Biddy Bishop denied there is anything in the story originating in Portland that Mulvey, of Salt Lake, was responsible for the uncertainty which has overhung the arrangements for the past few days. He affirms that Hererra suffered a slight in-jury in boxing with his sparring partner a few days ago, and it was at first feared it might make him trouble. It was then planned to substitute Rufe Turner for Herrera, but that project fell through because satisfactory terms could not be made with Turner's manager. By this time it was learned that Herrera was not seriously injured, and in consequence the old match was rearranged with a slight change of date.

have a chance to lay a set of tracks costing about \$55,000 for a new traveling crane oon to be purchased by the Government at a cost of \$40,000. Instead of letting the work out to contractors, Civil Engineer Charles W. Parks, who has charge of the improvements, has decided to have it done by his own men. In addition to laying the rails, Navy Yard employes will also pave the space between the tracks with vitrified brick. This job will amount to several thousand dollars for labor alone, and is in addition to the appro-priation for the railway. The total distance to be covered will be almost twothirds of a mile. The ties are to be set on solid concrete foundations, and it is a notable fact that the rails will be 20 feet apart, or several times the standard gauge for steam railroads. The need for this extreme width is on account of the great weight of the crane itself and the immense loads which it is intended to

Rheumatism

Most people have an idea that rheumatism is contracted like a cold, that the damp, chilly air penetrates the muscles and joints and causes the terrible aches and pains, or that it is something like a skin disease to be rubbed away with liniment or drawn out with plasters; but Rhuematism originates in the blood and is caused by Urea, or Uric Acid, an irritating, corroding poison that settles in mus-

cles, joints and nerves, producing inflammation and soreness and the sharp, cutting pains peculiar to this distressing disease.

Exposure to bad weather or sudden chilling of the body will hasten an attack of Rheumatism after the blood and system are in the right condition for it to develop, but have nothing to do with the real true causes of Rheumatism, which are internal and not external.

Liniments, plasters and rubbing will sometimes reduce the inflammation and swelling and ease the pain for a time, but fail to relieve permanently because they do not reach the seat of the trouble. S. S. S. cures Rheumatism because it attacks it in the blood of the trouble.

Bowling Green, Ky.

About a year ago I was attacked by acute rheumatism in my shoulders, arms and legs below the knee. I could not raise my arm to comb my hair. Doctors prescribed for me for over two months without giving me any relief. I saw S. S. S. advertised to mother that I was glad I had at last found some relief. I continued its use and am entirely well. I will always feel deeply interested in the success of S. S. S. since it did me so much good.
