch experiment station at Union, received the delayed Union County exhibit last evening and placed it in posi-tion today. Professor Leckenby, or "Farmer" Leckenby, as he prefers to be called, has brought some vegetables and fruits of rare quality and has a fine exhibit, though not extensive in quantity or variety. It is in the grasses shown that the chief value of the exhibit consists, and the purpose of the collection of grasses is to throw some light upon the solution of a problem that is growing more important each year as the area of free range decreases and the number of grazing cattle and sheep increases.

A sample of "Oregon Evergreen" grass, an entirely new variety, presents some-thing that Professor Leckenby thinks will be of great value to the region east of the Cascades, and perhaps to the western country. The grass was grig-inated by Leckenby at Walla Walla. Its particular merit is in its vigor and its suitability to a heavy soil. It stands the Wisters well and rushes a residence in the suitability to a heavy soil. Winters well and makes/a rapid growth in moist, cool weather. The samples show a growth of three feet or more, and the graes will make two crops in one It gives a heavier yield per year

"Oregon Brome," a grass which was originated from grass found growing wild in the streets of Portland, and which has been developed in the Walla Walla country. It is not a success in Western Oregon, but is promising good results east of the mountains. It is a rapid, early

grower and gets ahead of the weeds.
Professor Leckenby has on display some ecimens of Turkish alfalfa, derived from seed procured in Russian Turkestan. The roots of this variety are branching, while the more common varieties send a single root straight down deep into the soil. The Turkish alfalfa is more adapted to moist climates. What can be ac-complished by adapting a vegetable to the climate to which it is changed is shown in a very practical manner by some exhibits made by Professor Leckenby. He has some Turkish alfalfa grown from seed brought from Turkestan, and other Turkish alfalfa grown from seed taken after the plant had been acclimated. The first sample is of thin growth and not

wer two and a half feet tall. The latter s of dense growth and fully six feet tall, soth samples were produced under ex-celly the same conditions. actly the same conditions.

Similar results are shown regarding

some Russian Brome grass, the samples heing produced from nowly imported seed, seed of the third and seed of the fifth generation in this country. The lat-ter two samples show a wonderful im-provement over the grass grown from the imported zeed.

One other exhibit of grass that attracts wide attention is a large bunch of "Buffalo Grass" that grows on dry, sikall soil. It does not grow well from seed, but is started by transplanting sods. The grass, when once started, sprends by taking root from joints which touch the ground. It spreads rapidly and makes a good feed for sheep. It is not easily killed out, either by weather or over-feeding. It makes feed for sheep all

A very worthy exhibition of grasses has been made at the fair by three children of Jasper Wilkins, of Coburg. Althea Wilkins, aged 14. prepared a long line of grasses; Grace Wilkins, aged 10, collected clovers and alfalfa, and Mitchell Wilkins, aged 12, has a display of both grasses and grain. Mitchell Wilkins also has on ex-hibition a sled made without nalls or other metal and very solfdly constructed.

WASHINGTON TAXES INCREASED. Over \$100,000 More Than Last Year-Levy In 7.6 Mills.

OLYMPIA, Wash., Sept. 17.—(Special.)— The State Board of Equalization has completed its work. The state levy was this year fixed at a total of 7.6 mills, 5 mills of which is levied for school tax, the school levy being fixed by law. The total rate is the same as fixed last year.

This rate of taxation will bring to the state a total of \$692,471 for the general fund, \$1,384,945 for the school fund, and \$27,700 for the military fund, making a grand total of \$2,365,16

grand total of \$2,165,116. grand total of \$2,165,116.

As compared with the amount of taxes raised last year, the general fund will receive an increase of \$118,404, the school find an increase of \$80,344, the military fund a decrease of \$84,489, while the levy as made for the interest fund last year is entirely cut out on the ground that there are sufficient funds available for the purpose without a new levy this year. The total increase in the amount of state taxes

pose without a new levy this year. The total increase in the amount of state taxes to be raised is \$121,970 over the year 1902. For the purpose of raising this amount of taxes the board has equalized the dif-ferent classes of property in the state, as

Lands, including town and city lots, exclusive of improvements.

