

TURKEYS ARE HIGH

Fancy Stock Is in Strong Demand at Good Prices.

MARKET MAY NOT GO HIGHER

Forty Thousand Pounds Arrived by Express in Past Two Days—Heavy Receipts Are Expected Today—Local Produce Quotations.

All interest on front street yesterday centered in turkey receipts. Receipts were heavy, but not up to expectations, and as a result the market for dressed turkeys was firm all at 22 1/2 cents. What today and tomorrow will bring forth is an open question. It is not believed that many turkeys will come in at the same time. It is doubtful whether the price will advance further, as retailers are adverse to high prices. It is estimated that 40,000 pounds of dressed turkeys arrived Sunday and yesterday. Today's receipts are expected to be much heavier, and the price will depend on the quantity received. The high prices now ruling are due largely to the competition in the country. San Francisco and Puget Sound buyers have secured the Valley and Southern Oregon, paying 20 cents for all that was offered. While 22 1/2 cents was quoted in the local market yesterday, that price was only for the best stock. Many of the offerings sold at 20 cents a bit. Live turkeys were not numerous and were only in fair demand at 18 cents. No chickens came in, causing that line to strengthen somewhat. Quite a few dressed geese were received, which readily brought 12 cents. Live geese were quiet at the old price.

DOUGLAS COUNTY SHIPMENTS

Nineteen Thousand Turkeys Sent to Outside Markets. ROSEBURG, Nov. 23.—(Special.)—Turkey shipments from Douglas County for the Thanksgiving market closed last night and aggregated about 19,000 birds. Of this number 10,000 were shipped from Oakland, over 8,000 from Roseburg and the remainder from Drain, Tualuma and other points. The fowls were of unusually fine quality this year, and the growers realized 15 cents per pound, less an average price of almost \$2 per head. Most of the shipments were to Seattle. Some thousands of chickens were also marketed at the same time, and the aggregate poultry shipments for the Thanksgiving trade will bring into the county not less than \$40,000 this season. Oakland has for a number of years been the chief poultry center of Oregon, and still holds the lead in any other shipping point. Roseburg's output this year is 50 per cent larger than a year ago, and the product for the county is 25 per cent in excess of any former season.

California Prune Market.

These are about cleaned up, having gone export. The steamer San Juan on November 14 carried 211,450 pounds for Germany and Holland. There are very few prunes in growers' hands outside of the Santa Clara Valley, where they are holding for higher prices. No doubt other outside prunes are all sold. Santa Clara growers will realize better prices. Packers look for some improvement in both demand and price after January 1. Oregon has a big crop this year and their prices are low, much lower than California.

Alum Mountain.

German papers report that an "alum mountain" exists in China, which is not only noted as a natural phenomenon, but is also a source of wealth for the people in its vicinity, as they annually take many tons of alum from it. The mountain is said to have 750 acres of alum at the base of not less than ten miles and is nearly 1000 feet high. The alum is quarried in immense blocks, is then heated in large ovens, and afterward dissolved in boiling water. From this liquid the alum crystallizes in layers of about half a foot in thickness, which are cut up in blocks of ten pounds each. The Chinese use it mainly for purifying water.

Samples of Standard Grains.

Nearly two tons of samples of the grain standards selected for Oregon, Washington and Idaho have been received at the local Chamber of Commerce for distribution. The samples will be used to supply the various officials and grain dealers in places where grain from the state mentioned is handled. The Chamber of Commerce will begin sending these samples out immediately and within a short time they will probably all be gone.
