

MORE TEA IS USED Consumption Increases Faster Than the Supply. CAUSES PRICES TO GO UP

The tea market on the other side is very firm, and the present tendency is toward a still further advance. High-grade teas are worth from 1c to 1 1/2c more than last year. Lower grades run about the same in price, but taking quality into consideration, they are dearer. The war has had no effect yet on the labor question, and, consequently, is not responsible for the strength of the market. It is a question of the demand, especially for the better grades, increasing faster than the supply. The weather has not been favorable for first-crop teas.

Ceylon teas, especially high grades of good quality, are hard to procure, as the Russians are buying every line that shows any profit whatever. There has been an actual advance of one cent since March 1st. A medium and low-grade Ceylon, and 2c and over on other grades, with appearance very inferior to the 1903 crop. The season in India and Ceylon opened about May 1, and from all advice received, prices will rule very firm. The United States and Canada received 12,000,000 pounds of Ceylon and Indian teas of all grades last year, as against 12,000,000 the year before, and the chances are that this year will show a still further increase in imports. Planters' records show the new acreage to be very small, as compared with past years, and consumption has now caught up pretty well with the supply. One source of supply in the Kangra Valley, has been discontinued from the black tea market, as the planters are turning all their tea into greens. The market for China teas so far has not opened, but from advice received from people at the spot, and because of the high rates of exchange ruling on silver, the chances are that these will be a little higher than they were last year. They are in hopes that the quality will be a little better even than last year. Planters of Java and the Straits of Malacca are attempting to invade the market with their product, but the leathery flavor of Java and the black leaf and strong liquor of Malacca apparently try to keep them at such low prices that planters are despairing of making a paying crop of them, so, if pepper and cinchona hold up to as high rates as they have in the past few years, the probabilities are that the planters will take out their tea and plant cinchona or cocoa, the country being peculiarly adapted to their cultivation, as the rainfall in the rainy season is very heavy.