Improvements on land, town and city lots. 54,450,312 17,839,257 ... \$276,988,569 Total This total is less by \$5,383,372 than the

total valuations returned by the County Boards, and is an increase of \$16,048,421 over the state valuations fixed last year. The schedules of the board show an in-crease in the railroad mileage of the state of 157 miles 2152 feet over last year, and an increase in valuation of \$1,450,957. \
The following is the schedule prepared by the board showing the total amount of state taxes each county will be required to pay under the new levy and the amount

the counties will pay to each fund:

EX-CONVICT TAKEN FROM TRAIN. Suspected of Taking Part in the

Saloon Hold-Up at Arlington. THE DALLES, Or., Sept. 17.—(Special.)— John Green, who has just been released from serving a term in the Washington state penitentiary for murder, was taken from a brakebeam of the westbound train today and held pending the arrival of the authorities from Arlington. He is supposed to be one of the men who held up the saloon at that place early this morn

On being searched he was found to be armed and to have about \$45 in cash.

VANCOUVER, Wash., Sept. 17.

-(Special.)-G. H. Steward, who died September 10, was born in

Fountain County, Indiana, March

1, 1829. In company with Cap-tain Robert M. Steward and a

company of pioneers, he came

across the plains in 1850, landing

at The Dalles in August of that

year. He located at La Fayette,

Yamhili County, September, 1850.

In 1853 Mr. Steward was chosen

clerk of the United States terri-

torial courts and served four

years. From 1855 to 1857 he was

County Auditor of Yamhill Coun-

ty. In May, 1861, he was admit-

ted to the bar. Later he was ad-

mitted to practice before the Supreme Court. In 1858 he represented Yambill,

Tillamook and Clatsop Counties in the Legislature, and was chosen Quartermuster-General of Oregon by that body. In 1839 he

was elected first County Judge of

Yamhili County, and served one term. In 1868, he removed to

Vancouver, where he resided

until his death. In 1869 he was

admitted to practice law in Washington Territory. In the

ame year he was elected to the

BUILT FIRE ON CRAVE

Attempt to Conceal Body of S. P. Donkel.

MURDER DONE WITH A PISTOL

Son Discovers Buried Under Ashes Remains of His Father Whom He Had Left a Few Days Before,

PRINEVILLE, Or., Sept. 17,—(Special.)— The Sheriff, accompanied by the District Attorney and County Doctor, has returned from the scena of the murder of S. P. Donkel at the Pellton place on the Des-chutes River. The Coroner's jury uncov-ered the body from the grave dug by the murderers about three feet deep and brought the body to the surface.

On examination it was found Donkel had been shot in the head from behind the left ear, the bullet from a pistol used ranged a little down and to the front near the left eye. After further investigation and in questioning all the witnesses pres-ent the jury found Donkei came to his death by a pistol shot in the head made by some person or persons at present unknown.

Close examination around the grave showed quite a large fire had been built over the grave. The bed of the dead man's son was also found to be in the fire, his money was gone but his watch was on his person. Big Meadows is 70 miles southwest of

here. Mystery surrounds the case. From the meagre details now obtainable, Donkel and his son were camped on the banks of the Deschutes Elver and were en-gaged in putting up hay on the James Pelton ranch. The son left ten days ago on a cattle roun-up and when he returned Monday learned that his father had dis-appeared. Suspecting foul play he started a search but no trace of the missing man could be found for some time.

Finally the son found where the earth had apparently been disturbed and a fire built over the mound to divert attention. Digging down several feet at this point a boot was uncovered and it was found to be on the body of the missing man. The son at once rode to Prineville to notify the Coroner and Sheriff before removing the body from the ground. The officers left at once accompanied by the District Attorney and they will make a thorough investigation of the case before

TIBURON CREW CALLED OUT.

General Strike Started on the California Northwestern Railway. SAN FRANCISCO, Sept. 17.—The Bul-etin says today: A general strike of the employes of the California Northwestern Railway was inaugurated by the calling out of the crew of the steamer Tiburon on its arrival at Tiburon at 9:30 o'clock. Simultaneously the employes of the ships at that point ceased work with the freight-handlers and office men employed freight-handlers and office men employed by that road in the city. Some 300 or 400 men are involved. The immediate cause of the strike was the discharge of Night Watchman A. D. McDonaid by Master Mechanic Brassill on Saturday last be-cause, it is alleged by the strikers, of his membership in the United Brotherhood of Railway Employes.

President Foster, of the California Northwestern denies that the strike is a serious one. In a statement to the Assoclated Press, Mr. Foster says that the number of strikers does not exceed 140 men, and includes but few of the skilled men, and includes but few of the skilled employes of the road, the body of strikers being composed of railroad laborers and the less skilled of the company's employes. Mr. Foster states that none of the conductors, engineers or firemen have gone out, and that while some annoyance may be caused by the strikers, the traffic of the road will not be interrupted.

Men, and includes but few of the skilled of the skilled of the strikers and was found to run \$120 a ton.

D. B. Eldredge, the manager, who has his headquarters here, had also brought some of the porphyry out. He panned some of the porphyry out. He panned some of the identity.

Curry was taking a drink at the bar when the man who gave the information to the police afterwards came in. Recognizing Curry, he ran out and sought a friendly some of the skilled of the conductors, engineers or firemen have gone out, and that while some annoyance may be caused by the strikers, the foot wall of each ledge, the dikes.

YUKON CREEKS RISING.

Gold Output Will Be Increased-Large Hydraulic Plant Started, VANCOUVER, B. C., Sept. 17.-A special dispatch from Dawson to the Prov-

ince says: All creeks are rising and there is an outlook of an increase in the output by reason of heavy rains which have been

falling for the last three days.

E. E. Andrews yesterday started the plant for the Pacific Mining Company, the biggest hydraulic plant in the Yukon, and stated to be the largest plant in the world. A single casting on one of the pumps weighs 13 tons. This pump will throw about 5000 gallons of water per minute. The plant is most complete here and works perfectly. The cost is about \$300,000. The ground to be washed is sufficient to last about eight years, the plant working to its full capacity,

FISHING ON THE UPPER RIVER. Fine Quality of Salmon Being Taken

in Seines. THE DALLES, Or., Sept. 17.—(Special.)—
The Fall salmon fishing season opened
September II, and during the first week
the run of salmon was exceptional for
this season. The fishing is done with
seines, which is somewhat of a departure
for this part of the river. Heretofore all
fishing was done with the wheels or next fishing was done with the wheels or nets. The cannery above this city is canning from 25 to 28 tons per 24 hours and is working to its fullest capacity. That the salmon is of fine quality is shown by the fact that much of it is being shipped from Celllo to New York and other extreme Eastern points.

Men engaged in the salmon fishing industry are of the belief that the fine season is due to the propagation at the fish hatcheries during the past few years.

NORWEGIAN-DANISH CONFERENCE. Officers Elected for Ensuing Year Include Portland Men.

TACOMA, Sept. 17.—All of the Pacific Coast States, together with Idaho and Montana, are represented at the ninth annual Norwegian-Danish Methodist Episco-pal Conference, which opened today in Tacoma, Bishop Hamilton, of San Francisco, presiding. The following officers were elected for the ensuing year: Secretary, F. A. Scarvic, of Astoria, Or.: assistant secretary, August Peterson, of Seattle: statistical secretary, P. M. Melby, of San Francisco; assistant, O. O. Tweede, of Portland: treasurer, Carl Erickson, of Everett, Wash.; assistant, P. E. Peterson of Los Angeles.

Baby Badly Scalded,

HOQUIAM, Wash, Sept. 17.—(Special.)

The baby gift of Mrs. C. H. Rhodes was terribly scalded this morning, just how seriously is not yet known, Mrs. Rhodes had a can of boiling water on the stove, which by some means was overturned on

the child. Part of the flesh came off with

Southern Methodist Conference.

ing to Seattle where his father now is.

Is an ordeal which all women approach with indescribable fear, for nothing compares with the pain and horror of child-birth. The thought

of the suffering and danger in store for her, robs the expectant mother of all pleasant anticipations of the coming event, and casts over her a shadow of gloom which cannot be shaken off. Thousands of women have found that the use of Mother's Friend during pregnancy robs confinement of all pain and danger, and insures safety to life of mother and child. This scientific liniment is a god-send to all women at the time of their most critical trial. Not only does Mother's Friend carry women safely through the perils of child-birth, but its use gently prepares the system for the coming event, prevents "morning sickness," and other dis-

comforts of this period. Sold by all druggists at

\$1.00 per bottle. Book containing valuable information free. The Bradfield Regulator Co., Atlanta, Go.
